Joey,
I wonder if you could share some details about those two QSOs?
I need both of those - and 17m is one of my better bands.
Have you heard them more than once or was this just a great lucky day
for you?

Frank,

This was the first time I have heard either of them on 17 meters, its my
fav also,
I am there pretty much all the time unless I am sleeping.

the S Korean was prety strong Hong Kong was that special call and kinda
hard to copy both were about 600 PM,..... today.

I hope this helps.

11815. 12 meters in Norway

Yahoo group: DX-IS (2009)
Date: 2009-11-11 02:53:57 UTC
From: John Geiger
Topic: 11815 Message: 11815

I see that hams in Norway were just granted some additional frequencies, including a secondary allocation at 24.740 to 24.890. Now here is my question-will there be any DX there for them to work? Does anyone know of any other countries that have 12m allocations below 24.890?

73s John AA5JG

11816. TX3A on LotW

Yahoo group: DX-IS (2009)
Date: 2009-11-11 12:39:35 UTC
From: aburkefl
Topic: 11816 Message: 11816

Sometime during the night, the two-man team on Chesterfield Island uploaded their logs to Logbook of the World!

These guys are amazing.

Neither of them have much experience with RTTY, but they lugged along the necessary hardware and promised they would try. And try they have. The RTTY QSOs have apparently not yet been uploaded and apparently are not yet in the log search on their web site (www.tx3a.com), but everything else was uploaded.

They were on briefly yesterday on 17M SSB. Sometime around midnight UTC they said QRX for 5 minutes. That five minutes turned into well over an hour before I gave up. That was the first time I think they had been on SSB. I was concerned for their welfare - VK7XX was booming in on 17 around the same time - but the fact they uploaded logs indicated all was probably just fine.

They've been battling a lot of wind and unruly birds. They're using a lot of wire antennas and the wind and the birds keep taking the wire down.

A heck of a job in the middle of nowhere for just two guys!

Yes Art, I concur with your comments here, what an amazing job these two guys are doing in such adverse conditions and there is just two of them!

I was so surprised when they showed up on SSB and RTTY yesterday and on 20/17m!

So I guess they have responded to any criticism and added the LOTW confirmation to boot!

Not only that, they are there for two more weeks. So keep at 'em!

Good luck guys,

73, Lance - VK6DU

I could understand it, begrudgingly, if it was a full moon. But it isn't.
I also saw those spots. I don't believe a word of it.

I also heard CN34MV chased off 20M CW by a couple of Europeans who
terrorized his frequency and would not allow him to make any QSOs. There
was swearing and catcalls and it was very, very messy. And this was on CW.
CW of all modes!!! Where the hell are we going?

This kind of behaviour makes me very sad and embarrassed to be a ham radio
operator. More and more I see civility going down the drain -- not only on
the ham bands but on the highways and streets, in stores when I want to buy
something, people pushing their way into lines at the grocery store, etc.

And I do not write it off, as some do, because there's a lack of sunspots.
People aren't just frustrated, they're becoming monsters. Is it the water?

well,

I have my very own horror story to tell now, Thanks to the USPS.

I went this morning to the USPS office in Magnolia Ms. to exchange 1 IRC because it is about to expire. I was TOLD that they didnt have a clue what to do with one & that the USPS no longer carries them and they are NOW invalid.
the POSTMASTER then called MCcomb after I insisted,..... SAME thing !

then they CALLED JACKSON MISS ,..... the MAIN OFFICE and got the same thing ! I am just sitting shaking my Head,..... I told them all politely that they were wrong and needed to READ there own manuals. I then offered to go HOME and pull up the information on there WEB SITE,..... and bring it back to them.
they told me that they DO not handle IRC's.....

Ham radio is just a microcosm of the world. Ask yourself where the world is going. This behavior isn't peculiar to ham radio.

Kinda scary. Sometimes I wish it were 1959 again, even if it meant the lack of the technology we have now.

I believe people appreciate and value their amateur licenses less today than they did in the past. Won't go into reasons why (we probably all know why) but when you don't value something as much, you probably don't fear losing it as much either, or have respect for the hobby as a whole.

Zack,

its everywhere ! I wish I knew how to stop it !   it seems to me the population of this planet, is getting more ignorant as time goes by. I am at a loss to explain there behavior !

Ham radio is just a microcosm of the world. Ask yourself where the world is going. This behavior isn't peculiar to ham radio.

Kinda scary. Sometimes I wish it were 1959 again, even if it meant the lack of the technology we have now.

I could understand it, begrudgingly, if it was a full moon. But it isn't.
I also saw those spots. I don't believe a word of it.

I also heard CN34MV chased off 20M CW by a couple of Europeans who
terrorized his frequency and would not allow him to make any QSOs. There

was swearing and catcalls and it was very, very messy. And this was on CW. CW of all modes!!! Where the hell are we going?

This kind of behaviour makes me very sad and embarrassed to be a ham radio operator. More and more I see civility going down the drain -- not only on the ham bands but on the highways and streets, in stores when I want to buy something, people pushing their way into lines at the grocery store, etc.

And I do not write it off, as some do, because there's a lack of sunspots. People aren't just frustrated, they're becoming monsters. Is it the water?

Tim and ALL: regarding IRCs or issues

you dont like your service or getting the run-around from a Branch or
Station do the following. I did and I got action and follow-up.

You never tell a Postal Patron they cannot be helped !

http://www.usps.com/customerservice/welcome.htm

SPECIFICALLY CALL THE FOLLOWING NUMBER:Call 1-800-ASK-USPS
(1-800-275-8777)
M-F - 8:00am-8:30pm ET
Sat - 8:00am-6:00pm ET
Sun/Holidays - Closed

YES IT WORKS

your Postmaster or the Supervisor of the Branch / Station must call you back

ask for CA number to document the call

Anyone telling a customer to go to another Post Office for Service is wrong -

The District Office will follow-up

Sit back and do nothing if you like being treated like crap or CALL IN

There is one postal clerk in particular here in Urbana who knows all about IRC's - how to stamp and sell them, how to redeem them.

In fact, when I go there for stamps and I'm at her window she asks me if I want some IRC's today. Probably because I've purchased so many in the past from her. Maybe I'm just lucky. I hope she stays around a while.

well,

I have my very own horror story to tell now, Thanks to the USPS.

I went this morning to the USPS office in Magnolia Ms. to exchange 1 IRC because it is about to expire. I was TOLD that they didnt have a clue what to do with one & that the USPS no longer carries them and they are NOW invalid.
the POSTMASTER then called MCcomb after I insisted,..... SAME thing !

then they CALLED JACKSON MISS ,..... the MAIN OFFICE and got the same thing ! I am just sitting shaking my Head,..... I told them all politely that they were wrong and needed to READ there own manuals. I then offered to go HOME and pull up the information on there WEB SITE,..... and bring it back to them.
they told me that they DO not handle IRC's.....

&^%$ runs downhill ! is one of the criteria for becoming a plummer plus payday is on Friday and don't bite your fingernails!

My reasoning for going to the top is so they/he knows of the incompetency of one (or many) offices so possibly a memo can go out (yeah, wishful thinking).

My other solution as I've only used a very few IRC's in my limited DX experience is to have lotsa disposable income and send U$D's along with SAE's.

Glad you're getting it resolved
Rene

LMAO ! YES I like that and I think I shall do just that ! BUT I will give this Lady a chance to do what she says she can do then,..... Ill contact the Postmaster.

Its just another sign of the times, no one REALLY cares enough to actualy KNOW how to do there JOB anymore,..... they just want a Paycheck.

Tim and ALL: regarding IRCs or issues

you dont like your service or getting the run-around from a Branch or Station do the following. I did and I got action and follow-up.

You never tell a Postal Patron they cannot be helped !

http://www.usps.com/customerservice/welcome.htm

SPECIFICALLY CALL THE FOLLOWING NUMBER:Call 1-800-ASK-USPS
(1-800-275-8777)
M-F - 8:00am-8:30pm ET
Sat - 8:00am-6:00pm ET
Sun/Holidays - Closed

YES IT WORKS

your Postmaster or the Supervisor of the Branch / Station must call you back

ask for CA number to document the call

Anyone telling a customer to go to another Post Office for Service is wrong -

The District Office will follow-up

Sit back and do nothing if you like being treated like crap or CALL IN

11843. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-12 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11843

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 12 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 316 Issued at 2200Z on 12 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 11/2100Z
to 12/2100Z: Solar activity has been very low for the past 24 hours.
Region 1030 (N23W92) was classified as an Axx-alpha group with one
spot. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low on day one (13 November) and very low to low for day two and day
three (14-15 November). On day two, old Region 1029 is expected to
rotate back on the visible disk.
IIA. Geophysical Activity Summary 11/2100Z to 12/2100Z:
The geomagnetic filed has been at quiet levels for the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain at quiet levels for the next three days (13-15
November).
III. Event Probabilities 13 Nov-15 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 12 Nov 073
Predicted 13 Nov-15 Nov 073/074/075
90 Day Mean 12 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 11 Nov 000/001
Estimated Afr/Ap 12 Nov 001/001
Predicted Afr/Ap 13 Nov-15 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 13 Nov-15 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

SB DX ARL ARLD045
ARLD045 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. Alex, GM0DHZ will be here beginning November 16 for five weeks. He plans to operate using CW from the 3V8SS club station during the weekends. QSL via operator's instructions.

MADAGASCAR, 5R. Eric, F6ICX will be QRV as 5R8IC from St. Marie Island, IOTA AF-090, from November 17 to December 15. Activity will be on 80 to 10 meters. QSL to home call.

SAMOA, 5W. A group of operators are QRV as 5W0AP, 5W0CF, 5W0WL, 5W0IW and 5W0JC from Upolu, IOTA OC-097, until November 18. Activity is on 160 to 17 meters using CW, SSB, RTTY and PSK. QSL via operators' instructions.

GHANA, 9G. A group of operators are QRV as 9G5TT from Busua Beach in western Ghana until November 27. This includes activity as 9G5XX from Abokwa Island, IOTA AF-084. Activity is on 80 to 10 meters, with 20 meters only on Abokwa Island. QSL direct via I2YSB.

ANGOLA, D2. Paulo, CT1ITZ is QRV as D2CQ from Porto Amboimi until November 29. Activity is on 80 to 10 meters using SSB. QSL via CT1IUA.

COMORO ISLANDS, D6. Sam, F6AML, will be QRV as D68F from November 13 to 23. Activity will be on 160 to 10 meters using CW and SSB. QSL to home call.

SOUTH COOK ISLANDS, E5. Henrik, OZ6TL is QSL as E51TLA from Rarotonga, IOTA OC-013, until November 24. Activity is holiday style on the HF bands. Of late he has been active on 20 meters

using RTTY. QSL to home call.

CANARY ISLANDS, EA8. Members of the Teide DX Group will be QRV as EF8BFH on Tenerife Island, IOTA AF-004, from the Punta del Hidalgo Lighthouse, ARLHS CAI-035, on November 14 and 15 in celebration of the lighthouse's 15 years of operation. Activity will be on the HF bands, including 6 and 2 meters and 70 cm, using CW, SSB and various digital modes. QSL via EA8NQ.

MOLDOVA, ER. In celebration of 650 years since Moldova became an independent principality in 1359, special event stations ER650M and ER650MD are QRV until the end of November. QSL ER650M via ER1DA and ER650MD via ER4DX.

ITALY, I. Special event station II0TRM is active in commemoration of the 70th anniversary of the Morse Code receiving speed record of Theodore R. McElroy, W1JYN. QSL via bureau.

ANTARCTICA. Bill, K7MT will be QRV as KC4USV from McMurdo Base, IOTA AN-011, from November 15 to February 20. Activity is mainly on 20 meters using CW, SSB and PSK31. QSL via K1IED.

NETHERLANDS, PA. Special event station PC60TROLLEY will be QRV from November 17 to December 15 in celebration of the 60th anniversary of trolley buses in Arnhem. Activity will be on the HF bands using CW, SSB and digital modes. QSL via PA0FAW.

BRAZIL, PY. A group of operators are QRV as PW6C from Coroa Vermelha, IOTA SA-062, until November 16. QSL via K9AJ.

PALAU, T8. Jun, JJ1BMB is QRV as T88AA until November 22. Activity is on 80 to 10 meters using CW and SSB in his spare time. QSL to home call.

BRUNEI, V8. Hans, SM3TLG will be QRV as V88/home call from November 16 to 20. Activity will be on all HF bands using CW and SSB. QSL to home call.

BRITISH VIRGIN ISLANDS, VP2V. Gerd, DL7VOG will be QRV as VP2V/home call from Anegada Island, IOTA NA-023, from November 15 to December 2. Activity is on all bands using mostly CW and RTTY. QSL to home call.

FALKLAND ISLANDS. Members of the Uruguay DX Group will be QRV from Port Stanley from November 14 to 21. They will be active as VP8BUG using CW and digital modes and VP8BUH using SSB, respectively. Activity will be on all HF bands. QSL via EB7DX.

SOUTH GEORGIA ISLAND, VP8. Lars is QRV as VP8DIF until November 16. Lately he has been active on 30 meters using CW and RTTY. QSL via DJ9ZB.

VIET NAM, XV. Retu, OH4MDY and Henry, OH3JR are QRV as XV2RZ and XV2JR, respectively, until December 7. Activity is on all HF bands using CW, SSB and RTTY. QSL both calls direct via OH4MDY.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Iraq, YI9TM, current operation.

THIS WEEKEND ON THE RADIO. The Worked All Europe RTTY DX Contest, Japan International DX Phone Contest, NCCC Sprint, Bill Windle CW QSO Party, OK/OM DX CW Contest, North American Summits On The Air, Kentucky QSO Party and the CQ-WE Contest will certainly keep contesters busy this weekend. The Run for the Bacon QRP CW Contest is scheduled for November 16. Please see November QST, page 86, and the ARRL and WA7BNM contest web sites for details.

Paul, I just want to thank you for your personal efforts and influence with King Sol in finally having him kick butt and start the production line running for those SSNs.

Knowledgable ham radio operators can really get results!

I encourage you to keep up the great work and really push King Sol's production line to achieve SFIs in the mid 80s by July.

Be careful that you don't burn your fingers. Those SSs do get mildly warm.

11846. Re: my POST OFFICE & IRC's

Yahoo group: DX-IS (2009)
Date: 2009-11-13 01:28:10 UTC
From: wc5m
Topic: 11822 Message: 11846

You can get IRC's here, but you have to go to the big post office downtown. The Postmaster there keeps IRC's in stock for the 3 or 4 local hams that use them regularly. They have one clerk, a very nice oriental lady, who knows all about IRC's, including how to properly stamp them. The others don't have a clue and stare at you blankly when you ask for IRC's. It took a while to get them to keep IRC's in stock. You have to be persistant and polite. Once they understand there is a need for them they will help you out. They just don't want to order a bunch and get stuck with them.

well I am waiting to see what happens the local post master called me today to tell me that they NOW know how to redeem IRC's and it
wouldnt be a problem but he still says he refuses to order any. so I am taking a wait & see attitude.

Dear Friends,

the latest issue (October 2009) of the 425 ARI DX Magazine is now available for free download in .pdf format at www.425dxn.org/monthly the official web site of 425 Dx News.

It includes the weekly bulletins published in October, Qsl Managers and News from the Web.

Suggestions, advice, articles and photographs are welcome! Closing date for contributions is ten days prior to publication date. Please send your articles and pictures to iz3eba@...

Thank you for the attention, de

Nicola Baldresca, IZ3EBA

Be sure to follow up with Consumer Affairs if he refuses to order
them. That kind of ignorant arrogance really makes me see red!

11852. Re: UN in North Korea

Yahoo group: DX-IS (2009)
Date: 2009-11-13 12:43:54 UTC
From: aburkefl
Topic: 11820 Message: 11852

There were a couple of comments later on the cluster:

(1) "...no one has actually reported a P5 on the frequency..."
(2) "...all the spots seem to be coming from the same IP..."

Just to be on the safe side, I tuned into that frequency. The Maritime net was going full bore. Even if a P5 *were* on the air, someone from halfway around the world wasn't going to be heard in the western hemisphere. I think everyone in that net is generally S9+ a bunch.

11853. TX3A RTTY!

Yahoo group: DX-IS (2009)
Date: 2009-11-13 12:50:24 UTC
From: Brian Alsop
Topic: 11853 Message: 11853

These guys have been on 20M RTTY LP to the US in the late afternoon.
Loud in NC.

They claim to be novices at RTTY. I couldn't tell. They were running
them as fast as other DXpeditions.

Glad to get them for RTTY HR. QSL was received via LOTW within 36 hrs!

Get them while you can. Their site indicates that the food freezer on
their boat stopped working.

They're apparently fishing to have more food available. They seem to have freeze-dried stuff available for the trip back. If they had to rely on me to fish for them, the trip would be over!

Brave coupla guys!

As an update

My local office now has 100 IRCs in stock !!!!

Now with new ones from local office and buying from qsl manager have about 70 in stock
--

Again any Postal supervisor or Manager telling you he wont supply a publish item should be reported - thats the short of it.

No they probably dont like to keep things that dont sell quickly or slow in their inventory but they are the ONLY source to deliver mail in the US and send at a reasonable rate to international countries.

Enough calls to the UPS-HELP number and this is a track-able situation to be reported up the ranks ---

Tim and ALL: regarding IRCs or issues

you dont like your service or getting the run-around from a Branch or Station do the following. I did and I got action and follow-up.

You never tell a Postal Patron they cannot be helped !

http://www.usps. com/customerserv ice/welcome. htm

SPECIFICALLY CALL THE FOLLOWING NUMBER:Call 1-800-ASK-USPS

(1-800-275-8777)

M-F - 8:00am-8:30pm ET

Sat - 8:00am-6:00pm ET

Sun/Holidays - Closed

YES IT WORKS

your Postmaster or the Supervisor of the Branch / Station must call you back

ask for   CA number to document the call

Anyone telling a customer to go to another Post Office for Service is wrong -

The District Office will follow-up

Sit back and do nothing if you like being treated like crap or CALL IN

11858. ARLP046 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-11-13 15:06:27 UTC
From: jjreisert@alum.mit.edu
Topic: 7199 Message: 11858

SB PROP @ ARL $ARLP046
ARLP046 Propagation de K7RA

ZCZC AP46
QST de W1AW
Propagation Forecast Bulletin 46 ARLP046
>From Tad Cook, K7RA
Seattle, WA November 13, 2009
To all radio amateurs

SB PROP ARL ARLP046
ARLP046 Propagation de K7RA

Sunspot region 1029 disappeared after October 30, but not because it faded away. It was transiting over our Sun's western horizon on its trip around the back side. Six days after it was gone a new region 1030 appeared for several days, November 5-7. On November 8 region 1030 had faded away and seemed like other weak spots we've seen over the past couple of years, except they appeared for one day with a sunspot number of 11. Sunspot region 1030 ran for three days with sunspot numbers of 15, 16 and 11. But then on November 9 the sunspot region re-emerged, with sunspot numbers of 14, 13, 11 and 11 through November 12.

While 1030 is passing over the western limb, we can still see sunspot region 1029 transiting the far side of our local star, and now it is approaching the eastern horizon. A short time ago this observation would have been impossible, but with the STEREO mission (see http://stereo.gsfc.nasa.gov/) our total vision of the Sun now approaches 85%.

Old region 1029 appears as a bright area of magnetic disturbance, and we can't actually determine what the sunspot number or the total area of the region might be, but it still appears to have a large and robust magnetic signature.

The 45-day Air Force and NOAA Ap and flux forecast gives us some clue about the dates it may emerge into view, and when it is most directly facing Earth.

Predicted solar flux is 73 for November 13, 74 on November 14, 75 on November 15-21, and 80 for November 22-24. After that the forecast shows it declining to 75, 72 and 70. This suggests it might reach the most geoeffective position, that is, the position where it is near the Sun's central meridian relative to the Earth, around November 22-24.

Conditions have been good, with continued weak or missing solar wind, and very quiet geomagnetic indicators. As noted in previous weeks, a check of geomagnetic data at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt shows day after day with K index values at 0, which is as low as it can go. During past times and previous cycles, it was common to see a constant K index of 3, and A index of 12-15 for mid-latitudes. Note at the bottom of our bulletin that the average daily mid-latitude A index for the past week was less than 1!

That same NOAA and Air Force prediction shows a low planetary A index of only 5 for November 13-18, 8 on November 19-20, 6 on November 21, and back to 5 again for November 22 and onward. Geophysical Institute Prague for November 13-19 predicts quiet November 13-14, quiet to unsettled November 15, and quiet again November 16-19.

Bernie Mitchell, KD8KEO of Wayne, Michigan says he is a new amateur radio operator (about 9 months) and had good luck on 40 meters with the Nightwatch Net in the evening, but around the end of October after 0000 UTC he noted signals seemed weak.

He didn't say where the other stations are, but running some numbers through a propagation program -- such as W6ELprop -- shows quite a seasonal variation between the end of October and two months earlier, when using targets such as the center of the continental United States, or Atlanta, for example. But looking west, the propagation is better on 40 meters. Using California as a target, about 2000 miles away, propagation seems to be good day and night in August or October, whether we have sunspot activity or not.

Atlanta is only about 600 miles from Bernie, and 40 meters seems to need a longer path at this time of year, and also note that signals to the west have sunlight over the path much later in the day.

Willis Cooke, K5EWJ wrote in with a comment about backscatter. He writes, "I read with interest about the QSO between W5ZIT and AE5PW on 10/30/09."

He continues, "On 11/02/09 I found HL3ERJ at 5x7 on 17 meters SSB at 2311 UTC. I gave him a quick call in the pile and received a prompt answer with a 4x4 report. Many others across the western US were calling but he could not hear them. W5/VK2ACM came on and announced that he was in Louisiana and was the only other station to work Choi (HL3ERJ) while I was listening. A California station asked Clint (W5/VK2ACM) to QSY up and I followed. I found that Clint was 5x9 with my beam pointed toward Korea, but disappeared when I pointed it at about 17 degrees toward Shreveport (where Clint was), 229 miles to the North. After the California station finished, I called Clint and we talked for about 5 minutes before he disappeared during one of my short transmissions. An email to Clint confirmed that he had not moved his beam from the NW and I had dropped out suddenly."

He goes on to say, "This is what I think is an E layer Ion Cloud lying over the NW US and back scatter. W5ZIT with a fixed pattern antenna would not be able to detect his path. We see this fairly often on ten meters where it is often the only mode of propagation available. It is also present on lower frequencies, but is sometimes masked by F layer propagation so the only clues are shorter than normal propagation to nearby stations. Actually, I think it is not really short when the signal bounces off a cloud 1 or 2 thousand miles away to return to Earth 1 or 2 hundred miles away. Usually back scatter signals are not so strong, but sometimes they are."

Thanks, Willis!

Jon Jones, N0JK of Wichita, Kansas dropped a short line about 10 meters in the CQ Worldwide SSB DX Contest. On Saturday afternoon, October 24, HT2N in Nicaragua and several Brazilian stations were very loud. Using 10 watts on 10 meter SSB into a shortened mag-mount CB whip on the roof of his car, he worked HT2N and PY5KD around 2100 UTC while driving around and listening.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for November 5 through 11 were 15, 16, 11, 0, 14, 13, and 11 with a mean of 11.4. 10.7 cm flux was 70.5, 70.9, 70.6, 70.9, 72.1, 72.8, and 72.4 with a mean of 71.5. Estimated planetary A indices were 1, 0, 1, 6, 4, 1 and 1 with a mean of 2. Estimated mid-latitude A indices were 0, 0, 0, 4, 2, 0 and 0 with a mean of 0.86.

14 November 2009 A.R.I. DX Bulletin
No 967
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3W - Retu, OH4MDY and Henry, OH3JR will be active from Vietnam as XV2RZ and XV2JR respectively until 7 December. They operate CW, SSB and RTTY on the HF bands. QSL for both calls via OH4MDY (direct only). [TNX The Daily DX]
5R - Eric, F6ICX will operate only CW on 80-10 metres as 5R8IC from Sainte-Marie Island (AF-090), Madagascar from 17 November to 14 December. QSL via home call, bureau preferred. [TNX F6GCP]
6W - Tom, GM4FDM and Ronald, PA3EWP will be active as 6W/GM4FDM and 6W/PA3EWP from Senegal from 26 January to 9 February. They plan to concentrate on the low bands and RTTY, with an emphasis on North America and Japan. QSL 6W/GM4FDM via home call, QSL 6W/PA3EWP via PA7FM. Tom will upload his logs on LoTW, during the operation or as soon as he arrives home. [TNX http://dx-hamspirit.com/]
T7 - Aurelio, IZ0EGM will operate SSB and CW as T70A during the ARRL 10 Meter Contest (12-13 December) from the radio club of San Marino's IARU Society. QSL information on qrz.com [TNX IZ0EGM]
8P - Brian, ND3F will be active as 8P9SS from Barbados (NA-021) from 22 November to 2 December, including an entry in the CQ WW DX CW Contest. QSL via home call and LoTW. [TNX NG3K]
A4 - Celebrating Oman's Nationald Day, the Royal Omani Amateur Radio Society will be running special event station A43ND until 25 November on various bands and modes. QSL via A47RS. [TNX A41MA]
C9 - Igor, UY5LW will be active as C91LW from Maputo, Mozambique from 13 November to 3 December. He will operate CW with some RTTY and PSK on 80-12 metres, including an entry in the CQ WW DX CW Contest. Activity on 160 metres will depend on local situation. QSL direct to UY5LW. Logsearch and further information can be found at http://www.c91lw.dxer.com.ua [TNX UR4LRQ]
CE - Alain, F6BFH and Marco, CE6TBN [425DXN 966] plan to be active from IOTA group SA-085 on 15 November. Look for activity on 20, 17 and 15 metres CW and SSB. [TNX F5NQL]
CE0Y - Roberto, YV5IAL will be active as CE0/YV5IAL from Easter Island (SA-001) on 8-11 January. This will be a QRP, portable, holiday

style operation, with PSK31 activity on 14070.15 kHz from 22 to 1 UTC, and occasionally on 40, 30 and 15 metres. QSL via home call. [TNX YV5GRB]
CT9 - DJ2YA, DJ6QT, DL1CW, DL5AXX and SV1RP will be active as CT9/ homecall from Madeira (AF-014) from 24 November to 3 December, including a M/2 entry in the CQ WW DX CW Contest as CR3L (QSL via DJ6QT). [TNX SV1RP]
D2 - D2CQ is the newly issued callsign that Paulo, CT1ITZ (ex D2PJB) [425DXN 966] will be using from Angola until 29 November. QSL via CT1IUA. [TNX http://dx-hamspirit.com/]
DU - Jouko, DU/OH1RX will be active from Manila during the LZ DX Contest (http://lzdx.bfra.org/) on 21-22 November. QSL via home call, direct or bureau (preferred). [TNX OH1RX]
EA8 - The Teide DX Group will be active as EF8BFH from Punta del Hidalgo Lighthouse on Tenerife, Canary Islands on 14-15 November. They will be active on the HF bands, 6 and 2 metres and on 70 cm, using SSB, CW and digital modes. QSL via EA8NQ, direct o via bureau. [TNX EA8NQ]
F - Special station TM5TUR will be promoting amateur radio during the Science Week at the Turgot Secondary School in Limoges on 16-20 November. QSL via F6KTW. [TNX F8REF]
FG - Serge, F6AUS will be active as FG/F6AUS and TO4D (in contest) from La Desirade, Guadeloupe (NA-102) until March. [TNX F6AUS]
FK - JA1NLX will be active as FK/JA1NLX from Ouvea Island (OC-033), New Caledonia on 19-23 November. He plans to operate CW and RTTY on 40-10 metres, and possibily on 80m as well, with 100 watts and a vertical antenna. QSL via JA1NLX direct, bureau or LoTW. Further information and log search at http://www.ne.jp/asahi/ja1nlx/ham/fk_2009.html [TNX NG3K]
HB9 - Special event station 4U1AIDS will be active from UNAIDS (the Joint United Nations Programme on HIV/AIDS) headquarters in Geneva, Switzerland on 1-7 December to encourage amateur radio operators to participate in the World AIDS Day. Started on 1 December 1988, the aim of World AIDS Day is to raise money, increase awareness, fight prejudice and improve education. QSL to Andrey Fedorov, UNAIDS, 20 Avenue Appia, CH-1211 Geneva 27, Switzerland. Further information on this event can be found at [http://www.DX-World.com/4u1aids]
HL - DS2AGH and others will participate in the CQ WW DX CW Contest as 6M0HZ/2 from Kanghwa Island (AS-105). QSL via DS2AGH. [TNX http://dx-hamspirit.com/]
I - COTA (Carabinieri on the Air) members will be active as IQ6CC on 20-22 November to celebrate Saint Mary "Virgo Fidelis", patron saint of the Carabinieri, the Italian military police. QSL via IW6DSM, direct or bureau. [TNX I6YOT]
I - Tony/IK1QBT, Claudio/I1NVU and Emilio/IZ1GAR will participate in the CQ WW DX CW Contest as IG9X (SOSB 15m), IG9U (SOSB 80m) and IG9W (SOSB 40m) respectively. Outside the contest, between 22 November to 1 December, they will operate as IG9/homecall with a focus on the low bands. QSL via home calls. [TNX IK1QBT]

JA - Takeshi, JI3DST will be active as either JS6RRR and JI3DST/JS6 from the Miyako Islands (AS-079) on 21-30 November, including activity during the CQ WW DX CW Contest. His main QTH will be on Miyako-jima (JIIA AS-079-005), but he also plans to go and operate from Ikema-jima (AS-079-001) and Kurima-jima (AS-079-003). QSL via bureau only. [TNX JI3DST]
P2 - Bad weather has forced Hans, SM6CVX (P29VCX) to cancel his planned operation from Hastings Island (OC-117). He is now active from Normandby Island (OC-116) until 01.00 UTC on 14 November. The trip to Loloata (OC-240) is still on his agenda. QSL via SM6CVX. [TNX IZ1CRR]
PA - The only trolleybus system in operation in the Netherlands is in the city of Arnhem, which adopted it sixty years ago. Special callsign PC60TROLLEY will be aired from 17 November to 15 December. QSL via PA0FAW. [TNX F5NQL]
PA - Special event callsign PD450OBL will be in use from 24 November through 20 December to celebrate the 450th anniversary of the Dutch village of Oud-Beijerland. QSL via PD0LDC. [TNX PD0LDC]
PJ4 - Hennie, PE1MAE will be active as PJ4/PE1MAE from Bonaire (SA-006) until 1 December. He operates SSB mainly on 80 and 40 metres. QSL via PA2NJC. [TNX PA2NJC]
T8 - Jun, JJ1BMB will be active as T88AA from Palau until 22 November. He operates SSB only on 80-10 metres. QSL via home call, direct or bureau. [TNX JE1LFX]
TT - Jovica, E78A has been in Chad since 25 September, and has had his TT8JT renewed. He will be active from Abeche during the next three or four weeks. He operates CW during his spare time, as he is working for the United Nations High Commissioner for Refugees. Activity during the CQ WW DX CW Contest is not confirmed at this moment. QSL via E73Y, direct or bureau. [TNX E73Y]
V3 - Alex, KU1CW will be active as V31CW from Belize from 23 November to 2 December. He will operate CW only, including an entry in the CQ WW DX CW Contest. His wife Natasha will be active as V31YL, SSB only prior and after the contest. QSL via LoTW (preferred) or via KU1CW. [TNX KU1CW]
V8 - Hans, SM3TLG will be active as V88/SM3TLG from Brunei (OC-088) on 15-19 November. QSL via home call, direct or bureau. [TNX VA3RJ]
VE - Mike, W7ASF will be active as VY2/W7ASF from Prince Edward Island (NA-029) on 18-24 November, including an entry in the ARRL SSB Sweepstakes (21-23 November). QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
VP2V - Look for Gerd, VP2V/DL7VOG to be active from Anegada, British Virgin Islands (NA-023) from 15 November to 2 December. He will operate CW and RTTY on all bands, including activity during the CQ WW DX CW Contest (hopefully under a shorter VP2V callsign). QSL via home call, bureau preferred. [TNX DX Newsletter]
VU_ant - Bhagwati Prasad Semwal, VU3BPZ will be part of the 29th Indian Antarctic Expedition, between mid-November and March 2011. He will be located at Maitri Base and will operate mainly on 20 metres SSB as AT10BP. QSL direct to the qrz.com address. [TNX

http://dx-hamspirit.com/]
XE - XE3N, XE3PP, XE2WK and XE3RR will be active as XF3RR from Isla El Cerrito (NA-153) on 10-14 December. Organized by the Radio Club Cancun, this will be a low scale operation as the island is a protected area. Suggested frequencies are 3790, 7060, 14260, 18140 and 21260 kHz (SSB); 3585, 7044, 10104, 14085, 18104 and 21085 kHz (RTTY). IOTA group NA-153 was activated for the first and only time back in 1994. QSL via EB7DX.
XU - Wim, XU7TZG (XU7KOH) will be active from Koh Russei (AS-133) on 13-16 November. He plans to operate SSB (14260, 18128 and 21260 kHz) and PSK31 (14040, 18100 and 21080 kHz). QSL via ON7PP. [TNX ON7PP]

425 DX NEWS MAGAZINE ---> The latest issue (October 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA (iz3eba @ iz3eba.it)

DXCC NEWS ---> YI9TM (current operation from Iraq) has been approved for DXCC credit. [TNX NC1L]

LOGS ---> On-line logs for the recent Pacific tour by YT1AD and YU1DW (3D2AD, 3D2DW, 5W0DW, 5W7A, KH8/N9YU, T30AW and T30M) can be found at http://www.YT1AD.info/t31 [TNX YT3W]

LOGS ---> The on-line log for DU1/G0SHN's activity from Manila (June 2009 to present) is at http://LesNouvellesDX.fr/voirlogs.php. Gerard will be back home around 20 November, and will return to the Philippines in February 2010. He plans to have a new antenna for him to use while visiting other DU islands. [TNX F6AJA]

LOGS ---> A logsearch for T6AG is available at http://t6ag.nra.pt/ (2098 QSOs logged up to 9 November at 19.37 UTC).

+ SILENT KEYS + We are close in thoughts and prayers to Ake Broman, SM4EAC who lost his wife Margret, SM4PUR on 25 October. "She was a keen DXer", Ake says, "and had only two more countries to go to get them all".
Other recently reported Silent Keys include Bruce A. Makas (K1MY), Alexander Dobrev (LZ1XP), Oleg V. Abramov (RU6BN), Boris N. Alekseev (U5UF), Vladimir I. Bashmakov (UA1OV) and Viktor F. Eryukin (UA3RG).

QSLs received direct or through managers: 3XM6JR, 4L0B, 4L5O, 5B4AIF, 5W5LP, 5Z4/UA4WHX, 6W/PD9DX, 7O1YGF, 8P9NX, 9J2VB, 9V1VV, A25VB, BX4AD, CO8DM, CO8LY, DP1POL, EJ1DD (EU-121), EK6LP, EL2DX, HB0/HB9AON, HV50VR,

11861. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-13 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11861

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 13 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 317 Issued at 2200Z on 13 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 12/2100Z
to 13/2100Z: Solar activity has been very low for the past 24 hours.
Region 1030 (N23W105) rotated off the visible disk. No flares were
observed.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low to low for the next 3 days (14-16 November) due to old
Region 1029 rotating back on the visible disk.
IIA. Geophysical Activity Summary 12/2100Z to 13/2100Z:
The geomagnetic field has been at quiet levels for the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be at quiet levels for the next two days (14-15
November). Day three (16 November) is expected to be mostly quiet
with a slight chance of an unsettled period due to a weak coronal
hole high-speed stream.
III. Event Probabilities 14 Nov-16 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 13 Nov 074
Predicted 14 Nov-16 Nov 074/075/075
90 Day Mean 13 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 12 Nov 000/001
Estimated Afr/Ap 13 Nov 001/001
Predicted Afr/Ap 14 Nov-16 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 14 Nov-16 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11862. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-14 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11862

```
:Product: Report of Solar-Geophysical Activity

11863. Re: [DX-IS] Re: TX3A RTTY!

Yahoo group: DX-IS (2009)
Date: 2009-11-15 14:13:07 UTC
From: Win
Topic: 11853 Message: 11863

For just two guys, they (TX3A) are doing one hell of a great gob. I wish they would come up to the higher frequencies, but their plan was for 40/80/160. Considering the length of time they will be on the island, they may top some of the big DXpeditions in contacts.

Seems the XV4D group is having a problem with NA contact. About this time they are probably looking at their stats and wondering what happened. They have great operators, but not so great conditions.

Win, W0LZ

"La Sagrada Familia Speaks to the World ARMIC 30 YEARS 30 ACTIVITIES"

For days 12 and 13 December, the radio club ARMIC EA3RKR organized, along with the Construction Board Expiatori Temple of the Sagrada Familia in Barcelona, a very interesting day radio.

It is the first time you install a ham radio station in the grounds of the Temple and the program of activities includes lectures, demonstrations of amateur radio contacts, radio drawing material donated by businesses and local distributors and a number of events with special attention to children and youth.

The Paring will be disseminated by media Onda Cero devote a specific species to the event and on Radio 4, National Radio of Spain in Barcelona in L'Altra Ràdio program. The station, which will use a special indication for which it has designed a special QSL for the occasion, will operate on HF and V-UHF and installed in what was the former School of the Sagrada Familia, a building adjacent to the temple, designed by Gaudi and is a fine example of simplicity and functionality.
The original school building was destroyed during the Civil War and was rebuilt faithfully following the original design. Its function is now a museum.

Throughout the weekend and nights a group of players arrived specially from different points, will be responsible for putting in the air with a special callsign different seasons in multiple bands and modes of transmission.

For 30 years are not met daily, has prepared an activity full of surprises and without precedent, as one of the main activities of the tour 30 years 30 ACTIVITIES ARMIC S, because we want to celebrate this event with those who really have made this possible, ie all of you who in different ways have worked and supported so that it can be reality.

A weekend of what most everyone likes, radio, celebrating with each and every one of you this important milestone, 30 years of ham radio, for 30 years and on the radio!

More info soon .....

Are you going to lose? ...

Facebook is already available in the group of the event, looking at the Facebook event finder "La Sagrada Família Parla al Món" and join.

Brian,

I worked him three times back in 2002 and no cards; can't say for sure if I sent him QSL cards. When I get a confirmation from another station, I delete the "QSL card sent" entry in my logging program so when I generate a report of QSL's needed, they don't show up any more.

The above said, my bet is I sent him one for one of the contacts.

Good luck, and at least there are other stations to work over there!!

Bureau doesn't seem to work either. 4QSL requests outstanding since 2004. and again in 2006. Have filled them in with other contacts at this point.

Interesting.....Don't know what you are using for a logger but..

You might want to consider DXKeeper. In it you can flag the QSL as "expired" and it no long appears in things like a card aging report.

11870. RE: [DX-IS] Re: T99C

Yahoo group: DX-IS (2009)
Date: 2009-11-15 20:05:10 UTC
From: Dick Williams
Topic: 11864 Message: 11870

Brian,

Thanks for the information on DXKeeper. I am using DXBase and as far as I know it does not have that option. When I put a date in the QSL sent column, when I do a print out of QSL's not received, it will show up until I remove the date from the QSL sent column. There is another column labeled QSL's that is propagated with No, Card, LOTW, or Both. I have found that I can leave that column as both (I upload my log to LOTW), and as long as remove the entry from the QSL sent column, the QSL's not received report will not show it. I only "discovered" that recently; before I was removing both the date and changing the entry from Both to LOTW!

I have been using DXBase to long to think about changing to another logging program!! It is hard enough to change radios these days; I was just getting use to my Orion II, and then I sold it and purchased a K3. A whole new "learning curve" again.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, WP3GW, N4AA & QRZ DX, KH6BZF, WB6RSE, W7ISG, K8YSE, A35A, Algarve STAR DX Team, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, E73Y, G3SWH, I1JQJ/ IK1ADH & 425 DX News, JT1CD, Pete's-DX-Newsdesk, PS7YL, RSGB IOTA Web Site, SP5UAF, UR4LRQ, VA3RJ & ICPO, VE3ZIK, VHF-DX-Portal (MMMonVHF) and YT3W for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-November, through Sunday, 15th-November there were 225 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FK/c, FM, FO, FP, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5R, MADAGASCAR (IOTA Op). Just a reminder that Eric, F6ICX, will be active as 5R8IC from Saint Marie Island (AF-090) between November 17th and December 15th. Activity will be on 80-10 meters. QSL via his home callsign.

6V, SENEGAL. Dim, UT5UGR, will be active as 6V7R from La Somone during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via UT5UGR.

6W, SENEGAL. Jacques, F6BEE, will once again be active as 6W1RW during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to F6BEE, by the Bureau or direct. Look for activity before the contest on 30/17/12 meters.

6W, SENEGAL. Operators Tom/GM4FDM and Ronald/PA3EWP are planning a DXpedition to Le Calao between January 26th and February 9th (2010). They will sign as 6W/GM4FDM and 6W/PA3EWP. Activity will be concentrated on the low bands and RTTY, with an emphasis on North America and Japan. Tom will attempt to upload his logs on LoTW (InterNet permitting), if not, he will upload them as soon as he arrives home. QSL 6W/GM4FDM via GM4FDM. QSL 6W/PA3EWP via PA7FM.

9G, GHANA. The Italian team is now active from Busua Beach until November 27th. Look for the group to activate Abokwa Island (AF-084) with one station on 20 meters only during their stay. The time of operation on the island will be planned day by day pending the sea condition and weather forecast. Activity will be on all HF bands and modes, 80-10 meters. The callsign 9G5TT will be used from the mainland while the callsign 9G5XX will be used from Abokwa Island. Operators mentioned are: Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT, and Donato/IZ2CHO. QSL via I2YSB, direct only. For more information and updates, go to: http://www.i2ysb.com

9G, GHANA. By the time you read this Alan, G3XAQ, will be heading to Accra and is expected to be active as 9G5XA again. He will be there until December 4th. Activity will be CW only on 160-10 meters. No word on whether he will be in the CQWW DX CW Contest, but do not count it out. QSL via G3SWH. The log will be uploaded to G3SWH's Web site upon Alan's return at: http://www.g3swh.org.uk

A3, TONGA. Paul, A35A, informs OPDX that Dave Lee, W6ZL/A35KL, has arrived in Nuku'alofa on the Island of Tongatapu (OC-049) the morning of November 11th. He will be in Tonga for about 6 weeks, but he probably won't be on the air until he gets to Ha'apai (OC-169). Pauls states, "He had no trouble clearing customs with all the radio gear and a brand-new Honda generator. Dave will remain in Nuku'alofa until the 20th, and then will fly up to Ha'apai. Tomorrow, however, he will airfreight all the gear to Lifuka Island, and the overhaul of the A35A station will then commence! The 'to do' list includes lots of antenna work, installation of additional filters in the K3, and re-wiring the shack. We're still 'on' for the CQWW CW contest."

A4, OMAN (Special Event). Members of the Royal Omani Amateur Radio Society have activated special event station A43ND in celebrating Oman's "National Day". Activity will last until November 25th. Operations have been on 40/20 meters CW and 20/15 meters SSB, but look for activity on other bands and modes. QSL via A47RS.

A6, UNITED ARAB EMIRATES. The LARC (Lufthansa Amateur Radio Club) in cooperation with the Emirates Amateur Radio Society (EARS) will be operating out of Dubai as A65DLH between November 23-30th. Activity is planned for all bands 160-10 meters using CW, SSB and the Digital modes. They will also be in the CQWW DX CW Contest (November 28-29th). They will QSL via the Bureau, but if you want to QSL direct, please only use the new IRCs as they will not be ready to print and distribute QSLs by December 2009. QSL via DO7ZZ. A blog has been set up at: http://a65dlh.blogspot.com

C9, MOZAMBIQUE. With the support of the Kharkov University Contest Club (UT7L), operator Igor, UY5LW, is once again active as C91LW from Maputo until December 3rd. He has been on the air since November 13th. Activity will be on 80-10 meters using mostly CW with some RTTY and PSK operations. He will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. Activity on 160 meters will depend upon his situation, however skeds are welcome at: uy5lw@...
QSL via UY5LW direct (QRZ.com). For more details, updates, logs and photos, please visit: http://www.c91lw.dxer.com.ua

CO, CUBA. Luis, CO6LP, will be active during the CQ World Wide DX CW Contest (November 28-29th) as a Single-Op/Single-Band (40m)/Low-Power entry. He plans to use only a dipole. QSL via CO6LP.

CR6, PORTUGAL (LH Op). Members of the Algarve STAR DX Team will activate CR6A from Fuzeta-Barra Lighthouse on Armona Island (East Side) on November 22nd, between 0700-1300z. Activity will be on 40-15 meters using CW, SSB and RTTY. QSO is valid for: ARLHS POR-116, DPRN FF-04, WFF CTFF-07, DIA Ai-04 and DFFA Fa-45. Operators mentioned are: CT1CQK, CT1EHX, CT1FNT, CT1GFK, CT1GPQ, CT1IUA, CT2GFJ, CT2HTN and CT2IHP. QSL via CT1GFK. For more info, visit: http://algarvedx.com
Pictures and an online log will be available during activity on their Web site.

D2, ANGOLA (Update). Paulo, CT1ITZ, continues to be active, but is now signing D2CQ (instead of D2PJB) from Porto Amboim, 300km from the capital Luanda, until November 29th. Activity is expected to be on 80-10 meters SSB only. However, his activity so far has been on 20 meters. He is using an Icom 706 and a Windom antenna. QSL via CT1IUA. For direct QSL, please send 2 USDs or one new IRC (ending 2013). QSLs without enough postage will go via Bureau.

D4, CAPE VERDE. Ranko,4O3A, will be active as D4C from Sao Vicente Island during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. QSL via IZ4DPV. For the latest information, check the D4C Web page at: http://www.d4c.cc

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
YI9TM - Iraq; Current Operation

* 7O1YGF REMINDER. Bill Moore, NC1L, ARRL Awards Branch Manager, states:
"This is a reminder that free update for 7O1YGF Yemen cards will expire
on December 31, 2009. Starting January 1, 2010 normal submission fees
will apply. If you are planning to submit an update for this operation
I strongly recommend that you do not wait for the last minute as mail
around the holiday season is very heavy and delays can occur. All DXCC
needs is the card and SASE, or, in LoTW do an application with just
7O1YGF and remember to select payment by mail on Part four and leave
the paper QSO number at zero on Part two."

E21, THAILAND. Champ, E21EIC, will be active during the CQWW DX CW Contest
(November 28-29th) as a Single-Op/ALL-Band entry. QSL via LoTW. JA stations
QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at:
http://www.e21eic.net

E4, PALESTINE (Update). A little more details about the upcoming E4X
operation were released this past week. Specific dates were not announced
yet, but the 2010 operation lead by Antonio, EA5RM, will have at least
3 stations on the air at the same time on different bands and modes.
Activity will be on 160-6 meters (including 30/17/12 meters) using CW,
SSB and RTTY. Suggested frequencies were announced:

BAND	CW	SSB	RTTY
160m	1824	1845	
80m	3501	3780	
40m	7004	7056/7180	7035
30m	10104	10140	
20m	14024	14195	14080
17m	18074	18145	18100
15m	21024	21295	21080
12m	24894	24945	24920
10m	28024	28495	28080
6m	50103	50103	

Some of the equipment has been listed on the E4X Web page, and the QSL
route for the operation will be via EA5RM. An interesting survey is being
taken on the Web site for bands/modes needed for this operation. The
survey is in real-time (it lists the results and your callsign). It looks
like there "may" be online logs during the operation. For updates and
possible other details, visit the E4X Web page at:
http://www.dxfriends.com/e4x/index.php

HS8, THAILAND. Wut, HS8JYX, will be active during the CQWW DX CW Contest
(November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL
via HS8JYX, LoTW, direct or eQSL. Visit his Web page at:
http://www.hs8jyx.com

II0, ITALY (Special Event). Look for special event station II0TRM to be
active between November 16-22nd. Operations will be only CW. Suggested
frequencies are: 3563, 7025, 10115 and 14045 kHz. Operators mentioned
are Fabio/IK0IXI and other members of the Italian Naval Old Rhythmers
Club (INORC). Activity is to celebrate the World's Champion Radio Tele-

grapher T.R. McElroy (1901-1963). QSL by the Bureau or direct to IK0IXI:
Fabio Bonucci, via delle Sterlizie, 10, Civitavecchia, RM I-00053, ITALY.
For more details about Theodore R. McElroy, see: http://www.qrz.com/db/II0TRM

IOTA NEWS.....
AS-079. Take, JI3DST, will once again be active as either JS6RRR or
JI3DST/JS6 from the Miyako Islands between November 21-30th.
His activity will include the CQWW DX CW Contest (November
28-29th). He will operate mainly from Miyako-Jima (JIIA
AS-079-005), but he may also operate from Ikema-Jima (AS-079-
001) and Kurima-Jima (AS-079-003). QSL by the Bureau only.

EU-118. (Update) RARE IOTA! Operators Oscar/EA1DR, George/EC2ADN,
Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning
a DXpedition to Flannan Isles (a extremely difficult island
to land on) between June 18□21st (2010). Callsign will be
MS0INT. Last activation was in 2002 (also in 1989 and 1995).
QSL Manager will be M0URX. More details and a Web site will
be forthcoming.

EU-125. Juergen, DL4MAQ, will be active as OZ/DL4MAQ from Roemoe
Island (DIA NS-001), in the Jylland West Group, between December
12-19th. QSL via his home callsign.

NA-153. (Update) Operators Zalo/XE3N, Jose/XE3PP, Benigno/XE2WK and
Juan/XE3RR will be active as XF3RR from Isla Cerrito between
December 10-14th. This operation is organized by the Radio
Club Cancun, and it will be a low scale operation as the
island is a protected area. QSL via EB7DX. Suggested frequencies
are:
SSB - 3790, 7060, 14260, 18140 and 21260 kHz
RTTY - 3585, 7044, 10104, 14085, 18104 and 21085 kHz

JTDX CONTESTS. Khos, JT1CD, wants to remind everyone that next weekend
is the "2009 Mongolian DX Contest (CW/SSB)", November 21-22nd. The
Mongolian Amateur Radio Society (MARS) promotes and organizes the "Mon-
golian DX Contest". MARS has the honor to invite all licensed amateurs
and SWLs throughout the world to participate the annual "Mongolian DX
Contest". For rules, go to:
http://www.harts.org.hk/Rules_JTDXContest_Eng.pdf
Also, plan to be active in the "2010 Mongolian DX Contest (RTTY)", to be
held January 9-10th. For rules, go to:
http://www.harts.org.hk/Rules_JTDXContest_Eng.pdf

JT, MONGOLIA. Members of the Mongolian Amateur Radio Society (MARS)
will be active as JT1T during the Mongolian DX Contest (CW/SSB), November
21-22nd. Operators Enkhbayar/JT1DA and Nekhiit/JT1DN will be a Multi-Op/
All-Band/Mixed-Mode entry. QSL via LoTW or via the address on QRZ.com.

KH6BZF PROPAGATION FORECAST/REPORT (For November 16-22nd)....
Nov 16 AN SOLAR REFERENCE
Nov 17 AN ---------------

Nov 18 HN-LN AN - Above Normal/Geomagnetic Level is QUIET
Nov 19 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 20 AN LN - Low Normal
Nov 21 AN
Nov 22 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE FOR VHF'ER: Lee reported that the 2009 Leonid meteor shower is expected to peak on November 17th. Look for a sprinkling of meteors over North America and a possibly an outburst over Asia. For more deatils, please refer to:
http://science.nasa.gov/headlines/y2009/10nov_leonids2009.htm?list35439

DISTURBANCES TO PROPAGATION (Webinar). The Potomac Valley Radio Club will be hosting a Webinar presentation by Carl Luetzelschwab, K9LA. The event will be held on Thursday, November 19th at 9 PM EST (November 20 - 0200z). Discussion will be on disturbances to propagation, which "may" take place during some days in Cycle 24 and (possibly!) we "may" start seeing more solar flares, radio blackouts, and geomagnetic field activity. To understand these disturbances, join K9LA as he explains them and provides real world examples tied to our amateur radio operations. The event is free and open to the amateur community. Pass the word. To register go to:
https://www2.gotomeeting.com/register/681745378

KP2, U.S. VIRGIN ISLANDS. Operators John/K3CT and John/K3TEJ will be active as KP2/K3CT and KP2/K3TEJ, respectively, between November 24th and December 1st. Activity will include the CQWW DX CW Contest (November 28-29th) as a Multi-? entry using the callsign KP2M. Outside of the contest, their activity "usually" will have an emphasis on 160m and 30/17/12 meter bands using CW and RTTY. QSL KP2M via AI4U. QSL their KP2/homecall to their home addresses.

LX, LUXEMBOURG. Operators Willfried/DF4PD, Detlef/DK3QZ, Joerg/DL3QQ, Kai/DL3HAH, Hans/DL1XW, Chris/DL7CS, Mike/DF3VM, Stefan/DL5XX and Philippe/LX2A will be active as LX7I during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry (for the first time). QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

MZ, SCOTLAND. Ian, G3WVG, will be active as MZ5B from Eshaness, Shetland Island (EU-012, IOSA SH01, SCOTIA SI11, ARLHS SCO-075, BARLS A3838, WLH GM-026, WLOTA LH-0867, WAB HU27) during CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (??m) entry. QSL via LoTW or to G3TXF, direct or by the Bureau.

NEW OFFICERS FOR 2010. Members of the Central Arizona DX Association are pleased to announce the officers for the year 2010:
Jim Henderson, KF7E - President
Al Koblinski, W7XA - Vice President

Bill Maynard, W7ZT - Secretary
Bill Ellis, WB9CAC - Treasurer
Jim Hoggard, K7MY - Board Member at Large, two-year term
Bob Hansen, NA7RH - Board Member at Large, one-year term
Mike Johnson, KW7V - Past President

NP3, PUERTO RICO (Special Event). Members of the Western Amateur Radio Club will activate special event station NP3M/516 this coming Thursday, November 19th, starting at 0000z to 2359z. Activity is to commemorate the 516th anniversary of the discovery of Puerto Rico. Operations will be on 80-10 meters using CW, SSB and possibly PSK31. QSL via NP3M.

PACIFIC TOUR. Just a reminder that Chris, DO7AG, is expected to be in the South Pacific with his family between November and January. He plans to be active as 5W1QX from Western Samoa and A31CE from Tonga. Activity will only be on 40 and 20 meters (this is due to the type of license he has). Complete dates of activation have not been announced yet. Be listening.

PACIFIC DXPEDITION/TOUR (Update/Reminder). Operators Andrea/IK1PMR, YL Claudia/K2LEO/PA3LEO, Wil/PA0BWL, Joe/AA4NN, Franz/OE2SNL and Gerhard/DJ5IW are expected to be active from the following Pacific location between now and December 18th. The tentative schedule is as follows:
Samoa (5W) - November 11-18th; minus OE2SNL; Vaiala Beach Resort on the northern side of the Island of Upolu (OC-097);
callsigns are: 5W0AP (IK1PMR), 5W0CF (PA3LEO), 5W0WL (PA0BWL), 5W0IW (DJ5IW) and 5W0JC (DJ7JC).
Tonga (A3) - November 19th- December 1st; Otuhaka Beach Resort on the western side of the Island of Tongatapu (OC-049);
Group callsign for the CQWW DX CW Contest will be A31A;
Individual callsign are: A31MR (IK1PMR), A31LEO (PA3LEO), A31WL (PA0BWL), A31SN (OE2SNL), A31IW (DJ5IW) and A31JC (DJ7JC).
New Zealand (ZL) - December 2-5th; Waiheke Island (OC-201); Callsigns are: ZL/IK1PMR, ZL/PA3LEO, ZL/PA0BWL, ZL/OE2SNL, ZL/DJ5IW and ZL/DJ7JC.
South Cook Islands (E5) - December 5-12th; Rarotonga (OC-013); Callsigns are: E51PMR, E51LEO, E51BWL, E51SNL, E51XIW and E51NAA.
Singapore (9V) - December 15-17th; Callsigns are: 9V1/IK1PMR, 9V1/PA3LEO, 9V1/PA0BWL and 9V1/DJ7JC.

Activity is planned for 160-10 meters using CW, SSB and the Digital modes. The team will use three Elecraft K2/100 with DSP and amps. For more information and updates, watch: http://www.pacificdxpedition.com/index.php?s=intro

PW2, BRAZIL (Update/Special Event). Special event station PW2SIDC has been active from several Brazilian states since October 22nd, and will be on the air until November 30th (not the 22nd as first announced and also no activity from Fernando de Noronha Island). Activity is in celebration of V DEFENCIL - V International Conference of Civil Defense - to be held between November 17-20th, at Anhembi - Meeting & Conventions of Sao Paulo City, with the participation of RENER - National Emergency Network Amateur

Radio. Operators mentioned are: Monica/PS7YL, Ed/PS7DX, Flavio/PT2IW, Murilo/PR7AYE, Paulo Cesar/PT2PC, Alisson/PU5AAD, Angel/PT2ZUY, Junior/PY2ZA and Silva/PY8ELO. Operations have been on 40/20 meters using CW and SSB. QSL via PS7YL, by the Bureau, eQSL or direct to: Monica Freitas, Av. Sao Miguel dos Caribes 31, Natal, RN 59086-500 Brazil. QSL will be sent out after November 30th, after receipt and consolidation of logs received from the various operators.

QSL INFO AND NEWS.....
Algarve STAR DX Team announced that the 4W6AL QSL cards have arrived from LZ3HI (printer). Direct requests will be answered very soon. All 4W6AL information can be found on: http://algarvedx.com

7X0DX & 9M8DX QSL INFO UPDATE. Tom, SP5UAF, reports: "At the begining of November 1st, received 7X0DX and 9M8DX directs unanswered by late DL4DBR. As perhaps you remember Ted, DL4DBR, passed away at the begining of 2009 and during last months of his life he was not able to deal with QSL cards (basicaly callsigns 7X0DX and 9M8DX managed by him). Ted's wife, Renia, DL3DBR, was for some time too affected by the loss to prepare the package of unanswered QSLs. She tried many times but always started to cry. She sent me the package of unanswered direct QSLs at the beginning of November. Now all of them are answered and sent to recipients. However, there is a problem with cards sent via DL4DBR via the bureau. Ted, DL4DBR, had computer records but unfortunately all data was lost. So if anyone is still waiting for a bureau card, please re-send your card via the bureau via SP5UAF or send an e-mail request to my e-mail tom.sp5uaf@... or sp5uaf@... ."

TF4X QSL ROUTE. Phil, G3SWH, informs OPDX that he has been appointed the QSL Manager for TF4X. There is already a log search facility on his Web site and any direct QSL requests already sent to TF4X will be forwarded to him.

NOT THE QSL MANAGER FOR V51AS. Steve, WB6RSE, reports that he has received another request for V51AS. Steve states, "I am NOT and never have been the QSL Manager for Frank, V51AS. He told me in 2003 that his mail is routinely pilfered. Frank's QRZ.com page now shows an address in Germany: Frank Steinhauser, Am Rosenkothen 17, 40880 Ratingen, Germany."

Acim, YT3W, informs OPDX that logs for both YT1AD and YU1DW Pacific tour are on online at: http://www.YT1AD.info/t31
The logs include: 3D2AD, 3D2DW, 5W7A, 5W0DW, KH8/N9YU, T30AW and T30M.

QSLS VIA LOTW: TX3A

QSLS RECEIVED VIA MAIL: CE1KR, CO8LY, EA8AK, EK6LP, F6KMH, FT5WP/MM, GI6ATZ, K9AJ/VY0, KL5O, OX2A, OY3AA, PJ5/AH6HY, VU2PAI,

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQWW DX CW Contest (November 28-29th) as a Multi-? entry. QSL via DK4VW.

SV9, CRETE. Dimitrios, SV9COL, will be active in the CQWW CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to SV9COL.

T7, SAN MARINO. Aurelio, IZ0EGM, will be active as T70A during ARRL 10 Meter Contest between December 12-13th, using CW and SSB. QSL information is on QRZ.com.

TO4/FG, GUADELOUPE. Serge, F6AUS, will be active as FG/homecall from Les Saintes (NA-114) until March 2010. His activity will include contests, but he will be using the callsign TO4D. Look for him to possibly be on 160 and 80 meters. QSL via his home callsign.

TO5, MARTINIQUE. Albert, F5VHJ, will once again be active as TO5A during the ARRL DX SSB Contest (March 6-7th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or via F5VHJ.

TT8, CHAD. Jovica, E78A (aka 6W1SJ, ex. T98A, ST0RM, ST2A), who has been in Chad since September 25th, has received his renewed TT8JT license and will be on the bands during the next three or four weeks from Abeche (GL: KK03KU). As in 2008, the main purpose of Jovica's travel to Chad is his work for United Nations High Commissioner for Refugees (UNHCR). Activity will be mostly CW during his free time. Activity during CQWW DX CW Contest is not confirmed at this moment. QSL via E73Y: Boris Knezovic, P.O. Box 59, BA-71000 Sarajevo, Bosnia and Herzegovina, or via E7 bureau.

TX3, CHESTERFIELD ISLAND.. Operators George/AA7JV and Tomi/HA7RY continue to be active as TX3A until December 6th. As of print time, their log shows about 16k QSOs. Activity has be on all HF bands but with an emphasis on the lower bands. Modes used have been on CW, SSB and RTTY. QSL via HA7RY. For more detailed information and updates, visit their Web page at: http://www.TX3A.com

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. He will try to be active on 160 meters, if possible, with a new Inverted L antenna. QSL via VU2PAI direct (QRZ.com address).

WP3, PUERTO RICO. Alfredo (Al), WP3C, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via W3HNK.

XR0, EASTER ISLAND (Update). The international team of operators active as XR0Y from Rapa Nui are now QRT. For more details, please see their Web page at: http://rapanui2009.org

XU7, CAMBODIA. Peter, NO2R, will once again be active as XU7ACY from Sihanouk Ville. He will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Lower-Power entry. QSL via W2EN.

YI9, IRAQ. Paul, N6PSE, has reportedly been issued the callsign of YI9PSE by the Iraqi Ministry of Telecom and is currently planning a 6-8 person DXpedition to Northern Iraq (Kurdistan) for late spring/early summer of 2010. There will be three stations on the air from the International Hotel in Erbil, Northern Kurdistan (near Turkey). Operations are expected to be on all bands and modes. More details are forthcoming.

ZD8, ASCENSION ISLAND. Bob, G4DBW, will once again be active as ZD8RH. His activity will include the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via LoTW or to G4DBW.

ZM4, NEW ZEALND. Members of the East Coast Contesters ZM2M Team will be active using a new callsign, ZM4T, in the CQWW DX CW Contest (November 28-29th) as a Multi-2 entry. Operators mentioned are: Lee/ZL2AL, Stan/ ZL2ST, Holger/ZL3IO, Peter/ZL2LF and Mike/ZL2FAR. QSL via ZL2AL, direct or by the bureau. Visit the ZM2M Web page at: http://www.zm2m.com

I also used DXBase. Changed to DXKeeper two or three years ago and have never looked back. The author of DXBase stopped doing updates/upgrades recently.

I think you might find the way DXKeeper works (the logbook of the DXLab suite) will remind you of DXBase. Plus, you can import DXBase logs directly into DXKeeper.

I am in no way financially connected to DXBase but wanted to let folks
know that there is a new owner of the software and there appears to be
updates and changes in the works. Just FYI for those who hadn't heard.

Joey,

What do you mean by a "spotting service?" I am unaware of such a thing.

Hi Art,

I'm certain you are aware, but in the off-chance you aren't, DXbase has been sold. An updated version seems to be in the works for 2010. You might want to join the DXbase reflector for news.

Although several friends are pushing me to use another logging program, I have used DXbase for 15 years and I have enough trouble remembering how to tie my shoes and am reluctant to go though another learning curve :-).

I also used DXBase. Changed to DXKeeper two or three years ago and have never looked back. The author of DXBase stopped doing updates/upgrades recently.

I think you might find the way DXKeeper works (the logbook of the DXLab suite) will remind you of DXBase. Plus, you can import DXBase logs directly into DXKeeper.

Al,

I used no 'lass too' Bob Furzer's Logger 32 logging program but switched to DXLabs which is far better. One problem was it seemed to back up but really didn't.

I solved the problem of tying my shoes by getting velcro strap shoes;-)

DXKeeper is not difficult to learn, what with the help on their group plus online explanations. I don't have a new radio so I don't need the interfaces...

Date: 2009-11-16 19:22:15 UTC
From: Alan Leith
Topic: 11864 Message: 11884

Hi Rene,

Yes, my friends tell me the same thing. However, considering what I need and want to do, DXbase is really everything I need. I had no problem uploading 40,000 QSOs to LoTW in the last few weeks as some thought I might. I can figure out my totals. I write the few QSLs I send by hand. I don't print out pages and pages of reports. Over the years I have pretty much learned how propagation works, can figure out if my beam is turned the right way by the strength of the signal, and all that stuff.

As fancy as DXLabs is, I don't really wish to spend all my time looking at my computer screen instead of using my fingers to tune the bands with an occasional glance at the cluster information to see if there's anything I've missed while tuning.

Bob Furzer. I wonder if there's an award for working him in 25 different countries!!!

Always loved the way he messed with the heads of the "lass twoers." Sure could use him in many SSB and some CW pile-ups these days. Wonder where ole Bob is these days.

11885. P29VCX

Yahoo group: DX-IS (2009)
Date: 2009-11-16 20:16:47 UTC
From: Phil Snyder
Topic: 11885 Message: 11885

I saw a spot for P29VCX that said the online logs were up. I Googled it and found this website:

http://www.rep.pt/P29-PapuaNewGuinea/

Now I am pretty sure my 30 meter Q was a good one (I have been mistaken on this before though) but don't see it in the log. The looks of the website lead me to believe that the logs there are from 2007. They don't give a log updated date but all the news in the left column is from 2007. Does anyone know if these are current logs or 2007 logs?

I have to respond because this may leave the wrong impression.
AA6YQ structured the DXLabs suite into 7 applications so that you don't need to run what you don't use. If all you want is a logger and a capture window then DXKeeper is all you need. If you want more they all work together seamlessly.

DXKeeper---->
It also uploads to LoTW (and others) by QSO or by all not yet uploaded. It also does a verification(sync) that the uploaded QSO indeed made it to LoTW.
It prints either cards, labels, or envelopes for QSLs (I use a 30 labels per page)
It will determine which QSLs you need to request based on what you say you are tracking for awards (or you can flag them manually)
It prepares filing for awards like DXCC (I push a button and it tells me what LoTW credits to use or what cards to submit) and prepares the submittal listing for the award.
It tells me where I stand against more awards than I care about (if I ask)
It tracks my QSL requests and lets me know their age so I can request again (or panic)

I am sure there are many logggers that do the job but from a DXing standpoint I have never seen one that makes DXing and QSLing so easy.

Given the number of users, I respectfully suggest that those even still using their Collins radios may want to load the program, transfer an image of your log, and see what it does(assuming they have a computer)

I like and use the other applications which have helped me but, either way, getting the mundane award tracking and QSLing under control gives me alot more time to be on the radio.

Congratulations Joey!

I was listening also but they started 2 hours after NE USA 17meter peak propagation to that area of the world so I never heard much but a whisper in the noise.

Interesting over the last couple of days I have worked T30KI on 3 bands SSB from the same area of the world in the short few days they were on W Kiribati with wires and a 100W TS2000.

Hopefully I'll get another shot on SSB or RTTY on these guys before they leave.

When I returned to the airwaves back in 2004, I discovered that amateur radio had taken some big leaps (I essentially went off the air in 1987), particularly in the PC-to-radio environment. After trying several logging programs, I discovered DXBase, bought it (around $100 at the time) and used it for about a year. Then I discovered the author charged for annual updates (apparently coincident with the Dayton hamfest). At the same time, I discovered DXLabs, downloaded all the pieces (it's easier now than it was three years back) and gave it a whirl. The similarities between DXKeeper and DXBase made the learning curve less steep than it might have otherwise been. I've never looked back.

The DXLab suite is astounding, comprehensive, incredibly well supported (the author conducts a Yahoo forum) and updated often. Since the product is free, I couldn't possibly have any financial interest!

From: aburkefl
Topic: 11889 Message: 11894

They've had excellent signals on 80 CW several mornings in a row. I managed to get them on 30 the other day, but 40 has still been quite a struggle. The pileups just seem enormous even after a couple weeks of activity.

We too (both the wife and me) got them on 17 SSB last night - I needed that for SSB for Chesterfield. We had begun to despair that they weren't going to do much phone, but that was the second time we had heard them on 17 phone and finally got through on that mode.

Now if we could just snag 'em on RTTY.

Glad to hear you got through.

Hi Brian,

After reviewing your original post, I see, indeed, that it was hijacked. I apologize for the part I played in that hijacking.

However, if you haven't noticed, this seems to happen an awful lot on this reflector :-).

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 17 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 321 Issued at 2200Z on 17 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 16/2100Z
to 17/2100Z: Solar activity was very low. A B1.5 flare occurred at
17/1259Z, most likely originating from the new emerging flux region
near N19E68.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 16/2100Z to 17/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for days one and two (18-19
November). Quiet to unsettled levels, with a chance for isolated
active periods, are expected late on day three (20 November). The
increase in activity is expected as a recurrent coronal hole
high-speed stream becomes geoeffective.

Hi Art,

I have similar dates to you wrt. on and off the air. (i.e. I was off the air from 1990 and came back on around May 2005).

I have been using Logger 32 and VE7CC AR Cluster program. Logger32 does the logging, QSLing etc and I have kept VE7CC due to the colour coding which I rely on to quickly spot which band the DX station is on.

I have looked at DXlabs a couple of times, but found it quite bitsy, I guess you don't have to install the bits you don't want...

Btw, worked Dwayne this morning KD4POJ on the LP 20m for ND. I still need SD on LOTW, are there any hams in SD?

The reason I switched from Logger 32 was that at the end of the evening I would backup to a 3? diskette. When I moved and got a new computer the old went out so I downloaded Logger 32 and put my diskette in and there was nothing on the disk. My fault for not checking the diskette for content but as it is I couldn't go back to Logger 32 as Bob won't let anyone use it who uses his lass too on the air.

Ok Rene,

I upload my logs to LOTW, eQSL and Club log every week. So that's a triple, weekly backup plan.
It also pays to export and backup your ADIF file locally monthly to an external HDD.

3 and 1/2 inch disks went out quite a while back!

The reason I switched from Logger 32 was that at the end of the evening I
would backup to a 3½ diskette. When I moved and got a new computer the old
went out so I downloaded Logger 32 and put my diskette in and there was
nothing on the disk. My fault for not checking the diskette for content but
as it is I couldn't go back to Logger 32 as Bob won't let anyone use it who
uses his lass too on the air.

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 17 2200 UTC
Prepared jointly by the U.S. Dept. of Commerce, NOAA,
Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 321 Issued at 2200Z on 17 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 16/2100Z
to 17/2100Z: Solar activity was very low. A B1.5 flare occurred at
17/1259Z, most likely originating from the new emerging flux region
near N19E68.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 16/2100Z to 17/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for days one and two (18-19
November). Quiet to unsettled levels, with a chance for isolated
active periods, are expected late on day three (20 November). The
increase in activity is expected as a recurrent coronal hole
high-speed stream becomes geoeffective.
III. Event Probabilities 18 Nov-20 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 17 Nov 077
Predicted 18 Nov-20 Nov 078/079/080
90 Day Mean 17 Nov 072
V. Geomagnetic A Indices
Observed Afr/Ap 16 Nov 000/001
Estimated Afr/Ap 17 Nov 000/003
Predicted Afr/Ap 18 Nov-20 Nov 005/006-005/007-008/010
VI. Geomagnetic Activity Probabilities 18 Nov-20 Nov
A. Middle Latitudes
Active 05/05/15

Minor storm 01/01/01
Major-severe storm 01/01/01

# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 322 Issued at 2200Z on 18 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 17/2100Z
to 18/2100Z: Solar activity has been at very low levels for the past
24 hours. Two regions were numbered today. Region 1032 (N17E20) and
Region 1033 (N21E47) were both magnetically classified as Beta
groups.
IB. Solar Activity Forecast: Solar activity is expected to be at
very low to low levels. With the emergence of Regions 1032 and 1033,
there is a slight chance for a C-class flare.
IIA. Geophysical Activity Summary 17/2100Z to 18/2100Z:
The geomagnetic field has been mostly quiet for the past 24 hours. An
isolated unsettled period at mid-latitudes occurred between
18/0600-0900Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain at quiet levels for day one (19 November).
Unsettled, with isolated active conditions, are expected on day two
and three (20-21 November) due to a recurrent coronal hole
high-speed stream.
III. Event Probabilities 19 Nov-21 Nov

11906. HV50VR QSO

Yahoo group: DX-IS (2009)
Date: 2009-11-19 01:34:31 UTC
From: Bob
Topic: 11906 Message: 11906

Logged a station ID'ing as HV50VR on Nov7 around 21z on 30 Meter RTTY.
Its QSL manager doesn't seem to have an email.

Anyone log them or know if this Vatican station is still active.
Seemed like alot for folks were working it but can't even find any spots.

Was I dreaming? Pirate?

Bob KB1JZU

11907. RE: [DX-IS] HV50VR QSO

From: Alan Leith
Topic: 11906 Message: 11907

I don't know about the validity of the station you worked, Bob, but I got my confirmation via LoTW for my 2007 SSB QSO. The station WAS active for the 50th anniversary of Vatican Radio but I don't know why the call would be used two years later.

Bob;

Checking DX Summit, he was spotted several times on November 1, nothing after that. Some in August though. WFWL, I guess. QRZ does list a mgr. If he is for real, you get nice card, if not....well only 98 cents and some green stamps (however you do it)

Rene

Thanks! At least that takes care of crazy. For some reason the DXSummit search function only showed spots up to Nov1.

Weird pattern. Only a few short periods this year and no LoTW since last year. Guess it is going to cost 2 Green Stamps to find out.

Speaking of which.

My nephew (sister's son) has bought himself a holiday qth in YJ land.
He reckons that family will be able to go there very cheaply. I've
just written to him to remind him who his best uncle is.

Maybe looks like middle a next year, vk6apk might be signing portable YJ0.

73, Alek.

SB DX ARL ARLD046
ARLD046 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. A group of operators will be QRV as 3V3S from November 23 to December 2. Activity will be on all bands and modes. QSL via DL9USA.

GHANA, 9G. Alan, G3XAQ is QRV as 9G5XA from Accra until December 4. Activity is on 160 to 10 meters using CW. QSL via G3SWH.

BOTSWANA, A2. Mike, K9NW will be QRV as A25NW from November 23 to December 1. This includes being an entry in the upcoming CQ WW DX CW contest. QSL to home call.

OMAN, A4. In celebration of the Oman National Holiday, members of the Royal Omani Amateur Radio Society are QRV as A43ND until November 25. Activity is on all bands. QSL via A47RS.

UNITED ARAB EMIRATES, A6. A group of operators will be QRV as A65DLH from Dubai from November 23 to 30. This includes being an entry in the upcoming CQ WW DX CW contest. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL via DO7ZZ.

PORTUGAL, CT. Members of the Algarve STAR DX Team will be QRV as CR6A from the Fuzeta-Barra Lighthouse, ARLHS POR-116, on Armona Island on November 22. Activity will be from 0700 to 1300 on 40 to 15 meters using CW, SSB and RTTY. QSL via CT1GFK.

CANARY ISLANDS, EA8. Jean, ON5JV and Georgette, ON6AK are QRV as EA8/home calls from Tijoco Bajo on Tenerife, IOTA AF-004, until February 10. Activity is on 40 to 10 meters mainly during their

evening hours. QSL to home calls.

NEW CALEDONIA, FK. Akira, JA1NLX is QRV as FK/home call from the Ouvea Islands, IOTA OC-033, until November 23. Activity is on 80 to 10 meters using CW and RTTY. QSL to home call.

BONAIRE, CURACAO, PJ2. John, K4BAI and Don, W4OC will be QRV as PJ4/home calls from Bonaire, IOTA SA-006, from November 24 to December 1. This includes being an entry as PJ4A in the upcoming CQ WW DX CW contest. QSL all calls via K4BAI.

PALAU, T8. Pista, HA5AO will be QRV as T88CI from Koror Island, IOTA OC-009, from November 25 to December 10. Activity will be holiday style on 80 to 10 meters, and possibly 160 meters, using mainly CW. He may also try SSB and RTTY. This includes being an entry in the upcoming CQ WW CW contest. QSL to home call.

CHAD, TT. Jovica, E78A is QRV as TT8JT from Abeche for about three weeks. Activity is on the HF bands using mainly CW. QSL via E73Y.

BELIZE, V3. Pete, K8PT will be QRV as V31PT from Ambergris Cay, IOTA NA-073, from November 24 to December 5. Activity is on 40 to 10 meters using CW, SSB and RTTY. QSL to home call.

NAMIBIA, V5. Klaus, DJ4SO will be QRV as V5/home call from November 23 to December 15. Activity will be on 160 to 10 meters using CW, RTTY or PSK31. QSL to home call.

CHRISTMAS ISLAND, VK9X. Harry, DM5TI, Rene, DL2JRM, Thomas, DL2RMC and Sid, DM2AYO will be QRV as VK9XX from November 21 to December 5. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. They will be QRV as VK9XW in the upcoming CQ WW DX CW contest. QSL both calls via DL1RTL.

INDIA, VU. Amateur Radio operators in India have recently been authorized to transmit between 7100 and 7200 kHz, now giving them use from 7000 to 7200 kHz.

THIS WEEKEND ON THE RADIO. The ARRL Sweepstakes SSB Contest, NCCC Sprint, YO International PSK31 Contest, Mongolian DX Contest, SARL Field Day Contest, Feld Hell Sprint, LZ DX Contest, All Austrian 160-Meter Contest, RSGB 2nd 1.8 MHz CW Contest, North American Collegiate ARC SSB Championship and the EU PSK63 QSO Party will certainly keep contesters busy this upcoming weekend. The RSGB 80-Meter Club CW Sprint and SKCC CW Sprint are scheduled for November 25. Please see November QST, page 86, and the ARRL and WA7BNM contest web sites for details.

11914. HRD 5.0

Yahoo group: DX-IS (2009)
Date: 2009-11-20 14:34:26 UTC
From: Win
Topic: 11914 Message: 11914

I don't run CAT software, as a rule, but I keep it on my computer. HRD released 5.0 recently and I decided to take a look. It was not something I would was really interested in using.

But,,,,, the now stand alone Logbook 5.0 that comes with it is IMHO as good an any logbook out there. There is very little it does not do, and it is a very nice package .

It is well worth taking a look at, and it is free.

Win, W0LZ

21 November 2009 A.R.I. DX Bulletin
No 968
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9G - Alan, G3XAQ will be active as 9G5XA from Ghana until 4 December. He operates CW on all bands. QSL via G3SWH. The log will be uploaded to www.g3swh.org.uk on his return. [TNX G3SWH]
A2 - Mike, K9NW will be active as A25NW from Botswana between 23 November and 1 December, including an entry in the CQ WW DX CW Contest. QSL via home call. [TNX dx-hamspirit.com]
A6 - The Lufthansa Amateur Radio Club, in co-operation with the Emirates Amateur Radio Society, will be active as A65DLH from Dubai on 23-30 November, including an entry in the CQ WW DX CW Contest. They will operate CW, SSB and digital modes on 160-10 metres. QSL via DO7ZZ (bureau preferred). [TNX DO7ZZ]
CE - Alain, F6BFH has had to cancel the IOTA trip to SA-085 [425DXN 967] because of rough seas. He and his wife Danielle are now going to Chiloe Island (SA-018), where they expect to remain from 21 through 25 November. Alain plans to operate SSB and CW on 20, 17, 15 and maybe 30 metres. QSL via F6BFH, direct or bureau. [TNX F5NQL]
CT7 - Members of the Algarve STAR DX Team (http://algarvedx.com) will be active as CR6A from Fuzeta-Barra Lighthouse on Armona Island (not IOTA) between 7 and 13 UTC on 22 November They will operate CW, SSB and RTTY on 40-15 metres. QSL via CT1GFK.
FM - Saty, JE1JKL will be active from Martinique as FM/JE1JKL/p on 25-27 November, and as TO5T during the CQ WW DX CW Contest. QSL via home call. [TNX NG3K]
J6 - K9HZ will be active again as J68HZ from St. Lucia (NA-108) from 21 November through 5 December. He plans to operate on 80, 40 and 20 metres during his evening hours. Look for him around 14155, 7155 and 3770 kHz SSB, and 14050, 7050 and 3550 CW. QSL via home call. [TNX NG3K]
KH0 - Lee, HL1IWD and Harry, WX8C will operate as AH0/AH2Y and KH0/WX8C from Saipan for the CQ WW DX CW Contest. QSL via HL1IWD (but all of the QSOs will be confirmed automatically via the bureau). [TNX HL1IWD]

KP2 - Look for KP2/K3CT and KP2/K3TEJ to operate CW and RTTY from the US Virgin Islands from 24 November to 1 December. QSL via home calls. They will participate in the CQ WW DX CW Contest as KP2M (QSL via AI4U).
T7 - Dario, IZ2EER and Agostino, IK2FIQ will operate from T70A, the club station of the Republic of San Marino's IARU Society on 26-30 November. This will include activity during the CQ WW DX CW on 80 metres. [TNX IZ2EER]
TJ - Lionel, F5PSA (TJ3SL) will QRT from Cameroon around 15 December. Until that date, he will try to be QRV daily. His latest activity was on 20 and 17 metres SSB. QSL via F5PSA. [TNX F5NQL]
V5 - Klaus, DJ4SO will be active again as V5/DJ4SO from Namibia from 23 November to 15 December. He plans to operate CW, RTTY, PSK31 and some SSB on 160-10 metres, and to take part in the CQ WW DX CW Contest. QSL via home call, direct or bureau, and LoTW. [TNX The Daily DX]
VP6 - Al, ZL1AMD (VP6AL) has been on Pitcairn Island (OC-044) since early September and will remain there until March on on a 6-month assignment as the island's medical officer. The Daily DX says that Al "prefers picking up calls on 20 metres" rather than generating his own pile-up. QSL direct only to Al McDonald, c/o PDC Hahei, RD1, Whitianga 3591, New Zealand.
VU - Special callsign AU8JCB will be in use between 28 November and 1 December to celebrate the birthdate of Indian physicist Jagadish Chandra Bose. QSL via VU2DSI. [TNX The Daily DX]
XU - Wim, XU7TZG (XU7KOH) will be active from Koh Russei (AS-133) 20-23 November. He plans to operate SSB (14260, 18128 and 21260 kHz) and BPSK (14040,15 18100,15 and 21080,15 kHz). QSL via ON7PP. [TNX ON7PP]
YN - Eric, K9GY (YN2GY) will be active from Nicaragua on 26-29 November, CQWW DX CW Contest included. Outside the contest he will focus on 30, 17 and 12 metres CW. QSL direct to K9GY (but LoTW preferred). [TNX The Daily DX]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

D68F ---> Serge, F6AML has had to cancel his 13-23 operation from the Comoro Islands [425DXN 967]. In a text message earlier this week he mentioned "a confused and instable political situation" as well as "some big radio problems". [TNX F5NQL]

LOGS ---> On-line logs for P29VSR (OC-008), P29VCX (OC-102), P29NI (OC-205) and P29VLR (OC-231) are now available at www.425dxn.org/dxped/p29_2009/ (logs for P29VCX's activity from OC-116 and OC-240 will be added later).

NOT THE MANAGER ---> Steve, WB6RSE is receiving cards for V51AS, but he is not and never has been his QSL manager. Cards should be sent direct to Frank Steinhauser, Am Rosenkothen 17, 40880 Ratingen, Germany.

PSK63 QSO PARTY ---> The European PSK Club invites amateur radio operators all over the world to participate in the 4th EPC PSK63 QSO Party 2009 to be held on 22 November. Complete rules can be found at http://www.eu.srars.org/

QSL 7X0DX & 9M8DX ---> In early November Tom, SP5UAF received, processed and mailed out all of the outstanding direct requests for 7X0DX and 9M8DX (whose QSL manager, DL4DBR, passed away on 2 January). Those who still need a bureau card should resubmit via the bureau to SP5UAF, or send an e-mail request to either tom.sp5uaf@... or sp5uaf@... [TNX SP5UAF]

QSL TF4X ---> Phil, G3SWH reports he has been appointed QSL manager for TF4X. There is already a log search facility on his web site (http://www.g3swh.org.uk), and any direct QSL requests already sent to TF4X will be forwarded to him.

X-TREME ---> IZ5MMK, IZ5MOQ and IZ5NFD, kindly hosted by NP2KW, are testing the HF Remote Base located in St. Croix, U.S. Virgin Islands (http://np2kw-hf-remote.yolasite.com/). This test has been established to allow amateurs to participate in the next contests (CQWW, WPX) into the X-treme Category, while experimenting creatively with Internet-linked stations and other new technologies. Note that the QSL will be only via NP2KW and note that the contacts are not valid for DXCC. [TNX IZ5MMK]

+ SILENT KEYS + Recently reported Silent Keys include Jorge Camboni (CX8BBH), Rowley Shears (G8KW), David L. Wiesen (K2VX), John J. Hughes (K6MB), Hector Hugo Galvan (LU2XT), Evgeny A. Kostromin (UA4RZ), Lawrence T. Fadner (W3GN) and George M. W. Badger (W6TC).

11917. ARLP047 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-11-20 20:32:35 UTC
From: jjreisert@alum.mit.edu
Topic: 7313 Message: 11917

SB PROP @ ARL $ARLP047
ARLP047 Propagation de K7RA

ZCZC AP47
QST de W1AW
Propagation Forecast Bulletin 47 ARLP047
>From Tad Cook, K7RA
Seattle, WA November 20, 2009
To all radio amateurs

SB PROP ARL ARLP047
ARLP047 Propagation de K7RA

Sunspot activity seems to be increasing steadily of late. Daily sunspot numbers for November 5-19 were 15, 16, 11, 0, 14, 13, 11, 11, 0, 0, 11, 12, 0, 29 and 30.

Sunspot 1029 made its trip around the Sun and has re-emerged as sunspot 1032, and a new sunspot 1033 has come over the eastern limb. This steady appearance of sunspots has raised the MUF over many paths, and 15 meters is beginning to open regularly.

In the Southern Hemisphere, which gets more solar radiation this time of year, you can see a pronounced effect on the foF2 reading in the afternoon (local time is UTC+6.5 hours) on the web site http://www.swpc.noaa.gov/ftpdir/lists/iono_day/Cocos_Is_iono.txt.

This is a measurement taken with an ionospheric sounder on Cocos-Keeling Islands in the Indian Ocean, 12.5 degrees South latitude and 96.8 degrees East longitude. The instrument sweeps a radio signal across the HF spectrum, beamed straight up to the ionosphere overhead, and it measures the strength of the signal bouncing back to determine optimum frequency. You can see during mid-day foF2 is going above 10 MHz.

Of course, your results may vary. The effect was pronounced from 0600-1400z on November 19, and not quite as enhanced on November 20, 0700-1000z. Unfortunately, these ionosonde records don't go back but a day or two. You will see less effect this time of year in the Northern Hemisphere, as seen at a record of ionosonde data in Italy on the http://www.swpc.noaa.gov/ftpdir/lists/iono_day/Rome_iono.txt site. On the http://www.swpc.noaa.gov/ftpdir/lists/iono_day/Chilton_iono.txt site see similar data taken in the UK.

At http://www.swpc.noaa.gov/ftpdir/lists/iono_day you can check a list of links for 68 different locations, but some of them seem

inactive. For instance, after months of checking, I have never seen a bit of ionosonde data from Eglin Air Force Base in Florida, in the file "Eglin_iono.txt."

Another interesting tool to see varying MUF around the world, updated every five minutes, is at, http://www.spacew.com/www/realtime.php. The contour lines show the MUF over that particular area. During the day recently some areas over Africa are going above 30 MHz.

This weekend is the ARRL SSB Sweepstakes Contest, and conditions are expected to be good for this popular domestic operating event. There is a possibility of some disturbance from unsettled geomagnetic conditions, possibly peaking on Saturday. Predicted planetary A index for November 20-24 is 10, 15, 10, 6 and 5. Possible mild disturbance on Saturday would be from a wind stream from a coronal hole that currently faces Earth.

Predicted solar flux for the near term is 78 for November 20-21, 80 for November 22-26, and 70 on into early December.

Evan Rolek, K9SQG of Beavercreek, Ohio has been noting stateside and short skip 40 meter conditions this year. Back on April 20, he wrote "Over the past month, 40 meters has been dismal for daytime net activities. In addition to storm-related static, signals range from "normal" to 20-30 dB below normal. Interestingly, I'm experiencing one-way skip with certain stations, but not all. For example, a station that I share net control with on the Georgia 40 Meter Traders' Net on Sunday morning is down something like 15-20 dB on my S-meter. Still solid copy but he is unable to copy me at all."

But recently Evan notes an improvement. On November 16, he wrote observations "based upon some 40 meter swap and technical net participation. Recent weeks have shown an improvement in signal strength and areas of coverage in the 1400-1500z and 2000-2100z time frames (morning and afternoon on North America's East Coast). Signals are up 10-30 dB (yes, ten to thirty decibels) and the areas of coverage have improved. Close-in regions under 200 miles that were almost uncopyable for the past several months now have signals that are 10-35 dB over S9. Talking with stations in Minnesota, Louisiana, New Hampshire, Florida, Mississippi, etc. are becoming more frequent. I hope this is the sign of improvements for a long term basis."

Check out http://www.physorg.com/news177872248.html to read an interesting article about a solar tsunami, and how STEREO gives a 3-dimensional view to better judge the height of solar disturbances.

Larry Godek, W0OGH of Gilbert, Arizona says conditions are improving.

Larry writes, "First of all, I run only 100 watts here and all antennas except for the 20 meter beam at 30 feet are dipoles. DX has been quite good of recent.

"For me to work anything on 20 meter SSB which is normally KW Alley, is something that hasn't happened for years and years around here. However as I've worked ZB2EO, 6W/EI6DX, T30KI, ZS6JPY (40 meter SSB) and TL0A which is not impressive to some but it sure gets my attention.

"Surprisingly the African contacts have been in the morning hours, who I normally can't work, much less hear, until after 2100Z. Just too much RF blocking going on to the east of me.

"This morning on the ZB2 station, I had called him a few minutes earlier but again the east coast was doing all the talking. Shortly thereafter I heard him calling CQ DX with no answers. While signals were only about 5-5 both ways, it was a clear path with no other stations heard on the frequency. Quite a surprise.

"Last night, November 13 (0346z) ZS6JPY was heard calling CQ on 40 SSB. No one appeared to be returning his calls so I gave him a shout. Again using 100 watts and a weird 40 meter dipole antenna configuration I was able to work him.

"Kind of reminds me of the days back in the late 50s when you could load up the bedspring and work the world. WOW! Things are improving!

"Lots of DX on the 30 meter band from Europe as well as the Caribbean region and Pacific. The CW bands have been much better. I've even been able to work DX on 17 meters with the 20 meter beam, greatly reduced power of course, but never the less, propagation was good enough for it to happen."

Vic Woodling, WB4SLM of Centerville, Georgia (EM82dp) experienced some interesting tropospheric propagation earlier this week. Vic wrote, "Tropo last night (14-15 Nov) early this morning across the southeast to the southwest. Couple examples: worked our old friend Pat WA5IYX (San Antonio, Texas EL09ql) on 2 meter CW, 909 miles. Also made a "sweep" from 6 meters, 2 meters, 222, 432, 902, 1296, and 2304 MHz with OM Bill W3XO/5 (Kerrville, Texas EM00kd), 925 miles. I 'think' but really can't remember if this was my personal best on 6 meter tropo, but should be. I know it was (my best) on 2304 902 MHz. In chatting with Bill W3XO and Drew KO4MA (New Port Richey, Florida EL88pg) early this AM they said they had a 997 mile contact on 222 MHz."

After this weekend, when we have the ARRL SSB Sweepstakes Contest, the following weekend (November 28-29) is the CQ Worldwide CW DX Contest, followed by the ARRL 160 Meter Contest December 4-6, then the ARRL 10 Meter Contest, December 12-13.

This weekend we should see some propagation on 15 meters over the domestic paths for the contest. For instance, Dallas to Seattle should be good on 15 meters 1630-2130z, 10 meters possibly 1800-2000z. California to Ohio on 15 meters should work 1600-2130z, and possibly 1630-2030z. Dallas to Boston looks good for 15 meters 1600-1930z, and Dallas to Vancouver looks good on 15 meters 1630-2130z. Atlanta to Edmonton, Alberta also looks good for 15 meters 1630-2030z, with 10 meter possible 1730-1900z.

James French, W8ISS sent in a comment in response to the info about backscatter in last week's bulletin.

He writes, "We had this exact thing happen on ten meters Just before the November Sweepstakes started November 7th.

"Gave a call out asking if the frequency was in use, then started calling CQ. With the newly installed tri-band beam pointed west, a local station about ten miles away answered back. He said we were weak so we swung the beam East (his direction) and lost him totally. Swung the beam back West again and there he was. We were in Ann Arbor, MI and the other gent was in Belleville, MI. Was using W8ISS from the Red Cross station.

"I was wondering if we had installed the beam backwards as we had just gotten it up on the 65' tower about two weeks ago and was getting ready for Sweepstakes that weekend. Jay, WB8TKL, told me about how it was probably backscatter. I wouldn't have thought it possible that close, but there it had happened in front of me."

Finally, Chris Kelly, K0PF tells a story about operating mobile recently, and experiencing some of that old shortwave magic.

"My note regards an interesting contact I had the other night.

"I was driving to Colorado State University about 9 PM to pick up my son (K0PFJ) who had a late exam, and I decided to switch on the IC-706MK2G in the pickup and see if there was anything happening in this lowest of sunspot days. I heard and worked a station on Vancouver Island, who was very kind and turned his 20 Meters beam my way because he heard a mobile.

"He was working a lot of JAs who were barely audible to me. I tuned around a bit and heard an interesting accent and called, receiving a 5/7 report from ZL1BOS. I thought this was quite a feat from a 100 watt mobile (he must have a good antenna and receiver).

"A few minutes later and all the JAs had faded out and 20 seemed dead. I dropped to 40 meters, and promptly heard a ZS1, about 5/5. By the way, the antenna on the truck was a Hustler whip using a 20 meter resonator, tuned with a SGC antenna coupler. Not even the right resonator for 40.

"I have been a ham for almost 3 sunspot cycles, and while I am not very active right now (obviously busy raising a family), I am still

amazed at the propagation that opens up even at the bottom of the cycle. Hearing the opposite side of the Earth via two paths on the same night from a mobile station. Wow!"

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for November 12 through 18 were 11, 0, 0, 11, 12, 0, and 29 with a mean of 9. 10.7 cm flux was 73.2, 74.1, 74.8, 75.1, 76.2, 77.2, and 76.1 with a mean of 75.2. Estimated planetary A indices were 1, 2, 5, 4, 1, 1 and 2 with a mean of 2.3. Estimated mid-latitude A indices were 0, 2, 3, 3, 0, 0 and 2 with a mean of 1.4.

11918. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-20 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11918

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 20 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 324 Issued at 2200Z on 20 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 19/2100Z
to 20/2100Z: Solar activity has been at very low levels for the past
24 hours. Region 1033 (N21E23), a Bxo-beta, has continued to grow in
size and sunspot number. Region 1032 (N16W03), a Bxo-beta, has shown
a slight decay in spots and area. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be at
very low levels with a slight chance for a C-class flare.
IIA. Geophysical Activity Summary 19/2100Z to 20/2100Z:
The geomagnetic field has been at quiet levels for the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be unsettled with a slight chance for an active period
on day one (21 November) due to a recurrent coronal hole high-speed
stream. Conditions are expected to be predominantly at quiet levels
for day two and three (22-23 November).
III. Event Probabilities 21 Nov-23 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 20 Nov 076
Predicted 21 Nov-23 Nov 078/078/078
90 Day Mean 20 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 19 Nov 000/002
Estimated Afr/Ap 20 Nov 003/005
Predicted Afr/Ap 21 Nov-23 Nov 012/012-007/007-005/005
VI. Geomagnetic Activity Probabilities 21 Nov-23 Nov
A. Middle Latitudes
Active 15/10/05
Minor storm 10/05/01
Major-severe storm 01/01/01
```

11919. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-21 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11919

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 21 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 325 Issued at 2200Z on 21 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 20/2100Z
to 21/2100Z: Solar activity was very low. Region 1033 (N18E07)
remains a Bxo-beta region. No significant flares were observed
during the past 24 hours. The SOHO/C2 images observed a slow moving
(around 200 km/s) Earth directed CME at 21/0755Z. EIT images also
showed a wave pattern, associated with the CME, located in the
vicinity of a filament channel around S40E30.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low with a slight chance for a C-class flare.
IIA. Geophysical Activity Summary 20/2100Z to 21/2100Z:
The geomagnetic field was quiet to unsettled. Observations from the
ACE spacecraft indicate the continued influence of a recurrent
coronal hole high speed stream. Solar wind speed rose through the
period from 430 -575 km/s with Bz fluctuations from -8 to +9 nT.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (22-24
November).

Ohio/Penn DX Bulletin No. 935

The Ohio/Penn DX PacketCluster
DX Bulletin No. 935
BID: $OPDX.935
November 23, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1M, K1XN & GoList, NJ1Q, NO2R, K3IRV, N3SL, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, K8YSE, KE0UI, AT International, CO8TW, DJ7IK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, JG7PSJ, OZ1JTE, PA1WLB, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW and VU2PTT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-November, through Sunday, 22nd-November there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FK/c, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9X, VP2M, VP2V, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA (Update). Just a reminder/update that a German team will operate from the "Radio Club Station of Tunisian Scouts" (3V8SS) in Sousse, using the special callsign 3V3S between November 23rd and December 2nd. Operators mentioned are: Andy/DJ7IK, Jan/DJ8NK, Guenter/DJ9CB, Andreas/DL9USA and Lars/DF1LON. Also, operators Halim and Ashraf (from the 3V8SS station) will join the German team. The team will set up and

use a spiderbeam and verticals antennas. All antennas will be donated to the 3V8SS station. Look for them to also participate in the CQWW DX CW Contest (November 28-29th) as a Multi-Single/Low-Power entry. QSL via DL9USA. A Web page will be active soon at: http://www.3V3S.tk

5P15, DENMARK (Special Event/IOTA). Look for special event station 5P15COP from Zealand Island (EU-029) to be active between December 7-18th. Activity is taking place during the big United Nations "Copenhagen Climate Change Conference" <http://www.cop15.dk>. Operators would like to "invite all radio amateurs worldwide to show their concern and care about the environment and climate, by contacting this special event station." Operations will be on 160-6 meters using CW, SSB and the Digital modes. QSL via OZ5BAL, direct or by the Bureau. For more details about the project, QSL card and awards available, please visit: http://at www.5p15cop.dk

A2, BOTSWANA. Just a reminder that Mike, K9NW, will be active as A25NW between November 23rd and December 1st. Activity will include the CQWW DX CW Contest (November 28-29th). QSL via his home callsign (QRZ.com).

A7, QATAR. Operators Ali/A71BX, Juma/A71EM and David/K5GN will be active as A73A during the CQWW DX CW Contest (November 28-29th) as a Multi-Op/ All-Bands/Single-Transmitter entry. Operations will be from A71BX's QTH. QSL via EA7FTR.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R from Tumon (OC-026, USI GU003S, WLOTA L-0064) during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, Kazunori/JK3GAD, and Nozomu/JE8KKX. QSL via JH7QXJ.

C4, CYPRUS. Marios, 5B4WN, will be active as C4W during the CQWW DX CW Contest (November 28-29th) as Single-Op/All-Band entry. QSL is via the LoTW. QSLs via the Bureau are also available via the "self-QSL" button on: http://www.5b4wn.com

CO/CM, CUBA. Look for the following Cuban stations to be active in the CQWW DX CW Contest (November 28-29th):
CO8LY - Operator Eduardo as a Single-Op/Single-Band (15m)/Low-Power. QSL via EA7ADH.
CM8CAD - Operator Carlos as a Single-Op/Single-Band (40m)/Low-Power. QSL via info QRZ.com.
CO8TW - Operator Juan as a Single-Op/Single-Band (160m)/Low-Power. QSL via HB9SVT.

CN, MOROCCO. Stefano, IK2QEI, will be active as CN3A from Safi during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. He states that he will possibly be a "SOAB" if the new 80m system is ready for the contest. QSL via LoTW or via I2WIJ.

CQ MAGAZINE'S "DIAMOND JUBILEE WAZ AWARD" (#002 issued). Congratulations to James "Scotty" Scott, WK3N, of Hartstown, PA, for receiving the 2nd

75th anniversary limited-term "Diamond Jubilee WAZ" award. He submitted valid and proper confirmations of contacts with each of the 40 CQ WAZ zones to earn this special certificate. For complete details on the "Diamond Jubilee WAZ Award ", check out CQ's October 2009 issue, or visit the CQ Web site at: http://www.cq-amateur-radio.com

D6, COMOROS. Reports indicate that Serge, F6AML, who was expected to be active as D68F this past week, had to cancel his operation due to the political situation in D6-land. It was also reported that Serge apparently had all of his equipment confiscated and has returned to France.

DU, PHILIPPINES. By the time you read this, Gerard, F2JD, who was active as DU1/G0SHN will be back in France (around November 20th). OPDX was told that Gerarde was not very active while in Manilla (around 300 QSOs) due to a high noise level. He is expected to be back in the Philippines sometime in February and plans to get another antenna for his multiple activities while he travels the neighboring islands. His log is available at: http://LesNouvellesDX.fr/voirlogs.php

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (160m) entry. However, due to business commitment, Nodir will only be active during the first 24 hours of the contest. QSL K1BV via direct, by the Bureau or LoTW.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands (include topband). He has announced that he will be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via F8BPN, direct, by the bureau, LotW.

FO/A, AUSTRAL ISLANDS. German operators Wulf/DL1AWI, Peter/DL3APO and Mat/DL5XU will be active as FO/homecall from Raivavae Island (OC-114, DIFO FO-122, WLOTA L-2581) in the Austral Islands group between January 18th and February 5th. Their focus will be mainly the lower bands 160-30 meters, but will work some higher bands on SSB and RTTY. QSL via their home callsigns, direct or by the Bureau.

IOTA NEWS.....
AS-105. Kang, DS2AGH, and a group of operators will be active as 6M0HZ/2 from Kanghwa Island during the CQWW DX CW Contest (November 28-29th). QSL via DS2AGH.

J3, GRENADA (NA-024). Operators Colin/G3VCQ and Sharon/M3VCQ will once again be active as J38CW and J38SW from Beru between March 11-25th. Activity will be on all HF bands and modes. All QSLs are via G3VCQ, direct or by the bureau.

J6, ST. LUCIA. Bill, K9HZ, will once again be active as J68HZ from Labrelotte Bay, Castries, St. Lucia (NA-108, WLOTA L-1336) between now and December 5th. Activity will be on 80/40/20 meters using CW and SSB. Suggested frequencies are: CW - 3550, 7050 and 14050 kHz
SSB - 3770, 7155 and 14155 kHz

He also mentions to watch 40 meters between 2000-2400z daily. Operations from other local islands are possible. QSL via his home callsign.

J6, ST. LUCIA. Scott, NE1RD, will be active as J6/homecall between February 2-10th (2010). Activity will be on all HF bands and modes. QSL via his home callsign, direct or by the Bureau. Logs will be uploaded to LoTW.

J6, ST. LUCIA. Members of the "Buddies in the Caribbean" DXpedition group which specializes in 100 watt or less low power radios and the Buddipole portable antenna system is off again to a new DXpedition site on February 2-11th, 2010. This is an annual effort to demonstrate "ultra-lite" DXpeditioning into magnificent "vista" locations, operate a field portable battery-only radio with backpackable, lightweight antennas and most of all "have fun!" The nine operators from eight states will have fixed operations from a cliff-top villa and portable operations from various points on the island using CW, SSB, and the Digital modes. Operators mentioned are: Budd/W3FF, Chris/W6HFP, Scott/NE1RD, Dan/WZ1P, Steve/WG0AT, Mike/KC4VG, Guy/N7UN, Paul/KB9AVO and Wey/K8EAB. Licensing is not yet complete, but each operator is expected to receive their own callsign. QSL via LoTW, eQSL, or mail to operator's home callsign (SASE required). For more details, see:
http://sites.google.com/site/caribbeanbuddies/home
http://caribbeanbuddies.blogspot.com/

J8, ST. VINCENT. George, K2CM, will be active from the Island of Bequia, in The Grenadines (NA-025), between January 8th and February 12th (2010). Callsign was not provided. Activity will be on 20 meters using CW and SSB, and maybe 40 meters CW. QSL by the Bureau or direct (SASE/SAE) to K2CM.

JD1/O, OGASAWARA. OPDX was informed by Harry/JG7PSJ that Makoto/JI5RPT and he will once again be active from Chichijima Island (AS-031) between Sunday, December 27th, and Friday, January 1st (2010). Their callsigns will be JD1BLY (JI5RPT) and JD1BMH(JG7PSJ). Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via the Bureau to the JD1 callsigns or direct to their home callsigns. For more info, visit their Web pages at: http://www.ji5rpt.com/jd1
http://sapphire.es.tohoku.ac.jp/jd1bmh

KH6BZF PROPAGATION FORECAST/REPORT (For November 23-22nd)....
Nov 23 AN SOLAR REFERENCE
Nov 24 AN ---------------
Nov 25 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 26 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 27 AN LN - Low Normal
Nov 28 AN
Nov 29 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less

UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via F5SHQ.

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via WC4E. PLEASE NOTE: He may also use KP3Z as the callsign.

OFFICERS FOR 2009-2010. The following persons have been elected to committee the Oceania Amateur Radio DX Group Inc. for 2009/2010:
President : Bill Horner/VK4FW
Vice President : John Mcrae/VK5PO
Secretary/Treasurer : Eric Fittock/VK4NEF
Directors : Elvira Simoncini/IV3FSG
Mill Reiff/LX1CC
Chris Chapman/VK3QB
Eddie DeYoung/VK4AN
Web Master : John Mcrae/VK5PO
QSL Manager : Bill Horner/VK4FW

PB500, THE NETHERLANDS (Special Event). Look for special event station PB500GT to be active between November 28th and December 13th. Activity is to celebrate the 500th anniversary of the "GREAT TOWER of BREDA" (in Dutch Grote Toren). Operators will operate at a height of 65m from the Great Toren. This Great Tower is located in the middle of the city. Operations will be on 80/40/20/2 meters using SSB and the Digital modes. QSL Manager is Willem, PA1WLB. For more details about the tower, see:
http://www.torenbreda.nl
Also, look under PB500GT on QRZ.com.

QSL INFO AND NEWS.....
GA2MP QSL/LOG STATUS. QSL Manager Steve, N3SL, reports: "The special event callsign, GA2MP, will be retired on November 30th. Current logs are in LoTW as of November 19th. QSLs are on order but will not be in-hand before the December 31st cutoff for DXCC. If anyone needs a card for their 2009 DXCC submission, N3SL can fill your request using a GS2MP card. Simply indicate that with your QSL. Those who already have sent an SASE, please E-mail N3SL at <n3sl@...t> with a request to confirm using the GS2MP card. All others will be answered when the new cards arrive."

NEW QSL ROUTE FOR ZW5UN AND PT5UN. Irv, K3IRV, informs that he is now the QSL Manager for both ZW5UN and PT5UN. The QSL Manager was Oms, PP5EG. Since Irv was the QSL Manager for PP5EG, he talked to Oms and now he will also have the logs and cards for those two callsigns.

QSLS VIA LOTW: 7Q7AA, D2BB, PY1ZBA and S04R

QSLS RECEIVED VIA MAIL: 5H1EE, 5V7SE, 8R1DB, 8R1TO, 9G5ZZ, 9M6/JJ2CJB, 9Y4D, A61BK, A73A, BD9TD, C31CT, DX1J, EA9LZ, EK7DX, FK8GM, FO/G3BJ, FS/K1XM, GP0STH, J28JA, TK9X, VK9LA, WP3C, YI1RZ, ZK2NX and ZL7/N7OU

QSLS RECEIVED VIA THE BUREAU: 3X5A, 5J0A, 5L2MS, 7Q7CE, 8R1XR, 9Y4W, FJ/DJ2VO, J5UAP, and V73PX

S2, BANGLADESH (IOTA DXpedition). Operators Tutul/S21RC, Manjurul/S21AM, Sohel/S21S and Aminul/S21D are preparing a DXpedition in February 2010 to St. Martin's Island (AS-127) located in Chittagong Region Group. Dates mentioned are February 21-25th. QSL Manager will be EB7DX. More details will be forthcoming.

ST, SUDAN. Robert, S53R, will be active as ST2KSS from Khartoum during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (15m) entry. QSL via ST2M or by his instructions.

ST26, SUDAN. Look for the special callsign ST26ASC to be used between January 22□28th (2010). This activity coincides with the 26th Arab Scouts Conference from Khartoum, Sudan. No other details were provided. QSL Manager will be ST2M.

TF, ICELAND (On the Birds!). Ari, TF3ARI, has been worked on AO-51! Ari first appeared on AO-51 on October 24th, using a TS2000 and just a vertical antenna. John, K8YSE, reports that he has E-mailed Ari and learned he has now installed a UHF preamp (so he can hear better). Since North America is always near the horizon for him, his vertical antenna and preamp work well (Not many trees in Iceland!). Watch for Ari on early morning weekend passes on AO-51. John states that Ari will be on again during most Sunday mornings.

TI5, COSTA RICA. Phil, N0KE, will be active as TI5/N0KE starting November 25th. QSL via his home callsign. He also plans to be active as TI5N during the CQWW DX CW Contest (November 28-29th) as Single-Band (15m) entry. QSL via W3HNK or LoTW.

TJ, CAMEROON. Lionel, F5PSA, currently active as TJ3SL, will be here until around December 15th. His activity has been sporadic, but he is trying to be active daily, propagation permitting. Operations have been mainly 20 and 17 meters usually between 0930-1700z. QSL via F5PSA.

TM2, FRANCE. Look for TM2S to be used in the CQWW DX CW (October 28-29th) as a Multi-Single entry. QSL via F5PED. Operators mentioned are: Matt/ F5PED, Dany/F5CW, Bruno/F5AGB, Michel/F5IN, Emmanuel/F5NCU, Maurice/F5NQL, Serge/F6DZS and possibly Breton/F5QF.

TO4/FG, GUADELOUPE. Serge, F6AUS, will continue be active as FG/F6AUS until Match (2010). Look for him to be in the CQWW DX CW Contest (November 28-29th) as TO4D. He plans to be active on 160-6 meters. Over the past weekend Serge was on 80/40/30 meters CW. QSL via his home callsign.

TO5, MARTINIQUE (NA-107). Al, F5VHJ, will be active as TO5A during the ARRL DX SSB Contest (March 6-7th, 2010) as a Single-Op/All-Band/High-Power

entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

TX3, CHESTERFIELD ISLAND.. Operators George/AA7JV and Tomi/HA7RY continue to be active as TX3A until December 6th. As of print time, their log shows just under 27k QSOs. Activity has be on all HF bands but with an emphasis on the lower bands. Modes used have been on CW, SSB and RTTY. QSL via HA7RY. For more detailed information and updates, visit their Web page at: http://www.TX3A.com

V3, BELIZE. Alex, KU1CW, will be active as V31CW between November 23rd and December 2nd. His wife Natasha, KD0AKI, will also be active as V31YL. Alex is also expected to be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or direct to KU1CW.

V3, BELIZE. Wil, PA0WWV, will be active as V31WV from Sarteneja (northern Belize) between now and December 20th. Activity will be on CW and SSB using a FT1000mp MarkV w/amp at 750 watts. His antenna is a 30 ft. vertical close to the beach. QSL direct only with 2 USDs plus SAE (NO IRCs).

VP2M, MONTSERRAT. Mike, W1USN, will once again be active as VP2MPR between February 28th and March 13th (2010). Mike will work mainly SSB and PSK31. Bob, AA1M, will also return to Montserrat and will operate mostly CW as VP2MPL between March 6-11th. QSL both operators via their home callsigns.

VP9, BERMUDA (Update). Bob, KE0UI, will be active from here between November 25th and December 1st, and will operate as VP9I in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via N1HRA. For details about the station and QSL route, visit: http://vp9ge.com/vp9i.htm
Bob will operate as VP9/KE0UI before and after the contest on 160-10 meters with an emphasis on the 30/17/12 meter bands. QSL VP9/KE0UI via his home callsign.

VU, INDIA (News). OPDX was informed by Prasad, VU2PTT, that Gopal Madhavan, VU2GMN, who is the President of ARSI - the IARU recognized national organization of India, is reporting he spoke with the "Wireless Planning & Coordination Wing (WPC), India's Ministry of Communications and Inform-ation Technology Department of Telecommunications, and they have confirmed that the extra bandwidth (on 40m) has been officially released to VU radio amateurs based on the petitions given by ARSI on April 15, 2009, soon after the band was to be released as per agreement in WRC2003. VU hams can now officially use that extra bandwidth. Gopal also mentioned, "They have also confirmed that the other requests made by ARSI regarding 10 MHz and 50 MHz are also under consideration, so please wait for further news."

VU2, INDIA. Prasad, VU2PTT, will be active during the CQWW DX CW Contest (November 29-30th) as a Single-Op/All-Band/High-Power entry (or possibly a Single-Op/Single-Band [80m] entry). Entry depends on whether his beam will get fixed in time for the contest, or else he will do a full SOSB 80m running 400W to Inverted-L. QSL via the LoTW or direct using the info

on QRZ.com.

XU7, CAMBODIA (Update). Last week we mentioned that Peter, NO2R, will once again be active as XU7ACY from Sihanouk Ville during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Lower-Power entry. He informs OPDX that he will be there for another year or more. Look for him to be active on all bands using CW and SSB. QSL via W2EN.

11925. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-22 22:11:02 UTC
From: Paul Dunphy
Topic: 9721 Message: 11925

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 22 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 326 Issued at 2200Z on 22 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. Region 1033 (N18W05) was the only spotted group
on the disk but appeared to have decayed to spotless plage by the
end of the period.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
The geomagnetic field was quiet during the past 24 hours. Solar wind
speeds were somewhat elevated during the past 24 hours with
velocities ranging between 460-560 km/s. Nonetheless the
interplanetary magnetic field was generally weak (typically 3-4 nT)
and the fluctuations in the southward component, Bz, were also weak
(typically between +/- 3 nT).
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (23-25 November).
III. Event Probabilities 23 Nov-25 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 22 Nov 076
Predicted 23 Nov-25 Nov 075/075/075
90 Day Mean 22 Nov 072
V. Geomagnetic A Indices
Observed Afr/Ap 21 Nov 006/008
Estimated Afr/Ap 22 Nov 005/005
Predicted Afr/Ap 23 Nov-25 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 23 Nov-25 Nov
A. Middle Latitudes
Active 10/10/10
Minor storm 05/05/05
Major-severe storm 01/01/01
```

11926. Re: [DX-IS] Report of Solar-Geophysical Activity

From: Deacon Dave
Topic: 9721 Message: 11926

Have you noticed that Paul is beginning to let those SFI numbers slip?

It seems that it happens every 25 days. It looks like he's losing his control at the SOL Factory. :-)

11928. TL8HW Silent Key

Yahoo group: DX-IS (2009)
Date: 2009-11-23 23:49:36 UTC
From: w4fc@aol.com
Topic: 11928 Message: 11928

It is with sadness that I report the passing of
Tracy Hull, TL8HW. In the late 1980's he was
very active from Bangui, Central African Republic.
He was a Baptist missionary and served there
for over 20 years until the political situation
prohibited him from returning. He died from a
heart attack at the age of 69 in Clermont, FL.
He gave out many new country contacts while
there.
Paul, W4FC, ex-WB4LFM

11929. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-24 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11929

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 328 Issued at 2200Z on 24 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar Activity was very low. No flares occurred during
the past 24 hours. The disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet to unsettled. The ACE spacecraft
detected the arrival of a co-rotating interaction region at
24/0600Z. Solar wind speeds began to increase at 24/0800Z and
reached about 450 km/sec by 24/1800Z. The elevated wind speed and
fluctuating Bt/Bz caused three unsettled periods, 24/1200-2100Z.
IIB. Geophysical Activity Forecast: Geomagnetic activity on day one
(25 Nov) is expected to be mostly quiet with a chance for unsettled
periods due to persistence of current solar wind conditions.
Conditions are expected to be quiet to unsettled again on day two
(26 Nov) based on recurrence. Quiet conditions are expected to
return on day three (27 Nov).
III. Event Probabilities 25 Nov-27 Nov
Class M 01/01/01

11930. 2008 Beijing Olympic Games Stations

Yahoo group: DX-IS (2009)
Date: 2009-11-24 22:19:38 UTC
From: kw3w
Topic: 11930 Message: 11930

Is anyone else having problems getting confirmations from either BT1OB, BT1OH, BT1OJ, BT1ON or BT1OY. I worked each station and forwarded cards with IRCs and SASEs to the QSl Manager (BA4EG) twice. I also sent inquiries to the email address posted for BA4EG on QRZ. I never received any type of reply. The website for the stations has been inaccessible sine the first of the year. Does anyone know of an alternate route? Thanks, Reggie (KW3W)

The numbers are not boding well for the contest this weekend. Conditions here have not been particularly good these past few days. Tonight I am hearing 3V3S on 40 at an S-2. I worked 9L7NS, 9G5TT and 9L1NH on 20 earlier but they were a rough go. However, CN2R on 17 was a one-caller. And although I saw lots of intriguing spots on 17, I couldn't hear much. I'll be LP for the contest and fear I won't do well. But we live in hope.

Subject: [DX-IS] Report of Solar-Geophysical Activity

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 24 2200 UTC
Prepared jointly by the U.S. Dept. of Commerce, NOAA, # Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity SDF Number 328
Issued at 2200Z on 24 Nov 2009 IA. Analysis of Solar Active Regions and Activity from 23/2100Z to 24/2100Z: Solar Activity was very low. No flares occurred during the past 24 hours. The disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very low.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet to unsettled. The ACE spacecraft detected the arrival of a co-rotating interaction region at 24/0600Z. Solar wind speeds began to increase at 24/0800Z and reached about 450 km/sec by 24/1800Z. The elevated wind speed and fluctuating Bt/Bz caused three unsettled periods, 24/1200-2100Z.
IIB. Geophysical Activity Forecast: Geomagnetic activity on day one (25 Nov) is expected to be mostly quiet with a chance for unsettled periods due to persistence of current solar wind conditions.
Conditions are expected to be quiet to unsettled again on day two (26 Nov) based on recurrence. Quiet conditions are expected to return on day three (27 Nov).
III. Event Probabilities 25 Nov-27 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux

Observed 24 Nov 075
Predicted 25 Nov-27 Nov 075/075/073
90 Day Mean 24 Nov 072
V. Geomagnetic A Indices
Observed Afr/Ap 23 Nov 000/000
Estimated Afr/Ap 24 Nov 005/005
Predicted Afr/Ap 25 Nov-27 Nov 007/008-007/007-005/005 VI. Geomagnetic Activity Probabilities 25 Nov-27 Nov A. Middle Latitudes
Active 20/20/10
Minor storm 10/10/05
Major-severe storm 05/05/01

The timing isn't great for the 28-day rotation, but sunspots can
and have been popping up more often so who knows? That prediction of
73 for 3 days hence is based on what they see now. Maybe the sun
will develop something in the next 3-4 days that will help things
over the weekend! Hope springs eternal.

Worked A31A and 5W0NH on 17M today (around 4-5 PM local) so
there is hope. They were not loud, but didn't seem to attracting
many callers either.

In goggleing for some info on a 4Z station, I ran across an item from their Postal Ministry, that indicated that if my xmas cards were forwarded to them, I could have them specially posted from the Holy Land. The web page was dated 1999, but I can't find anything else. I emailed the ham, but have not recieved a reply (possibly he does not check email very often).
Anybody know of such a program?

The only reason I asked on this board is that we deal with DX and he was a ham.

Happy turke y day to all!

For the cost of mailing the cards back to the USA + $10.00 to cover my cost of driving there, I will be happy to have the PO in Christmas Island, NS, hand frank the envelopes. They'd have to be in my hands no later than December 10th to reasonably guarantee delivery before Christmas. BTW, it is essentially US $1.00 to mail from Canada to the US and I would provide a Canadian Xmas stamp for your envelopes.

I'm a ham and I'm a lot closer than the Holy Land. :-)

That is great news! I could use some of that kind of help.

I have sent for the QSLs direct three times with SAE and either IRCs or green stamps. (I've tried both!) The last time, I addressed the envelope in Chinese. No replies received.

I have also sent for the certificate. No luck with that either. I had enough points for the Gold level certificate.

I DID receive a prompt QSL from VR2008O, the Olympic station in Hong Kong.

This is very disappointing. The Chinese did a great job with the Olympics in general, and the five BT1O stations were very active. Unfortunately, their QSLing performance so far has been abysmal.

Guys,

There is a 15 page article about Mount Athos in the most recent National Geographic.

"Center of Orthodox monasticism for 1000 years, the self-governing peninsula of Mount Athos is virtually walled off from mainland Greece by rugged terrain and lack of roads, its 20 monasteries reachable only by boat"

No YL's allowed. As one monk says "If womem were to come here, two-thirds of us would go of with them and get married"

So there are another 19 possible monasteries for possible dxpeditions. Another part says there is no electricity. However, one pix shows one monastery clearly illuminated by electric lights. Monk Apollo clearly is getting his watts from somewhere.

Interesting reading.

Nice pixs and story about VP8/F too in same issue.

With the CQWW CW coming up this weekend, there are a number of places being "activated" that, while not exactly rare, are not exactly common either. Condx are just good enough that - before and after the contest - 17, 30 and sometimes even 12, will have activity in places that one might not hear on a regular basis.

Those periods either side of a big contest are often very interesting for those with "entities" still yet to chase!

Good luck!

My wife got all excited just a few minutes ago. There was an announcement for Somalia. I asked her what the call was and she said "T5TT!" I quickly responded "..Somalia is pretty tough these days - that's actually supposed to be 9G5TT in Ghana." Ghana isn't exactly rare, but you don't hear it every day. Somalia is another story. I wouldn't go there on a bet!

Yes, I have worked a few of the contest station getting ready. Let us hope the take the opportunity to move around after the contest.

I saw the T5TT spot ??

I worked ZC4VJ on CW this AM with a pounding signal on 15 meters. For some reason I have never heard ZC on CW before. In fact, although I don't work RTTY, I was setting up RTTY yesterday, as I thought it would be the only way to work him.

It looks like I may live to see another sun spot cycle, HI.

You got it right, Art. Major contests bring out the rare stuff
and open dead bands. Too band more people wouldn't check 15/12/10
for beacons or just get on and call VQ. All most of us ever so is
make a quick spin of the band and assume it is dead, and go back to 20/17.

I'm gonna miss CQ WW this weekend. Have family obligations I
can't get out of! The best contest of the season, and I am not going
to be here. My oldest son decided he wanted to visit Cape Breton, so
we are going to head there Friday and come back Sunday. It is a God
forsaken place, and I can't understand why anyone would want to visit
there, let alone live there. Terrible place. Rotten weather and
rotten propagation. (This designed to get a response from VE1AL,
who will have to represent VE1 in the contest! :-))

Al, it will be a whirlwind trip, so unlikely I'll have any time
for an eyeball -- just hitting the Cabot Trail and a few other spots
of interest. I used to live on Dorchester Street in Sydney for 2
years in the early 1970s, right beside the tar ponds, and I want to
go back and see them for nostalgia reasons.

Now that I think about it, living beside all that toxic waste
could explain many things . . . :-)

From: Alan Leith
Topic: 11947 Message: 11947

To all my stateside friends, a very Happy Thanksgiving.

I heard a fairly well-known east coast DXer today wish "happy holidays" to 7X2ARA. Please remember that the USA is the only country that celebrates Thanksgiving tomorrow. Canada, the only other country I know that does celebrate Thanksgiving, does so on the 2nd Sunday/Monday of October (our growing season is shorter :-)). Certainly there is no such holiday in the Moslem world and wishing happy holidays to someone who likely doesn't know what you're talking about is somewhat ludicrous.

Please eat lots and lots of turkey and fall asleep for the entire weekend so I can have the run of the bands in CQWW.

From: Alan Leith
Topic: 11948 Message: 11948

Is anyone else annoyed by the number of "tks new one" or "tks new band" or similar moronic remarks made on the cluster? Like, I mean I can live with it but it still annoys me greatly. Do the posters of such idiotic comments think I care, that the DX operator is sitting there reading the cluster spots and grinning because he's provided a new one, in fact, that anyone cares? Not bloody likely.

Also, as others have pointed out, I am frustrated by the number of spots that appear with errors in the callsign. If you can't type, can't read CW or are just plain stupid, do not post to the cluster.

I think the system needs better security. How to achieve that -- I haven't got a clue.

Rant over.

Can't see much of the tar ponds any more, Paul. They're in the process (after 20+ years of arguing with the tree huggers about the best method) of filling the ponds with cement/concrete to contain the sludge. I don't know if you'd recognize Dorchester St. any more. Many of the old buildings near the old train station and bordering on the tar ponds have been torn down after fires or simple neglect.

As for a tour of the Cabot Trail in late November, good luck. The weather for the weekend is dismal. Best time to tour the trail in the autumn, as you probably already know, is during the middle two weeks of October!

However, if you have to, you have to. I certainly understand.

I've been scouring the bands the last few days and have happily added a whole bunch of the contest stations to the log. My time in the contest will be limited but I'll be in there LP.

>Art - N4PJ

You got it right, Art. Major contests bring out the rare stuff and open dead bands. Too band more people wouldn't check 15/12/10 for beacons or just get on and call VQ. All most of us ever so is make a quick spin of the band and assume it is dead, and go back to 20/17.

I'm gonna miss CQ WW this weekend. Have family obligations I can't get out of! The best contest of the season, and I am not going to be here. My oldest son decided he wanted to visit Cape Breton, so we are going to head there Friday and come back Sunday. It is a God forsaken place, and I can't understand why anyone would want to visit there, let alone live there. Terrible place. Rotten weather and rotten propagation. (This designed to get a response from VE1AL, who will have to represent VE1 in the contest! :-))

Al, it will be a whirlwind trip, so unlikely I'll have any time for an eyeball -- just hitting the Cabot Trail and a few other spots of interest. I used to live on Dorchester Street in Sydney for 2 years in the early 1970s, right beside the tar ponds, and I want to go back and see them for nostalgia reasons.

Now that I think about it, living beside all that toxic waste could explain many things . . . :-)

73, Paul VE1DX/VE1/M

11951. Off-topic (sort of) -- Xmas Postage

Yahoo group: DX-IS (2009)
Date: 2009-11-25 20:03:07 UTC
From: Phil & Anne Irons
Topic: 11951 Message: 11951

This is only sort of off topic because we *do* send QSLs direct,
sometime, don't we?

This item is certainly of interest to Canadian hams--I don't know if it
applies to the US or other countries--probably not as I don't think they
have to pay tax on stamps!

I just got back from the Post office and found out there that if you
have mail going outside Canada, and the total is more than $10.00, your
postage is tax-free!!! The only condition is that you must apply the
stamp(s) right there--you can't take them home and apply them later.
This would work for DX QSL cards, too, I would imagine.

Just thought you'd be interested...

Propagation Forecast Bulletin 48 ARLP048
>From Tad Cook, K7RA
Seattle, WA November 25, 2009
To all radio amateurs

SB PROP ARL ARLP048
ARLP048 Propagation de K7RA

This is a brief Propagation Bulletin preceding the Thanksgiving holiday. ARRL headquarters is closed on Thanksgiving Day and the day after, Friday, November 27. Part of the reason for the brevity is because of limited internet access at the moment. I hope to have another bulletin out Monday morning to catch up with the sunspot, solar flux and geomagnetic data normally at the bottom of this bulletin.

Last Friday's Propagation Forecast Bulletin ARLP047 reported sunspot numbers for November 12-18 as 11, 0, 0, 11, 12, 0, and 29, and since then, November 19-24 they were 30, 31, 14, 13, 0 and 0. Nice conditions for the ARRL SSB Sweepstakes last weekend.

This weekend, November 28-29 is the CQ Worldwide CW DX Contest. Although recent activity seems a good trend, we have no indications when sunspots will return.

With increasing sunspot activity have come reports of openings on 15 meters.

Jack Emerson, W4TJE of Fancy Gap, Virginia says a friend in North Carolina copied the VR2B beacon (Hong Kong) at 21.15 MHz some mornings via long path.

Jack said he began listening, and most of the time the signal is barely copyable. But on November 23 at 1210z via long path Jack said he was able to hear the signal, although with S1 signal strength, 519. He was about to leave for work but decided to tune up the band, and on 21.255 MHz at 1212z found special event station VR2009EAG coming in very well at 5x5. Jack worked him with 100 watts, and swung another antenna around to the short path direction to make sure he was actually receiving the signal via long path propagation.

The evening before (November 22, local time) Jack heard more JA stations on 15 meters than he has ever heard during the new solar cycle. Jack worked UA0CM just after local sunset, with a 599 signal report.

Carl Luetzelschwab, K9LA reports recent openings on 12 meters.

Jon Jones, N0JK operated casually on a Sunday afternoon outing in the ARRL SSB Sweepstakes, and took along a 5 watt transceiver and a CB mag-mount whip. He was on a trap clay shoot outing at a friend's farm. Jack added some wire to the whip to get it to load on 15 meters, and reports "Figured it might be good enough to make a Q or two. To my surprise, it really got out! Over the next hour and a half I made 43 QSOs on 15 Meters, including some real DX like WP3R, AL1G and KH7XS. A number of stations commented 'great QRP signal!' Even some short E-skip to NM, TX and CO. But the comments that impressed me the most were: "thank you for getting on and helping out."

In Sweepstakes, weary contesters on Sunday afternoon digging for new calls really appreciate the casual operators getting on to give out some needed contacts. Jon's 43 contacts were with 20 sections.

Aki Akai, JQ2UOZ of Nagoya, Japan has also had good luck on 15 meters recently, running 500 milliwatts into a dipole on his apartment balcony. You can watch a video at http://www.youtube.com/watch?v=uvCsl327k5w showing his station and some contacts he made on November 22. He wrote to us last year (see 2008 Propagation Forecast Bulletin ARLP035 at http://www.arrl.org/w1aw/prop/2008-arlp035.html) about a personal challenge to earn DXCC during the solar cycle minimum using only one-half watt. On November 15 he made 19 contacts with Czech and Slovak stations on 15 meters during the OK/OM DX Contest, and you can see his log of these contacts at, http://www.k4.dion.ne.jp/~jq2uoz/GoodEarsList.html.

Look for the data normally at the bottom of this bulletin in a dispatch early next week.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this
bulletin are at http://www.arrl.org/w1aw.html#email.

When someone wishes me the best of a local holiday I accept it in the
spirit it was given and thank them. I use every opportunity I can
find to send good wishes regardless of the occasion, local, regional or global.

You're having another bad day, Al. ;)

There is no way to stop those brag spots, Al. If we locked out
all the calls who did that, half the DXers in the world would be on
the list! I see no point in "Look at meeeee!" spots either, but they
are a way of life these days.

On a related issue, there is work quietly being done to
associate spots with IP addresses. You would be amazed at what the
initial analysis of this data is showing. Not just where the bogus
spots for crap originate (that was the initial intent of the
project), but rather something more interesting. I suspect once this
is finalised, anyone looking at the data will see a clear pattern of
what is being done. Some of the spotters may find themselves a tad
embarrassed.

73, Paul VE1DX

Maybe, Dick, I'm just a little too sensitive!!!

No big deal. It is kinda like Ws sending me SASEs with US postage. In that case, I simply save them until I go the states or give them to someone returning to the states.

Actually, I'm having a reasonably good day -- I worked several new band countries!!!

I follow the clusters like just about everyone else. But my interest is in the band/frequency info. I could do without the message info completely. I can go to the frequency and figure out for my self what his signal level is and where he is listening. I do like the spots when I am stalking the infrequent operator. They are great for plotting patterns of operation.

The question I have: Are a million spots of the same station really
necessary? You see it for all the DXpeditions. Several spots every
minute for the same station on the same frequency is absurd. It's too
bad that some algorithm can't cut down on this overkill.

Brian

The number of spots shouldn't bother you if you are running a packet application like Spotcollector. Only see one spot unless the freq varies by more than 'x'. Hovering over the spot shows the regions which has spotted it.

My slow burns are: 'no copy here' 'pls qsy for me' 'test' 'self spots by spotting another call' and my all time favor 'spotting someone before you work them'

Ciao

11959. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-25 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11959

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 25 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 329 Issued at 2200Z on 25 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar Activity was very low. No flares occurred during
the past 24 hours.
IB. Solar Activity Forecast: Solar Activity is expected to be very
low.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
The geomagnetic field was mostly quiet with two isolated unsettled
periods, 25/0000-0600Z. A secondary solar wind data source,
SOHO/MTOF, indicated the earth is currently in a high speed stream,
preceded by a co-rotating interaction region detected by the ACE
spacecraft early yesterday. Wind speeds, as measured by SOHO/MTOF,
averaged 430-470 km/sec during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled on day one (26 Nov) based on
recurrence. Quiet conditions are expected to return on days two and
three (27-28 Nov).
III. Event Probabilities 26 Nov-28 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 25 Nov 074
Predicted 26 Nov-28 Nov 074/073/071
90 Day Mean 25 Nov 073
V. Geomagnetic A Indices
Observed Afr/Ap 24 Nov 003/006
Estimated Afr/Ap 25 Nov 007/005
Predicted Afr/Ap 26 Nov-28 Nov 007/-99999-005/-99999-005/-99999
VI. Geomagnetic Activity Probabilities 26 Nov-28 Nov
A. Middle Latitudes
Active 20/10/05
Minor storm 10/05/01
Major-severe storm 05/01/01

It can, Brian. KH2D's Wincluster Lite (no longer supported or available) had an option to dump spots that were replicated within 15 minutes or within 1 KHz. I enabled it and a number of users whined they wanted to re-spot and say "QSX 2.5 UP" or similar, so I turned it back on. No DX Cluster software that I am aware of today has that algorithm built in.

As for no comments. KH2D again had that option and when I enabled that, I got the same whines. It seems most users want the ability to spot whatever they feel like with whatever comments they like. There are multiple DX Cluster authors who offer various packages (DX Spider, AR-Cluster, CLX, CC Cluster, DxNet etc.) In order for any major changes to occur, they all would have to agree on the "best" way.

ARLD047 DX news

ZCZC AE47
QST de W1AW
DX Bulletin 47 ARLD047
>From ARRL Headquarters
Newington CT November 25, 2009
To all radio amateurs

SB DX ARL ARLD047
ARLD047 DX news

This week's bulletin was made possible with information provided by HB9ERK, IK1QBT, K9WZB, NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Marios, 5B4WN will be QRV as C4W as a Single Op/All Band entry in the CQ WW DX CW contest. QSL via bureau.

SIERRA LEONE, 9L. Members of the VooDoo Contest Group will be QRV as 9L5A in the CQ WW DX CW contest. Before and after the contest, they are active as 9L1NH and 9L7NS on the newer bands. QSL 9L5A via G3SXW, 9L1NH via G3RWF and 9L7NS via AA7A.

BOTSWANA, A2. Mike, K9NW is QRV as A25NW until December 1. This includes an entry in the CQ WW DX CW contest. QSL to home call.

QATAR, A7. Operators Ali, A71BX, Juma, A71EM and David, K5GN will be QRV as A73A in the CQ WW DX CW contest as a Multi Op/All Band/Single Transmitter entry. QSL via EA7FTR.

EASTER ISLAND, CE0. Lars, SM6CUK is QRV as CE0Y/SM6CUK until December 6. He is active using only CW. This includes an entry in the CQ WW DX CW contest as a Single Op/All Band entry. QSL to home call.

MOROCCO, CN. Stefano, IK2QEI will be QRV as CN3A from Safi in the CQ WW DX CW contest possibly as a Single Op/All Band entry. QSL via I2WIJ.

CUBA, CO. Look for CO8LY, CM8CAD and CO8TW to be Single Op/Low Power entries on 15, 40 and 160 meters, respectively, in the CQ WW DX CW contest. QSL via operators' instructions.

TAJIKISTAN, EY. Nodir, EY8MM is QRV from Dushanbe and will be a Single Op/Single Band entry on 160 meters in the CQ WW DX CW

contest. QSL via K1BV.

JERSEY, GJ. Mat, F5SHQ will be QRV as MJ0ASP as a Single Op/Single Band entry on 80 meters in the CQ WW DX CW contest. QSL to home call.

SWITZERLAND, HB. Look for special event station 4U1AIDS to be QRV from UNAIDS HQ in Geneva from December 1 to 7 as part of World AIDS Day. QSL via operators' instructions.

REPUBLIC OF KOREA, HL. A group of operators will be QRV as 6M0HZ/2 from Kanghwa Island, IOTA AS-105, in the CQ WW DX CW contest. QSL via DS2AGH.

ITALY, I. Tony, IK1QBT, Claudio, I1NVU and Emilio, IZ1GAR are QRV as IG9/home calls from Lampedusa, IOTA AF-019, until December 1. They will be active as IG9X in the CQ WW DX CW contest. QSL via IK1QBT.

GUAM, KH2. Members of the Guam Contest Club will be QRV as AH2R from Tumon, IOTA OC-026, as a Multi/Single entry in the CQ WW DX CW contest. QSL via JH7QXJ.

WAKE ISLAND, KH9. Colin, KH9/WA2YUN is usually QRV on the ANZA Net around 0600z. QSL via K2PF.

VIRGIN ISLANDS, KP2. Sharon, K7WZB and Garry, K9WZB will be QRV as K2V from Saint Croix Island, IOTA NA 106, from December 2 to 14. Activity will be on 160 to 6 meters using CW, SSB, RTTY and PSK31. They will monitor 6 meters most of the time for any band openings. QSL direct via K9WZB.

SUDAN, ST. Robert, S53R will be QRV as ST2KSS from Khartoum as a Single Op/Single Band entry on 15 meters in the CQ WW DX CW contest. QSL via operator's instructions.

CAMBODIA, XU. Peter, NO2R is QRV as XU7ACY from Sihanoukville and is here for another year. Activity is on all bands using CW and SSB. He will also be active as a Single Op/All Band/Low Power entry in the CQ WW DX CW contest. QSL via W2EN.

GIBRALTAR, ZB. Jorma, OH2KI will be QRV as ZB2X as a Single Op/Single Band entry on 10 meters in the CQ WW DX CW contest. QSL to home call.

THIS WEEKEND ON THE RADIO. The CQ World Wide DX CW Contest and the NCCC Sprint will certainly keep contesters busy this weekend. Please see November QST, page 86, and the ARRL and WA7BNM contest web sites for details.

It's putting your log in the cluster for all to see what you've worked.
It's an ego thing. Remember? It's called compulsive behavior..
Narcisstemic Clusteritis Bingosis or NCB
Plus it's a vehicle for the rare DX to read your spot asking him [DX] to
listen for you or go to xx band or to whatever mode. A lot of that would
stop if the clusters were to disable the comments section. Many disable the
Announce part but why not comments?
BTW, I have Spot Collector 5.1.6 but no clue as to how to use it - dummy me.

Rene

Does anyone know where I can get more info on the 160 Antenna
the fellows on Chesterfield are using ?
I checked their Web site, but I need more information such as
Feed Points, Directions the wires run, etc., little stuff like that.

I would like to put one up here.

Thanks, Dick, W1KSZ

It's putting your log in the cluster for all to see what you've worked.
It's an ego thing. Remember? It's called compulsive behavior..
Narcisstemic Clusteritis Bingosis or NCB
Plus it's a vehicle for the rare DX to read your spot asking him [DX] to listen for you or go to xx band or to whatever mode. A lot of that would stop if the clusters were to disable the comments section. Many disable the Announce part but why not comments?

BTW, I have Spot Collector 5.1.6 but no clue as to how to use it - dummy me.

>>>Let me know when you're ready to give it a try, and I'll give you a call.

Don't know about algorithms, but SpotCollector does just that. It "accumulates" the spots so you don't see the print go flying by on the screen, just the one spot. It literally "collects" the spots.

As for plotting patterns of operation.....

SpotCollector (part of the DXLabs suite) has a very interesting feature. Actually, it has very many interesting features, but this one is "right up your alley."

You can right-click on a spot and open a separate dialog box that will show spots *only* for that station. For those who like to see where the stn appears to be operating (to help establish any possible patterns), the dialog box accumulates spots only for the station highlighted and you don't have to wade through spots for other bands/stations.

Dave, AA6YQ, keeps coming up with more and more goodies in his DXLab suite. Great stuff - and free.

I thought there was a network setting which limited the forwarding of "exact spots" within ten minutes of each other to avoid flooding the network. But it may be the setting limits a user from originating the same spot information within a given period.

73 ES DX,

Gary - AB9M

The question I have: Are a million spots of the same station really necessary? You see it for all the DXpeditions. Several spots every minute for the same station on the same frequency is absurd. It's too bad that some algorithm can't cut down on this overkill.

It was just a thought... and its possible that some nodes may limit users from spotting the same station on the same freq within ten minutes or so. K9USA seems to keep me from making duplicate spots. But your mileage may vary....

Then there's the other side of the coin - NO cluster spot
Una broma:
That reminds me of a local ham which I called on 2 mts once to advise him of a DX on the air. He replied that that station was not on frequecy because he wasn't posted on the cluster! I said..ok seems I just made a qso with a DX that isn't valid because he wasn't on the cluster... 73....bye....
I later confirmed the qso with HV0A on 10 mts. Funny he was never on the cluster...

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 26 1719 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 329 Issued at 2200Z on 25 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar Activity was very low. No flares occurred during
the past 24 hours.
IB. Solar Activity Forecast: Solar Activity is expected to be very
low.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
The geomagnetic field was mostly quiet with two isolated unsettled
periods, 25/0000-0600Z. A secondary solar wind data source,
SOHO/MTOF, indicated the earth is currently in a high speed stream,
preceded by a co-rotating interaction region detected by the ACE
spacecraft early yesterday. Wind speeds, as measured by SOHO/MTOF,
averaged 430-470 km/sec during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled on day one (26 Nov) based on
recurrence. Quiet conditions are expected to return on days two and
three (27-28 Nov).
III. Event Probabilities 26 Nov-28 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 25 Nov 074
Predicted 26 Nov-28 Nov 074/073/071
90 Day Mean 25 Nov 073
V. Geomagnetic A Indices
Observed Afr/Ap 24 Nov 003/006
Estimated Afr/Ap 25 Nov 007/005
Predicted Afr/Ap 26 Nov-28 Nov 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 26 Nov-28 Nov
A. Middle Latitudes
Active 20/10/05
Minor storm 10/05/01
Major-severe storm 05/01/01
```

11975. Report of Solar-Geophysical Activity

#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 330 Issued at 2200Z on 26 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 25/2100Z
to 26/2100Z: Solar activity was very low. The visible solar disk
was spotless. No flares were observed during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 25/2100Z to 26/2100Z:
The geomagnetic field was mostly quiet. One period of unsettled
conditions was observed at mid-latitude reported at 26/1200Z.
Observations from the ACE spacecraft show a continued decrease in
solar wind speeds. Velocities ranged from around 430 km/s at the
beginning of the period to around 375 km/s at forecast time.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (27-29
November).

11977. 1997 TO0 Operations

Yahoo group: DX-IS (2009)
Date: 2009-11-27 20:04:45 UTC
From: RICHARD SOLOMON
Topic: 11977 Message: 11977

Does anyone recall where TO0CW and TO0RM operated from in early
September 1997 ?

Thanks, Dick, W1KSZ

The Ohio/Penn DX PacketCluster
DX Bulletin No. 936
BID: $OPDX.936
November 30, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, N4CT, KH6BZF, W6ZL, K8YSE, WI8R, AT International, DF4SA, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, I1JQJ/IK1ADH & 425 DX News, JQ2GYU, M0URX, OK1FCJ, ON4ZD, ON5NT, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3RSA, VHF-DX-Portal (MMMonVHF) and VK4AAR for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 21st-November, through Friday, 27th-November there were 230 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FK/c, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9X, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4X, ISRAEL. Victor, RV2FW/1, will be active as 4X/RV2FW from a QTH on the Mediterranean coast between November 26-29th. His activity will include the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (40m) entry. QSL via the UA1 QSL Bureau.

4Z, ISRAEL. Alex, 4Z5KJ, will be active as 4Z5J during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via W0MM.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW DX CW Contest (November 28-29th) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

9K, KUWAIT. Faisal, 9K2RR, will be active as 9K2HN during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via info on QRZ.com.

9L, SIERRA LEONE. Just a reminder that the members of the VooDoo Contest Group will be active during CQWW DX CW Contest (November 28-29th), signing 9L5A. This year the operators are Ned/AA7A, Nick/G3RWF, Fred/G4BWP, Bud/N7CW and Gary/ZL2IFB. They will enter the contest as a Multi-Two entry. Their activity in the contest will be on all six contest bands. For pre-contest activity, there may also be some operations on 30/17/12 meter bands and RTTY. QSL 9L5A via G3SXW (see QRZ.com). G3RWF may also activate his 9L1NH callsign, and AA7A his 9L7NS callsign. Please QSL via their home callsigns. There will be no daily logs, but LoTW upload will be done soon after returning home. No cash donations are requested for this project just the usual USD/IRC for direct cards.

9M6, EAST MALAYSIA (Update/Callsign Change). Tony, KM0O, is currently active as 9M6LSC (not 9M6/KM0O as first reported) from the Langkah Syabas Beach Hotel club station until November 30th. Look for him to be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. PLEASE TAKE NOTE: QSL this operation "ONLY" via KM0O. This callsign (9M6LSC) has been used before. Brian, 5B4AIZ/G4ODV, used it between March 6-9th, 2008. QSL this operation via G3SWH. For all other operations as 9M6LSC, QSLs should go via JN1WTK. For more info on the QSL routes, please check: http://www.qrz.com/db/9m6lsc

A3, TONGA (Island News/Update). Dave, W6ZL/A35KL, informs OPDX that he is now on Lifuka Island (OC-169) at the QTH of Paul, A35A [ex. A35RK]. He states, "Last week, I visited Andrea, IK1PMR, and the A31A team, now operating from Otu'haka resort on the western side of Tongatapu Island (OC-049). They have been busy working down the pileups on 30 and 40 meters CW and RTTY while assembling the rest of their contest antennas for a Multi/Single entry in CQWW DX CW Contest." See their Web page at: http://www.pacificdxpedition.com
Dave also mentions, "Paul and I plan to do some antenna work here and will operate the CQWW DX CW Contest as individual Single-Op entries." Listen for Paul as A35A Single-Op/Low-Power on 80 meters, and Dave as A35KL Single-Op/All-Band/Low-Power.

CE0Y, EASTER ISLAND. Lars, SM6CUK, will be active as CE0Y/SM6CUK through December 6th. Activity will be CW only on all bands including 30m. Look for him in the CQWW DX CW Contest (November 28-29th) as a Single-Op/ All-Band/Low-Power entry. QSL via his home callsign, direct or by the Bureau.

CR5, PORTUGAL. Operators Marq/CT1BWW, Zoli/HA1AG and Con/DF4SA will be active as CR5X in the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. They will have two fully equipped stations using 2 Spider-beam Yagis on 40-10m, and wire verticals on 40/80/160m using their 12m, 18m, and (for the first time) 26m fiberglass poles. This will be a temporary setup; an installation will start 40 hours before the contest. QSL via DJ9MH. They will confirm all QSOs automatically via the Bureau.

CW7, URUGUAY. Operators Pedtro/CX5BW, Tom/CX7TT and Fred/K9VV will be active as CW7T from La Paloma, Rocha, during the CQWW DX CW Contest (November 28-29th) as a Multi-2 entry. QSL via K5WW.

DT8, SOUTH SHETLAND ISLANDS. Sang, DS4NMJ, will once again be active as DT8A from the South Korea's Antarctic King Sejong Station which is located in the Barton Peninsula, on South Shetland Islands (VP8/h, IOTA AN-010) for 14 months. He will be leaving for VP8/H-land on November 29th and is expected to be there between December 5th (2010) and January 31st (2011). Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via HL2FDW.

E2, THAILAND. Wara, E21AOY, from Nonthaburi (near Bangkok) on the Island of Koh Phangan (AS-101), is always active QRP (4 watts). He is expected to be on during the CQWW DX CW Contest (November 28-29th) as a Single-Op/ Single-Band (15m)/QRP entry. QSL via E21AOY.

E2, THAILAND. Paul, HS4DDQ, will be active as E20WXA during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (40m)/Low-Power entry. QSL via E20WXA.

EA9, CEUTA AND MELILLA. Petr, OK1FCJ, will be active during the CQWW DX CW Contest (November 28-29th) as EA9/OL8R and EA9/OK1FCJ before the contest. He informs OPDX that he plans to set up 2 verticals: one from SP7GXP (40-10m), and the other one from DF4SA Spiderbeam 18m (160/80/40m). Petr mentions that this will be a temporary set up, and he will be running only low power. QSL via OK1DRQ or by the Bureau.

FO, FRENCH POLYNESIA. Operators Jacques/F6BEE, Phil/FO8RZ, Nigel/G3TXF and Gilles/VE2TZT will be active between February 9-25th (2010). They plan to use a special callsign (TBA) and be active on 9 HF bands, 160-10 meters with a strong effort on the lower bands (160/80m). Also planned are entries in the CQ WPX RTTY and ARRL DX CW Contests. QSL via G3TXF.

FM, MARTINIQUE. Operators Olivier/F6ARC and Mike/FM5CD will be active as FM5CD during the CQWW DX CW Contest (November 28-29th) as a Multi-Single/ High-Power entry. QSL via F5VU.

FY, FRENCH GUIANA. Operator Didier, FY5FY, will be active as FY5KE during the CQ World Wide DX CW Contest (November 28-29th) as a Single-Op/All-

Band/QRP entry. QSL via FY5KE.

H40, TEMOTU PROVINCE. Operators Siegfried/DK9FN, Bernhard/DL2GAC and Hans-Peter/DG1FK will be active as H40FN (CW), H40MS (SSB) and H40FK (Digi-mode), respectively, from Ngarando/Reef Islands (OC-065) between February 6□19th (2010). Activity will be focused on 160/80m (using their famous LOBSTER 2-element multi-band vertical), but they will operate on 160-6 meters depending on the band conditions. QSL H40FN via HA8FW, H40MS via DL2GAC and H40FK via DG1FK. QSL cards will be sent out automatically via the Bureau. However, for those who want to receive their QSL cards directly, a minimum of 2 USDs for postage is requested. Donations are most welcome. For more details, updates and pictures/details of Siegfried's last visit to Temotu, please visit the following Web page at:
http://hari-ham.com/h40fn

HG0, HUNGARY (WFF Op). Members of the Regionalis Radios Sportklub Puspok-ladany (HA0KHW) will once again activate more Hungarian National Parks during the month of December. Look for them to be active as HG0WFF/p from:
December 5-6th - Duna-Drava Nemzeti Park (HAFF-003)
December 7-8th - Nyugat Mecsek Tajvedelmi Korzet (HAFF-033)
Decemebr 9-10th - Kelet Mecsek Tajvedelmi Korzet (HAFF-024)
Operators mentioned are: Laci/HA0HW, Viktor/HG0NDZ, Zoli/HA0IH, Tomi/HA4DX and Geza/HA4XG. QSL via HA0HW, by the HA QSL Bureau as usually.

HH2, HAITI. Steve, VE2TKH, is now active as HH2/VE2TKH from Petionville (South East) Haiti. His license is valid between November 23rd and December 15th. Activity will be limited between 0100-1100z due to power availability. Operations have been mainly on CW with a focus on 30/20/17/15 meters. QSL direct via M0URX. Bureau requests are available. See details at: http://www.m0urx.com/qsl-request-form.html

HR, HONDURAS. Operators Victor/N8OO and Andrei/NP3D will be active as HR2/N8OO and HR2/NP3D, respectively, between December 10-20th. Activity will be on all HF bands using CW, RTTY and SSB. Also look for Victor to participate in ARRL 10 Meter Contest (December 12-13th) and Andrei in OK DX RTTY Contest (December 19th) as HQ2S. QSL via the following:
HR2/N8OO - via his home callsign or via UA9TF.
HR2/NP3D and HQ2S - via RW6HS or via W3HNK. LoTW is OK.

HS0, THAILAND. Finn, HS0/OZ1HET, will be active as HS0AC (the Radio Amateur Society of Thailand [RAST] club station) during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via HS0ZFZ.

HS8, THAILAND. HS8KGG will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via HS8KGG.

IOTA NEWS.....
AS-127. (Update/Rare IOTA) Last week we reported that operators Tutul/S21RC, Manjurul/S21AM, Sohel/S21S and Aminul/S21D were preparing a DXpedition in February 2010 to St. Martin's Island located in Chittagong Region Group. The operation will take place

between February 21-25th. The group has requested the callsign S21DX. St. Martin is the only coral island in Bangladesh (S2), and there is also a lighthouse on the Island (WLOTA #2351) very near their camp site. There is no electricity and no motor vehicles on the Island which makes the air interference free. They team plans to have two stations on the air with a few antennas like last time. To power the stations they will use 1KVA generator and 2x 115AH batteries. QSL Manager will be EB7DX. The group is looking for sponsors/funds. A Web page is now up and running at: http://iota.s2dx.org

NA-191. Operators Gunter/TI7WGI, Andreas/DH8WR, Rene/DL2JRM and Jens/DL3ALF will be active as TI7XX from San Jose Island between December 30th and January 5th (2010). Activity will be on all HF bands using CW, SSB, RTTY and PSK31. QSL via DL2JRM direct or by the Bureau. For more info, visit their Web page at: http://ti7.info/index.html

OC-042. Alex, DV1UBY, continues to be active as 4D1N from Quezon City, on Luzon Island (OC-042, WLOTA L0081), The Philippines, until the end of the year. His activity has been on 40/20/15 meters using only 10 watts. Look for him to be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry QSL 4D1N via DV1UBY, by the Bureau or direct.

OC-197. Adhi, YB3MM, will be active as YB3MM/P from Bawean Island between December 4-9th. Activity will be limited to 15 meters CW. QSL via IZ8CCW.

IRC REMINDER! Alan, VK4AAR, and many other QSL Managers would like to remind that in about 5 weeks time, the IRCs which many have been using for the last few years will no longer be valid at the post office. The "31st December 2009" is the deadline for the current style ... but best to stop using them by end of November to allow transit time. The new one has the expiry date of "31st December 2013"... just above the "UPU" logo at your right-hand side. PLEASE START USING THEM IMMEDIATELY FOR SAFETY.

IU9, ITALY. Fabio, IT9GSF, will be active as IU9T from Sicily during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via IT9GSF. He states this is a serious attempt as SO2R (Single-Op/2-Radios). Fabio will have yagis on 4 bands, a vertical on 80m and a an Inverted L on 160m at 21m. He will use beverages for RX. He adds, "Extremely good location for USA and Asia on the low bands (800m asl and slope terrain)."

J3, GRENADA. Tom, VE3RSA, will be active as J38XJ during the CQWW DX CW Contest (November 28-29th) as a Single-Op/QRP entry. QSL via LoTW. Tom informs OPDX that his activity outside of the contest will be CW only, mostly on 40/20/15 meters, and depending on conditions possibly 10m. He will operate until December 3rd.

JA'S TOP 50 MOST WANTED (Interesting!). An interesting "Most Wanted DXCC Entity Survey" took place in Japan in September by "The PaperDXers". The results were published in the Japan "CQ" ham radio magazine as well as on Yutaka, JQ2GYU, Web page. See the results at: http://www.sakurai.or.jp/HAM/html/WANTED-JA.html

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power/Assisted entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

KH6BZF PROPAGATION FORECAST/REPORT (For November 30th-December 6th)....
Nov 30 AN SOLAR REFERENCE
Dec 1 AN ---------------
Dec 2 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 3 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 4 AN LN - Low Normal
Dec 5 AN
Dec 6 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OH0, ALAND ISLAND. Jukka, OH6LI, will be active as OH0V in the CQWW DX CW Contest as a Single-Op/Single Band (160m) entry. He plans to use a new antenna system. For details, view the Web page at: http://www.qsl.net/oh0v

OY6, FAROE ISLANDS. Operators Johan/OY2J and Tom/OY3AA will be active as OY6A from Torshavn (EU-018) during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via LoTW. Visit the Faroese Radio Amateurs Web page at: http://www.fra.fo

P3, CYPRUS. Operators Andrey/RV1AW, Vitaly/RN4WA, Alex/RU4HP, Sandy/RW4WR and Harry/RA3AUU will be active as P33W during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via RA3AUU.

P4, ARUBA. John, KK9A, will be active as P40A during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via WD9DZV.

PJ2, NETHERLANDS ANTILLES. Some of members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2/homecall through the end of November. Operators mentioned are Geoff/W0CG (PJ2DX), Jeff/K8ND, Jim/W0NB, Jim/W8WTS, Jim/WI9WI, Mal/NP2L, Rodger/N4RR, Jeff/KU8E and Anthony/W4OI/HK4AR. Their main goal is the CQWW DX CW Contest (November 28-29th), as a Multi-2 entry (possibly a Multi-Multi) using the callsign PJ2T. QSL PJ2T via N9AG or LoTW. QSL all others via their home callsigns.

QSL INFO AND NEWS.....
Algarve STAR DX Team reports that 90% of the direct requests for the 4W6AL QSL cards were sent out on Monday, November 23rd. Some cards

were received this past week from several stations in Europe. The other 10% will be sent out next week.

Algarve STAR DX Team reports their last CR6A activity from Fuzeta Barra Lighthouse - East Point (POR-116) ended on November 22nd! They had 5 stations on 5 bands and worked 2500 stations. Logs and pictures will be online very soon on: http://algarvedx.com

Charlie, N4CT, informs that thanks to Les, K4DY, for "prodding" him to get on LoTW, he is now on LoTW and has uploaded most of the HS0ZDR logs. So now, QSL HS0ZDR via Tony, W4FOA, or LoTW.

TM0M QSL STATUS. Leon, ON4ZD/OS0S, informs OPDX that the QSLs for the TM0M IOTA EU-065 activation from May 2009 has been received from the Ukraine by the Manager F6ANA. All QSLs will be sent in the next days direct and by the Bureau. Online log is still available at: http://users.belgacom.net/cdxg

QSLS VIA LoTW: 4U1UN, 5N0OCH, A25/DL7DF, A52OM, AO8HQ, DR1A, DX1J, EA1DR, FM5CD, FO8RZ, G3XRJ, GI5K, HK1X, HS0ZDR, MW0CRI, OA4AHW, OQ5A, PR1T, RA0FU, S58P, SI6A, SN0HQ, S04R, T88CI, TK5EP, TX3A, VK4KW, WP2B, YR0HQ, Z36W and ZS2EZ

QSLS RECEIVED VIA MAIL: 4U1UN, 4W6AL, A41MX, CP4BT, E51NOU, FG5LA, FO/G3BJ, GT4IOM, GW5NF, J5UAP, J69MV, KD6WW/VY0, R1ANB, VQ9LA, YO4ATW and ZL7/N7OU

QSLS RECEIVED VIA THE BUREAU: 4L6DL, 4W6R, 5B4KH, 5X1NH, 8N4HQ, AO5HE, C4EURO, CK3AT, CP4BT, CQ7P, CS8HQ, E7/YT2ED, E73MMM, EA4TV, EA6/GW0VML/p, EA7TN, EB1DH, EB7DX, EG5T, EH5H, EK8PL, GB2BML, GB2CLB, GM1MVL/P, GM3USR/P, HG80HQ, HL0HQ, IB0/IZ2ACD, IB0CW, II2MM, II7PAX, II9LXCT, IK2YGZ, IM0/IW2MXY, IO5O, IQ0IPY, IQ3UD, IQ8OM, IR8PS, IU1L, IZ8EPX, LZ6A, MJ/OE5HDN, MM0BNN/P, MX0SSW, OZ6AGC, P3CA, PJ2X, R300SM, S51F, S56DX, SP0177JG, SV2GWY, SV9GPV, SX24EVI, SX24KZN, SX24LRS, T88CQ, TC0W, TK7C, TU/DB1DT, UA4PWR, UR7GW/p, VC1T, VC3A, VC3E, VO1MX, VY2TT and YQ9W

SOUTH AMERICAN TOUR. Ghis, ON5NT, will once again be on a South American trip through Brazil and Uruguay in December. He informs OPDX that there will not be any activity from Brazil as there is no reciprocal license between ON and PY (He states, "I can't get a PY license. Operating with my CEPT license/PY does not seem to be fully legal."). However, Ghis will be active from Uruguay between December 12-17th. His callsign will be CX5NT. As this is holiday trip, he plans to be active mostly during the local evening/night hours. So check 30m (10107 being his preferred frequency) and 40m (CW in general) will be the best options to catch him. QSL via ON5NT.

ST, SUDAN (Update/Callsign Change). Robert, S53R, will be active as ST2AR from Khartoum during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via S53R or by his instructions.

TF, ICELAND. Operators Yngvi/TF3Y, Kristinn/TF3KX, Oskar/TF3DC, Thor/TF4M and Odurr/TF3OO will activate the club station TF4M in Otradalur during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via G3SWH.

TF, ICELAND. Darren, G0TSM, will be active as TF/G0TSM during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. Operations will be limited. QSL via LoTW or direct to G0TSM.

TI, COSTA RICA. Marty, K2PLF, will be active as TI5/K2PLF between now and December 1st. His activity includes the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry using the callsign TI5A. QSL via TI5KD or K2PLF.

TX1, NEW CALEDONIA. Sam, FK8DD, will be active as TX1B from Noumea, New Caledonia (OC-032), during the CQWW DX CW Contest (November 28-29th) as Single-Op/All-Band/Low-Power entry. QSL via LZ1JZ .

TX3, CHESTERFIELD ISLAND. Only a few more days to work operators George/ AA7JV and Tomi/HA7RY as TX3A before they depart for Australia on December 1st (not December 6th as reported earlier - QRT on November 30th - a delay could happen because of WX). As of print time their log shows just under 35k QSOs. Activity has been on all HF bands but with an emphasis on the lower bands. Modes used have been on CW, SSB and RTTY. QSL via HA7RY. For more detailed information and updates, visit their Web page at: http://www.TX3A.com
LAST MINUTE UPDATE: Tomi plans to be active (as TX3A) during the CQWW DX CW Contest as a Single-Op/Low-Power entry. Also, QSL via HA7RY.

V6, MICRONESIA. Operators Mike/KM9D and Jan/KF4TUG, aboard the "Don Henry", are reportedly heading to Pohnpei. No other details were reported. Stay tuned!

YE1, INDONESIA. Gus, YB1ALL, will be active as YE1C from Indonesian Aerospace Industry Center during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. See QSL info on QRZ.com.

ZC4, UK SOV. BASE AREAS ON CYPRUS. Andy, G3AB, will be active as ZC4T during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL ZC4VJ via LoTW or direct to M0URX.

ZONE 23 (Top-Band DXpedition). Peter, RX0AE, is planning a TOPBAND DX-pedition to Zone 23 by the end of 2010 (November-December). He wants to use the best propagation conditions and work as many DXCC entites as possible. He states, "The expedition will require a lot of preparations. I would like to know your opinion - is Zone 23 still on a top of Most Wanted, and what bands is it most needed on?" You can E-mail him with your answer at the following addresses: RX0AE@...
RX0AE@...

The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 28-29th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2009 CQWW DX CW Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/cqc2009.html (By call sign)

11979. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-27 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11979

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 27 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 331 Issued at 2200Z on 27 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 26/2100Z
to 27/2100Z: Solar activity was very low. The visible disk remains
spotless. No flares were observed during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 26/2100Z to 27/2100Z:
The geomagnetic field was quiet. The ACE spacecraft show solar wind
velocities averaging around 350 km/s.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (28-30 November).
III. Event Probabilities 28 Nov-30 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 27 Nov 074
Predicted 28 Nov-30 Nov 071/070/070
90 Day Mean 27 Nov 072
V. Geomagnetic A Indices
Observed Afr/Ap 26 Nov 003/006
Estimated Afr/Ap 27 Nov 002/003
Predicted Afr/Ap 28 Nov-30 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 28 Nov-30 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11980. Report of Solar-Geophysical Activity

Yes, I set up Druple (database engine development system for web applications) on one for a friend. Went very smoothly and I must say at first glance at least Windows & seems to be what Vista should have been. Seemed to run with out any problems. Being a development system required a fairly complex setup which went very smoothly even though the software was not designed explicitly for Windows 7. I have a machine here that looks like a candidate for upgrading to Windows 7 which I will get to after CQWW and the paper work for it is finished. ;-)

I honestly think Microsoft mainly comes up with new Windows programs just because they've saturated the market with the older one and their sales are dropping. I have seen nothing wrong with XP and I don't know what Windows 7 will have that XP doesn't that I would need myself.

I've installed XP 64-bit on two computers now and it is a nightmare to install. I learned all the difficultes and problems with it, though. If anyone is ever planning on installing it, I can give you a lot of tips. :-)

Back to CQWW CW. 40 meters was terrible last night and even at sunrise here. I have never seen such bad conditions on that band. I hope we get sunspots by next year.

Tnx Geoff,
My wife is thinking of getting a new laptop and me thinks everything comes with Windows 7 these days. We still have XP. I'm thinking of getting an Elcraft K3 in a few months which might interface with Win 7. She's thinking of a Dell but a friend who checks stocks, etc., seems to think Dell is going out of business. What is popular today and can be used with DXLabs?

11987. RE: [DX-IS] New computer

Yahoo group: DX-IS (2009)
Date: 2009-11-29 17:45:33 UTC
From: Dick Williams
Topic: 11981 Message: 11987

I have upgraded two desktops and one laptop to Windows 7 with minimal problems; biggest is HP has not updated their drivers for my OfficeJet L7780 wireless printer. Called them and they said to use the Windows drivers with a USB cable. Great solution if you don't mind dragging a 100 ft USB cable all over the house so you remain connected to the printer!! Hopefully by the next millennium they will release new drivers.

My laptop had VISTA on it, and the upgrade was very easy and took about 30 or so minutes. My two desktops had XP and you need to do a fresh install; Microsoft does have a program that will save your files, but you need to re-load all your programs. Personally, I found it much easier to insert my XP disk, format the hard drive and do a fresh install of XP. Once that finished I, installed Windows 7; took about 30 minutes and I proceeded to install my programs (I keep all files that I do not want to lose backed up on disk, so it was easy to copy those back into the programs).

The only other recommendation I can make is to stick with the 32 bit version. Chances are 99% that you don't need over 3 Gb of memory, you are using applications that require 64 bit, and there are a lot more applications that will not run on the 64 bit version.

Same story here as well. I have sent twice once with IRC's and the second with GS for the QSLs. I did receive my certificate about a month ago for my bronze award and that I only sent for once back last December so about 10 months. Maybe someday the cards will show up but I am not holding my breath at this point.

ARLP049 Propagation de K7RA

ZCZC AP49
QST de W1AW
Propagation Forecast Bulletin 49 ARLP049
>From Tad Cook, K7RA
Seattle, WA November 30, 2009
To all radio amateurs

SB PROP ARL ARLP049
ARLP049 Propagation de K7RA

This is a follow-up to last Wednesday's pre-Thanksgiving Propagation Forecast Bulletin ARLP048. It was a little early to provide the complete Thursday through Wednesday sunspot, solar flux, and A index that normally appears in Friday's bulletin, so we are including it here at the bottom of this bulletin. The next bulletin will be out four days from now.

Our exciting period of nearly daily sunspot activity ended with the first spotless day on November 23, and the Sun has been blank since then. A look at the STEREO image at http://stereo.gsfc.nasa.gov/ shows a bright active area perhaps five days over the eastern horizon, but we don't know if that will give us sunspots or not.

As the two STEREO craft move further from earth, the visual gap on the Sun's far side is gradually closing, and we look forward to the time in 2011 when all of the Sun will be visible from STEREO and earth. Currently the gap is about 14.3%.

You can calculate the approximate percentage of the Sun in that dark spot by using the "Where is STEREO?" link on the STEREO home page, which takes you to http://stereo-ssc.nascom.nasa.gov/where.shtml. Check the "Separation angle A with B" stat at the bottom, subtract that number from 180, divide the result by 360, then multiple that result by 100 to get a percentage figure.

You can check future dates by clicking on the "STEREO Orbit Tool" link, taking you to http://stereo-ssc.nascom.nasa.gov/where/.

When you check February 1, 2010 at 0000 UTC it yields a separation angle of 135.197 degrees. Subtracted from 180 degrees, this yields 44.803, divide that by 360, then multiply by 100, and you get approximately 12.45% remaining on the dark side. October 1, 2010 yields 5.58%, and January 1, 2011 just 1.26% in the dark. Check the arithmetic!

WorldRadio Online posts a new issue on the twentieth of each month, and each has a column on propagation by Carl Luetzelschwab, K9LA. You can download it at, http://www.cq-amateur-radio.com/WorldRadio.html and read Carl's article on "The Impact of Deep Solar Minimum on 160m Propagation." Carl's column begins on page 28 of the current December issue. The January 2010 issue should appear online on December 20.

Past bulletins mentioned the incredible WSPR mode for weak signal communication. Doug Hawkins, W3HH of Ocala, Florida was using WSPR mode on November 18 on 30 meters, and copied AA1A in Marshfield, Massachusetts -- 1,105 miles away. Not unusual, except that AA1A was running only 10 microwatts! Doug points out that this signal is 20 dB below 1 mW. Doug says that several other stations have copied AA1A, but so far this is the longest distance record.

Doug thought the distance was about 900 miles, but I looked up the address for each station at the top of the ARRL web page at http://www.arrl.org/, then plugged the addresses into a computer atlas to find the exact latitude and longitude coordinates, then used W6ELprop to calculate the distance, which turned out to be over 20 percent further than Doug's estimate.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at, http://www.arrl.org/w1aw.html#email.

Sunspot numbers for November 19 through 25 were 30, 31, 14, 13, 0, 0, and 0 with a mean of 12.6. 10.7 cm flux was 76.7, 76.2, 75.8, 76.3, 75.7, 74.7, and 74.2 with a mean of 75.7. Estimated planetary A indices were 2, 1, 8, 4, 0, 6 and 5 with a mean of 3.7. Estimated mid-latitude A indices were 0, 2, 6, 2, 0, 3 and 4 with a mean of 2.4.

> Can you tell me if the new IRCs can be used for direct QSLs to Russia? Not sure how safe the use of USDs are these days.

Here's a good summary from the QRZ.com page for RW0CWA:

"RW0CWA club station made 630 QSOs in CQ WW 160 m contest in January 2009, half of that with North America.

We will reply all buro cards and direct QSLs with return postage. Please DO NOT SEND GREENSTAMPS AND SAE. Envelopes with something thick inside are very attractive to post thieves. Quite often mail comes with 'dollar footprints' in the inner side of the SAE. That means the envelope was opened, dollar disappeared. Moreover, your QSL may get lost, it happened many times last year.

So, just QSL and one valid IRC in the envelope makes the probability of getting your card here resonably high. Blank envelope costs almost nothing here, less than one US cent. When sending IRC's please check the expiration date, the new ones are valid until the end of 2009. It usually takes 8 to 10 weeks to get QSL back. Direct cards without return postage will be sent via the buro.

It seems that registered mail comes without any trouble but it is quite expensive.

If you did not get reply QSL within resonable period of time, please e-mail us.

73, Igor RW0CF"

So use 1 IRC and make the envelope as inconspicuous as possible.

73, Bill

12005. T6XI

Yahoo group: DX-IS (2009)
Date: 2009-12-01 05:28:15 UTC
From: nu7t
Topic: 12005 Message: 12005

At the end of last weekend's contest, I worked T6XI on 20m from Nevada. The signal sounded like a polar route. But, my little beam is wide and I could not decide exactly, the best direction.

I have poked around attempting to locate information on T6XI to no avail. Has anyone information on this call or where I might find out if the call has been issued ?

The T6 prefix belongs to Afghanistan and has been used lately. T6YA has been fairly active for a month. I don't know about T6XI though.

I havw watched the T6YA packet spots with longing; it's one of six countries I still need for a new one. He's always on the air on bands and times when I can't hear him.
:-(

Rene

Came out of this business as a hardware engineer and product manager.
Digital->Compaq->Hewlett Packard.

Two thoughts:

1. Windows 7 is the OS that all have been waiting for since XP. Vista went too far toward the new media environment without worrying about migration. Most company IS Dept. did not convert. Now they will.

2. No one is going to like this but the larger manufacturers have both a business line and a consumer line. Hard to buy the business lines but the have greater durability but less flash. Consumer lines have more flash but are 'cost focus' Big difference in cost/price. Read this as you get what you pay for.

I am running a 10 year old and 6 year old portable on XP and (except for a virus on one) I have had zero hardware problems. My son (same manufacturer) never made it two years (consumer model)

When I upgrade to Windows 7 (and I will) it will be with new hardware.
It is not worth the hassle unless you get some more horsepower out of it and hardware is pretty cheap due to the deals being made.

Will never do a portable again because I don't need portability!
If I needed to operate remotely I'd set up a small netbook. The small system boxes allow ease of maintenance & upgrade in my mind. Features that portables do no provide.

I know the world is going with portables, that is why I have an Ipod touch...my idea of a portable. Now if someone would do a bluetooth interface to my rig and Dave would port DXlabs..... HI

T6AG is also active at the moment, but I'm experiencing the same results as you - he's on bands and times when I can't hear him here.

A couple of years ago a Russian was there - T6X (I think his name was Andy) and I managed to work him on 15 and 20 SSB - never heard him on CW. That was back in 2005 and condx were somewhat better then.

A couple of years ago at Visalia I met T6EE, but his operating is quite sporadic and generally very low power. I think he also operates only SSB, but I could be mistaken.

Ya mean yur jus' noticin' that? Or, "no copy here," or "big sign in Roma," or other such useless drivel. And, oh yes, when did "sign" replace the CW abbreviation "sig" for signal? Or something I heard on 17M yesterday -- THNX. Maybe the sender has a lisp.

12016. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-03 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12016

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 03 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 337 Issued at 2200Z on 03 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 02/2100Z
to 03/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. The disk is spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 02/2100Z to 03/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for day one (04 Dec). Quiet to unsettled
levels with a slight chance for isolated active periods are expected
on days two and three (05-06 Dec) as a recurrent coronal hole high
speed becomes geoeffective.
III. Event Probabilities 04 Dec-06 Dec
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 03 Dec 072
Predicted 04 Dec-06 Dec 072/073/073
90 Day Mean 03 Dec 073
V. Geomagnetic A Indices
Observed Afr/Ap 02 Dec 000/001
Estimated Afr/Ap 03 Dec 001/005
Predicted Afr/Ap 04 Dec-06 Dec 005/005-007/008-007/008
VI. Geomagnetic Activity Probabilities 04 Dec-06 Dec
A. Middle Latitudes
Active 05/20/10
Minor storm 01/10/05
Major-severe storm 01/05/01
```

SB DX ARL ARLD048
ARLD048 DX news

This week's bulletin was made possible with information provided by DS4NMJ, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TANZANIA, 5H. Igor, UA3DJY plans to be QRV from the 5I3A club station until December 15. Activity is on all bands using CW and SSB. QSL via RK3AOL.

SOUTH SHETLAND ISLANDS. Lee, DS4NMJ will be QRV as DT8A from the Antarctic King Sejong Station on King George Island, IOTA AN-010, from December 5 to January 31, 2011. Activity will be on 160 to 10 meters using mostly CW with some SSB and RTTY as well. QSL via HL2FDW.

PHILIPPINES, DU. Alex, DV1UBY is QRV as 4D1N from Quezon City on Luzon Island, IOTA OC-042, until the end of the year. Activity is on 40, 20 and 15 meters using QRP power. QSL to home call.

MARTINIQUE, FM. Fernando, EA1BT will be QRV as TO1BT from December 8 to 15. Activity will be on all bands. QSL to home call.

HUNGARY, HA. A group of operators will be QRV as HG0WFF/p from a number of Hungarian National Parks during December. QSL via HA0HW.

HAITI, HH. Steve, VE2TKH is QRV as HH2/homecall from Petionville until December 15. Activity is generally on 30, 20, 17 and 15 meters in his spare time. QSL via M0URX.

SARDINIA, IS0. Members of the Sardinia QRP Club will be QRV as IQ0QP from the Capo Sant' Elia Lighthouse on December 12 and 13. Activity will be on 80 to 20 meters using CW, SSB and digital modes. QSL direct.

ANTARCTICA. Karel, ON5TN is QRV as OR4TN from the Belgian Princess Elisabeth Station until the end of January 2010. Activity is generally on 80, 40 and 30 meters using CW and SSB around 2100 to 2300z. QSL to home call.

DENMARK, OZ. Special event station 5P15COP will be QRV from Zealand Island, IOTA EU-029, from December 7 to 18 during the Copenhagen Climate Change Conference. Activity will be on 160 to 6 meters using CW, SSB and digital modes. QSL via OZ5BAL.

PAPUA NEW GUINEA, P2. Annas, MM0GQA is QRV as P29VAA from Port Moresby for the next three to six months while working for a humanitarian aid organization. Activity is in his spare time. QSL via operator's instructions.

SUDAN, ST. Robert is QRV as ST2AR and is generally active on 20 to 10 meters mostly during the weekends. QSL via S53R.

EGYPT, SU. Mohammed, SU1KM has been active on 30 meters using RTTY around 1740z and then using CW around 1800 to 1900z. QSL direct.

BELIZE, V3. Will, EA7HEJ is QRV as V31WV from Sarteneja until December 20. QSL this operation via EA7HEJ.

CHRISTMAS ISLANDS, VK9X. Station VK9XX is QRV until December 5. Activity is on the HF bands using CW and SSB. QSL via DL1RTL.

BRITISH VIRGIN ISLANDS, VP2V. Curt, W3HQ is QRV as VP2V/homecall from Virgin Gorda, IOTA NA-023, until December 16. Activity is generally on 160 and 10 meters during the weekends and the newer bands the rest of the week. QSL to home call.

CAMBODIA, XU. Wim, ON6TZ and Peter, NO2R plan to be QRV as XU7KOH from Koh Island, IOTA AS-133, from December 11 to 14. Activity will be on 80 to 10 meters using CW, SSB and PSK near the usual IOTA and PSK frequencies. QSL via ON7PP.

INDONESIA, YB. Adhi, YB3MM/p is QRV from Bawean Island, IOTA OC-197, until December 9. Activity is limited to 15 meters using CW. QSL via IZ8CCW.

THIS WEEKEND ON THE RADIO. The ARRL 160-Meter CW Contest, ARRL EME Contest, NCCC Sprint, TARA RTTY Melee, Wake-Up! QRP Sprint and the TOPS Activity CW Contest are all scheduled for this weekend. The ARS Spartan CW Sprint is scheduled for December 8. The NAQCC Straight Key/Bug CW Sprint is scheduled for December 9. Please see December QST, page 66, and the ARRL and WA7BNM contest web sites for details.

Robert,

NOT that I disagree, with you, (not in the least) but there are so MANY people that do this kind of thing, over & over again, I still say that it was better to keep the ridgid standards and if there were less hams as a result then so be it !

its that age old saying once again,
NOTHING worth having is easy to get !.....

Regards, Joey

12023. DXCC/WAS Fast Turnaround Time - 14 Hrs

Yahoo group: DX-IS (2009)
Date: 2009-12-04 05:25:10 UTC
From: R Johnson
Topic: 12023 Message: 12023

WOW !!!
I didn't expect this kind of service.

Last night at 02:02Z I applied for my DXCC Award .
This morning at 16:08Z I was granted my DXCC 112/Phone and 315/Challenge.

That's a 14 Hr turnaround time !!!

I suspect the speed of this application was due to:
1) 100% LoTW Application
2) Pre Purchased LoTW Credits on file
3) Payment by Credit Card

Now that I have my LoTW DXCC Award I can spend more time making more QSO's and
sorting all my "Paper" to try and resolve another potential 35 countries so
I can make a "Hybrid Application" next year (AARRGG) !!!

As a side note the night before, I applied for my LoTW "WAS Phone" award.
That application only took 09:20 Hr's to be fulfilled. Again, WOW !!!

When I look at the costs of QSL'ing, LoTW wins "hands down" !!!

Hi,
I finally worked South Korea this morning - DS1REE.
We're both on LOTW, but the paper qsl is more important to me!
IK3QAR has no qsl info.
QRZ and HAMCALL have totally different addresses.

When I run into this, is there a dependable source for the *current* qsl
route?

Tx Don,
Unfortunately, even the dental clinic name and address are completely
different.
However, I noticed he has an email address and fired off an address query.
He responded almost immediately - "only qrz.com is correct"
I guess hamcall doesn't stay as current as qrz nowadays - it used to be
the reverse.
Thanks all, I'm back in tall cotton.

12031. ARLP050 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-12-04 19:21:53 UTC
From: jjreisert@alum.mit.edu
Topic: 7715 Message: 12031

SB PROP @ ARL $ARLP050
ARLP050 Propagation de K7RA

ZCZC AP50
QST de W1AW
Propagation Forecast Bulletin 50 ARLP050
>From Tad Cook, K7RA
Seattle, WA December 4, 2009
To all radio amateurs

SB PROP ARL ARLP050
ARLP050 Propagation de K7RA

Recent sunspot activity--which ended on November 22--pushed up the moving average we've been tracking for several years. Because we have all the data for November, we now have the most recent 3-month average of daily sunspot numbers, which centers on October. For 2009, the 3 month moving average centered on January through October was 2.19, 2.02, 1.49, 2.01, 4.23, 5.2, 4, 4, 4.64 and 7.1. The latest value is the highest since April 2008, when it was 8.89.

The monthly averages of daily sunspot numbers are also rising, although not as smoothly as the three month average. The monthly averages for March through November 2009 are 0.77, 1.27, 3.97, 6.6, 5.07, 0.39, 6.6, 7 and 7.7. The November average is the highest since March, 2008 when it was 15.87.

Current projections show a steady quiet planetary A index of 5 for December 4, then 8 for December 5-6, and back to 5 through the end of the month. Solar flux predictions show December 4-6 at 72, 73 on December 7-10, then 75 on December 11-23. The predicted solar flux value of 75 seems to correspond to the return of an active region that we can see emerging from the dark spot on STEREO. An area that looked promising a few days ago has moved over the horizon and not produced any sunspots.

Geophysical Institute Prague predicts quiet to unsettled conditions December 4, unsettled December 5, and quiet December 6-10.

The same 45 day forecast from NOAA and US Air Force referenced above also predicted a planetary A index of 5 for December 3, but in fact all indices that day were zero, according to http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt. The last time the planetary A index was five or above was November 24-26. The directory at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html has links to the daily forecast for the past few weeks. By sampling the forecasts, you can see that the forecasters seem to prefer a

planetary A index of 5 for their minimum value. Five is an indicator of very stable and quiet conditions, but in fact conditions have been even quieter.

Low geomagnetic activity should be good for the ARRL 160-Meter CW Contest this weekend. And, perhaps we will see some sunspots return for the ARRL 10-Meter Contest the following weekend.

Over the past few years we've received reports from Dave Greer, N4KZ of Frankfort, Kentucky, usually about 6 meters. The last was in Propagation Forecast Bulletin ARLP028 in July. How do I know? By pointing a search engine at the propagation bulletin archive on the ARRL web site.

Use any search engine, such as lycos.com, bing.com, altavista.com or google.com, enter a call sign or a word or any string of characters, then a space, followed by site:http://www.arrl.org/w1aw/prop/ and hit Search. In this case, I entered N4KZ site:http://www.arrl.org/w1aw/prop/ and found seven bulletins since May 19, 2005 containing that call. This will be number eight.

This time N4KZ wrote about 40 meters:

"I've been operating 40 meters for a little more than 40 years now and the band has impressed me with its daylight DX numerous times during the past few years. The most recent examples occurred during the recent CQWW CW DX contest. On Sunday, November 29 at 1931 UTC I worked 4O3A in Montenegro on the low end of 40-meter CW. That was 2:31 p.m. EST, a good two-and-a-half hours before my local sunset. That might not be a big deal for East Coast stations but I don't often hear Europe here that early. But just a minute later, I tuned lower and heard an A71 station in Qatar, in Zone 21, working a pile-up of Europeans in the contest. I didn't hear a single European on frequency but the A71 had a decent signal into my Central Kentucky QTH. Two or three U.S. stations were calling the A71 but I don't think any of them ever made it through the European wall."

"But I've heard Europe even earlier in the day on 40 meters. A couple years ago, a PA station from the Netherlands was a S5 on SSB into Kentucky at high noon in the dead of Winter. I never heard anything like that on 40 meters during high sunspot years."

"I've also been quite pleased at my ability to work DX from my 100-watt 40-meter SSB mobile station since the broadcast stations signed off between 7.1 and 7.2 MHz. I have worked numerous Europeans, Russians, three VK stations, and some Africans from my car. I'm just running an IC-706MKIIG and a Workman helical whip antenna."

Thanks, Dave!

Bob Elek, W3HKK of Johnstown, Ohio also commented on 40 meters this week, but first had a lot to say about stealth antennas and experiences with wire antennas on the low bands.

Bob was a serious DXer and contester from 1976 to 1995, but then moved to a home with deed restrictions. He write, "He "began experimenting with stealth antennas hidden in a small wooded area behind my last home, adjacent to a golf course. I spent years trying assorted home made loops, verticals, bob-tail curtains and inverted Ls (all mired deep in the trees to keep them hidden from prying eyes) that would fit in my situation using nothing more than existing trees for support. I also gravitated to the WARC bands and 160-80-40m.

A few observations:

1. Upper corner, direct fed bobtail curtains only a few feet off the ground work very well. I worked worldwide (India, Afghanistan, Kazakhstan, JA, JT etc) on 12 and 17m with them, and highly recommend them to anyone who has two properly spaced supports to hang them from.

2. While the trees clearly muted performance, delta loops, and quarter wave inverted Ls (however crudely erected) are also fine performers on 40-80-160m. I was fortunate to have one 80 foot oak tree which served as the support for many of my experimental, less than ideal antennas.

3. I began putting up home made ground planes for 30 and 20m, from cheap fiberglass telescoping fishing poles taped to a short length of PVC piping, with 14 wire serving as the radiator (taped of course) and radials/guy wires. These performed well despite being surrounded by trees.

This past Summer, I moved to 3 rural acres in central Ohio. Due to the almost complete absence of trees on my property, I decided to go with home made ground planes for 20, 30, and 40m, plus a single feed two band inverted L for 80 and 160 supported by a 15 foot (!) tree in the back yard. Yes, a mere 15 feet high inverted L, at the apex! I run 100 watts, mostly on CW, but some SSB as well.

The new QTH differs from the last one in that it is on open rolling hills with cornfields to the east, is sloping slightly downhill for 1000'+ to the east, north and west, and slightly uphill to the south. My antennas are lined up E-W about 50 feet apart, with 4-16 radials, both on ground and 3-4 feet above ground. SWR runs 2 to 4:1, with direct fed 52 ohm coax (cobbled together from left over scraps that are 20-40 years old. My antenna analyzer (MFJ-259) shows losses are acceptable for the appropriate frequencies. Those where it was excessive, I threw out).

Point #1: On 160 meters, even a single coax direct fed pair of 15 foot vertical inverted Ls, with the remainder of their quarter

wavelength sloping down to 7 feet above ground at the ends, perform pretty well. 150 ft of cobbled coax (soldered at the joints, then taped) matched through a tuner in the shack allow me to work all over the US and as far as the west coast on the 3905 Net on 1.892 MHz on a regular basis. In the November CW DX Test I worked 3 Caribbean and 2 South American stations, in limited operating. This with 100 watts and the 15 foot vertical portion on my inverted L, plus 8 ground laid radials, four for each band. On 80 meters I've done less operating, but one would expect similar if not slightly better performance there. I have worked all over the US, plus a couple of Europeans, North Africans, and Caribbean/Latin American stations on SSB around 3.798 MHz.

By comparison, at my last QTH, with the top of the vertical portion of my 160 meter L at 80 feet, and 4 radials, I worked into Europe, Africa and the Caribbean/South America about 100 times with 100 watts, with the antenna buried in trees. In one 160 meter SSB contest I made 553 contacts with it in one weekend. Not bad for an antenna in the woods with a handful of radials.

Point #2: And my main point. With my new 40 meter quarter wave ground plane with 8 radials, in the open, 100 feet from the house, direct fed by 52 ohm coax, my SWR is below 1.5:1, and I work nearly all that I hear, even DX, even on SSB.

And in recent weeks I have heard KL7, VK6, ZLs, KH6s, ZSs, 9L5, CE, CN2, EA9, HC8, OH0, P33, TX3A (Chesterfield Is), TFs, 6 JAs, and a myriad of the more common countries, all on 40 meters, and I worked them all. In addition, I heard several Chinese, Indonesian, and KH2 stations, multiple times, for long periods of time, and as late as 10 AM!

Point #3: What is going on with 40 meter propagation? While the short skip is less frequent, about half the US is coming through during the daytime with 59+ signals. And at night time, tuning around 7.125-7.2 MHz SSB, the world is at our finger tips. With the increasing wealth of Third World countries, kilowatts and 3-4 element Yagis are everywhere now, and these guys come through like gang-busters, most any night. Look especially around their sunset and sunrise times. Or look between 5-10 AM local time to Asia and the Pacific. VK6s, JAs, China, Hong Kong, Malaysia, are there, often in our portion of the phone band. A few recent examples: Last week around 6 PM I heard a guy in NYC working JAs, who were then working the Caribbean. Then a couple of ZSs broke in to say they were copying Japan, the US, and the Caribbean all 59+. Amazing!

Another example, around 9 PM I heard a KL7 calling CQ through S-9 QRM, and I worked him arm chair copy both ways. I have heard VK6s (the antipodal point on the globe from central Ohio) coming through on 40 SSB both in the morning hours and in the late afternoon routinely during the past month. As I recall, November conditions

were usually well down from September and October, but not this year.

Point #4: I have often tuned 7.125-7.200 MHz and heard nothing, just noise. Of course, the shortwave broadcast stations have vacated this spectrum, but with the long skip we have large segments of unused frequencies, in the evening hours. As I continue tuning the silent frequencies, all of a sudden I will hear a 5-7 to 5-9+ station from Brazil, Argentina or Europe call CQ, and I usually work them on my first call.

So there is plenty of DX out there to be had. And vertical/ground plane antennas that are far short of the optimum 120 radials, will get you through far better than most dipoles or inverted Vs. So grab a fishing pole, a rebar, some duct tape and 14 wire and go see for yourself! Go get your share of the DX. They're listening for you!"

Whew! Thanks, Bob. Believe it or not, that was edited down for brevity. To read more of Bob's writing, check out his narrative on his trip to Brazil in the July-August 2005 issue of the NODXA Rag at http://www.papays.com/rag0805.pdf.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for November 26 through December 2 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 74.7, 73.7, 72.9, 72.1, 72.4, 72.2, and 71.4 with a mean of 72.8. Estimated planetary A indices were 6, 2, 3, 1, 2, 0 and 1 with a mean of 2.1. Estimated mid-latitude A indices were 3, 0, 2, 1, 1, 0 and 0 with a mean of 1.

12033. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-04 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12033

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 04 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 338 Issued at 2200Z on 04 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 03/2100Z
to 04/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. The visible solar disk is spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 03/2100Z to 04/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled, with a slight chance for isolated
active conditions, for days one and two (05-06 December) due to a
recurrent coronal hole high speed stream. Conditions are expected
to return to quiet levels for day three (07 December).
III. Event Probabilities 05 Dec-07 Dec
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 04 Dec 072
Predicted 05 Dec-07 Dec 073/073/073
90 Day Mean 04 Dec 072
V. Geomagnetic A Indices
Observed Afr/Ap 03 Dec 000/000
Estimated Afr/Ap 04 Dec 000/001
Predicted Afr/Ap 05 Dec-07 Dec 007/008-007/008-005/005
VI. Geomagnetic Activity Probabilities 05 Dec-07 Dec
A. Middle Latitudes
Active 20/10/05
Minor storm 10/05/01
Major-severe storm 05/01/01
```

12034. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-05 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12034

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 05 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 339 Issued at 2200Z on 05 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 04/2100Z
to 05/2100Z: Solar activity was very low. No significant flares
were observed during the past 24 hours. The visible solar disk is
spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 04/2100Z to 05/2100Z:
The geomagnetic field was quiet. Solar wind observations from the
ACE spacecraft indicate the onset of a co-rotating interaction
region at around 06/0530Z. Solar wind velocity and density
increased slightly with fluctuations in the IMF Bt and Bz.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled, with a slight chance for isolated
active conditions, for day one (06 December) due to a coronal hole
high speed stream. Conditions are expected to be predominately
quiet for days two and three (07-08 December).
III. Event Probabilities 06 Dec-08 Dec
Class M 01/01/01
Class X 01/01/01

BY - Celebrating the launch of the Amateur Radio satellite XW-1, special event station BT3WX will be active from Taiyuan, Shanxi Province until 20 December. Look for activity on 160-10 metres and on VHF/UHF amateur satellite bands, including FM, SSB, CW, RTTY and PACSAT modes. QSL via BA1DU. [TNX BA1DU]
CO - Ed, CO7PH plans to operate SSB and CW as CO7PH/p from Cayo Coco (NA-086) on 17-31 December and from Cayo Anclitas (NA-201) on 2-5 January. [TNX CO7PH]
D2 - Paulo, CT1ITZ (D2CQ, ex D2PJB) was expected to QRT in late November [425DXN 967], but is now reported to remain in Angola until 27 December. He operates SSB ony. QSL via CT1IUA. [TNX F5NQL]
DL - DF9TM, DL2SWW and DL2VFR will operate CW and SSB as DF0WFF from Biosphere Reserve Schaalsee on 4-6 December. QSL via bureau. Information on the DL Flora & Fauna Award can be found at http://www.wff-dl.de/ [TNX DL2VFR]
FM - Fernando, EA1BT will be active on the HF bands as TO1BT from Martinique (NA-107) on 8-15 December. QSL via home call. [TNX F5NQL]
HA - Radio Club Puspokladany (HA0KHW) will be active as HG0WFF/p from three different Hungarian National Parks between 5 and 10 December. QSL via HA0HW, bureau preferred. [TNX HA0HW]
HR - Victor, N8OO and Andrei, NP3D will be active as HR2/N8OO, HR2/NP3D and HQ2S from Honduras on 10-20 December. They will operate CW, RTTY and SSB on all bands. Victor will participate in the ARRL 10 Meter Contest, and Andrei will take part in the OK DX RTTY Contest. QSL HR2/N8OO via home call (or via UA9TF for ex CIS countries) QSL HR2/NP3D and HQ2S via W3HNK (or via RW6HS for ex CIS countries) and LoTW. [TNX NG3K]
I - IQ3GA/3 - not II3SB as previously announced [425DXN 969] - will be active from Burano Island (IOTA EU-131, IIA VE-010) for the 5th International ARMI Contest to be held on 5-6 December (details at http://www.assoradiomarinai.tk). QSL via IW3IE. [TNX IT9MRM]
ON_ant - Karel, ON5TN has been active as OR4TN from the Belgian Antarctic

base "Princess Elisabeth", Antarctica since 1 December. He will remain there until the end of January 2010, with activity on the amateur radio bands during his spare time. Look for him between 21 and 23 UTC around 7007 (CW) and 7077 (SSB). Updates will be posted on qrz.com under OR4TN. QSL via ON5TN.
T6 - Jack, W4JJ is now active as T6LC from Gardez (Paktia Province), Afghanistan. He expects to operate mainly on 40 and 20 metres CW and SSB, 1430-1800 UTC as time permits. QSL via K4MJN. [TNX NG3K]
VK9 - David A. Burton, VK9WBM will be working at the weather station on Willis Island (OC-007) for the next six months. He plans to operate on the HF bands and 6 metres in his spare time. QSL via VK4DMC. [TNX www.southgatearc.org]
XE - The 10-14 December XF3RR IOTA expedition to Isla El Cerrito (NA-153) [425DXN 967] has been cancelled. The Radio Club Cancun plans to organize another operation from a different island in the same IOTA group in a few months' time.
XU - Peter, XU7ACY and Wim, XU7TZG will be active as XU7KOH from Koh Russei (AS-133) on 11-14 December. They will operate CW (Peter) and SSB and PSK31 (Wim) on 80-10 metres. QSL via ON7PP, direct only. [TNX NG3K]

Direttore Responsabile I2VGW

2010 IDXC ---> The 61st Annual International DX Convention, sponsored by the Southern California DX Club, will be held at The Holiday Inn Hotel & Conference Center Visalia on 16-18 April 2010. Preregistration began on 1 December. Complete details can be found at http://www.dxconvention.org/. For questions regarding registration or DX stations who need lodging assistance, please email Cathy Gardenias, K6VC at the address located on the website under registration. [TNX N6RV]

A35A ---> "Paul, A35A's move to Vava'u (OC-064) has been postponed indefinitely, and perhaps cancelled altogether", The Daily DX reports [425DXN 946]. "He remains QRV from Lifuka Island, Ha'apai (OC-169) until further notice".

CQ DX MARATHON ---> Each year, from 1 January to 31 December, CQ Magazine sponsors a challenge to work as many countries and zones as possible in the calendar year. The 2009 edition of the CQ Magazine DX Marathon ends soon, but there is still time to fill in some missing countries and zones. For complete rules and submission information, please visit www.dxmarathon.com [TNX K9EL]

CQ WW CLAIMED SCORES ---> Valery, RW3GU maintains an Unofficial Claimed Scores web page (http://pileup.ru/) for the 2009 CQ WW DX Contest (SSB and CW). Scores are based on 3830 reflector posts and claimed results from CQWW

logs received page.

K5D ---> The long anticipated K5D (Desecheo 2009) DVD is now available for sale. It was written, produced and narrated by Bob Allphin, K4UEE and edited by Ed Boutwell, W4ZSB. This is their seventh DXpedition DVD. To purchase a copy, go to www.kp5.us and click on the link on the first page. [TNX K4UEE]

RDA TRIP ---> Denis, RA4FJV says that his Russian District Award 2009 trip is over after some 7000 QSOs made as UE4FDA and RA4FJV/m from 28 different districts. On-line logs can be found at http://www.ra4fjv.org/logs/search.html; QSL dia RA4FJV, direct (Denis Ogurok, Chernyshevskogo 1-1, 442153, Nizhny Lomov, Russia) or bureau.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

TX3A ---> The Online QSL Request System for TX3A is now up and running at http://tx3a.com/qsl.html (it can be used for either direct and bureau cards).

+ SILENT KEYS + Andrej V. Golopurov, RU1AO is one of the victims of the Nevsky Express train disaster on 27 November. He was returning from Moscow to Saint Petersburg for the CQ WW CW. Other recently reported Silent Keys include Ben Clarkson (G7WHO), Paul Knight (KE5OVA), CQ Amateur Radio Hall of Famer Jerry Sevick (W2FMI), Antonio Scolamiero (YV4DDK) and New Zealand's Top DXer Roy Jackson (ZL4BO).

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9M6 - Tony, KM0O, is currently (25-30 November) operating as 9M6LSC from the Langkah Syabas Beach Hotel club station on all 10-160 metres, mainly (or all) CW, including an entry in the CQ WW DX CW Contest. QSL this operation only via KM0O. [TNX 9M6DXX]
CE0Y - Lars, SM6CUK will be active as CE0Y/SM6CUK from Easter Island until 6 December, including and entry in the CQ WW DX CW Contest. He operates CW only, with a special temporary authorization to use 30 metres. QSL via home call, direct or bureau. [TNX The Daily DX]
CX - Ghis, ON5NT will be active as CX5NT from Uruguay on 12-17 December. He plans to operate holiday style during the local evening and night hours, typically on 30 and 40 metres CW. QSL via ON5NT. [TNX ON5NT]
EA - Adolfo, EA7TV will be active as EG7OFM on 28-29 November from La Rabida Monastery. The special callsign is in celebration of the 800th anniversary of the Order of Friars Minor, founded by Saint Francis of Assisi. QSL via EA7TV, bureau preferred. [TNX EA7TV]
F - TM23T, TM4TLT and other special stations will be activated for the 23rd annual Telethon, the fund-raising event organized by the French Muscular Dystrophy Association that will take place on 4-5 December. QSL via operator's instructions. [TNX F8REF]
GM - MS0INT is the callsign issued to the IOTA expedition to the difficult to access Flannan Isles (EU-118) [425DXN 963]. Weather permitting, a team of five determined operators (EA1DR, EC2ADN, EA3NT, MM0NDX and SM0MDG) will be active from this rare group on 18-21 June. QSL via M0URX. Further information is expected in due course. [TNX http://dx-hamspirit.com/]
H40 - Siegfried, DK9FN will be active again as H40FN (QSL via HA8FW) from the Reef Islands (OC-065), Temotu Province on 6-19 February. He will operate CW only, with a strong emphasis on 160 and 80 metres, while Bernhard, DL2GAC (H40MS, QSL via home call) will operate SSB and Hans-Peter, DG1FK (H40FK, QSL via home call) will operate mainly PSK31. Further information to be found at http://hari-ham.com/h40fn/

HH - Steve, VE2TKH is active in his spare time as HH2/VE2TKH from Petionville, Haiti until 15 December. He focuses on 30, 20, 17 and 15 metres, but power is currently only available between 01.00 to 11.00 UTC, while between 11 and 6 UTC he runs battery power. QSL via M0URX. [TNX http://dx-hamspirit.com/]
HL_ssh - Sang Hoon Lee, DS4NMJ will be active as DT8A from the Korean Antarctic base King Sejong on King George Island South Shetlands (AN-010) for 14 months, from 5 December 2009 through 31 January 2011. He plans to operate on all bands mainly CW, with some SSB and RTTY. QSL via HL2FDW. [TNX ARRL DX Bulletin]
I - II0SB/mm from an Italian Navy Coast Guard patrol boat (QSL via IS0MKX) and II3SB from Burano Island (IOTA EU-131, IIA VE-010, QSL via IW3IE) will be two stations participating in the 5th International ARMI Contest to be held on 5-6 December (details at http://www.assoradiomarinai.tk). [TNX IT9MRM]
IS0 - A group of operators from the Sardinia QRP Club (IQ0QP) will be active from the lighthouse at Capo Sant'Elia (ARLHS SAR-019, WAIL SA-008) on mainland Sardinia (EU-024) from about 18 UTC on 12 December until about 10 UTC on the 13th. They will operate SSB, CW and digital modes on 20, 30, 40 and 80 metres. QSL direct (see qrz.com). [TNX IS0VSU]
KP2 - Sharon, K7WZB and Garry, K9WZB will be active as K2V from Saint Croix, US Virgin Islands (NA-106) on 2-14 December. They will operate SSB, CW, RTTY and PSK31 on 160-6 metres, with special attention for 6m openings. QSL via K9WZB (direct only). On-line log at http://www.clublog.org/logsearch/K2V [TNX NG3K]
OH - Santa Claus Land (OH9SCL) will be again active in December from the Artic Circle. Activity will be on 10-160 metres CW, SSB and digital modes. QSL via OH9UV. [TNX The Daily DX]
OZ - Special event station 5P15COP will be active on 160-6 metres SSB, CW and digital modes on 7-18 December from Sjaelland (EU-029) during the United Nations Climate Change Conference that will be held in Copenhagen. QSL via OZ5BAL, direct or bureau. Further information, including detail of the relevant certificate, can be found at http://www.5p15cop.dk [TNX OZ1JTE]
PA - Special event station PB500GT will be active from 28 November to 13 December to celebrate the 500th anniversary of Grote Toren, the great bell tower that is the main landmark of the city of Breda. QSL via PA1WLB. [TNX F5NQL]
S2 - S21RC, S21AM, S21S and S21D will return to St Martin's Island (AS-127), Bangladesh on 21-25 February. They plan to operate as S21DX with two stations. QSL via EB7DX. They are looking for a few pieces of equipment, instructions on how to help and further information can be found at http://iota.s2dx.org/ [TNX http://dx-hamspirit.com/]
ST - ST2AR is the new callsign issued to Robert, S53R [425DXN 960]. Look for him to participate in the CQ WW DX CW Contest. For the time being, QSL via S53R (direct only). [TNX NG3K]
TF - Darren, G0TSM will be in Reykjavik, Iceland from 27 November to 1 December. He hopes to make some S&P QSOs during the CQ WW DX CW

Contest as TF/G0TSM. QSL via home call. [TNX G0TSM]
TI - TI7WGI, DH8WR, DL2JRM and DL3ALF will be active as TI7XX from San Jose Island (NA-191) from 30 December to 5 January. They plan to operate CW, SSB, PSK31 and RTTY on all bands with two stations. QSL via DL2JRM, direct or bureau. [TNX www.rsgbiota.org]
V3 - Wil, EA7HEJ (PA0WWV) will operate SSB and CW as V31WV from Belize until 20 December. QSL direct only to Wil Lameree, Apartado Postal 107, 21830 Bonares, Huelva, Spain.
VE - Special callsign VE3PARK will be in use on 1-31 December to celebrate the 100th anniversary of Canada's National Parks System. QSL via VE3NOO. [TNX F5NQL]
VP2M - Mike, W1USN will be operate mainly SSB and PSK31 as VP2MPR from Montserrat (NA-103) from 28 February to 13 March. Bob, AA1M will operate mostly CW as VP2MPL on 6-11 March. QSL via home calls. [TNX AA1M]
VP2V - Kurt, W3HQ will be active as VP2V/W3HQ from Virgin Gorda, British Virgin Islands (NA-023) on 4-16 December. He will operate CW only, with a focus on 160 and 10 metres during the weekends, and on 30, 12 and 17 metres during the week. QSL via home call. [TNX NG3K]
XU - Norbert, F6AXX and Alain, F6HBR will operate CW only (3520, 7020, 10115, 14020, 18071, 21020, 24891 and 28020 kHz) as XU7UFT from Sihanoukville, Cambodia on 3-8 December. QSL via F6AXX, direct or bureau. Direct cards will be replied to after 15 January 2010. [TNX F5NQL]
YB - Adhi, YB3MM will be active in his spare time as YB3MM/p from Bawean Island (OC-197) between 4 and 9 December. His activity will be limited to 15 metres CW. QSL via IZ8CCW. [TNX IZ8CCW]

ARRL 160 METER CONTEST ---> Object of the contest is for amateurs worldwide to work W/VE amateurs on 160 metres CW only (complete rules can be found at http://www.arrl.org/contests/rules/2009/160-meters.html). This year's event will run from 22.00 UTC on 4 December through 16.00 UTC on the 6th.

IOTA ANNUAL UPDATE (NEW DEADLINE) ---> The deadline for this year and future years is 31 JANUARY (one day earlier than previously).
Applications or updates submitted online on or before 31 January 2010 will count for the 2010 Honour Roll and Annual Listings so long as the supporting cards sent to checkpoints are postmarked no later than that date. Updates postmarked after 31 January will be processed in the normal way but scores will be held over to the following year's listing. To remain listed in the performance tables participants will need to have updated at least once since February 2005.
On-line credit for QSOs made during the 2009 IOTA Contest is expected to be claimable around Easter 2010.

NAVAL CONTEST ---> This year's International Naval Contest will be organized by the Nucleo de Radioamadores da Armada (NRA), the Portuguese Navy Amateur Radio Club. Complete details on the event, that will be held on 12-13 December, can be found at http://www.nra.pt/

NOT THE MANAGER ---> Marc, F6DAY says he is receiving cards for 5R8AL, but he is not and has never been his QSL manager.

QSL GA2MP ---> This special event callsign will be in use until 30 November. Current logs are in LoTW as of 19 November. QSLs are on order, but will not be in-hand before the cutoff for DXCC (31 December). If anyone needs a card for their 2009 DXCC submission, N3SL can fill your request using a GS2MP card. Simply indicate that with your QSL. Those who already have sent an SASE, email N3SL (n3sl@...) with the request to confirm using the GS2MP card. All others will be answered when the new cards arrive. [TNX N3SL]

QSL 9M6LSC ---> Please note that the QSL route for contacts made on 25-30 November 2009 (CQWW CW included) is via KM0O. The callsign was used also by Brian, 5B4AIZ/G4ODV on 6-9 March 2008 (QSL via G3SWH). For all other operations as 9M6LSC QSLs should go via JN1WTK. [TNX 9M6DXX]

QSL PT5UN & ZW5UN ---> The new QSL route for both ZW5UN and PT5UN is via K3IRV.

TX3A ---> If the weather holds fine as forecast, TX3A is expected to go QRT at the end of the CQ WW DX CW Contest at 24 UTC on 29 November (i.e. on 30 November at 10 AM Chesterfield time). They will depart for Australia on 1 December.

+ SILENT KEYS + Recently reported Silent Keys include Ron Levy (K2CO), Kenneth L. Adams (K5KA), Andy Jarema (N6TCQ), John F. Mayger, Jr. (W4DJ), Bob Taylor (W5LBT) and Tracy Hull, TL8HW. "In the late 1980's he was very active from Bangui, Central African Republic", Paul, W4FC says. "He was a Baptist missionary and served there for over 20 years until the political situation prohibited him from returning. He died from a heart attack at the age of 69 in Clermont, FL. He gave out many new country contacts while there".

QSLs received direct or through managers: 3D2GM, 3W1M, 4U1ITU, 4U1UN, 4W6AL, 5H1EE, 5N0OCH, 5V7SE, 7X0DX, 8R1DB, 8R1TO, 9G5ZZ, 9M2AX, 9M6/JJ2CJB, 9Y4D, A45WG, A61BK, A7/M0FGA, A73A, AH0BT, BA8AG/4 (AS-136), BD9TD, C31CT, CE1KR, CO8LY, CP4BT, DX1J, E51NOU, E51QMA, E51TUG, EA9IE, EA9LZ, EK6LP, EK6TA, EK7DX, EY7AD, EY8MM, FG5LA, FK8GM, FO/G3BJ (OC-050 & OC-152), FP/G3ZAY, FR1AN, FS/K1XM, GP0STH, GT4IOM, H40MY (OC-178, OC-192, OC-162), H44TO (OC-192), HP3AK, J28JA, J29ZG, J5UAP, J69MV, J79ZG, K7A (NA-236), K9AJ/VY0 (NA-185), KD6WW/VY0 (NA-185), KH7XS, KL5O, LA2NK (EU-044), OX2A, OY3AA, PJ5/AH6HY, R1ANB, T2G, T30GM, T70A, TK9X, TO8YY, TY5ZR, UN4L, V51AS, V8FGM, VE1/G3ZAY, VK9LA, VU2PAI, WP3C, YI1RZ, YI9TM, YL2GN, YO4ATW, Z21BC, Z35M, Z37M, ZK2NX, ZL7/N7OU, ZS6RJ.

12037. LOTW qso/qsl time matching

Yahoo group: DX-IS (2009)
Date: 2009-12-06 00:46:46 UTC
From: Frank T Brady
Topic: 11052 Message: 12037

Hi
I recently heard from ZL1ALZ that he never received LOTW confirmation of two of our QSOs in 2005.
e.g., his time was 0527z and mine was 0428z - we figure that LOTW has a narrower match window.
My time was correct (local + 4 hours) because Indianapolis did not use DST (unlike much of the rest of the state).
Had I been on DST, the time would have matched his (my local time + 5 hours).
Any ideas about what is happening here (why no match).

From: Earl Needham
Topic: 11052 Message: 12038

Yep, both stations' times have to be within 30 minutes or else no match.

If you were both accurately logging in UTC there would not be a
problem. One of your two systems was incorrectly calculating UTC
which is why the one hour discrepancy--too much for LOTW. Whichever
log entry is in error needs to be corrected and re-uploaded to LOTW.

Dick

Topic: 11052 Message: 12040

I see your point Dick - I'll have to get with zl1alz and see which of us
used the incorrect UTC.
I'm glad to hear that it's ok to correct the time and upload the qsos again.
That was a question I forgot to ask.
I was worried that the system wouldn't want me to modify info and resubmit.

Hi Frank:
The time match window is 30 Min.

I think your time calculation is reversed.

EST + 5 = GMT
EDT + 4 = GMT

Probably all the other QSO's you submitted in that upload won't match.

Just change the time and reload to LoTW.

By chance was the clock on your computer set for DST? Mine changes automatically twice a year. Could the 2005 contact been when Indiana went on DST? Just a thought.

LOTW doesn't allow you to modify or delete an entry. As far as LOTW
is concerned, you will be uploading an entirely new QSO. You will
end up with two entries in LOTW, one correct and one incorrect. This
is how LOTW was designed.

Thanks Dick,
I've examined my qso log, and from 2005/04/02 through 2005/10/28 I was using the DST GMT offset when I should NOT have been (Indianapolis and some other Indiana areas weren't going to DST at that time. So, I'll have to adjust and resubmit that batch of QSOs. Maybe I'll get a needed confirmation or two! At least I will help guys like ZL1ALZ get their confirmations.
This has been very worthwhile - thanks everyone.

12045. UTC time Calc error

Yahoo group: DX-IS (2009)
Date: 2009-12-06 13:38:49 UTC
From: Norman Alexander
Topic: 12045 Message: 12045

The problem is miscalculation of UTC time based on local time. Based on the statements below UTC was incorrectly computed. The shift to DST time reduces the differential by one hour with respect to UTC time.

EST + 5 hours = UTC, and EDST + 4 hours = UTC.

In the case for Indiana, which is in the Eastern Time Zone, the preceding statement applies. However Fort Wayne chooses to stay on Standard time (EST) and therefore would keep the 5 hour differential to UTC.

This excerpt from the text below describes the error as the statements are opposite of how the time is calculated.
"My time was correct (local + 4 hours) because Indianapolis did not use DST (unlike much of the rest of the state). Had I been on DST, the time would have matched his (my local time + 5 hours)."

The solution is to use EST (local time year round in Fort Wayne) plus 5 hours for all QSO's.

Remember, if you "Spring ahead" one hour, UTC does not change so now the differential is less, "Fall Back", well you can figure that out too.

Regards,

W4QN

Hi
I recently heard from ZL1ALZ that he never received LOTW confirmation of
two of our QSOs in 2005.
e.g., his time was 0527z and mine was 0428z - we figure that LOTW has a
narrower match window.
My time was correct (local + 4 hours) because Indianapolis did not use
DST (unlike much of the rest of the state).
Had I been on DST, the time would have matched his (my local time + 5
hours).
Any ideas about what is happening here (why no match).

For the USA, why not tune in to WWV before every contest to make sure you
have it right (and to synchronize your clock)? I do that.

WindowsXP service pack 3 broke the automatic DST feature. It reverted to
the old schedule. MS has a
patch to fix it.

I don't entirely trust the computer for accuracy. That's why I tune in to
WWV and if they say "twelve hours forty five minutes coordinated universal
time," that's what I set my clock to.

From: John P.
Topic: 12045 Message: 12049

There are many applications that will sync the computer to a GOOD time standard from a time server.

The one I use is called "D4TIME" which can be found on the Internet. It has a number of Internet time servers in its configuration and also measures the time delay between to server and your computer and adjusts accordingly. It has a small footprint in memory and can be set up to automatically update the computer clock periodically - as a Task Tray application.

Subject: Re: [DX-IS] date/time/ and other confusion

I have never bothered to use anything but the built in features of WinXP. It sets the clock with time.windows.com once a week. However it is trival to change it to the time server of your choice. I use time.nrc.ca the source for CHU and a simple reg edit changes the frequency that the time is set to once/hour. By doingit that way I don't have software running in the background the uses system resources and memory. Check out the

12051. On Spotting PSK-31 DX

Yahoo group: DX-IS (2009)
Date: 2009-12-06 18:10:14 UTC
From: CSM(r) Gary Huber - AB9M
Topic: 12051 Message: 12051

I've recently been accused of a number of things regarding DXClusters and PSK-31 DX.

First of all, I do not want to or intend to diminish anyone's joy of DXing.

I consider myself fortunate to have been mentored by some real Old Timers in the DX game; gentlemen who had worked everything but still took the time to teach the new kid the rules of the game...

I consider myself fortunate to have worked in the emerging wireless industry before the IBM PC and cell phones in applications development of NexTel® and Blackberry® products for one of the world's insurance giants.

I consider myself fortunate to have the financial resources to accumulate the station equipment that I have. While there are a few radios with better sensitivity and dynamic range figures, what I have works for me and I am satisfied.

I am grateful for the many DX confirmations that I've received, although I'd like to have Crozet and South Sandwich "on the wall" instead of just 342/336.... (oops, "ego spot!!")

I'm grateful that I have the time to spend, four to eight hours a week, looking for new ones.

I found this location to have little noise and a good receiving / transmitting location on glacial moraine.

I do NOT spot everything I hear, but I try to spot DX PSK-31 stations which MAY be of interest to other Digital DXers.

I believe that those who are complaining may have some resource limitation, either bandwidth or computing power. As a former DXCluster Sysop, I still have the manual with the necessary filter commands and will be happy to provide the DXC commands to improve resource utilization.

DX IS!

Best regards and apologies to all,

Hey, it's all about DXCC anyway and there is a separate award for Digital DXCC, which includes PSK-31. What's the problem?

Just because everyone isn't going for digital DXCC doesn't mean the spots aren't useful to some people.

Gary, I am grateful I figured out how to set up VE7CC's program to filter out all your spots. Also anything that says RTTY or PSK in the comments. Now we're both happy.

The complainers should try that route.

On XP and Vista, you may change the time zone yoiu are in (and yes it does have both versions of Indiana) by checking a box that automatically changes youir time. It will warn you of the change one week in advance. Right click on the time in the lower right hand of your task tray. Will even adjust time for contest software (at least mine does)

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 CQ DX MARATHON (Less than a month to go!) John, K9EL, Program Manager for the CQ DX Marathon, wants to remind everyone that there is less than a month left in the 2009 version of CQ Magazine's annual DX Marathon! Each year from January 1st to December 31st, CQ Magazine sponsors a challenge to work as many countries and zones as possible in the calendar year. This

year's edition ends soon, but there is still time to fill in some missing countries and zones. Last year's winner was determined by a QSO made on December 21st, so keep working DX! For complete rules and submission information, please see their Web site at: http://www.dxmarathon.com

3W, VIETNAM (Update/Operator Needed!! [VERY RARE IOTA - #2]). An international group of operators will be active as 3W6C from Con Co Island (AS-185), Vietnam, in April 10-18th, 2010 (See OPDX.926 for more details). Paul, AA1MI/HB9DST, EUCW Communications Manager for the "Helvetia Telegraphy Club", reports that the 3W6C DXpedition has an opening for one additional experienced CW operator. He states, "This DXpedition is being headed up by several members of the Helvetia Telegraphy Club, but we also have members from other countries including Vietnam. German language is NOT required to participate. Full details about the DXpedition are available at: http://www.3w6c.qrv.ch
If you or any members of your organization would like to be considered a candidate for this open spot on our crew, please send details about your background and DXing experience to Hans-Peter at: hb9bxe@...
He can likewise give you further details about expenses, travel, etc."

3V10, TUNISIA (Special Event). The Radio Club Station of Tunisian Scouts (3V8ST) in the CAST will commemorate their 10th anniversary by activating special event station 3V10A from the headquarters of Tunisian Scouts in Tunis Mahrajens (Tunisia's capital city). Activity will last until December 31st. QSL via: AMATEUR RADIO CLUB STATION TUNIS, P.O. Box 339, 1082, Tunisia.

5I, TANZANIA. Igor, UA3DJY, is currently in Dar Es Salaam, and plans to operate from the DIT Communications Club station, 5I3A, until December 15th. Over the past weekend, Igor has been very active on 17 meters CW between 0730-1400z. QSL via RK3AOL.

61ST IDXC. The 61st Annual International DX Convention sponsored by the Southern California DX Club will be held at the Holiday Inn Hotel & Conference Center, Visalia, CA, April 16th, 17th, 18th, 2010. Pre-registration begins December 1st, 2009. The International DX Convention is the world's foremost DX convention. If you are a DXer or interested in any aspect of ham radio, you need to be at Visalia. Top DX operators from around the world will be there. Meet the big guns from the US, Asia, Europe, Africa and Oceania. Meet the people on the other side of the mic or key. Shake hands with the person you have had that sked with for the past 10 years. Renew friendships. Don't forget your YL! We will have something special for them as well. Top DXpeditioners from every continent tell you how they did it. Learn the secrets for big signals on the top band, how to have fun and adventures chasing IOTA, contest forum, antenna forum, DX forum, seminars for everyone from the seasoned pro to the beginning DXer. Attend the traditional Saturday night banquet where great friends and good food are met with lively presentations. The Sunday breakfast buffet has a terrific selection and variety. Enjoy more presentations and the parody, "Are You Smarter Than a DXer. This year there is a twist! Visit the manufacturers' midway where you can talk to the people

who design and use the latest and best equipment. Don't forget the raffle prizes which top even the famed Dayton Hamvention! For the early arrivers NCCC will be hosting the Contest Academy on Friday! Stop by their Web site for more details at: http://www.dxconvention.org
For questions regarding registration or DX stations who need lodging assistance, please E-mail Cathy Gardenias, K6VC, at the address located on the Web site under registration.

8Q, MALDIVES. Thomas, OE2ATN, is planning to be active as 8Q7AT from the Island of Velidhu (AS-013) next year between May 23rd and June 4th (2010). Activity will be mainly SSB on 80/40/20 meters using a Yaesu FT-897D (w/LDG Auto-Tuner and 100 watts) into possibly a G5RV antenna. QSL via OE2ATN (QSL cards will go out via GlobalQSL.com).

A3, TONGA (Island News/Update). Paul, A35A, informs OPDX on December 2nd, that Dave/W6ZL (A35KL) was leaving Ha'apai on December 3rd. Dave should be in New Zealand by the time you read this. Paul states, "Dave probably won't be QRV again from Tonga until perhaps April 2010. He may be able to get on the air from ZL, when he visits some of his radio buddies down there. I'll let him fill you in if/when that happens." He also mentions, "All antenna work here at A35A is 99% complete. The SteppIR yagi (w/6m add-on) is up and working fine; the 4 element 6m beam has been cleaned up and is working fine; the SteppIR BigIR vertical (w/80M add-on) is up, but I still have some tweaking to do on the elevated radials to get a good impedance match. I intend to be more active from now on, especially on 80m. I want to finish up on 5BDXCC before my QSL manager (W7TSQ) gets tired of waiting! HI... The 6m Es season is fast approaching down here, so that should provide some excitement....especially since both North and South Cook Islands (E51CG and E51WL) are now QRV. Incidentally, our announced move to Vava'u (OC-064) has been postponed indefinitely, and perhaps cancelled altogether. A35A remains QRV from Lifuka Island, Ha'apai (OC-169) until further notice. QSL via W7TSQ or LoTW."

AFRICAN TOUR (Western). Peter, HA3AUI, is once again heading to Africa in early 2010. Look for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau between January 15th and March 31st. Peter used these callsigns once before. His stays in Senegal (6W) will be very near to the border of Guinea-Bissau (J5), and he plans to make regular trips to J5-land for the beautiful beaches there (plans to also operate from there). Using his Elecraft K3 with 500w into a 5-Band Spiderbeam and verticals, Peter's activity will be on 160-10 meters, mainly on the digital modes, but he will use the other modes on request. QSL direct via HA3AUI. Visit his Web site at: http://cqafrica.net

BT3, CHINA (Special Event). Look for special event station BT3WX to be active until possibly mid-December. Activity is to celebrate the launch of XW-1, China's first amateur satellite, as well as inspire radio amateurs and young people to learn about amateur satellite communication technology, space knowledge, and the popular amateur satellite activities in China. AMSAT-China will set up special event station in Taiyuan, Shanxi Province of China. Activity will be on all of HF amateur bands from 160-10 meters

and on VHF/UHF amateur satellite bands, including FM, SSB, CW, RTTY and PACSAT modes. The BT3WX activities have already started (but QSNs have been reported) and will last until the end of the launch (expected December 20th). QSL Manager is BA1DU: Alan Kung, P.O.Box 8091, Beijing, CHINA 100088. Operators mentioned are: BA4RB, BA4RN, BA4RS, BA4RX, BA4TA, BA4TB, BD4IBW, BD4REB, BD4RPJ, BD4XX, BH4REQ, BA6AA, BD6BW, BA7CK, BA7JG and BD7PZL. There are "BT3WX Communications Awards available" (HF Award and Satellite Award). For details, see AMSAT's Web site at: http://www.amsat.org/amsat-new/news

CE0Z, JUAN FERNANDEZ ISLAND. Toshi, JA8BMK, will be active as CE0Z/JA8BMK between January 19th and February 2nd. Marco, CE6TBN, will be joining him, but for only 5 days (dates were not provided). Activity will be on 160-10 meters, with a focus on the lower band, and they are expected to be using CW, SSB and the Digital modes. They will use an amp, and antennas will be a yagi and vertical. QSL direct to JA8BMK at: Toshi Fukuta, 2115-3 Nobori, Yoichi, Hokkaido 046-0002 Japan.

CO7, CUBA (IOTA Op). Edor, CO7PH, will activate the following Cuban IOTAs as CO7PH/P in the coming weeks in Cuba's 7th District:
NA-086 - Cayo Coco Island between December 17-31st
NA-201 - Cayo Anclitas Island between January 2-5th.
Bands and modes of activity as well as QSL route was not provided.

D2, ANGOLA (Update). Paulo, CT1ITZ, active as D2CQ, will be in Porto Amboim until December 27th. Activity will be on 80-10 meters SSB only. Most of his activity this past week has been on 20/17 meters between 0830-1730z. He is using an Icom 706 and a Windom antenna. QSL via CT1IUA. Direct QSL, please send 2 USDs or one new IRC (ending 2013). QSLs without enough postage will go via Bureau.

DR09, GERMANY (WAP Op). German radio amateurs in the district Upper Bavaria (Southern Germany) will activate the special callsign DR09ANT (DOK "IPY" and WAP-Nr. 156) for the "Worldwide Antarctic Program" (WAP) for the last time between December 14-31st. Activity will be on all bands and modes. QSL via Bureau.

DU, PHILIPPINES. Lee, HL1IWD, will be active as DU1/HL1IWD from Manila between December 31st and January 3rd. Activity will probably be on 80-10 meters using mainly CW. QSL via his home callsign.

DVD AVAILABLE FOR THE HOLIDAYS! The "KP1-5 Project" announced today that the long anticipated Desecheo K5D DVD entitled "so rare, so near, yet so far" is now available for sale. The DVD was 5 months in production and is receiving rave reviews. It was written, produced and narrated by Bob Allphin/K4UEE, and edited by Ed Boutwell/W4ZSB. This is their seventh DXpedition DVD. To purchase your personal copy or for a great Holiday gift, go to <http://www.kp5.us> and click on the link on the first page.

IOTA NEWS.....
AS-133. Operators Peter/XU7ACY (ex-NO2R) and Wim/XU7TZG (ex-ON6TZ) will be active as XU7KOH from Koh Russei (aka Bamboo Island)

between December 11-14th. Activity will be on all bands,
80-10 meters on the regular IOTA and PSK frequencies. Modes
will be PSK31, SSB and CW. Peter will do the CW and Wim will
be on SSB and PSK31. QSL ONLY DIRECT with 2 USDs and a SAE
to the QSL Manager ON7PP.

NA-153. (OPERATION POSTPONED!) Operators Zalo/XE3N, Jose/XE3PP, Benigno/
XE2WK and Juan/XE3RR, who were expected to be active as XF3RR
from Isla Cerrito this week, have postponed their operation
(due to logistics) until possibly early 2010. Activity was
planned for 80-15 meters using SSB and RTTY. QSL via EB7DX.
This operation is organized by the Radio Club Cancun, and
was expected to be a low scale operation as the island is a
protected area of the government of Mexico. To avoid the
tranquillity of the thousands of birds and species that inhabit
the island, this island is subjected to many restrictions
including the amount of equipment and individuals on the
island. For updates, please visit the following Web page at:
http://www.xf3rr.net

SA-044. Pasquale, YV5KAJ, informs OPDX that he is celebrating his 25th
year in amateur radio by going on a DXpedition to the Island
of Tortuga and honoring Anacleto, IW5EID, for introducing the
hobby to him. He will also be using the special callsign,
YW5EID, during his operation between December 26-29th. Activity
will be on 40/30/20/17/15/12 meters using SSB and the Digital
modes (RTTY/BPSK/Olivia). QSL via EA5KB or see info on QRZ.com.

KH6BZF PROPAGATION FORECAST/REPORT (For December 7-13th)....
Dec 7 AN SOLAR REFERENCE
Dec 8 AN ---------------
Dec 9 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 10 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 11 AN LN - Low Normal
Dec 12 AN
Dec 13 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LCL 2009. Lighthouse Christmas Lights QSO Party will be held between December
19th and January 3rd (2010). More details about awards, certificates, prizes
and rules for the ARLHS 2009 Lighthouse Christmas Lights QSO Party (LCL 2009)
are available on the following Web page at:
http://arlhs.com/LCL-2009-guidelines.html

NEW OFFICERS FOR 2010. Members of the National Capitol DX Association
(NCDXA) <http://www.qsl.net/ncdxa> elected the following officers to
serve in 2010 at their October 2009 annual meeting:

Dick Mayott/W2YE - President
John Kanode/N4MM - Vice President
George Vincent/K3GV - Secretary
Brian Bayus/N1KC - Treasurer

QSL INFO AND NEWS.....
TX3A'S OQRS NOW ACTIVE. The TX3A's "Online QSL Request System" (OQRS) is now active at: http://tx3a.com/qsl.html

QSLS VIA LoTW: F9IE, FR5MV, K4M and TX3A

QSLS RECEIVED VIA MAIL: 3D2GM, 4W6AL, 5B4KH, BA4DW, CU3EJ, E7/KX7M, EA3BOX, ES1WN, ET3JA, ES3AX, FK/JA1NLX, FP/G3ZAY, FR5ZL, HK3JJH, JT1CO, K9RR/4, KH7C, KH0/JR4GPA, LX1NO, LY2ZZ, OH1AA, OX3XR, R1ANC, R1ANY, RW6HS, T2G, T30GM, T68G, TF3CW, TG9NX, TI7DBS, TX5SPA, TX5SPM, UA2FFW, UN8GV, VY0O, W3HNK, WP4U, YW5F and ZK2NX

QSLS RECEIVED VIA THE BUREAU: 3V8SS, 4K9W, 4O/EA1DR, 5W0UK, 6V7O, 8J1RL, 9J2FM, 9K2/SP4R, 9M2TO, 9M6/N1UR, A52RY, C91YI, CE8A, CE0Y/SM6CUK, D68WL, DP1POL, DU7/PA0HIP, DX1J, E51CUK, H40FN, J3/DL7CM, J6/W0SA, KG4SS, KH6OO, KL7HBK, T88IW, UK/JI2MED, V5/DL2SL, VP6PR, XR7A, YS1G, ZD7X and ZK3MW

SOUTH AMERICAN TOUR (Update). As we mentioned last week, Ghis, ON5NT, will once again be on a South American trip through Brazil and Uruguay in December. He informs OPDX that there will not be any activity from Brazil as there is no reciprocal license between ON and PY (He states, "I can't get a PY license. Operating with my CEPT license/PY does not seem to be fully legal."). However, Ghis will be active from Uruguay between December 12-17th. His callsign will be CX5DNT (not CX5NT as first announced). He states, "The rule says the first letter after the number in the callsign indicates the region. The Montevideo region is A, B, C or D." As this is a holiday trip, he plans to be active mostly during the local evening/night hours. So check 30m (10107 being his preferred frequency) and 40m (CW in general); they will be the best options to catch him. QSL via ON5NT.

T6, AFGHANISTAN. Jack, W4JJ, currently in Gardez (Paktia Province, Eastern Afghanistan), is working with the Afghan National Army, and has been issued the callsign T6LC from the Government of the Islamic Republic of Afghanistan. There have been a couple of QSNs reported on 40m SSB and 20m CW. Jack expects to operate between 1430-1800z, as time permits. QSL via K4MJN. Visit his Web page at: http://www.w4jj.com

VK9W, WILLIS ISLAND. Reports indicate that David Burton (home callsign not provided) has been assigned to the "Bureau of Meteorology" station on Willis Island for the next 6 months and will be operating as VK9WBM. The last activation of Willis Island was by the Bavarian Contest Club in October 2008 as VK9DWX, and the team made +95k QSOs. David is currently on the island, but no QSNs have been reported. His activities will be limited to his free time, but he plans to be active as much as possible on the HF bands and 6 meters using an IC-718 and an Alinco DX70. Details of the station's setup are expected to be on QRZ.com. His QSL Manager is VK4DMC.

VR2, HONG KONG (Special Event). Members of the Hong Kong Amateur Radio Communications Association (VR2HAM) will activate special event station VR2EAG to celebrate 5th East Asian Games 2009 being hosted in Hong Kong. Activity will last until December 13th. QSL via: HK Amateur Radio Communications Association, GPO Box 7191 Hong Kong. Visit their Web page at: http://vr2ham-hk.com -- or -- http://vr2ham.org

VY1, CANADA (Need the Yukon!). "Yukon John", KL7JR, informs OPDX this week that he will be active as VY1RST from Destruction Bay, Yukon, between December 17-22nd. Activity will be on 80-10 meters SSB using various homebrew antennas. E-mail skeds are available at: KL7JR@...
John mentions that he will attempt to activate Jacquot Island on Kluane Lake for a "new one" (for the CISA) provided the ice is thick enough to drive on. QSL via the address on QRZ.com or the CBA.

YI, IRAQ. A group of operators called the "YI9PSE DXpedition team" are planning to visit Kurdistan and be active in the spring of 2010. Activity will be on 160-10 meters including 30/17/12 meters using CW, SSB and RTTY. They will have at least 3 stations on the air. Suggested frequencies are:
CW - 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 1845, 3780, 7065/7180, 14195, 18145, 21295, 24945 and 28495
RTTY - 7035, 14080, 18100, 21080, 24920 and 28080 kHz

The current YI9PSE Team consists of the following operators: Paul/N6PSE (Team Leader), Andreas/N6NU, Bob/N6OX, Bruce/W8HW, Garry/NI6T, David/AH6HY and Jun/JH4RHF. Pilot station will be Chuck/AA6G. QSL via N6NKT. Online logs will be available during and after the DXpedition. For more details and updates, visit: http://www.yi9pse.com

12057. Re: UTC time Calc error

Yahoo group: DX-IS (2009)
Date: 2009-12-07 12:57:19 UTC
From: aburkefl
Topic: 12045 Message: 12057

If you're "maintaining" your OS with microsoft updates, the DST information remains correct.

If the PC you use for ham radio functions is *only* used for ham radio functions, you can set the PC time to a country in the same time zone as UTC, set the UTC offset to zero and never mess with it again.

Personally, I wish we could just set our clocks to DST and then leave 'em alone.

I agree. Doesn't have to be DST - pick either "winter time" or "summer time" and leave it the same all year long. Somewhere I recall this time change was introduced either during WW II to increase daylight hours, or for farmers to have more daylight to work their fields. It does neither -- there are only so many hours of sunlight per day no matter what "o'clock" you call it.

Since I was a kid this resetting of all the clocks twice a year was a nuisance. Indiana didn't use DST until 2006, and they seemed to have survived OK. Saskatchewan uses DST all year around and seem to get by too. Hawaii doesn't use DST at all and they are still here. Not hard to find a W9 (from Indiana if you are chasing WAS), a VE5 or a KH6 . . . probably because we all use UTC.

It also negatively impacts us insomniacs.

The first thing suggested for insomniacs is to go to bed the same time each night.

Changing the clock by one hour really screws things up. Just when one gets adjusted to the new time, they change it again.

I see someone else "endorsed" the same keyer I own. I have a LOGIKEY Model K5. It will do just about everything except slice bread. That said, I generally only use a couple of the available memories. The really specialized stuff one needs for different contests is provided by my contest logging program, N1MM.

The keyer seemed complicated initially, but the great majority of its functions I never seem to use!

Ahhhh, but if it weren't for the invention of the electric light we would be watching television by candle light, operating our radidios with batteries and logging by the S meter light (as did VP8QG)
Rene
p.s. Los Angeles many years ago tried DST all year and it was great except for mom's complaining about their kids walking to school in the dark so it went back to how it is now...

----- Original Message -----
From: "aburkefl" <aburkefl@...>

Many years ago I read a comment by some wag who complained that the electric light has led to the demise of civilization. Prior to that, many people went to bed when it got dark and slept until the sun came up!

I think I've seen QSL's where the op was using candles to provide light.
They may have been on an OJ0 operation and maybe on DJ6SI's Penguin Island
operation? I need to dig out those cards.

I was pleasantly surprised when my LoTW app got pretty fast turnaround as
well. First ever DXCC Application. All LoTW. 2 Awards - Mixed and CW. But
it looks like we still go into the normal queue for printing and delivery.
We both show on the queue listed at
http://www.arrl.org/awards/dxcc/appstatus.html, along with friends of mine
who sent in 'hybrid' apps a long time ago.

K1EL WinKeyer is the answer. We have two of them at our ZM2M contest site. Great as "Stand alone" or even better controlled by DX4WIN, Writelog, N1MM and others. Clean precise keying with plenty of adjustable parameters. It will control 2 radios.

The kit takes about 3 - 4 hours and is easy to build or you can purchase completed. It's the best box of dits and dahs I have ever used.

Hi Guys,

I see Lars SM6CUK is now active from Juan Fernandez. Does anyone know if he can be QRV on 20m? Especially around 1000 - 1200z for VK.

I know he has been active on both 30/40m but there is just too much daylight between us (as it's summer down here).

If anyone can get a message to him it would be greatly appreciated. I have tried his email, but I am not sure if he has access to it.

73, GL, Lance - VK6DU

Love the DX cluster, no more complaints from me!!

Ok on DST and computers.

We do not have DST here in Western Australia...it's a funny situation, the bunch of hicks we are... :-)

People have been trying to get it through parliament for years. We had a trial recently for a couple of years spent a fortune on getting all our computer clocks adjusted only to have it knocked on the head at a referendum!

So now all the computers have had to have the software removed again....

Boy o boy....but I tell you what though, at least we don't have to do those painful mental gymnastics each summer for SR and SS times...you know the ones, do I add an hour or subtract an hour... it was frustrating the mould out of my socks...
:-)

I agree. Doesn't have to be DST - pick either "winter time" or "summer time" and leave it the same all year long. Somewhere I recall this time change was introduced either during WW II to increase daylight hours, or for farmers to have more daylight to work their fields. It does neither -- there are only so many hours of sunlight per day no matter what "o'clock" you call it.

Since I was a kid this resetting of all the clocks twice a year was a nuisance. Indiana didn't use DST until 2006, and they seemed to have survived OK. Saskatchewan uses DST all year around and seem to get by too. Hawaii doesn't use DST at all and they are still here. Not hard to find a W9 (from Indiana if you are chasing WAS), a VE5 or a KH6 . . . probably because we all use UTC.

Hi Lance,

You guys are lucky, but if it ever gets implemented, just
remember the phrase "Spring ahead and fall back" to keep track of
which way to add the hour.

Although you fellows are in a different hemisphere, so maybe it
should be "Spring back and fall ahead" in Australia!"

Sent: 09-12-01(화) 09:18:27
Subject: LOTW uploads

Park,

I was fortunate enough to have worked you a few weeks ago on 160 mtrs. I checked <http://qrz.com/> QRZ.com to confirm your QSL address and noticed you qsl via LOTW, so I have been holding off sending you a card.

When reading your QRZ.com information, I noticed at the bottom you mentioned that you upload your log to LOTW everyday (assume when you are active). When I didn't see a match after several days, I checked LOTW and noticed you had not uploaded any QSO's since Jul.

Additionally, I noticed you (or someone using your call sign) has been very active; and I am beginning to wonder if you have really been on the air and just have not had a chance to upload your QSO's; or fearing the worst, that someone has been using your call sign without your knowledge? Hopefully it has been just a case of being too busy!

If you have a chance, let me know, and I will not send a card and wait for LOTW.

Thanks, best of 73's and DX,

Dick K8ZTT

Parks reply is below:

Hello Dick,

sorry for the LoTW upload last july my logging PC was dead because of 'harddisk' mechanical problem so, I have to change new one until now...

I do not know how can I reinstoll progrem.... If you need Card send me direct I will answer as soon as possible~!!

No one used my call until now... don't worry abt. that

Park, DS1REE

I went ahead and sent him a QSL card the next day. In any case, Park must have repaired his computer because, like Alan, I was pleasantly surprised this morning when I found my contact had been confirmed via LOTW.

DX Bulletin 49 ARLD049
>From ARRL Headquarters
Newington CT December 10, 2009
To all radio amateurs

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by IZ0EGM, NC1L, VK4ABD, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. In celebration of its 10th anniversary members of the Tunisian scouts club station are QRV as 3V10A until December 31 . QSL via bureau.

CHINA, BY. Special event station BT3WX is QRV from Taiyuan until December 20 to celebrate the launch of amateur radio satellite XW-1. Activity is on 160 to 10 meters using CW, SSB, RTTY, FM and PACSAT. QSL via BA1DU.

THE GAMBIA, C5. Eric, SM1TDE is QRV as C56SMT until January 3, 2010. Activity is in his spare time on 160 to 10 meters using only CW. QSL to home call.

JUAN FERNANDEZ ISLAND, CE0. Lars, SM6CUK is QRV as CE0Z/homecall until December 14. Activity is on all bands, except 160 meters, using only CW. QSL to home call.

ANGOLA, D2. Paulo, CT1ITZ is QRV as D2CQ from Porto Amboim until December 27. Activity is on 80 to 10 meters using only SSB. QSL direct via CT1IUA.

GERMANY, DA. Special event station DR09ANT will be QRV on December 14 to 30 to commemorate the ''Worldwide Antarctic Program.'' Activity will be on all bands and modes. QSL via bureau.

SOUTH COOK ISLANDS, E5. A group of operators are QRV as E51PMR, E51LEO, E51BWL, E51SNL, E51XIW and E51NAA from Rarotonga until December 13. Activity is on the HF bands using mostly CW and RTTY, with some SSB, with three stations active simultaneously. QSL via

operators' instructions.

HONDURAS, HR. Victor, N8OO and Andrei, NP3D are QRV as HR2/homecalls until December 20. Activity is on all bands using CW, SSB and RTTY. This includes an entry in the ARRL 10-Meter contest. This also includes a possible entry as HQ2S in the upcoming OK DX RTTY contest. QSL HR2/N8OO to home call and HR2/NP3D and HQ2S direct via W3HNK.

DJIBOUTI, J2. Olivier, J28KO has been QRV on 20 meters using RTTY around 1500z. QSL via F6DKI.

SAN MARINO, T7. Aurelio, IZ0EGM will be QRV as T70A during the ARRL 10-Meter contest. QSL to home call.

TURKEY, TA. Members of the Turkish Special Wireless Activity team will be QRV as TC2IYK on December 12 and 13 during the International Naval Contest 2009. QSL via bureau.

CANADA, VE. John, KL7JR will be QRV as VY1RST from Destruction Bay from December 17 to 22. Activity will be on 80 to 10 meters using SSB. He may also try to activate Jacquot Island on Kluane Lake. QSL to home call.

WILLIS ISLAND, VK9W. Dave, VK4ABD will be QRV as VK9WBM while on work assignment at the Bureau of Meteorology in the Australian Coral Sea territories until July 2010. Activity will be on 40 meters and above during his spare time. QSL to home call.

HONG KONG, VR. Some members of the Hong Kong Amateur Radio Communications Association are QRV as VR2EAG until December 13 during the 5th East Asian Games 2009. QSL via operators' instructions.

ANTARCTICA. Bhagwati, VU3BPZ is QRV as AT10BP from the Indian Maitri Base and can be found active on 20 meters SSB around 0000 to 0130z. QSL via operator's instructions.

THIS WEEKEND ON THE RADIO. The ARRL 10-Meter Contest, NCCC Sprint, Feld Hell Sprint, MDXA PSK DeathMatch, International Naval Contest, SKCC Weekend CW Sprint and the CQC Great Colorado CW Snowshoe Run are all scheduled for this weekend. The North America High Speed Meteor Scatter Winter Rally runs from December 12 to 16. Please see December QST, page 66, and the ARRL and WA7BNM contest web sites for details.

12086. SV/A

Yahoo group: DX-IS (2009)
Date: 2009-12-11 03:13:48 UTC
From: Lance Martin
Topic: 10624 Message: 12086

Hi Guys,

Anyone else need SV/A? I guess it will happen one day. For anyone else out there who is a DXer, please, please use the cluster, or at least have a look at it when you are going to call CQDX somewhere. 14195 is probably not such a good place for the non rare DXer out there to call CQ....but hey, no one owns that frequency and I guess if you can't hear a the rare DX station on the frequency that you are about to call CQDX on then hey...have a go...

Don't worry, I keep smiling and taking pills....

73, Lance - VK6DU

12087. Re: [DX-IS] SV/A

Last month's National Geographic had an article on SV/A. Apparently there are 19 or 20 possible monasteries that are possible QTH's for operation on the peninsula. They say there is no electricity but one photo clearly shows one well lit up inside and out. Obviously Monk Apollo is getting his electrons from somewhere.

Interesting reading.

12088. ARLP051 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-12-11 15:21:45 UTC
From: jjreisert@alum.mit.edu
Topic: 7783 Message: 12088

SB PROP @ ARL $ARLP051
ARLP051 Propagation de K7RA

ZCZC AP51
QST de W1AW
Propagation Forecast Bulletin 51 ARLP051
>From Tad Cook, K7RA
Seattle, WA December 11, 2009
To all radio amateurs

SB PROP ARL ARLP051
ARLP051 Propagation de K7RA

Finally! A sunspot appeared on Wednesday, December 9, giving us a daily sunspot number of 13. This followed 16 days of no sunspots, and again on December 10 the sunspot number was 13. The new group is number 1034, and it is a solar Cycle 24 spot, as all sunspots have been since number 1016 on April 29-30, 2009.

This weekend is the annual ARRL 10-Meter Contest. Will there be enough sunspot activity to enhance 10-meter propagation? The latest prediction for solar flux shows it rising 75-77 on December 11-12, and staying at 77 through December 17, which probably correlates with the new sunspot moving toward the center of the solar disk.

To significantly raise the MUF to enhance 10 meter signals over most paths takes more sunspot activity than we are seeing this week, although every bit helps. But this contest often depends on sporadic-E skip and the effect of ionized meteor trails during the Geminids meteor shower, which should reach a peak just a few hours after the contest ends on Sunday. Geminids meteor showers have intensified with each passing year as Earth moves deeper into the debris stream from extinct comet 3200 Phaethon.

Back in Propagation Forecast Bulletin ARLP005 earlier this year (see http://www.arrl.org/w1aw/prop/2009-arlp005.html) we reproduced a letter written 34 years ago by Ed Tilton, W1HDQ, the originator of this bulletin. Ed talked about meteor enhanced 10 meter propagation during this contest.

We were watching the current sunspot move toward the horizon a few days ago, via the STEREO spacecraft (http://stereo.gsfc.nasa.gov/) and wished the whole Sun were visible, which should happen in 2010. Currently STEREO sees about 86% of the Sun. It should reach 90% on June 29, 2010 between 0027-0040 UTC, and 95% coverage on October 12, 2010 between 1252-1259 UTC.

A view of real time MUF maps at
http://www.spacew.com/www/realtime.php shows that during daylight over low latitudes the MUF is going above 10 meters over the past couple of days.

A couple of 160 meter notes since the recent contest:

Randy Whiting, KC9KHG of Woodstock, Illinois says he upgraded to General class in March 2007, and at the time told locals he was putting up a 160 meter inverted V with a 60 foot apex. They told him he would work only two or three hundred miles.

The week before last he worked KC7YM in Wyoming, a distance of 1,079 miles between their stations. Then December 3 he worked G3JMJ, a distance of 3,971 miles. Both were on CW.

Markus Hansen, VE7CA of North Vancouver, British Columbia writes, "Wow, conditions were amazing during the recent ARRL 160 meter Contest. I was amazed how easy it was to work NH, RI, DE, MD VA, NC and GA from my QTH here on the west coast. I am only running 100 watts and a very weird shaped 160 meters loop strung around my city-sized lot. The KH6s were bending my S meter in the mornings at sunrise and JA3YBK was pounding in at well over S9 at 1434Z Sunday AM. Good fun!"

Hans Goldschmidt, SM5KI says he is 82 years old and has been a ham over six decades. He is in the center of Stockholm, and "really was shocked when I put up in a nearby low tree an end fed half-wave wire, the feedpoint only 1.5 meters above the ground. Right away I was in a 50 minute long QSO with a station in North Carolina. My signals S7-9! There seems to be a daily window around 1300Z to the Eastern US States on 14 MHz and I can work K8SL and others daily with S7-9."

"In the morning on 14 MHz we have the usual winter conditions and the band is completely dead right now until about 0700Z. Still the same, last week I worked daily SU9HP, a Swede on holidays down there, on 14 at 0730Z with Q5 signals every morning, when there was almost no other signal to be heard on the band."

"I say this because despite black-outs and the present sunspot minimum conditions, you may still find a useful path to some DX spot on the globe. Sometimes it is easier to find a rare DX on a dead band. There is also less QRM as the competing stations have given up even to try."

"Years ago I was shocked to hear on 14 MHz two stations, not too strong, on a completely dead band during a blackout, talking, what it seems to be locally. They were in YJ8 and we had an unexpected QSO. Similar QSOs occurred in the past and many were near the equator. Whatever THAT means?"

"Finally a suggestion: Do not give up using the DX-bands just because they seem to be dead. There may be short selective openings to some parts of the globe. Do not rely on those awful DX clusters but LISTEN, LISTEN!"

Thanks, Hans! Good advice.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for December 3 through 9 were 0, 0, 0, 0, 0, 0, and 13 with a mean of 1.9. 10.7 cm flux was 71.6, 71.5, 71.7, 71.9, 71.1, 72.2, and 73 with a mean of 71.9. Estimated planetary A indices were 0, 0, 3, 2, 2, 1 and 0 with a mean of 1.1. Estimated mid-latitude A indices were 0, 0, 3, 1, 2, 0 and 0 with a mean of 0.86.

3V - Commemorating the 10th anniversary of Scout amateur radio club 3V8ST, special station 3V10A will be active until 31 December from the headquarter of Tunisian Scouts in Tunis. QSL direct (see qrz.com) or bureau.
C5 - Eric, SM1TDE will be active holiday style as C56SMT from The Gambia from 10 December to 3 January. He will operate mainly CW (2 kHz from the band edges), with some RTTY and SSB. QSL via SM1TDE, bureau preferred. [TNX SM1TDE]
C5 - Niels, OZ8KR will be active again as C56KR from Bakuto, The Gambia on 5-24 March. He will operate holiday style on 80-10 metres SSB. QSL via OZ8KR. [TNX OZ8KR]
CE0Z - Lars, SM6CUK is now active as CE0Z/SM6CUK from Robinson Crusoe Island, Juan Fernandez Archipelago (SA-005) until 14 December. He operates CW only on all bands (160 metres excluded). QSL via SM6CUK, direct or bureau. [TNX dx-hamspirit.com]
CE0Z - Toshi, JA8BMK will be active as CE0Z/JA8BMK from Juan Fernandez from 19 January to 2 February. He plans to operate SSB, CW and digital modes on 160-10 metres, with a focus on the low bands. [TNX http://dx-hamspirit.com/]
CX - Ghis, ON5NT will be active as CX5DNT (not CX5NT as previously announced) from Uruguay on 12-17 December. He plans to operate holiday style during the local evening and night hours, typically on 30 and 40 metres CW. QSL via ON5NT. [TNX ON5NT]
DU - Lee, HL1IWD will be active as DU1/HL1IWD from Manila, Philippines from 31 December to 3 January. QSL via bureau to home call. [TNX HL1IWD]
GI - Special event station GB1HF will be operated from Northern Ireland starting on 14 December to celebrate the 100th anniversary of the first powered flight in Ireland by Harry Ferguson (31 December 1909). The station will be on air from the Harry Ferguson Memorial, Dromore will operate SSB, CW and RTTY on 80-10 metres. QSL via MI0SAI, direct, bureau and LoTW. [TNX www.southgatearc.org]
J6 - John, VE8EV will be active as J68/VE8EV from St. Lucia (NA-108) on

18-20 December. He will operate SSB and CW on all bands, mostly during the RAC Canada Winter Contest. All contacts are welcome during the contest, stations outside of Canada just sent RS(T) and a serial number. QSL to home call. [TNX VE8EV]
J6 - John, W5JON will be active again as J68JA from Marigot Bay, St. Lucia on 2-11 March. He plans to operate on 160-6 metres (including 60 metres) and to participate in the ARRL International DX SSB Contest. QSL via home call. [TNX W5JON]
JD1_mt - Masa, JD1BMM is active from Minami Torishima until 16 December. He will return on 20 January 2010 and will remain until mid-February, for what it is likely to be "the last chance to make a QSO with JD1/M" for some time, The Daily DX reports. The Japanese Coast Guard radio station on the island closed down on 1 December, and the amateur radio club will close in February.
JD1_oga - Harry, JG7PSJ (JD1BMH) and Makoto, JI5RPT (JD1BLY) will be active from Chichijima (AS-031), Ogasawara from 27 December to 1 January. They plan to operate CW, SSB and digital modes on 160-6 metres, with a focus on the low bands, and via satellite. QSL via home calls. Further information, including on-line logs and QSLling instructions, can be found at http://www.ji5rpt.com/jd1/ (for JD1BLY) and http://sapphire.es.tohoku.ac.jp/jd1bmh/ (for JD1BMH). [TNX JI5RPT]
P4 - Marty, W2CG will be active as either P40C or P40CG from Aruba (SA-036) on 5-26 January. He plans to operate primarily CW and RTTY on 80-6 metres, usually between 12-14 UTC and 20-24 UTC, other times as schedule permits. QSL via W2CG, direct or bureau (but LoTW preferred). [TNX W2CG]
SP - Special event station HF150LZ will be active until 27 December to celebrate the 150th anniversary of the birth of Ludwik Zamenhof, the inventor of Esperanto. QSL via SP4YPB.
TA - The TC Special Wireless Activity Team (www.tcswat.org) will be active as TC2IYK on 12-13 December from the Istanbul Sailing Club from the International Naval Contest 2009. QSL via the bureau or direct to TCSWAT, PK 73 Karakoy, 34421 Istanbul, Turkey. [TNX TA0U]
VK - The Hellenic Amateur Radio Association of Australia will be active as VI2BI from Broughton Island (OC-212) on 5-7 February. The team will include Tommy/VK2IR, Peter/VK2NN, Allan/VK2GR, Raffy/VK2RF, Paul/VK2HV and John/VK3JHA, and they plan to operate CW, SSB and RTTY on 160-6 metres. QSL direct to VK2CL. They have a web page at www.vi2bi.blogspot.com [TNX www.rsgbiota.org]
YI - YI9PSE will be active from Erbil, Iraq in late spring or early summer of 2010. Paul, N6PSE and others (for the time being JH4RHF, N6NU, N6OX, NI6T, VE7CT and W8HW) plan to operate CW, SSB and RTTY on 160-10 metres with at least three stations for 7-9 days. QSL via N6NKT. Details can be found at http://www.yi9pse.com/ [http://dx-hamspirit.com/]
YV - Celebrating his Silver Jubilee in amateur radio, Pasquale, YV5KAJ will be active as YW5EID from La Tortuga (SA-044) on 26-29 December. This special callsign's suffix is in honour Pasquale's Elmer, Anacleto Marrai (IW5EID), who has been invited as guest

operator. Look for activity on 12, 15, 17, 20, 30 and 40 metres usign SSB and digital modes (RTTY, BPSK and Olivia). QSL via EA5KB. [TNX YV5KAJ]
ZL - The new dates for the IOTA activity from Stewart Island (OC-203) [425DXN 962] are 12-23 March. Ray, VK4DXA (ZL4TY) and Paul, ZL4PW (ZL4M) will operate SSB, CW and RTTY on 160-10 metres. Information at http://www.zl4pw.orconhosting.net.nz/OC203/si_index.htm [TNX dx-hamspirit.com]

425 DX NEWS MAGAZINE ---> The latest issue (November 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA (iz3eba @ iz3eba.it)

BAHRAIN & 6 METRES ---> The Daily DX reports that radioamateurs from Bahrain can now operate on 6 metres (50.0-50.5 MHz on a primary and exclusive basis, and 50.05-52 MHz on a secondary basis) and on additional frequencies on 136 KHz, 1.8 MHz, 7 MHz, 430 MHz and higher bands. They can not operate on these newly allocated frequencies until their licenses are amended.

INDIA & 30 METRES ---> The Wireless Planning & Communication Wing of the Ministry of Communications in India has written to the President of the Amateur Radio Society of India (VU2GMN) to inform that 10.100-10.150 MHz has been allocated to Amateur Services on a secondary basis in India. Earlier, temporary permissions were issued from time to time for 10 MHz. It has also been communicated that the 50-52 MHz (6m) band cannot be allocated now since it has already been allocated to other services. [TNX dx-hamspirit.com]

+ SILENT KEYS + The ARRL reports that William A. "Bill" Wilson (K6ARO), passed away on 5 December at 95 years of age. First appointed as presidential envoy to Rome in 1981, he was appointed the first full ambassador to the Holy See in 1984, serving until 1986. Other recently reported Silent Keys include Attilio Sacco (I1BAY), former President of ARI Sanremo.

QSLs received direct or through managers: 3D2GM, 3D2KJ, 3D2MJ, 3D2OU, 3DA0JK, 4L8A, 4U1UN, 4W6AL, 5B4KH, 5H3EE, 8J1RL (AN-015), 8R1DB, A41MX, A52FJJ, AH0BT, AL7R, BD2RJ/2 (AS-151 and (AS-158), C31CT, CT8/DL7JAN (EU-175), CU3EJ, D2NX, E51QMA, E51TUG, E7/KX7M, ES1WN, ES3AX, ET3JA, FJ/WQ2N, FK/JA1NLX (OC-033), FM5LD, FO/SP9PT (OC-046), FP/G3ZAY, FP/KV1J, FR5ZL, FT5GA, H40MY, H44TO, HK1/AC8W, HK3JJH, HK3O, HV5PUL, JT1CO, JV1A, JY4NE, K9RR/4 (NA-138 and NA-142), KH0/JR4GPA, KH7C, KL7HBK, KV4FZ, LU5OM,

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 11 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 345 Issued at 2200Z on 11 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 10/2100Z
to 11/2100Z: Solar activity was very low. No flares were observed
during the forecast period. Region 1034 (N20E45) remains a small Bxo
Beta group.
IB. Solar Activity Forecast: Solar activity is expected to be very
low to low. There is a chance for an isolated C-class event from
Region 1034 during the next three days (12-14 December).
IIA. Geophysical Activity Summary 10/2100Z to 11/2100Z:
The geomagnetic field has been quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (12-14 December).
III. Event Probabilities 12 Dec-14 Dec
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 11 Dec 072
Predicted 12 Dec-14 Dec 077/077/077
90 Day Mean 11 Dec 072
V. Geomagnetic A Indices
Observed Afr/Ap 10 Dec 001/001
Estimated Afr/Ap 11 Dec 005/005
Predicted Afr/Ap 12 Dec-14 Dec 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 12 Dec-14 Dec
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

12092. Ergonomics and rig placement

Yahoo group: DX-IS (2009)
Date: 2009-12-12 22:00:49 UTC
From: John Geiger
Topic: 12092 Message: 12092

You can tell that the 10 meter contest has no propagation if I am sending out an email during it.

Let me preface this question by saying that I don't want to computer control the rig. I have tried that before with a TS-B2000 and didn't like it. I say this because I am sure that it would be the answer many would reply with.

Here is my situation. On Thanksgiving day I hurt my right shoulder (I am right handed) and as it was getting better I reinjured it last weekend in the 160 contest by excessive tuning of the VFO dial. The shack is set up on a computer center, and the rig is on the second shelf, right at eye level. This means I have to raise my arm to tune the VFO dial, and the excessive raising last weekend reirritated my shoulder. This past week I would just use my left hand to tune the VFO and push buttons instead, but that was getting awkward, especially with the 10 meter contest coming up.

Today I broke down and moved the rig to the desktop instead, so I don't have to raise my arm to turn the dial. I really don't like it here as it looks a little more cluttered now with the rig, laptop, keyer paddles, and rotor control. Plus is it closer to the line of fire when my 6 year old daughter is throwing things around the house. However, this will have to do for now.

Now here is my question: Have others found that having the rig slightly lower than you is easier on the arms or shoulders over the long run than having to raise your arm to tune the rig? I was hoping to eventually move it back to its original place, but if I run the risk of straining the shoulder more having it there, I might have to learn to live with it where it is.

What has your experience taught you about rig placement? Maybe there is a doctor or orthopeadist on the list who knows something about ergonomics and injury prevention. I am using a Yaesu FT857D so I guess I could eventually remote mount the faceplate at a lower level and put the body of the rig where it used to be.

Talk about a bummer way to start the 10 meter contest weekend.

Sorry - know what that is all about (no cartiledge left in my shoulders) but
it seems that it was your own fault - you were TUNING instead of watching
the cluster;-)

John,
I hope your shoulder improves.
Every time I've tried to raise the xcvr even an inch or two I couldn't stand it.
I'm sure it creates a lot of extra stress on a bunch of your upper anatomy to reach and twirl.
Just my opinion though
73, have a great holiday and a speedy recup.

Thanks Frank,

Now I just need to learn that when you are 42 (now 43) you can't do the monkey bars with the daughter at the park anymore.

What works for ME is to have the rig on the desktop at the LEFT and use my left hand to tune and hit buttons. The key is on the right next to the mouse and key. In contests I am mostly S&Ping so lots of tuning, cant imagine having the rig up a level. Especially with a bad shoulder (rotator cuff issues here). I even have the right arm of the chair raised slightly higher so I can rest it w/o too much movement.

Both our rigs sit just barely above the desk level. I'm right-handed, so the paddles/keyer are on the right and the rig is on the left. The main monitor is straight ahead. My optometrist said the main monitor should be "dead ahead" and you shouldn't have to turn your head to look at it - ever.

My wife's rig on the other side is to her right, but, in both cases, our arms do not have to come off the desktop to tune the rig.

You can see a pic of our operating positions at QRZ.COM.

Good luck with your shoulder. I've torn up my rotator cuff twice - neither time was much fun.

But still a ham radio content.

I noticed that Linux Journal has devoted its Dec. issue to amateur radio. Unfortunately here in the wilds of Cape Breton, the magazine stands are sparsely populated with interesting magazines. Is there anyone out there who could obtain a copy for me and forward it on ??? I will, of course be more than happy to reimburse the good Samaritan for his/her service.

Just another idea is to call the publisher and ask for a complimentary copy to be sent to you. Most magazines are happy to do this on a one-time basis.

12104. RE: [DX-IS] Rig placement and ergonomics

Yahoo group: DX-IS (2009)
Date: 2009-12-13 17:02:44 UTC
From: Ron Notarius W3WN
Topic: 12104 Message: 12104

Suddenly I don't feel so bad about a massive honeydew list facing me this weekend...

John, all I can tell you is that as I am rebuilding my shack, I set up my Corsair II and related computer in the left corner, and the Corsair is mounted on a shelf several inches above the operating bench. The design is such that I can rest my left elbow on the bench while tuning, or to grab the hand mike for SSB, and it keeps my right hand free to type or operate the paddles.

I still need to pick up (or find in a box) a PTT foot switch, and get a proper desk mike for the Corsair. But those will come in time.

This arrangement is not for all, but it suits me.

[And, while I realize you don't care for the solution, temporarily using computer control until your shoulder heals isn't such a bad idea.]

Oh, and if you think the monkey bars are bad at 42, just wait until you're in your 50's dealing with a YL teenager. Trust me, you don't know what hell is yet... and she hasn't even started dating, so the worst is yet to come...

Subject: [DX-IS] Rig placement and ergonomics

You can tell that the 10 meter contest has no propagation if I am sending out an email during it.

Let me preface this question by saying that I don't want to computer control the rig. I have tried that before with a TS-B2000 and didn't like it. I say this because I am sure that it would be the answer many would reply with.

Here is my situation. On Thanksgiving day I hurt my right shoulder (I am right handed) and as it was getting better I reinjured it last weekend in the 160 contest by excessive tuning of the VFO dial. The shack is set up on a computer center, and the rig is on the second shelf, right at eye level. This means I have to raise my arm to tune the VFO dial, and the excessive raising last weekend reirritated my shoulder. This past week I would just use my left hand to tune the VFO and push buttons instead, but that was getting awkward, especially with the 10 meter contest coming up.

Today I broke down and moved the rig to the desktop instead, so I don't have to raise my arm to turn the dial. I really don't like it here as it looks a little more cluttered now with the rig, laptop, keyer paddles, and rotor control. Plus is it closer to the line of fire when my 6 year old daughter is throwing things around the house. However, this will have to do for now.

Now here is my question: Have others found that having the rig slightly lower than you is easier on the arms or shoulders over the long run than having to raise your arm to tune the rig? I was hoping to eventually move it back to its original place, but if I run the risk of straining the shoulder more having it there, I might have to learn to live with it where it is.

What has your experience taught you about rig placement? Maybe there is a doctor or orthopeadist on the list who knows something about ergonomics and injury prevention. I am using a Yaesu FT857D so I guess I could eventually remote mount the faceplate at a lower level and put the body of the rig where it used to be.

Talk about a bummer way to start the 10 meter contest weekend.

Ohio/Penn DX Bulletin No. 938

The Ohio/Penn DX PacketCluster
DX Bulletin No. 938
BID: $OPDX.938
December 14, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web page, K1XN & GoList, NJ1Q, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W4DXX, W5FKX, W5JON, KH6BZF, K8YSE, N8PS, AT International, CO8LY, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, I1HYW, I1JQJ/IK1ADH & 425 DX News, OK1DOT, Pete's-DX-Newsdesk, RSGB IOTA Web Site, ST2M, TA1HZ, TA0U, VE3EXY, VA3RJ & ICPO, VE6LB/VA6XDX, VE8EV, VHF-DX-Portal (MMMonVHF), VU2PTT, VU3USJ and VY0PW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-December, through Sunday, 13th-December there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. By the time you read this, Jim, WB2TJO, should be active from here. Jim has been on the islands since December 8th, waiting for a license. He will be there until January 6th, and plans to visit three of the islands (Viti Levu, Vanua Levu and Taveuni -- all in IOTA OC-016). Using his Icom 706 MkIIG and wire antennas, look for him on 40 and 20 meters. Jim will be on holiday, so operations will be limited and casual. Look for updates, possibly on QRZ.com.

5T, MAURITANIA. There have been reports that YL Yoshiko, JQ1LCW, is now active as 5T5YL. QSNs on Sunday show activity on 17 meters SSB working mainly Europe and East Coast NA stations. QSL via JQ1LCW.

A6, UNITED ARAB EMIRATES. By the time you read this Don, N1DG, is expected to arrive in U.A.E for a week because of his job starting December 14th. However, his activity will be limited due to his work; he is expected to operate from the A61AD station, possibly on 12 and 17 meters using CW, SSB and RTTY. The A61AD station does have a 4 element SteppIR for 20-6 meters, so Don's activity will be limited to those bands. Logs will be uploaded to LoTW upon conclusion of his trip.

A6, UNITED ARAB EMIRATES. Gerry, VE6LB, informs OPDX that he will be active as A6/VE6LB from Dubai between January 8th and February 8th. Activity will be holiday style with low power using wire antennas and mainly on 40-15 meters CW. QSL direct via his home callsign or LoTW.

A9, BAHRAIN (News). Reports indicate that "The Daily DX" is reporting that radio amateurs in Bahrain can now operate on 6 meters (50.0-50.5 MHz on a primary and exclusive basis, and 50.05-52.00 MHz on a secondary basis) and also on additional frequencies on 136 kHz, 1.8 MHz, 7 MHz, 430 MHz and higher bands. However, they cannot operate on these newly allocated frequencies until their licenses are amended.

C5, THE GAMBIA. Eric, SM1TDE, will be active as C56SMT until January 3rd, 2010. Activity will be holiday style. Eric states, "Look for me on CW, 2 kHz from the band edges, as well as some RTTY and SSB." He was spotted on 40/30/20 meters CW this past weekend. QSL via his home callsign (the Bureau is preferred).

C5, THE GAMBIA. Neils, OZ8KR, will be active as C56KR from Bakuto between March 5□24th, 2010. This is his third trip to Bakuto. Activity will be holiday style with operations on 80□10 meters SSB, using 100 watts into wire antennas close to the Atlantic Ocean. QSL via OZ8KR.

CO8, CUBA (80 meters). Eduardo, CO8LY, has announced that he has installed a 2 element wire for 80 meters, and it is directed at Europe and NA to try to work the biggest quantity of countries. If stations need to work Cuba on 80 meters, they can send an E-mail to Eduardo and make a Sked for 80 meters at: co8ly@...
Eduardo is also building a 160 meter long wire but hasn't had the time to finish it. He has been taking care of his wife who has ovarian cancer.

DXPEDITION OF THE YEAR SURVEY. The "DX World of Ham Radio" Web page is conducting a online survey to see which expedition warrants the title "DXpedition of the Year 2009". Special engraved trophies will be shipped to the top three DXpeditions of 2009. To participate in the survey, go to: http://dx-hamspirit.com

HEADING TO THE ANTARCTICA. Operators Andrej/UT6UE and Yurij/UT6UF are on board the "S/Y Kupava" on an Antarctic voyage to the Ukranian Antarctic Research Centre's base -- Vernadsky Base. Onboard equipment includes a VX1700, RTX Yaesu HF, Tuner FC-40, and a folded dipole for 80, 40 and 20

meters. They hope to be active on 3645-3720, 7090-7130-7185, 14140-14260-14345, between 2200-0100z. They have already been reported on the Packet-Clusters signing UT6UE/MM. For more info and pictures, visit the following Web page at: http://uarl.com.ua/news/antarctida
Also, visit the WAP Web site for more details at: http://www.waponline.it

IOTA NEWS.....
AS-086. (Rare IOTA) Vasily, RA9LI, is now active as RA9LI/0 from Troynoy Island in the Kara Sea for one year. Reports indicate that he has been there since mid-November. Activity will be on the HF bands, mainly SSB. He was heard earlier in the week on 14260 kHz between 0730-1030z. QSL via UA9LP.

NA-058. Members of the Camden County Amateur Radio (KB4CC) plan to activate Cumberland Island (USI GA002S, Camden County, Georgia) between January 23-24th. They plan to have two stations running on battery power on the following suggested frequencies and modes: SSB - 14260 kHz
CW - 14040 kHz, 7055 kHz and 7030 kHz
QSL via KB4CC: CCARS - USI#GA-002S, PO Box 2203, Kingsland, GA 31548. For more information, visit: http://www.ccars.org

NA-066. Members of the Palos Verdes Amateur Radio (K6PV) will be active from Santa Catalina Island (USI CA016S, WLOTA LH-2912, Los Angeles County, California) between February 25-28th. Activity will be on the ususal IOTA frequencies, mostly 20 meters SSB, using CW, RTTY and/or PSK31. Operators mentioned are: Ray/N6HE, Dan/W6DC, Mel/K6SY, Doris/K6KSY, Jeff/K6JW, Homer/K6HKT, Ginger/KG6TAU, Bob/AB6SY, Joe/K5KT and Marian/K5KKT. QSL direct to K6PV (Palos Verdes Amateur Radio Club) or by the Bureau. They will have a special K6PV IOTA card for this activation. Visit the PVARC's Web page at: http://www.palosverdes.com/pvarc

OC-212. Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VI2BI from Broughton Island for three days in February 2010. Activity will take place on multiple bands (160-6 meters) simulataneously to give everyone the chance to contact them. The VI2BI team will consist of some of the operators who took part in the VK9NI DXpedition back in July this year. Operators mentioned are: Tommy/VK2IR, Peter/VK2NN, Allan/VK2GR, Raffy/VK2RF, Paul/VK2HV and John/VK3JHA. Suggested frequencies are:

BAND	CW	SSB	RTTY
160m	1825	1840	
80m	3525	3793	3630
40m	7020	7085	7035
30m	10105	10145	
20m	14025	14195	14090
17m	18075	18160	18105
15m	21025	21295	21090

12m 24895 24950 24925
10m 28025 28490 28090
6m 50105 50130
Special Notes:
* 80m Listening for VK Foundation Class Licence on 3.695 MHz.
* 20m They may use 14.260 MHz.(US General Class Licence)
For update and an online log search, visit the blog at:
http://www.vi2bi.blogspot.com

OC-203. (Update/RARE IOTA). Look for Ray/ZL4TY (home callsign VK4DXA) and Paul/ZL4M (home callsign ZL4PW) to be activating Stewart Island between March 12-23rd, 2010. They plan to have 2 stations using verticals for 160-30 meters and a Spiderbeam for 20-10 meters. They intend running barefoot unless they can obtain a solid-state amplifier. The following suggested frequencies (+/- 10 kHz, QRM, QRN & propagation permitting) have been announced:
Band CW SSB RTTY
---- ----- ----- ------
160m 1820 1845
80m 3525 3785 3580
40m 7025 7165 7038
30m 10115 10145
20m 14025 14260 14085
17m 18080 18145 18105
15m 21025 21295 21085
12m 24895 24945 24920
10m 28025 28475 28085 kHz

QSL Info: They need a minimum of 2 USDs or 1 x IRC (please, 2010 issue) for a direct reply. Any donation sent with your QSL request will be greatly appreciated. Cards with insufficient funds or invalid IRCs will be sent via the bureau. All logs will be uploaded to LoTW following the DXpedition.

QSL ZL4TY via VK4DXA; by the VK Bureau or direct to: Ray Crawford, 53 Moore Street, Kingaroy, QLD 4610, Australia

QSL ZL4M via ZL4PW; by the ZL Bureau or direct to: Paul Ormandy, 13 Swift St., Oamaru 9400, New Zealand

For more details and updates, visit their Web page at:
http://www.zl4pw.orconhosting.net.nz/OC203/si_index.htm

J6, ST. LUCIA (NA-108). John, VE8EV, is expected to be active as J68/VE8EV from Castries between December 18-20th. Activity will be SSB and CW on all bands, mostly during the RAC Canada Winter Contest (December 19th, between 0000-2359z) which this year is being held the weekend before Christmas. All contacts are welcome during the contest, stations outside of Canada just send RS(T) and a serial number. Check out John's blog, for info and QSL details, at: http://ve8ev.blogspot.com/2009/10/na-108-st-lucia.html

J6, ST. LUCIA. John, W5JON, will once again be operating from the hilltop QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between March 2-11th. His callsign will be J68JA. Reference numbers are: IOTA NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including 60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into the following antennas: ZS6BKW design multiband dipole, and a 3 element yagi on 6m. Activity will also include the ARRL International DX Phone Contest (March 6-7th) as a Single-Op/All-Band entry. QSL via W5JON. John adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

KH6BZF PROPAGATION FORECAST/REPORT (For December 14-20th)....
Dec 14 AN SOLAR REFERENCE
Dec 15 AN ---------------
Dec 16 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 18 AN LN - Low Normal
Dec 19 AN
Dec 20 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE FROM LEE, KH6BZF: Forecast for the next several weeks is for "Above Normal" (AN) conditions on the low bands and some short skip on the high bands with solar flux levels in the 70's and the "A" low as well as "K" indexes. Have a very special upcoming "Happy Holidays To All.....Aloha and Mele Kalikemaka & Haole Makahiki Hou......"

PD09, THE NETHERLANDS (Special Event). Look for special event station PD09XMAS to be active until January 3rd, 2010. Activity is to celebrate "Christmas 2009". Activity has been on 20 meters SSB this past weekend on 14194 kHz. QSL via PD5X, direct or by the Bureau.

PJ5, ST. MAARTEN/ST. EUSTATIUS. Jim, K1NA, will once again be active as PJ5NA. Activity will include the ARRL DX CW Contest (February 20-21st) as Single-Op/All-Band entry. QSL via K1NA (100% QSL direct only with SASE) No bureau cards will be answered. DX stations MUST have SASE or SAE with 1 USD. No IRC! USA stations SASE only.

RTTY WELCOME DAY (January 1st - All Day Long!). Phil, N8PS, wants to remind everyone: "Now is your chance to meet and greet other RTTY operators from all over the world.
-- No hours, No rules, No score, No pressure, No quota, No log needed. --
- Any band*, Any contact, Any time, Any power, Any equipment, Any antenna.-
(*) = Authorized amateur radio sub-bands, of course.
Get that antique set-up running or fire-up that brand new rig. Use any modem or computer or combination thereof. Meet and greet others without time limits. Have a short exchange or a rag-chew - whatever suits you. Participation is voluntary. No log necessary. No awards - just satisfaction. Help others find joy in RTTY by operating for the

first time, or the thousandth time.
Get your set-up running smoothly and help others to reverse inversion.
Just get on the air to say 'howdy' -or- 'hello' -or-'WELCOME TO RTTY'
PLEASE HELP SPREAD THE NEWS. TELL YOUR FRIENDS AND NEIGHBORS.
'I'LL SEE YOU ON THE AIR FOR:'
RTTY WELCOME DAY - 01 JANUARY 2009 - ALL DAY LONG
73 - de Phil - N8PS, RTTY Welcome Day Cheerleader"

QSL INFO AND NEWS.....
P29CS QSL ROUTE (Important). Peter, VY0PW, informs OPDX that Andy, P29CS, on Lihir Island (OC-069), is requesting stations "NOT" to QSL to his present QRZ.com address. This is his location only and not intended for mail purposes. Andy states that he is looking at present for a QSL Manager, but this might take a while as he is very busy with work.

QSL SURVEY. Don, W5FKX, is conducting an informal survey of QSLing methods and would very much appreciate your input. Please respond directly to him at: w5fkx@cox.net
1. Do you use the Logbook of the World (LOTW)?
If not, what has kept you from using it?

2. Do you use the eQSL service?
If not, what has kept you from using it?

3. Do you use the QSL Bureau system?
If not, what has kept you from using it?

4. Do you send out direct QSLs?
If not, what has kept you from doing so?

5. What is the approximate percentages of your QSLs received via:
LOTW
eQSL
Bureau
Direct

Don states, "Thanks very much for your participation. Any additional comments are welcome."

TC2IYK via TA Bureau or to: TCSWAT, PK73 Karakoy, 34421 Istanbul, TURKEY. Activity was by the Turkish group called TCSWAT (TC Special Wireless Activity Team) during this past weekend from Istanbul Yelken Kulubu (Istanbul Sailing Club -- <http://www.istanbulyelken.org.tr>) for the International Naval Contest. Please check <http://www.tcswat.org> for more details about the QSL info.

HAVE PATIENCE! Nenad, VE3EXY, reports that he received a message from Vlad, UA4WHX, stating that effective this week all outstanding direct requests for VE stations have been answered!

XV4TUJ via OK1DOT; "DIRECT ONLY", per Petr, OK1DOT.

QSLS VIA LoTW: 3D20CR, 4U1UN, 5N9OCH, A25/DL7DF, DL7FER, HI3TEJ, K4M, KD6WW/VY0, RX0AE, SU1KM, TI5/K2PLF, TX3A, TX9, VE3XB, VE7DLM and ZW5B

**SPECIAL NOTE: LoTW has reached new milestones. Since its inception on September 15, 2003, more than 30,000 hams have signed on to "Logbook of The World (LoTW). The ARRL's online logging program has had an increase of more than 7000 hams since 2008. These 30,000 hams have made upwards of 250 million QSOs with more than 58 million QSOs in 2009 alone. In 2009, there was an increase of more than 24 percent for both the number of registered users and the number of QSOs over 2008. For more details, go to the ARRL Web page at: http://www.arrl.org/news/stories/2009/12/03/11229

QSLS RECEIVED VIA MAIL: 3D2KJ, 3D2MJ, 3X5A, 5F1ROM, 5H3EE, 5K0T, 8R1PY, A52FJJ, ER8C, FM5LD, HL3ERJ, HV0A, J79ZG, K5D, KV4FZ, LX/PA6Z, OX3R, PZ5M, S04R, ST2R, T27OU, TM0M, TX5SPA, TX5SPM, TY1MS, VK9DWX, VP2VVV, VP9KF, VQ9LA, VQ9RD, VR2009EAG, W3FO/KH2, WN1Y/NH2, XE2WWW and YW5F

QSLS RECEIVED VIA THE BUREAU: V51AS

ST26, SUDAN (Special Event). Members of the Khartoum Sea Scouts Radio Club (ST2KSS) will be active as ST26ASC until January 28th, 2010. Activity is to celebrate the 26th Arab Scouts Conference (under Peace and Unity). Activity this past weekend was on 20 meters SSB. QSL via ST2M.

VP2V/W4DXX OPERATION WRAP-UP. Eric, W4DXX, informs OPDX readers of his recent ham-cation at the end of November on Tortola as VP2V/W4DXX which concluded w/1240 QSOs in 109 countries and 50 states with about 9 hours of operating time. Equipment and assistance was supplied by WB4MRF, N3DXX, KN5H, and VP2VQ. Bill Moore has accepted the operation for DXCC as of 12/9/09. All QSOs will be uploaded to LoTW shortly, and QSL cards are currently in design. QSL to W4DXX w/SASE or via LoTW.

VU, INDIA (News). OPDX was informed by Prasad, VU2PTT, that Gopal Madhavan, VU2GMN, who is the President of ARSI - the IARU recognized national organization of India, is reporting that the "Wireless Planning & Coordination Wing (WPC), India's Ministry of Communications and Information Technology Department of Telecommunications has written to him to inform that 10100-10150 kHz has been allocated to Amateur Radio Services on a secondary basis in India. This means that VU2 hams are free to use this on a non-interference basis with existing users of these frequencies. Earlier, temporary permission was issued from time to time for this WARC band. It has also been communicated to Gopal that the 50-52 MHz (6m) band cannot be allocated now since it has already been allocated to other services. ADDED NOTE: Steve, VU3USJ, mentions, "Gopal, VU2GMN, who has been in contact with the relevant authorities in Delhi, says he is trying to clarify if SSB will be included with the permanent allocation. I believe Australia is the only other country allowing SSB on 10 MHz for hams."

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 13 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 347 Issued at 2200Z on 13 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 12/2100Z
to 13/2100Z: Solar activity was very low. Region 1034 (N19E16)
remains a small Bxo bi-polar group.
IB. Solar Activity Forecast: Solar activity is expected to be at
predominately very low levels. There is a chance for an isolated
C-class event from Region 1034 during the next three days (14 - 16
December).
IIA. Geophysical Activity Summary 12/2100Z to 13/2100Z:
The geomagnetic field was at quiet levels.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (14 - 16 December).
III. Event Probabilities 14 Dec-16 Dec
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 13 Dec 076
Predicted 14 Dec-16 Dec 077/077/077
90 Day Mean 13 Dec 073
V. Geomagnetic A Indices
Observed Afr/Ap 12 Dec 002/001
Estimated Afr/Ap 13 Dec 003/005
Predicted Afr/Ap 14 Dec-16 Dec 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 14 Dec-16 Dec
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Thanks Brian,

Well he seems to be getting out very well into EU as there have been lots of spots on the cluster.
I wish he'd send a few electrons this way! Or should I say radio waves...

Last month's National Geographic had an article on SV/A. Apparently there are 19 or 20 possible monasteries that are possible QTH's for operation on the peninsula. They say there is no electricity but one photo clearly shows one well lit up inside and out. Obviously Monk Apollo is getting his electrons from somewhere.

Interesting reading.

Yeah, he wants you to pay for his holiday with your abundant supply
of the Yankee Dollar. Your are all filthy rich aren't you? That's
what the dx thinks.

In contrast, you may prefer to work me. This is a cut and paste from
my qrz.com listing.

"If you work me and you need my card quickly, you may send your card
direct. Please DON'T send money or IRC. Just an addressed return
envelope will be fine. If you send money or IRC, I will send it back
to you. I was happy to work you so I am happy to pay my own postage
when I send you my qsl card."

73 and good luck,
Alek

There is more than one country where postage to NA costs
significantly more than $1.00. It makes little difference to me
whether I spend $1.85 on an IRC or send the guy $2.00. I'm not going
to beat somebody up for 15 cents.

Dick

PS: My Momma didn't raise no fool. I'll accept donations, too. :)

I just remembered that US IRCs are $2.10 now, not $1.85. The guy
would be doing me a favor by only asking for $2.00. :)

Dick, the interesting part of that is that he says DO NOT send IRC's,
which says to me that he figures that her can come out ahead with GS.
Sorry, there are a lot of V31 ops around, and this guy is SOL from me.
I will not run the risk that he is bloating his wallet just by being on
the air.

12122. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-16 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 12122

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 16 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 350 Issued at 2200Z on 16 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 15/2100Z
to 16/2100Z: Solar activity has been low. Today's activity
consisted of two C-class events both from Region 1035 (N30W18), the
first a C5/Sf at 0124Z and the second a C3 at 1302Z. A slow-moving,
partial-halo CME was associated with the C5 event. Region 1035 has
not shown significant growth during the past 24 hours. However,
there does appear to be a small delta magnetic configuration in the
central portion of the region.
IB. Solar Activity Forecast: Solar activity is expected to be low.
There is a slight chance for an isolated M-class event from Region
1035.
IIA. Geophysical Activity Summary 15/2100Z to 16/2100Z:
The geomagnetic field has been quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet during the next three days (17-19 December).
(The partial halo CME discussed in Part 1A, above, is expected to
arrive on day 4 and increase geomagnetic activity to unsettled to
active levels).

Subject: Re: [DX-IS] Interesting Listing

Yeah, he wants you to pay for his holiday with your abundant supply of the Yankee Dollar. Your are all filthy rich aren't you? That's what the dx thinks.

In contrast, you may prefer to work me. This is a cut and paste from my qrz.com listing.

"If you work me and you need my card quickly, you may send your card direct. Please DON'T send money or IRC. Just an addressed return envelope will be fine. If you send money or IRC, I will send it back to you. I was happy to work you so I am happy to pay my own postage when I send you my qsl card."

73 and good luck,
Alek

What a drag! The on-line log doesn't show any QSO's with you, either. I guess it's good to send in a card, though, just in case they busted your call a couple times.

The 5K0T operation from Serrana Bank busted my call twice. :-(They got it right while they were on Baja Nuevo.

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 17 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 351 Issued at 2200Z on 17 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 16/2100Z
to 17/2100Z: Solar activity has been low. One C-class event occurred
from Region 1035 (N30W32), a C1/Sf at 16/2149Z. There were numerous
B-class events throughout the period. Region 1035 has grown in area
to approximately 210 millionths. However, the region has lost its
delta magnetic configuration and is now a beta.
IB. Solar Activity Forecast: Solar activity is expected to be low.
There is a slight chance for an isolated M-class event from Region
1035.
IIA. Geophysical Activity Summary 16/2100Z to 17/2100Z:
The geomagnetic field has been quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet during days 1-2 (18-19 December). An increase
to unsettled to active levels is expected on day three (20
December). The increase is forecast due to the expected arrival of
the CME observed on 16 December.

DX Bulletin 50 ARLD050
>From ARRL Headquarters
Newington CT December 17, 2009
To all radio amateurs

SB DX ARL ARLD050
ARLD050 DX news

This week's bulletin was made possible with information provided by NC1L, VE8EV, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SRI LANKA, 4S. Peter, DC0KK is QRV as 4S7KKG from Moragalla, IOTA AS-003, until January 7, 2010. Activity is on 20 meters using CW, RTTY, PSK and WSJT. QSL to home call.

NIGERIA, 5N. Ivan, OM3CGN is now QRV as 5N7M. He is active on 40 to 10 meters. QSL to home call.

MAURITANIA, 5T. Ito, JA1PBV is QRV as 5T5BV until the end of December. Activity is on the HF band using mainly CW with some digital. QSL to home call.

UNITED ARAB EMIRATES, A6. Don, N1DG is QRV from club station A61AD in Abu Dhabi for about one week while on work assignment. Activity is generally on the HF bands using CW, SSB and RTTY in his free time. QSL via operator's instructions.

QATAR, A7. In celebration of Qatar National Day, special event station A71QND is QRV until December 19. QSL via A71CO.

CUBA, CO. Edor, CO7PH is QRV as CO7PH/p from Cayo Coco, IOTA NA-086, until December 31. QSL direct via W3HNK.

ANTARCTICA. Felix is QRV as DP1POL from the German Neumayer Station III and has been active on 20 meters using SSB between 0000 and 0100z. QSL via DL1ZBO.

NORTHERN IRELAND, GI. Special event station GB1HF is QRV until January 10, 2010 to celebrate the first powered flight in Ireland by pilot and inventor Harry Ferguson. Activity is on 80 to 10 meters using CW, SSB and RTTY. QSL via bureau.

ST. LUCIA, J6. John, VE8EV is QRV as J68/home call until December 20. Activity is on all bands using CW and SSB. This includes an entry in the RAC Winter contest. QSL to home call.

HAWAII, KH6. Tom, N1CE is QRV as home call/KH6 from Oahu Island, IOTA OC-019, until January 6, 2010. QSL direct.

WAKE ISLAND, KH9. Colin, WA2YUN is QRV as KH9/home call for about one year while on work assignment. He is active in his spare time. QSL via K2PF.

GREENLAND, OX. Fred, KB4DMQ is QRV as OX3QM from Thule for one year. He is currently active on 40 meters. QSL to home call.

NETHERLANDS, PA. Special event station PD09XMAS is QRV until January 3, 2010 to celebrate Christmas 2009. Activity has been on 20 meters using SSB. QSL via PD5X.

ANTARCTICA. Mike, RW1AI is QRV from club station R1ANP from Progress station and is here for about a year while on work assignment. QSL this operation via RW1AI.

POLAND, SP. Special event station HF150LZ is QRV until December 27 to commemorate the 150th birthday of Ludwik Zamenhof, the inventor of the artificial language Esperanto. QSL via SP4YPB.

SUDAN, ST. Members of the Khartoum Sea Scouts Radio Club are QRV as ST26ASC until January 28, 2010 to celebrate the 26th Arab Scouts Conference under Peace and Unity. They have been active on 20 meters using SSB. QSL via ST2M.

MOUNT ATHOS, SV/A. Monk Apollo, SV2ASP/A has been QRV on 20 meters around 1330z and 40 meters around 1800 to 1900z. QSL direct.

CANADA, VE. Members of the Coquitlam and Surrey Amateur Radio clubs are QRV as VG7W until December 31. This includes an entry in the RAC Winter contest as a Multi/Multi entry. Activity is on 160 to 2 meters using CW, SSB and FM. QSL via operators' instructions.

THIS WEEKEND ON THE RADIO. The OK DX RTTY Contest, NCCC Sprint CW Ladder, AGB-Party Contest, Russian 160-Meter Contest, RAC Winter Contest, Croatian CW Contest and ARCI Holiday Spirits Homebrew Sprint are all on tap for this weekend. The Run for the Bacon QRP CW Contest is scheduled for December 21. The SKCC CW Sprint is scheduled for December 23. The Lighthouse Christmas Lights QSO Party runs from December 19 to January 3. Please see December QST, page 66, and the ARRL and WA7BNM contest web sites for details.

As of this minute (Friday morning - 11:58 UTC) the SFI is 87 (according to what gets fed here from the VE7CC cluster node).
Unfortunately, there's also a CME on the way. I saw the forecast yesterday, but don't remember when it's supposed to hit.

Sure would be nice if maybe this spring the SFI could climb over 90.
After more than 30 years of slogging along on 80 with a low piece of wire, I finally got my 200th confirmed on 80 the other day. Ready for some more fun on 10 and 12 for a while.

12134. ARLP052 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-12-18 16:36:46 UTC
From: jjreisert@alum.mit.edu
Topic: 7958 Message: 12134

SB PROP @ ARL $ARLP052
ARLP052 Propagation de K7RA

ZCZC AP52
QST de W1AW
Propagation Forecast Bulletin 52 ARLP052
>From Tad Cook, K7RA
Seattle, WA December 18, 2009
To all radio amateurs

SB PROP ARL ARLP052
ARLP052 Propagation de K7RA

Sunspot activity continued this week, with new group 1035 emerging December 14, following 1034, which appeared December 9. Daily sunspot numbers since December 9, through December 17, have been 13, 13, 13, 12, 14, 28, 38, 30 and 24. Solar flux values have been above 80 since December 15, with the values from Tuesday through Thursday of this week at 81.6, 83.2 and 86.9. The 2000z (local noon in Penticton) are the official daily number, and on December 17 at 1800z the flux value was 88.1, higher than any flux value in the past three years.

The last time the 10.7 cm flux was higher was December 15, 2006 at 88.2. Just three days prior to that on December 12, 2006 it was 104.2. It wasn't long ago that flux values were in the sixties, but we haven't seen solar flux below 70 since October 16, 2009 at 69.6.

The latest prediction from NOAA and USAF is for flux values around 88 for December 18-20, then 85, 82, 82 and 80 for December 21-25. Predicted planetary A index for December 18-24 is 5, 6, 15, 6, 5, 5 and 5, indicating a possible disturbance on Sunday. Geophysical Institute Prague predicts quiet conditions December 18-19, unsettled to active December 20, quiet to unsettled December 21-22, unsettled December 23, and quiet December 24.

Currently at the NASA STEREO site (http://stereo.gsfc.nasa.gov/) we can see sunspot group 1035 at a high latitude heading toward the western (right-hand) side of the solar image, and just passed over the eastern horizon a bright patch of activity that could emerge as a sunspot. There is also some activity in the southern hemisphere on the far side just emerging from the less than 13.7 percent of the Sun not visible to STEREO.

At http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt under the column "Sunspot Area 10E-6 Hemis" you can see the area (in millionths of a solar hemisphere) covered by sunspots steadily growing all week.

This increased sunspot activity gives us improved chances of expanded HF propagation. For instance, doing a projection with a popular propagation prediction program, with zero sunspots today from my location in Seattle to Brazil on 12 meters, there is a chance of propagation from 1800-2000z, but for less than 25 percent of the time. But with an average of sunspot number for the past few days at 30.7, the same path has excellent probability of opening with strong signals from 1700-2100z.

Mail after the 10 meter contest last weekend indicated that propagation was disappointing on Saturday and much better on Sunday. You can also see comments on the Contest Soapbox at http://www.arrl.org/contests/soapbox/. Just select "2009 ARRL Ten Meter Contest" from the drop-down menu.

In contrast to the 10 meter reports, there were a great many enthusiastic reports on 160 meters propagation this week. James French, W8ISS of Lincoln Park, Michigan operated from the Red Cross communications center in Ann Arbor. He reports that the 10 meter contest didn't get interesting until late in the event on Sunday. He says, "Listened a few times down on 160 meters and heard non-stop signals across the whole band."

Jan Wise, KA5PRO in Pocahontas, Arkansas was surprised on December 10 at 0407z when he contacted KH7XS in Laupahoehoe, which is on the northeast side of the Big Island of Hawaii. Jan was running 100 watts SSB on 1.845 MHz into a simple inverted L antenna at 50 feet.

Dick Bingham, W7WKR of Stehekin, Washington reports that last Saturday night in the evening local (West Coast) time he was surprised to work an SM4HCM and FM5CD on 160 meter CW with 100 watts into a sloping half-square antenna.

Jeff Hartley, N8II of Shepherdstown, West Virginia also reports great 160 meter conditions last weekend during the 10 meter contest. He noted great signals from Northern Europe, and 160 was "much better than during the 160 meter contest!"

Jon Jones, N0JK of Wichita, Kansas said 10 meters was bad Saturday, but he had great results on Sunday. He reports, "There was widespread Es (E-skip) across the southern part of the country. Had Texas, Louisiana, Mississippi, Florida and Alabama stations in all afternoon steady and loud. After 2200 UTC the Es spread west to Arizona, New Mexico and northeast to Ontario, Maryland, Michigan, etc."

"The Es to the Gulf of Mexico allowed an 'Es link' to form TEP (trans-equatorial propagation), and on to South America. So despite a low solar flux, CX, LU, PY stations were very strong around 2300 UTC Dec 13. I was able to work several PYs CXs and LU1HF while running 5 watts and a CB mag-mount whip on the car on 10M CW. They were an honest 599 despite a very simple antenna to Kansas. As strong as during solar Cycle 23 peak."

Randy Shirbroun, ND0C of Worthington, Minnesota reports some great 80 meter conditions last weekend. He wrote, "I was playing around off and on in the 10 meter Contest and there was some great Es and so-so TE on Saturday evening and especially Sunday afternoon. But for me the really exciting thing was around midnight (local) on Friday night on 80 meters."

"I run exclusively QRP so I am definitely a slave to the whims of the propagation gods. There wasn't anything going on 10 when I checked it around 0545 UTC Saturday - not very surprising but I was hoping for maybe a little MS (meteor scatter) or Es. So I went to 80 CW and was very pleasantly surprised. I was able to work 6 central and eastern Europeans (HA, HB, 9A, S5, and DK) in an hour running 5 watts to a dipole at 45 feet here in SW Minnesota. It wasn't easy, but the band was relatively quiet and no big pile-ups and the guys on the other end were patient and obviously had good ears. It was definitely my best hour of 80 meter DXing! I think that was a very special opening, but I definitely need to check 80 more often. (I'll bet it was a great night for the guys on 160 with decent antennas and a little power.) Hopefully it is a sign of things to come this winter on the lower bands, especially with non-existent sunspots. Maybe 5BDXCC with QRP is possible! I have 240 on 10, 270 on 15, 270 on 20, 100 on 40 and now 55 on 80 - we'll see!"

Randy Crews, W7TJ of Spokane, Washington wrote on December 16, "We are still in the low portion of the cycle, and I remember in years past during this time with a quiet Sun and geomagnetic field, low band propagation is exceptionally good. The higher solar activity enhances 40 meters, 30 meters and even 80 meters. Last weekend I worked three new European countries on 160 meters. 80, 40, and 30 meters offer short path European propagation starting an hour before local sunrise, switching to long path at sunrise, and back to short path propagation once again about 45 minutes to an hour past sunrise. Pretty cool!"

Robert Elek, W3HKK of Johnstown, Ohio reported on December 12, "Hark! Sunspots! And a big bump up in 40/80/160 DX was noted on Dec 11 and 12. But prior to that, 40 had been relatively quiet for the past week. However, on 12/6, OX3KQ sounded like a beacon on 7.153, with signals from S7 to S9 +5 dB for a couple of hours (1900-2100z). Mid afternoon! My average noise level was S2. OX3KQ was using a rotary dipole at 70 feet and working pile ups into most of Europe, plus pockets of JA and stateside stations who could penetrate his European wall. HA, IZ4, EC, UW5, DJ2, YO, RK0, A41, Z31, UR5, RZ8 were a sample of what he was plucking off, plus a dozen or so US and a dozen JAs. Non stop DX for him, and it sounded like he was picking them off the top of the pile. Fascinating to see how the skip would move around favoring first to his east, then to his west, then to his north."

"Again, we see that on a quiet or dead band, DX is possible from almost any point on the globe on 40 meters. Also, E51NAA (North Cook Islands) was worked again, on both 12/11 and 12/12 between 0400-0500z, around 7.025 MHz with good signals. I've heard him coming through for over a week now, again, on a quiet band."

"Another Magical Opening on 160: On 12/11 at 0500z I worked TF4M, plus LA, SM, PA: all with 599 signals, with 100w cw/160m inverted L with an average height above ground of 10 feet! It seems 1.815-1.840 is a jam packed DX segment especially on Friday and Saturday nights. And around 1.843, a UM0 (Uzbekistan) was a solid 5x7(3 S-units above my noise) and looking hard for takers. Amazing! You could hear nearly all of Europe calling CQ that night, many signals in the 579 to 599 range. On an antenna you could almost jump up and touch! Amazing. So it doesn't take a lot to join the fun."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for December 10 through 16 were 13, 13, 12, 14, 28, 38, and 30 with a mean of 21.1. 10.7 cm flux was 73.9, 72.1, 74.5, 75.5, 78.6, 81.6, and 83.2 with a mean of 77.1. Estimated planetary A indices were 1, 0, 1, 2, 4, 0 and 3 with a mean of 1.6. Estimated mid-latitude A indices were 1, 0, 2, 1, 4, 0 and 2 with a mean of 1.4.

12136. BRAG :-)

Yahoo group: DX-IS (2009)
Date: 2009-12-18 17:22:54 UTC
From: Alan Leith
Topic: 12136 Message: 12136

Since there are only two other local DXers to whom I can brag, I simply have to tell everyone (whether they care or not) that the arrival today of a QSL from FO/F6CTL (Marquesas) for SSB and a card two weeks ago from 4W6AL (note the similarity in our calls!!!) for CW have given me all the countries I have worked on SSB and CW confirmed. So I now have 335 confirmations on SSB and 334 confirmed on CW.

I'm really pleased with myself!

73

Alan:

Count it have been 5J0A? Don't find any activity from 5J1A. 5J0A is in
QRZ.com
with activity in 2007.

DX,
Dave WA8WV

Wow, cool. Congrats!

I need to send for cards for FT5GA. Also, after trying to get cards from 4O1A unsuccessfully, I worked 4O3A in CQWW. He has a US manager. That will give me everything I've worked confirmed, at 332 current countries confirmed for Mixed DXCC.

Thanks!! I might add that my overall total on the current list is 337.
I'm missing only PeeeeeFive for mixed #1 HR.

No 972
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4S - Peter, DC0KK is now active as 4S7KKG from Sri Lanka until 7 January. He operates SSB, CW and digital modes on the HF bands. QSl via home call, direct or bureau.
5N - Nick, LZ1QK has been active as 5N/LZ1QK from Nigeria since October 2008. He has now received four callsigns for him to use from different locations (5N3LQK, 5N3WQK, 5N4LQK and 5N4WQK). Next year he will operate under a special callsign (5N50K) celebrating the 50th anniversary of indipendence of Nigeria. The QSL route for all calls is via LZ1CL. [TNX The Daily DX]
5R - Sam, G4OHX will be active as 5R8HX from Antananarivo, Madagascar (AF-013) from 28 December until 3 January. He plans to operate mainly CW "on as many bands as possible". QSL via home call, direct only.
GM - Using their club callsign GS2MP (North of Scotland Contest Group), Chris/GM3WOJ and Jim/GM0NAI will be operating their vintage Yaesu transmitters/receivers and transceivers from 1 January through 31 December. Each calendar month they will use a different Yaesu radio and amateurs worldwide are invited to work GS2MP and earn points towards the "Yaesu Heritage Year Award". Operation will mostly be on 40 and 20 SSB and CW. More details can be found at http://www.gm7v.com/yaesu2010.htm [TNX GM3WOJ]
J8 - George, K2CM will be active from Bequia Island (NA-025) from 8 January to 12 February. He will operate SSB and CW on 20 and maybe 40 metres. QSl via home call, direct or bureau. [TNX www.rsgbiota.org]
KH9 - The Daily DX reports that Colin, KH9/WA2YUN now expects to remain on Wake Island (OC-053) for "about another year". He is active in his limited spare time. QSL via K2PF.
ST - The Khartoum Sea Scouts Radio Club (ST2KSS) will be active as ST26ASC until 28 January to celebrate the 26th Arab Scout Conference that will be held next month. QSL via ST2M. [TNX ST2M]
VE - Steve, N6QEK will be active as VY1/N6QEK from Whitehorse, Yukon from 30 December to 4 January, including the ARRL RTTY Roundup. He

plans to operate RTTY, PSK31 and SSB on 80-10 metres. QSL via N6QEK. Further information can be found at http://www.n6qek.com [TNX NG3K]
VP8_fal- Michael, G7VJR and Martin, G3ZAY will be active as VP8DMN from the Falkland Islands (SA-002) on 21-29 January. They will operate mainly CW, with an emphasis on the low bands. QSL via G7VJR, direct or bureau. All QSOs will be uploaded to LoTW. [TNX http://dx-hamspirit.com/]
XE - The Grupo DXXE (http://www.dxxe.org/) will be active from various locations as 4A1DXXE on 20-31 December to c elebrate their 5th anniversary. This will be an all band SSB, CW, RTTY and PSK31 operation. QSL via N7RO (direct or bureau) and LoTW. [TNX XE1R]
YJ - Nao, JK1FNL will be active as YJ0NA from Port Vila (OC-035), Vanuatu from 28 December to 4 January. He will operate on 40-6 metres with 100 watts and wire antennas. QSL via home call. [TNX JK1FNL]
YJ - Franko (9A3DW), Hrle (9A6XX), Marko (9A8MM) and possibly a fourth operator will be active as YJ0MM from Efate (OC-035), Vanuatu on 21-28 January. They plan to have two medium power stations active on 160-10 metres CW, SSB and RTTY using verticals and spiderbeams. QSL via 9A8MM, direct or automatically via the bureau. Further information can be found at http://vanuatu.rkp.hr/

BLACK SEA CUP ---> The Black Sea Contest Club sponsors the Black Sea Cup International Contest, which will be held from 12 UTC on 6 February through 11.59 UTC on the 7th. For further information please visit http://bscc.in/ [TNX UR5EAW]

DXPEDITION OF THE YEAR SURVEY ---> Col, MM0NDX is conducting an online survey to recognize the DX World of Ham Radio DXpedition of the Year 2009 - please visit http://dx-hamspirit.com/dxpedition-of-the-year-2009/ and cast your vote!

QSL P29CS ---> Andy, P29CS (Lihir Island, OC-069) advises not to use his qrz.com address for sending cards, as it is his location only and the cards will not get to him. Andy is presently looking for a QSL manager, but this might take a while. [TNX VY0PW]

+ SILENT KEY + Recently reported Silent Keys include Tadahiko Honma (JA1UE), Karel Debrouwere (ON5BV), Arnold J. Polsbroek (PZ1AP), Nikolaj S. Esipenko (RA3XG), Karlis Sleckaitis (YL2MD) and Antonio Scolamiero (YV4DDK).

I think I'm one of the two Al said he could brag to! Well, Al,
congratulations! Nice going and I know the reason you don't have a
P5 is simply because you were not QRV when he was on the air . . . so
you are excused for that transgression. My bet is when another one
shows up you will have him is short order.

Take care and keep knocking them off on all bands and
modes. That's what it is all about. 17 is open to Africa right now
(18:22 UTC), by the way.

73, Paul VE1DX

12144. Re: [DX-IS] BRAG :-)

Hi Al:
Bravo & congratulations!! I care because I have been working on a
similar issue, and know how it is to fight the battle. For years I have
ignored 5BDXCC. However, not too long ago I looked at my totals on LOTW
and realized that I was within striking distance. Given propagation
condx, and nothing new to work, I decided to start working on that with
special attention to LOTW. After the CQ contest a while back, this
morning confirmation #100 came in for 40 meters. That leaves me needing
only 30 on 80 meters, and 33 on 10 meters. I also need ONE more for WAS
on 160, and a fellow I worked during the 160contest is a LOTW
participant, and promised to upload his contest logs shortly. Wahooooo!!!

So, now with Paul doing such nice work with the SFI, I may get there
shortly, that is of course, if I can get my 80 meter antenna working
again.. mumble, mumble.

73,
Mike, W5UC

Had a QSO with a Eastern EU station a few days ago. Instead of sending TNX QSO or TNX FER THE CHAT, I sent TNX FER THE BUZZ OM and he became very concerned about his signal! I'd given him a 589 RST but he mistook the word BUZZ as an AC hum on his signal. I had to assure him his signal was fine and it was just a term that meant a short QSO.

I hear used it fairly often, usually between OPs that know each other. Been sending it now and then for years. Oh well, cultural differences, I guess. Will refrain from using BUZZ anymore!

Also had a guy in his 80s take exception with OT one time. Didn't like it one bit. Guess that rules out OC and OB as well.

73

Al, VE1AL

I think I'm one of the two Al said he could brag to! Well, Al, congratulations! Nice going and I know the reason you don't have a P5 is simply because you were not QRV when he was on the air . . . so you are excused for that transgression. My bet is when another one shows up you will have him is short order.

Take care and keep knocking them off on all bands and modes. That's what it is all about. 17 is open to Africa right now (18:22 UTC), by the way.

Hello Mike,

Nice going yourself! While I have 5BDXCC, my nemesis appears to be 12M for 8BDXCC. I'm afraid 9BDXCC is never going to be possible from a small city lot with lots of local interference. As they say, keep on truckin'.

Greetings for the season.

73

Al, VE1AL

I once worked TR1XX (now a Silent Key) on CW and sent "BJR" to him, which was followed by a long message from him back to me in French. I understood maybe 5 words of it. So I'm careful of what I send now due to that, too! :-)

Hi Jim,

I was a hair's width away from a P5 QSO but I didn't get through. Someday (and I hope to be alive) it will come back on. I'll get it!

As for that BS7H -- my QSO was on 20M CW in '95. I counted myself lucky that I made a single QSO. Trying to work them on SSB that time was difficult and I never did get through.

NEVER say NEVER. As long as it counts, it will come back on.

Good luck!

Al, VE1AL

I think I'm one of the two Al said he could brag to! Well, Al, congratulations! Nice going and I know the reason you don't have a P5 is simply because you were not QRV when he

was on the air . .. . so you are excused for that transgression. My bet is when another one shows up you will have him is short order.

Take care and keep knocking them off on all bands and modes. That's what it is all about. 17 is open to Africa right now (18:22 UTC), by the way.

73, Paul VE1DX

Hi Jim,

I was a hair's width away from a P5 QSO but I didn't get through. Someday (and I hope to be alive) it will come back on. I'll get it!

As for that BS7H -- my QSO was on 20M CW in '95. I counted myself lucky that I made a single QSO. Trying to work them on SSB that time was difficult and I never did get through.

NEVER say NEVER. As long as it counts, it will come back on.

Good luck!

I got lucky with ONE QSO with the last BS7H operation, on 20 CW.

Of the ones I still haven't worked, I think 3YBouvet and P5 are going to be
the toughest. The other four (A5, A9, EP and YA) have ops there but don't
seem to agree with my schedule or propagation at this time.

12165. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-18 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12165

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 18 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 352 Issued at 2200Z on 18 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 17/2100Z
to 18/2100Z: Solar activity has been low. One C-class event
occurred from Region 1035 (N30W45). It was an optically
uncorrelated, impulsive C7.6 observed at 18/1855Z. Numerous B-class
events were also observed throughout the period. Region 1035
continues to grow in area (310 millionths), longitudinal extent (12
degrees) and spot count (14 spots). However, during the past 24
hours, the large negative polarity penumbra and associated umbra
located near region center decayed resulting in a beta magnetic
configuration for the region.
IB. Solar Activity Forecast: Solar activity is expected to be low.
There is a slight chance for an isolated M-class event from Region
1035.
IIA. Geophysical Activity Summary 17/2100Z to 18/2100Z:
The geomagnetic field has been quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for day one (19 December) of the forecast
period. An increase to unsettled to active levels is expected on
day two (20 December). The increase in activity levels is due to
the expected arrival of the CME observed on 16 December. By day
three (21 December), the field will return to mostly quiet levels.
III. Event Probabilities 19 Dec-21 Dec
Class M 10/10/10
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 18 Dec 084
Predicted 19 Dec-21 Dec 085/085/083
90 Day Mean 18 Dec 073
V. Geomagnetic A Indices
Observed Afr/Ap 17 Dec 002/001
Estimated Afr/Ap 18 Dec 002/005
Predicted Afr/Ap 19 Dec-21 Dec 005/005-015/015-007/007
VI. Geomagnetic Activity Probabilities 19 Dec-21 Dec
A. Middle Latitudes
Active 15/45/15
Minor storm 05/15/05
```

Major-severe storm 01/05/01

I gotta get a 30 meter antenna back up. My 40 meter loop just doesn't work at all on 30 meters. It does OK on 20 and 15.

Putting another antenna up involves coming up with a 30 foot ladder and getting up on the roof. Maybe if we have another warm day on a weekend I can manage it soon.

Mike,

Hope you enjoy the groceries!

The DXSCAPE cluster shows spots from 1330-1436. I worked him at 1357 after he started taking NA only.

I had to go out to do some shopping with the XYL, and by the time I got back a couple of hours later he was already in LoTW for the session and I got an instant match.

Good luck and Merry Christmas.

Subject: RE: RE: RE: [DX-IS] BRAG :-)

If we want to work Conway Reef in North America we'll have
to see a North American-based DXpedition. The last one was
for Europe and didn't give a hoot about us.
73 Al, VE1AL

That's a bit unkind. Pacific stuff is much rarer in EU than in NA.
I have worked it 20 or more times over the years from TX, and did work this
last lot on 15m SSB, but it didn't do anything to my heart rate.

I don't think the BYs and JAs complained about BS7H working lots of us in
NA.

HNY a tous,
Derek aa5bt

Mike,

I think that is/was a glitch that has been fixed. The one-time
work around suggested was:

(1) Go to the Settings tab

(2) Click Test

If my memory is correct, this will do the update.

Why not? Because it was hard to work? I need 7O on CW and I
was too dumb to work the one recently counted after a decade of
arguing. I don't think the DXpedition should never have taken
place. Rather I think I should have worked it. I don't think 7O
ought to be deleted, either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but
countries grandfathered in are not deleted unless they cease to exist
for political reasons. If they met the size/distance criteria when
they were added, they are there for the long haul.

There have always been dangerous places to go, for various reasons. Places like Peter 1st, South Sandwich or Bouvet are dangerous just by their location. Many places in the world now will get you shot at if you go there. Decades ago the Spratlys were a place where access meant crossing through an area infested by pirates. At least one group were attacked one or more members of the crew killed. It may still be that bad, although I think access is now possible by air. BS7H is difficult because of physical access to the rocks themselves AND for political and pirate reasons.

No one has to go to these places, and the danger is why many of them are rarely activated. If DXpeditioners only went to the easy places, half of those on the list would never be activated. Those who go take a calculated risk. Thankfully few have resulted in fatalities, but some have over the years. I don't know that BS7H is the worst place on the planet to try to activate, but if it is not, it is close. That is why it is rare and likely will remain so.

73, Paul VE1DX

12182. Re: [DX-IS] Why should BS7H not have occurred?

Yahoo group: DX-IS (2009)

From: John Geiger
Topic: 12136 Message: 12182

But conditions can and do change. How many in the late 90s ever thought that YA would be activated again. Same for ZA throughout the 80s. Plenty of other countries who quickly changed situations and became active again, or safe to activate. If it is dangerous, don't go there, but it doesn't warrant removing it from the DXCC list if it met the criteria when it was added.

From what I see BS7 is above the water level at high tide, which is all that is needed for it to count from a physical standpoint.

I could not disagree more. As has been pointed out, the DXCC criteria allowed for the creation of Scarborough Reef as a "country" at the time it was added. It became the same kind of challenge to us hams as did Kilimanjaro or Mt. Everest to mountain climbers or Antarctica or the floor of the Pacific Ocean to explorers.

After experiencing an extremely dangerous evacuation from St. Paul Island in 1988 and then again a somewhat dangerous but less traumatic departure from Sable Island the following year, I never once suggested that either be deleted. And while neither would fit today's criteria, both still count for DXCC.

Ya pays yer money and ya takes yer chances.

I'd go back to St. Paul or Sable in a flash. You couldn't pay me to step across the border in to Afghanistan.

Okino Tori-shima was a political error. Steps were immediately taken to see that would never happen again.

IMO !

Why not? Because it was hard to work? I need 7O on CW and I was too dumb to work the one recently counted after a decade of arguing. I don't think the DXpedition should never have taken place. Rather I think I should have worked it. I don't think 7O ought to be deleted, either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but countries grandfathered in are not deleted unless they cease to exist for political reasons. If they met the size/distance criteria when they were added, they are there for the long haul.

Subject: [DX-IS] BRAG :-)

Since there are only two other local DXers to whom I can brag, I simply have to tell everyone (whether they care or not) that the arrival today of a QSL from FO/F6CTL (Marquesas) for SSB and a card two weeks ago from 4W6AL (note the similarity in our calls!!!) for CW have given me all the countries I have worked on SSB and CW confirmed. So I now have 335 confirmations on SSB and 334 confirmed on CW.

I'm really pleased with myself!

Okino Tori-Shima was the only deleted entity since I've been on the air that I missed. Partly due to the massive QRM that made me go away. I'm sorry now that I didn't go for it - fairly easy from the Left Coast. Just like the Pee Five after he was spotted on the cluster - the S-meter went to +30 and stayed there probably until he went QRT. No way would I have gotten into that mess.

I could not disagree more. As has been pointed out, the DXCC criteria allowed for the creation of Scarborough Reef as a "country" at the time it was added. It became the same kind of challenge to us hams as did Kilimanjaro or Mt. Everest to mountain climbers or Antarctica or the floor of the Pacific Ocean to explorers.

After experiencing an extremely dangerous evacuation from St. Paul Island in 1988 and then again a somewhat dangerous but less traumatic departure from Sable Island the following year, I never once suggested that either be deleted. And while neither would fit today's criteria, both still count for DXCC.

Ya pays yer money and ya takes yer chances.

I'd go back to St. Paul or Sable in a flash. You couldn't pay me to step across the border in to Afghanistan.

Okino Tori-shima was a political error. Steps were immediately taken to see that would never happen again.

A lot of places are more dangerous for various reasons. Yemen. Peter I Island. Annobon Island. Certain of the Spratley Islands.

People went to all of these and most came back safely, except for one operation to the Spratleys. Aves Island was seriously diminished in size by a hurricane. There may not be much more left of it than BS7. Should we delete it too?

Congrats! And you're still ahead of me! I have something like 331 mixed, 320 CW and only 308 on SSB. I should live long enough to catch you!

Amen, Schedule a cruise on a ship going somewhere well to the western side of the Indian ocean. Take your portable rig with you. When the cruise ship gets hijacked and they take you back to Somalia, ask them if you can work DX!

Open up the "Settings" tab. In the section labeled "Updater" (mine has a couple of little green windows), click on "Test".

For whatever reason, that seems to "unlock" the process. The update I got later (after that one locked up) seemed to work properly.

Had to do that on mine and the wife's PC.

Then those guys who just went to Conway Reef should have that one deleted as well. After all, if anything happened to either one of them, they were hundreds of miles away from any medical attention.

Oh, and we should stop people from climbing mountains while we're at it.

What about airplanes? They crash too, don't they.

What about......

Okino Tori Shima should never have been admitted in the first place and that was later acknowledged. It probably enjoyed the shortest stay on the DXCC list of any entity ever placed there.

It was ultimately classified as a "seamount" - a portion of it was above water *only* during low tide. When the tide was in, that platform those guys operated from was sticking up out of the water with no rock/land visible at all.

From: Alan Leith
Topic: 12136 Message: 12214

Thanks for the congrats, Art. Yes, it was really frustrating to see spots for Conway from North America and when I was around looking for them I could not hear a peep. Strangely, I heard TX3 several times but was not successful in working them either. Luck of the draw, I guess.

I'm not sure, but I believe VE1DX worked both of them. 100 miles northeast, I couldn't hear much.

Happy holidays, my friend, and I consider the race to be on :-) .

73

Al, VE1AL

I must have really been lucky. That last group worked me on 15, 17 and 20 SSB/CW. Only one of the 4 QSOs was easy!

A lot of places are more dangerous for various reasons. Yemen. Peter I Island. Annobon Island. Certain of the Spratley Islands.

People went to all of these and most came back safely, except for one operation to the Spratleys. Aves Island was seriously diminished in size by a hurricane. There may not be much more left of it than BS7. Should we delete it too?

BS7H,..... the Dxpedition that Never should have been !

IMO !

Why not? Because it was hard to work? I need 7O on CW and I was too dumb to work the one recently counted after a decade of arguing. I don't think the DXpedition should never have taken place. Rather I think I should have worked it. I don't think 7O ought to be deleted, either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but countries grandfathered in are not deleted unless they cease to exist for political reasons. If they met the size/distance criteria when they were added, they are there for the long haul.

From: CSM(r) Gary Huber - AB9M
Topic: 12136 Message: 12217

When we start arguing the relative risks of each Dx-pedition, we may find there are many, probably most of the top 100 or so that would have to be deleted as too life threatening. Every time I sit down in my shack, I'm just inches from sudden death (high voltage in the RF Amp). Most DX-peditions have life risks ranging from electrocution to weather. Managing life risks is one key to a successful operation.

Okino Tori Shima should never have been admitted in the first place and that was later acknowledged. It probably enjoyed the shortest stay on the DXCC list of any entity ever placed there.

It was ultimately classified as a "seamount" - a portion of it was above water *only* during low tide. When the tide was in, that platform those guys operated from was sticking up out of the water with no rock/land visible at all.

Not sure about Penguin but Walvis Bay from the ARRL DXCC website:

"Only contacts made from September 1, 1977, to February 28, 1994, count for this entity."

That's more than a couple years.

12221. Re: RE: [DX-IS] BRAG :-)

Yahoo group: DX-IS (2009)
Date: 2009-12-19 16:01:29 UTC
From: Zack Widup
Topic: 12136 Message: 12221

I got one QSO with the recent Conway operation - on 15 SSB. I worked an
earlier operation there but didn't manage any SSB QSO's then.

I tried to work 3D20CR on 40 and 30 CW with no luck. I didn't spend numerous
hours at it because, as I noted, I worked an earlier operation.
TX5SPA had a lot stronger signal here and was easier to work.

Gary is right!
If, If, If.....If a frog had wings & could fly he wouldn't bump his A-- when he jumps, but he jumps anyway. Nowhere in the DXCC rules do I see anything that says IF an operation(DX-Pedition) is too dangerous, then it does not qualify as a new entity. Who are we, as armchair Expeditioners, to tell anyone what they should or should not do with their personal time? It isn't for us to say what level of risk an individual exercises in pursuit of an activity. I think people who jump out of airplanes had tall of the cheese fall off of their crackers, but it's THEIR crackers.

If you can call a villa a "country," yes. Actually my understanding is that the Order owns several extraterritorial villas in Rome but only one is used for DXpeditions. I think it's the one where the entrance pathway neatly frames St. Peter's Basilica when you look through the keyhole at the gate (evidently a somewhat popular thing to do). But they swear allegiance only to the Pope. They ARE considered a separate entity to Italy, as the Vatican is.

I guess the closest thing to SMOM is 4U1ITU and 4U1UN. Also just buildings with "country" status. I keep hoping to be able to work 4U1UN on 6 meters, but they haven't been active during a big 6m opening that I've been around for.

How many people have died trying to climb Mt. Everest? I heard a radio show on that very subject about a year ago. One of the saddest things I've ever heard.

How many people die doing stunt flying as a hobby? I've known several people who successfully did it and one who didn't.

There are quite a few hobbies that are far more dangerous than going to Scarborough Reef.

I worked 4U1UN on 6m in the June 1992 VHF contest, but never got a QSL out of them. I don't have my log for that contest, so guess I will need to work them again.

That was one of my very first VHF contests and I only had 144 MHz with a cobbled-together transverter back then. I'm amazed I worked anyone with it. :-)

I know they've been active on 6m but I was never near a rig at the time. Oh well, one of these days ...

In the June contest this year I did work XE2WWW (anyone who didn't work them wasn't calling them), J39BS and P43A on 6 meters. This was with about 10 watts and a very small 3 element beam.

in june, I worked 16 Countries in europe on 6 meters,

But I have a Force 12 9 element YAGI, on a 30 ft boom.

NEXT year ! I'll have a 3 some of 4cx350's on 6 meters !

That was one of my very first VHF contests and I only had 144 MHz with a cobbled-together transverter back then. I'm amazed I worked anyone with it.
:-)

I know they've been active on 6m but I was never near a rig at the time. Oh well, one of these days ...

In the June contest this year I did work XE2WWW (anyone who didn't work them wasn't calling them), J39BS and P43A on 6 meters. This was with about 10 watts and a very small 3 element beam.

If you can call a villa a "country," yes. Actually my understanding is that the Order owns several extraterritorial villas in Rome but only one is used for DXpeditions. I think it's the one where the entrance pathway neatly frames St. Peter's Basilica when you look through the keyhole at the gate (evidently a somewhat popular thing to do). But they swear allegiance only to the Pope. They ARE considered a separate entity to Italy, as the Vatican is.

I guess the closest thing to SMOM is 4U1ITU and 4U1UN. Also just buildings with "country" status. I keep hoping to be able to work 4U1UN on 6 meters, but they haven't been active during a big 6m opening that I've been around for.

Joey, what is the claimed gain on that antenna? 6 was good this year
with 900 watts out of a pair of 3-500Z's, and a home brew 6 element yagi
on a 21 foot boom, at 73 feet. Calculated gain is 9.5 dBd. Feedline is
7/8 heliax.

Mike

A lot of places are more dangerous for various reasons. Yemen. Peter I Island. Annobon Island. Certain of the Spratley Islands.

People went to all of these and most came back safely, except for one operation to the Spratleys. Aves Island was seriously diminished in size by a hurricane. There may not be much more left of it than BS7. Should we delete it too?

Then those guys who just went to Conway Reef should have that one deleted as well. After all, if anything happened to either one of them, they were hundreds of miles away from any medical attention.

Oh, and we should stop people from climbing mountains while we're at it.

What about airplanes? They crash too, don't they.

What about......

Alan

Congratulations!!!!!

I was just putting my ARRL submittal together for next week and came to realize how hard it is going to be to get those last few that are never on. Maybe if the other thread in this reflector gains some traction we will reduce the DXCC list to only a few major countries with nearly medical facilities. Then it will be easy.

Present standing here as of just under 6 years on HF at the bottom of cycle 24 is 301 mixed confirmed made up of 282 confirmed RTTY and 258 confirmed Phone (281 worked) No CW new ones.

Considering I am only missing 36 in that time, and a few of them have been on (just couldn't get them in the log), it has been quite a good few years for DX.

They really start to get hard to work above 300. I think I worked my first 100 countries in about 4 months (mind you, this was almost exclusively on 40 CW with no packet, no internet and no newsletters at the time), then it took a year or so to work the next 100 and a few years for the next 100. Over the last few years I've gotten maybe 5 new ones a year.

How about Kingman Reef and Palmyra Island. When K6LPL, WA2FIJ and crew landed on Palmyra their plane crashed [pix on QSL card], other than Jan (forgot call) who was flown off and later sued, they all continued to set up and WA2FIJ went on to Kingman, which has barely enuf room to walk around on. Maybe these two entities should be deleted too so no one else can possibly crash on landing...

I guess I'm getting old, but I'm having trouble understanding that data. Are they saying the gain is 18.5 dBi, and the net gain is 10.6 dbd? In my old fashioned way of thinking, if the gain is 18.5 dBi, then the gain over a dipole should be 16.36 dBd (18.5 - 2.14). So, I don't understand the 10.6 dBd figure. I sure would like to model that antenna in EZ-Nec.

OK, looking at their web site, it appears that they are doing a little hocus-pocus with the gain figure. That 18.5 dBi gain figure looked very high to me, and it appears that they are including ground gain in that figure, whereas I am accustomed to quoting gain in free space. Using their method of stating gain, my 6 element antenna has a gain of 17.39 dBi as calculated by EZ-Nec at the same 74' height. I still don't understand the 10.6 dbd figure.

73,
Mike

OK, as I think about it, that 10.6 dBd figure may be the free space
gain. Just a bit more hocus-pocus, aka slight of hand.

The reason they crashed was potholes in the runway that they did not
see on the flyovers prior to the expedition.
Was Jan the Surgeon who cut their hand (pretty badly) ?

The Coast Guard had to get them off the island, and, IIRC, billed them
for the trip.

Otherwise, it was a pretty normal (if you can call living on a Coral
outcropping normal) expedition.

YOU BET!!! That's a helluva deal. My problem is that I get too much
pleasure & fun out of designing & building my own, and EZ-Nec has turned
out to be very accurate in it's calculations.

LOL, that's exactly what they are doing. Their gain above ground at 74' is 18.5 dBi. My gain at that same height is 17.39 dBi, a difference of 1.11 dB.

That mysterious gain figure is 10.6 dBd. My gain in free space is 9.5 dbd. Again a difference of 1.11 dB.

You gotta watch them every minute of every day.

A lot of places are more dangerous for various reasons. Yemen. Peter I Island. Annobon Island. Certain of the Spratley Islands.

People went to all of these and most came back safely, except for one operation to the Spratleys. Aves Island was seriously diminished in size by a hurricane. There may not be much more left of it than BS7. Should we delete it too?

BS7H,..... the Dxpedition that Never should have been !

IMO !

Why not? Because it was hard to work? I need 7O on CW and I was too dumb to work the one recently counted after a decade of arguing. I don't think the DXpedition should never have taken place. Rather I think I should have worked it. I don't think 7O ought to be deleted, either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but countries grandfathered in are not deleted unless they cease to exist for political reasons. If they met the size/distance criteria when they were added, they are there for the long haul.

Dick, K6LPL, Dave Gardner was the surgeon who cut his hand and put an end to his surgery days. No need to explain how he cut his hand. I knew Dave as he was a fellow club member of the Southern California DX Club.

The reason they crashed was potholes in the runway that they did not
see on the flyovers prior to the expedition.
Was Jan the Surgeon who cut their hand (pretty badly) ?

The Coast Guard had to get them off the island, and, IIRC, billed them
for the trip.

Otherwise, it was a pretty normal (if you can call living on a Coral
outcropping normal) expedition.

Having been there and getting bumped off of the Honor Roll by several countries gives me something to look forward to. Since I got back (kinda sorta) on the air there have been at least two new countries added. When I rejoined the League earlier this year I submitted 17 cards which put me back on HR but now the newer ones.... Poor Al, if and when Pee Five comes on and he works it - that's it - all over with. He'll have to take up county hunting or slow scan TV .... ..

I don't get that. The dBd gain is generally about 3 dB lower than the dBi gain, plus or minus some. How can it be about 8 dB different?

Date: 2009-12-19 22:08:26 UTC
From: John Geiger
Topic: 12136 Message: 12254

The DBi is theoretically done in free space, where the DBd might be adding ground gain as well. That is why DBd figures are often cited at a certain height for the antenna.

Are any other VHFers on the list thinking like me-that the ARRL needs to add a Grid challenge like the DX challenge. You could add up the grid squares you work on each band, plus the ones from satellites and treat it like the DX challenge is, maybe only starting with 400 or 500 grids. Might be motivation enough to get some to add new bands to their station. VUCC on 432 is interesting. Don't have it yet, about 15 grids short. Have 3 VUCCs on 6m, plus one on 2m and one on the satellites.

12256. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-19 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12256

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 19 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 353 Issued at 2200Z on 19 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 18/2100Z
to 19/2100Z: Solar activity was low by virtue of a single C2.9/Sf at
10/0014Z from Region 1035 (N30W56). Since this event, only B-class
x-ray activity, with some weak, low frequency radio emissions have
been observed from this region. Over the past 24 hours, the region
decayed, both in areal coverage and spot number, but retained its
beta magnetic configuration. Two new regions were numbered this
period. Region 1036 (S29W19) emerged on the disk as a 3-spot beta
group, while Region 1037 (N18E54) rotated onto the disk as a 2-spot
beta group. Both regions have been quiet and stable.
IB. Solar Activity Forecast: Solar activity is expected to be low
for the next three days. There is a slight chance for an isolated
M-class event from Region 1035.
IIA. Geophysical Activity Summary 18/2100Z to 19/2100Z:
The geomagnetic field has been quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled with a chance for isolated active
periods on day one (20 December). This activity is in response to
the expected arrival of the CME observed on 16 December. Days two
and three (21 - 22 December) will see mostly quiet conditions.
III. Event Probabilities 20 Dec-22 Dec
Class M 10/10/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 19 Dec 082
Predicted 20 Dec-22 Dec 082/082/080
90 Day Mean 19 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 18 Dec 002/002
Estimated Afr/Ap 19 Dec 002/005
Predicted Afr/Ap 20 Dec-22 Dec 015/015-007/008-005/005
VI. Geomagnetic Activity Probabilities 20 Dec-22 Dec
A. Middle Latitudes
Active 45/15/05
Minor storm 15/05/01
Major-severe storm 05/01/01

A lot of places are more dangerous for various reasons. Yemen. Peter I Island. Annobon Island. Certain of the Spratley Islands.

People went to all of these and most came back safely, except for one operation to the Spratleys. Aves Island was seriously diminished in size by a hurricane. There may not be much more left of it than BS7. Should we delete it too?

At 08:17 PM 12/18/2009, you wrote:

Ah !

BS7H,..... the Dxpedition that Never should have been !

IMO !

Why not? Because it was hard to work? I need 70 on CW and I was too dumb to work the one recently counted after a decade of arguing. I don't think the DXpedition should never have taken place. Rather I think I should have worked it. I don't think 70 ought to be deleted, either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but countries grandfathered in are not deleted unless they cease to exist for political reasons. If they met the size/distance criteria when they were added, they are there for the long haul.

VUCC on the various bands is a lot of fun, too. Just don't try 47 GHz to start out with ... :-)

Having been there and getting bumped off of the Honor Roll by several
countries gives me something to look forward to. Since I got back (kinda

sorta) on the air there have been at least two new countries added. When I rejoined the League earlier this year I submitted 17 cards which put me back on HR but now the newer ones.... Poor Al, if and when Pee Five comes on and he works it - that's it - all over with. He'll have to take up county hunting or slow scan TV .... ..

From: CSM(r) Gary Huber - AB9M
Topic: 12259 Message: 12259

Any ideas on the time it takes to get DXCC submission cards back after you receive the DXCC credit for them? I'm still waiting on the cards I received credit for over a month ago.

Zack, the actual difference between dbi & dbd is 2.14 db. So, if you want to know the true gain of an antenna, model it in free space and subtract 2.14 db to get the true gain. Now, if the antenna is moved near the earth you start getting ground gain. The closer to earth the higher the ground gain. what Force 12 is doing is playing with the numbers by quoting the gain of the antenna including ground gain, thus making it look better. Instead of calling theirs "gain in free space", they call it "Net Gain". Just another form of hocus pocus, or smoke & mirrors.

Notice that they quote their "Gain" at 18.5 dBi. if we subtract the above 2.14 dB, we get 16.36 dBd, then if we subtract 6 dB for ground gain, we get very close to their "net gain'". Smoke & mirrors any way you slice it. It's BS like this that caused QST to disallow any quoting of gain figures in their ads.

That figures!

The gain of a beam (in free space anyway) is mainly related to the length of the boom. Doing some rough calculations with various computer programs, I see a 30 foot boom at 50 MHz is capable of producing at most a little under 12 dBd of gain (11.7 is the most I can come up with). That would put the dBi gain at about 14 dB at most. Chances are it will be a little less than that.

The "Worked All Wal-mart Stores" (WAWS) would be more difficult then the Counties award. There are 4,258 stores in the US vs. 3077 Counties:

891 Discount Stores
2612 Supercenter Stores
153 Neighborhood Stores
602 Sam's

4,258

Although I think most stores have more Hams in their lots then some counties do. Rules would be - you most be parked and a dated store receipt along with a matching dated QSL card.

OK, Time out!

So, let me get this straight in my pain pill soaked head,
What you guys are saying is that this antenna isnt any better than the 6 element cushcraft ? when it comes to DB gain ?

I KNOW this antenna is different on beam path & F to B ratio,
I can mae people disappear if I want to.

Confussed, Joey

You know,

aside from needing SOME of those cards to resubmit them for VUCC.
I find it silly that I fret over them till they come back then stick them in a box and forget about them......

LMAO.....

Yep, sent to the DXCC desk. Thanks, I figured it might take a while to get them back but I didn't figure the outgoing (return) queue would be as long as the submission queue.

Are any other VHFers on the list thinking like me-that the ARRL needs to add a Grid challenge like the DX challenge.. You could add up the grid squares you work on each band, plus the ones from satellites and treat it like the DX challenge is, maybe only starting with 400 or 500 grids. Might be motivation enough to get some to add new bands to their station. VUCC on 432 is interesting. Don't have it yet, about 15 grids short. Have 3 VUCCs on 6m, plus one on 2m and one on the satellites.

12271. Re: [DX-IS] Force 12 / Cushcraft

Yahoo group: DX-IS (2009)
Date: 2009-12-20 01:04:59 UTC
From: Zack Widup
Topic: 12267 Message: 12271

If the 6 element Cushcraft is on a 30 foot boom, yes.

The numbers I gave are what comes out of Yagi Optimizer and NEC2. They usually agree very closely. Are you using the numbers Cushcraft gave for the beam or the numbers these programs produced?

I've spent hundreds of hours playing with Yagi Optimizer, mainly in trying for the "ideal VHF antenna." The F/B ratio can be varied dramatically with the Yagi Optimizer program. It just takes adjusting the lengths of elements. The beam width is dependent mostly on the number of elements. More elements gives you a narrower main lobe but more sidelobes. The maximum gain is dependent mostly on the boom length.

Minor variations in these can be achieved with the modeling program. F/B ratio and gain can be a trade-off.

Not true Joey. Cushcraft was the original company who caused ARRL to forbid gain statements in their ads. They were notorious for inflating the gain figures of their antennas. The gain figures for the Cushcraft 6 element on a 12 foot boom are inflated and inaccurate. I have modeled that antenna in EZ-Nec, and it doesn't come out to what they claim.

That figures!

The gain of a beam (in free space anyway) is mainly related to the length of the boom. Doing some rough calculations with various computer programs, I see a 30 foot boom at 50 MHz is capable of producing at most a little under 12 dBd of gain (11.7 is the most I can come up with). That would put the dBi gain at about 14 dB at most. Chances are it will be a little less than that.

Zack, the actual difference between dbi & dbd is 2.14 db. So, if you want to know the true gain of an antenna, model it in free space and subtract 2.14 db to get the true gain. Now, if the antenna is moved near the earth you start getting ground gain. The closer to earth the higher the ground gain. what Force 12 is doing is playing with the numbers by quoting the gain of the antenna including ground gain, thus making it look better. Instead of calling theirs "gain in free space", they call it "Net Gain". Just another form of hocus pocus, or smoke & mirrors.

Notice that they quote their "Gain" at 18.5 dBi. if we subtract the above 2.14 dB, we get 16.36 dBd, then if we subtract 6 dB for ground gain, we get very close to their "net gain'". Smoke & mirrors any way you slice it. It's BS like this that caused QST to disallow any quoting of gain figures in their ads.

Subject: Re: [DX-IS] Why should BS7H not have occurred?

A lot of places are more dangerous for various reasons. Yemen. Peter I Island. Annobon Island. Certain of the Spratley Islands.

People went to all of these and most came back safely, except for one operation to the Spratleys. Aves Island was seriously diminished in size by a hurricane. There may not be much more left of it than BS7. Should we delete it too?

Ah !

BS7H,..... the Dxpedition that Never should have been !

IMO !

Why not? Because it was hard to work? I need 7O on CW and I was too dumb to work the one recently counted after a decade of arguing. I don't think the DXpedition should never have taken place. Rather I think I should have worked it. I don't think 7O ought to be deleted, either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but countries grandfathered in are not deleted unless they cease to exist for political reasons. If they met the size/distance criteria when they were added, they are there for the long haul.

Are any other VHFers on the list thinking like me-that the ARRL needs to add a Grid challenge like the DX challenge.. You could add up the grid squares you work on each band, plus the ones from satellites and treat it like the DX challenge is, maybe only starting with 400 or 500 grids. Might be motivation enough to get some to add new bands to their station. VUCC on 432 is interesting. Don't have it yet, about 15 grids short. Have 3 VUCCs on 6m, plus one on 2m and one on the satellites..

12279. Antenna question

Yahoo group: DX-IS (2009)
Date: 2009-12-20 01:56:16 UTC
From: Paul M Dunphy
Topic: 12279 Message: 12279

Has anyone used a Mosley TA-34-XL?

http://www.mosley-electronics.com/spec%20files/amateur/ta34xl.htm

I'm told by sources I consider reliable that Mosley have 10-mile test ranges where they do actual tests on their antennas. The reason given is that they supply a lot of antennas on military contracts, and they must meet specs. Therefore they need to test their military (and commercial) products. It follows they have the same facilities to test their amateur antennas. The reason for this preamble is I *really* like the figures given in dBd as 9.5 (10 metres), 9.1 (15 metres) and 8.2 (20 metres.) I want to believe these to be accurate.

The other thing that makes me believe they are correct is the relatively low F/B (18 on all three bands as compared to 23-35 by other antennas.) It's known that you can do some shuffling of the element spacing to improve forward gain at the expense of the F/B ratio.

Do any of you gurus know if 4 elements on a 21-foot boom can be spaced to give 9.5/9.1/8.2 forward dBd gain? Or is this more of the smoke and mirrors? They do say dBd, not dBi, but the "net gain" from the ground Mike mentioned might be a factor here.

If these numbers are right, that would be one cracker jack of an antenna. At 68 pounds, I believe I can keep one in the air. Just wondering if there would be a noticeable improvement over a HyGain TH5 (which works well, but I have no idea of the gain figures -- and even if I did have them, would not be able to know how they were derived.)

Well, you don't have to sell me on Mosley, Joey. I have the TW-33-XL (the 3 element version of the TW-34-XL you have) as well as a 5-element 6M Mosley monobander stacked above it. They are built like tanks and will outlast me. Look at my photo on QRZ standing on the boom of it . . . I wouldn't do that if I didn't think it was extremely well built! :-)

The thing is, I'd like to have something a bit more rugged than the TH5, and I like the advertised gain on the TA-34-XL . . . but those numbers seems too good to be true. I'd hate to replace the TH5 with the TA-340XL and find little to no difference in gain. The TH5 honks. The only thing I'm looking for is equal (or better) electrical performance and a more rugged antenna for our wind and ice storms. I know the Mosley will take anything nature will throw at it.

in the 1st week of Dec, we had 3 inches of SNOW here !
at daylight the 1st thing I did was go look at my antennas, HA HA !

they have never seen snow before I wanted to know what it would do to them. (Nothing of course) but it was fun to watch the snow melt off of them. it has snowed here now 2 yrs in a row, last year it was 8 inches., but that one knocked out the power for a couple days, they dont build the grid as strong here as they do up North. (miss).

Subject: Re: [DX-IS] Re: BRAG

The "Worked All Wal-mart Stores" (WAWS) would be more difficult then the Counties award. There are 4,258 stores in the US vs. 3077 Counties:

891 Discount Stores
2612 Supercenter Stores
153 Neighborhood Stores
602 Sam's

4,258

Although I think most stores have more Hams in their lots then some counties do. Rules would be - you most be parked and a dated store receipt along with a matching dated QSL card.

BS7H,..... the Dxpedition that Never should have been !

IMO !

Why not? Because it was hard to work? I need 70 on CW and I was too dumb to work the one recently counted after a decade of arguing. I don't think the DXpedition should never have taken place. Rather I think I should have worked it. I don't think 70 ought to be deleted,

either. It gives me something to look forward to.

BS7H met the DXCC rules when it was added. It doesn't now, but countries grandfathered in are not deleted unless they cease to exist for political reasons. If they met the size/distance criteria when they were added, they are there for the long haul.

Also, you can get a worked all states award by not working all states. You can get one if you work 49 states (not Maryland) and a station in Washington, DC. Guess that would be a worked almost all states.

The "Worked All Wal-mart Stores" (WAWS) would be more difficult then the Counties award. There are 4,258 stores in the US vs. 3077 Counties:

 891 Discount Stores
2612 Supercenter Stores
 153 Neighborhood Stores
 602 Sam's
------------ --------- --------- -------
4,258

Although I think most stores have more Hams in their lots then some counties do. Rules would be - you most be parked and a dated store receipt along with a matching dated QSL card.

Having been there and getting bumped off of the Honor Roll by several countries gives me something to look forward to. Since I got back (kinda sorta) on the air there have been at least two new countries added. When I rejoined the League earlier this year I submitted 17 cards which put me back on HR but now the newer ones.... Poor Al, if and when Pee Five comes on and he works it - that's it - all over with. He'll have to take up county hunting or slow scan TV .... ..

What's interesting to me is the number of bureaus TODAY that use "Box 88"! I put +"Box 88" +"QSL" in a search engine and came up with many entries. On the first page, I found Box 88 QSL addresses in Ukraine, Russia, Viet Nam, Kazakhstan, Thailand, and Croatia!

I wonder if Box 88 is available here in Clovis...

Nope (not as of midnight local.) Doesn't look too
bad. Forecast for Halifax is (all units are metric):

Tonight
Cloudy periods. Wind becoming northeast 20 km/h overnight. Low minus 10.

Sunday
Increasing cloudiness. Snow mixed with ice pellets beginning in
the afternoon. Local blowing snow in the afternoon. Wind northeast 20
km/h increasing to 40 gusting to 60 near noon. High minus 2.

Sunday night
Snow and blowing snow. Amount 10 to 15 cm. Wind northeast 40
km/h gusting to 60 becoming northwest 30 gusting to 50 near midnight.
Temperature rising to zero by morning.

Monday
Flurries and rain showers. High plus 2.

I just came in from a 20 mile drive, Dale, and there wasn't a flake of snow to be seen. From the forecast, I think the Halifax area will get more from the storm than we here on Cape Breton Island. But I'll let you know for sure late tomorrow :-) .

I've received the credit (342/336) for my submission to the DXCC Desk. I'm just waiting for the cards to come back. Fortunately most of the dozen cards are duplicates or one of several mode/band cards from DX-peditions. Still I'd like to get them back.

Any ideas on the time it takes to get DXCC submission cards back after you receive the DXCC credit for them? I'm still waiting on the cards I received credit for over a month ago.

Re: the TH-5....

My TH-7 has been in the air here in the wind and ice of the mid-west for over twenty years...
see http://www.csm-gh.com/AB9M-TH-7.htm

then see http://www.csm-gh.com/ac9s-skyhawk-1.htm and the other AC9S antennas for pictures of ice and wind failures..

Antennas with long booms which come down in the winter are not as good as one with less gain which survives and plays when you need it.

Joey

Well, you don't have to sell me on Mosley, Joey. I have the TW-33-XL (the 3 element version of the TW-34-XL you have) as well as a 5-element 6M Mosley monobander stacked above it. They are built like tanks and will outlast me. Look at my photo on QRZ standing on the boom of it . . . I wouldn't do that if I didn't think it was extremely well built! :-)

The thing is, I'd like to have something a bit more rugged than the TH5, and I like the advertised gain on the TA-34-XL . . . but those numbers seems too good to be true. I'd hate to replace the TH5 with the TA-340XL and find little to no difference in gain. The TH5 honks. The only thing I'm looking for is equal (or better) electrical performance and a more rugged antenna for our wind and ice storms. I know the Mosley will take anything nature will throw at it.

12299. K7K QSL from 1997

Yahoo group: DX-IS (2009)
Date: 2009-12-20 17:28:09 UTC
From: Paul M Dunphy
Topic: 12299 Message: 12299

I have a friend who is "Reflector challenged." He sent me the following request this AM. I can't find anything, so I'm hoping some of the gang here either has a K7K card from 1997 with info on it, or knows one of the operators or the manager. Here's the info I was given:

"The only ones I really need are of the K7K variety. I've emailed AH0W but can't email the qsl mgr, KE7LZ. No published email address for him. There's a blurb on the internet that KE7LZ moved to Japan a few years back. He appears to be in the Air Force. KE7LZ was the qsl mgr for K7K. AH0W was one of if not the leader of the dxpedition. Could you put out a query on one of the dx reflectors inquiring about qsls for the K7K operation and how one might acquire same? By the way, the operation took place in late September/early October in 1997. Thanks!"

For quite some time Aves Island was a very large sand bar with a building and a pier. Now the sandbar is much smaller and most of the pier (if not all) is gone. It's probably now much smaller than Clipperton Island.

Getting into Palmyra by boat is no picnic either!

The award for the "trip that went wrong" probably belongs to the guys back in the early 80s who activated Palmyra and Kingman Reef. At that time, Palmyra was privately owned (it has since become Federal property and has become one of those "preserve/reserve" areas - consequently it became more active). The guy wrote to the owner, requesting permission to be there and operate. When he departed, he had not yet received written permission to operate from Palmyra. The first part of the trip was to Kingman and then to Palmyra, assuming he would have the documentation in order when he got back.

Alas, Murphy reared his ugly head and the permission to be on Palmyra had never been granted. So, although they were there, and there with good/honest intentions, that particular operation never did count. Fortunately, the operation on Kingman Reef was legit and accepted with no probs by the DXCC desk.

That Palmyra operation (AD0S?) was my first disappointing "reject" from the DXCC desk.

Hmmmmm - 'early 80's' - ok.
I worked K6LPL/KH5 on January 6, 1980 and WA2FIJ/KH5K on January 9, 1980 and both were accepted by the League.

Hi Paul,

The QSL Manager was AH0W. On the expedition were UA3AB, KH7U, N9NS, K0EU, W0MY, SM0AGD, AH0W and JA3IG.

My QSL is stamped and signed by AH0W.

Subject: [DX-IS] K7K QSL from 1997

I have a friend who is "Reflector challenged." He sent me the following request this AM. I can't find anything, so I'm hoping some of the gang here either has a K7K card from 1997 with info on it, or knows one of the operators or the manager. Here's the info I was given:

"The only ones I really need are of the K7K variety. I've emailed AH0W but can't email the qsl mgr, KE7LZ. No published email address for him. There's a blurb on the internet that KE7LZ moved to Japan a few years back. He appears to be in the Air Force. KE7LZ was the qsl mgr for K7K. AH0W was one of if not the leader of the dxpedition.
Could you put out a query on one of the dx reflectors inquiring about qsls for the K7K operation and how one might acquire same? By the way, the operation took place in late September/early October in 1997. Thanks!"

Thanks Bob. Getting the last few confirmed was somewhat shaky because I had been somewhat remiss in sending for the cards in a timely manner. For instance, my card from FO/DL7FT for our 10M SSB QSO was iffy because I didn't know where to send the card. I finally tried his widow (also a ham) and she kindly send me that one. There are other similarly dramatic results.

After all, I got a note from a W0 last week asking if I still have the CY0DXX logs (I do) and I made a W6 happy earlier this month with an early Christmas present of a CY9DXX QSL.

It appears that what goes around comes around.

Alan

Congratulations!!!!!

I was just putting my ARRL submittal together for next week and came to realize how hard it is going to be to get those last few that are never on. Maybe if the other thread in this reflector gains some traction we will reduce the DXCC list to only a few major countries with nearly medical facilities. Then it will be easy.

Present standing here as of just under 6 years on HF at the bottom of cycle 24 is 301 mixed confirmed made up of 282 confirmed RTTY and 258 confirmed Phone (281 worked) No CW new ones.

Considering I am only missing 36 in that time, and a few of them have been on (just couldn't get them in the log), it has been quite a good few years for DX.

VE1AL said:
"It appears that what goes around comes around."

So true! A while back, I found out that one of my Elmers from 1982 had been totally flooded out in Katrina. Upon learning that he didn't have a bug (and he's a BIG TIME CW bug op), I boxed up one that I had got off Ebay and sent it to him. It was a nice bug but not particularly special to me.

About 6 months later, I got a box from someone else, totally out of the blue. Inside this box was the antique, rare (VERY rare) bug from a different Elmer!

It doesn't matter what you call it -- karma, zen, balance or anything else -- "ye shall reap what ye sow".

7 3 es Merry Christmas!

"The only ones I really need are of the K7K variety. I've emailed AH0W but can't email the qsl mgr, KE7LZ. No published email address for him. There's a blurb on the internet that KE7LZ moved to Japan a few years back. He appears to be in the Air Force. KE7LZ was the qsl mgr for K7K. AH0W was one of if not the leader of the dxpedition.
Could you put out a query on one of the dx reflectors inquiring about qsls for the K7K operation and how one might acquire same? By the way, the operation took place in late September/early October in 1997. Thanks!"

73, Paul VE1DX

12314. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-20 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12314

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 20 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 354 Issued at 2200Z on 20 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 19/2100Z
to 20/2100Z: Solar activity was very low. Isolated low-level B-class
flares occurred during the latter half of the period. Region 1035
(N31W70) showed no significant changes during the period. New Region
1038 (N16W26), a simply-structured A-type group, was numbered.
IB. Solar Activity Forecast: Solar activity is expected to be very
low to low with an isolated C-class flare possible from Region 1035.
There is also a slight chance for an M-class flare from this region.
IIA. Geophysical Activity Summary 19/2100Z to 20/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at mostly quiet levels during the period (21 - 23
December).
III. Event Probabilities 21 Dec-23 Dec
Class M 10/05/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 20 Dec 084
Predicted 21 Dec-23 Dec 084/080/076
90 Day Mean 20 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 19 Dec 000/001
Estimated Afr/Ap 20 Dec 002/005
Predicted Afr/Ap 21 Dec-23 Dec 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 21 Dec-23 Dec
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Oh gawd Dale, you mustn't get on the air much - less than me. Or maybe location. We've been inundated with DU's almost as much as JA's here on the Left Coast. I've worked many over the years. I'll trade you a DU for a FJ, send it to you with a SASE and include U$D's to boot.

Rene
p.s. as per QRZ yur SOL:
The search for "DU2AEU" produced no results.

DU2AEU looks like a callsign from Philippines

The callsign DU2AEU was not found in our 1993 database

Boy is he lucky! I saw K7K on the reflector (dx summit I think) during CQWW and though he was just a special events station from 7-land. I wanted DX--not some silly station promoting corn. Afterwards I found out. Boy was I green! Anybody seen a route for DU2AEU from '73 hi hi (bet he is sk). Only DU I ever worked since licensed in '71 I'm still waiting for the come around hi hi

http://www.arrl.org/awards/dxcc/appstatus.html

Got my credits but still no award. Silly me thought since I was submitting all LoTW I would get quick turnaround on the award as I did on the credits. This was my First Ever submission - DXCC basic and CW awards. Hoped to have the certs for Christmas. Again, silly me....

So now I am putting together my card/lotw submission for 20m, 15m, and 40m awards for next year.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Holiday, Merry Christmas and Season's Greetings". Thanks to the many individuals who sent holiday wishes to my family and me.....73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-December, through Sunday, 20th-December there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, G, GD, GI, GM, GU, GW, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J8, JA, JD/m, JD/o, JT, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9W, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4A, MEXICO (Special Event). Members of the DXXE (Mexican Contest and DX group) will celebrate their 5th anniversary by using the special callsign 4A1DXXE between December 20-31st. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK31. The following operators will be active from different locations: Ismael/XE1AY, Hugo/XE1CQ, Sergio/XE1CT, Alex/XE1EE, Tony/XE1GRR, Pepe/XE1J, Ramon/XE1KK (Co-leader), Masa/XE1MM, Carlos/XE1MW, Joaquin/XE1R (Co-leader & callsign trustee), Miguel/XE1YYD, Benjamin/XE2AU, Bernardo/XE2HWB, Hector/XE2K (Co-leader & schedule and log controls), Marco/XE2S, Jorge/XE2WWW, Zalo/XE3N and Daniel/XE3RR. The QSL Manager is Dick, N7RO. Don't send your QSL cards to the Mexican Bureau since they will not have QSLs to answer. Make sure your Bureau QSL card is clearly marked via N7RO. QSOs with this station are good for the DXXE Award. For more information, visit the DXXE Web page at: http://www.dxxe.org

4S7, SRI LANKA. Peter, DC0KK, is now active as 4S7KKG until January 7th, 2010. Activity will be on all HF bands using CW, SSB and the Digital modes (RTTY, PSK and WSJT). Over the past week most of his activity has been on 20 meters RTTY and PSK31. QSL via DC0KK, direct or by the Bureau.

5N, NIGERIA. Tony, LZ1JZ, wants to remind everyone that Nick, LZ1QK, has been active as 5N/LZ1QK since October 2008. During his stay, Nick has received/used four different callsigns from different locations (5N3LQK, 5N3WQK, 5N4LQK and 5N4WQK). Next year he will operate under the special callsign 5N50K to celebrate the 50th anniversary of independence of Nigeria. His QSL Manager is LZ1CL: Vassil Shatarov, P.O Box 185, Plovdiv 4000, BULGARIA. ADDED NOTE: Currently, QSLs for 5N/LZ1QK and his other operations are momentarily not accepted for DXCC credit because the DXCC Desk has not received documentations yet.

7TH IDXC ANNOUNCEMENT. The 7th International DX Convention organized by the Strange Radio Team (SRT) will be held April 17-18th, 2010. The City will be Paestum near Salerno (fantastic Archeological Area/tourist site) and the airport is Napoli Capodichino. Look for more details to become available soon at: http://www.strangeradioteam.com/idxc

9H, MALTA. Christian, EA3NT, is active as 9H3NT until December 23rd. Activity will be on 40□10 meters using CW and SSB. QSL via LoTW or by his home callsign direct or by the Bureau.

ANTARCTICA TOUR (VP8, VP8/G, VP8/H, VP8/O and KC4). Thaire, W2APF, will be traveling on board the ship "National Geographic Explorer" heading to the Antarctica region between February 8th and March 5th. He is expected to be operating under the following callsigns (specific dates were not provided):
W2APF/C6A/MM □ While on board the ship "National Geographic Explorer"; http://www.expeditions.com/Ship_Detail92.asp?Ship=20
W2APF/KC4 □ While in Antarctic territories
VP8DML □ While in the territory of the Falkland Islands (VP8) including South Shetlands Islands (VP8/H), South Orkney□s Islands (VP8/O) and South Georgia Islands.
QSL all activity via W2APF.

BIRD ACTIVITY (Many Grids To Be Activated!). Jim, ND9M/VQ9JC, plans to activate 85 grids in 8 states on AO-51 (he actually travels through 13 states) between January 21st and February 10th. Jim and his wife will be driving to the Denver area (DN70) where his step-son lives and Cheyenne (DN71) where is brother lives. The trip will start from Panama City, Florida, on/or around January 21st, where they will head to Memphis, TN, and Jim may possibly activate some grids. From Memphis they will head westbound through OK, then into KS and NE before hitting CO. Their around trip will take them through Big Bend National Park and Texas (hitting every grid in TX) and the Gulf Coast into Louisiana. Here is the list of grids to be activated from start to finish:

Depart Memphis westbound
along 35N latitude to 100W Turn north along OK/TX
longitude line (100W)
---------- ----------
EM44 / EM45 (AR) DM96 / EM06
EM34 / EM35 DM97 / EM07 (KS)
EM24 / EM25 (OK) DM98 / EM08
EM14 / EM15 DM99 / EM09 <----- May try to run a quad
EM04 / EM05 DN90 / EN00 <----- field/grid point
DM94 / DM95 (TX) DN91 / EN01 (NE)

Turn west along 41N latitude
to I-80 and head toward Try to run DN71 when in Cheyenne.
Longmont. ----------

DN81 DN80 DN70

Head south from Longmont toward Leave Big Bend and head for
Big Bend Nat'l Park Brownsville, TX
---------- ----------
DM79 / DM89 DM72 / DM82 DL99 / DM90
DM78 / DM88 DM71 / DM81 DL98 / EL08
DM77 / DM87 DM70 / DM80 EL07
DM76 / DM86 DL79 / DL89 EL06
DM75 / DM85 DL88 - Big Bend EL16
DM74 / DM84 EL15 (Brownsville)
DM73 / DM83

Resume northbound and northwest Turn east toward 96W east
toward 100W longitude of Dallas
---------- ----------
EL17 / EL18 DM91 / EM01 EM13 / EM23
EL09 / EL19 DM92 / EM02
EM00 / EM10 DM93 / EM03

Turn south along 96W and head Follow Gulf Coast into
toward Houston & the Gulf Coast Louisiana
---------- ----------
EM12 / EM22 EL29 EL39 / EM30
EM11 / EM21 EL28 EL31 / EL32
EM10 / EM20 EL33

Jim will return home via route of convenience.....
(ed. Whew! I sure hope I got it right for him....)

BLACK SEA CUP INTERNATIONAL 2010. The Black Sea Contest Club (BSCC) will sponsor the "Black Sea Cup International Contest 2010" which will be held between 1200z, February 6th and 1159z, February 7th. For more information on the contest, please visit the BSCC Web page at: http://bscc.in

CE0Z, JUAN FERNANDEZ ISLAND. Al, LA9SN, will be active as CE0Z/LA9SN from March 16-23rd (possibly to the 26th), 2010. Activity will be on 80-10 meters using mostly CW and 100 watts. QSL via his home callsign (may change). For updates, visit his Web page at: http://www.la9sn.com

CTU USA 2010. Tim Duffy, K3LR, Contest University Chairman, reports:
"I am pleased to announce that 'early bird' registration for Dayton ConTest University ('CTU') 2010 is now OPEN. This will be the only Contest University held in the USA during 2010. Our 4th year holding CTU in Dayton!
The CTU staff is working hard to prepare an interesting and informative curriculum for 2010. CTU USA will be held in Dayton, Ohio, on Thursday, May 13, 2010 (classes last all day). This is the day before the big 3 day Dayton event!
CTU USA 2010 will feature some of the best Radio Contest operators and station builders ('CTU Professors'). They will present state of the art contesting topics that will increase your contesting knowledge and fun.
Thanks to our flagship Sponsor -Icom America for their continued support of CTU USA 2010 and our contesting radio sport. Also thanks to CQ Magazine, DX Engineering, Superbertha, International Radio and Dave, W9ZRX, for their contributions that help make CTU a success.
For CTU USA 2010 details, registration and more information, go to:
http://www.contestuniversity.com
Please make sure that you click on the registration page and indicate if you are a returning CTU graduate or if this is your first time attending Dayton CTU.
Based upon the tremendous attendance at Dayton CTU 2009, I expect Dayton CTU 2010 student registration slots will fill up fast. Space is limited.
Contest University traveled to the United Kingdom and Italy during 2009. Both locations had tremendous response with hundreds of students. CTU will be held in England and Italy again during 2010. There will be announcements next month of additional Europe Contest University locations.
http://www.contestuniversity.com/main/page_uk.html
http://contestuniversityitaly.wordpress.com/gallery-contest-university-italy-2009/
This is the only USA Contest University for 2010 - we hope to see you in Dayton! Thanks to Scott, KA9FOX and QTH.com for his hosting of the Contest University Web site! Merry Christmas and 73!"

CHINESE BIRD VERY ACTIVE (XW-1 Satellite News). The new Chinese satellite XW-1 (HOPE-1) was in the linear transponder mode over South and North America on December 20th, between 0222Z and 0246Z for the first time. The passband was filled with stations over the U.S. with excellent signals. K8YSE reported making 13 contacts on this pass.

XW-1 is at an altitude of 1200KM, more than 400KM higher than the popular AO-51, SO-50 and AO-27 satellites. This means a longer visible pass and more distance. Contacts with Europe are possible with the eastern US. XW-1 will be in the FM mode between 0153 and 0228Z, December 21st over South and North America for the first time. One watt of output power makes this satellite easier to hear, so many are expected to be making contacts on this pass. A recording of the SSB pass can be downloaded at:
http://www.papays.com/XW-1_20Dec2009_022218z.mp3
The FM pass will eventually be uploaded to the following file:
http://www.papays.com/XW-1_21Dec2009_020500z.mp3
Congratulations to the Chinese Team that designed, built and launched this satellite. Details can be found on the AMSAT Web site at:
http://www.amsat.org

CX, URUGUAY. Jorge, CX6VM, will be active during the CQ 160m CW Contest (January 29-31st, 2010) as a Single-Op entry. QSL via QRZ.com address.

DXCC NEWS (2009 DXCC Yearbook Final Reminder). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "Just a last-minute final reminder that if you have not made your 2009 submission, you must make a submission in order to appear in the next yearbook. The submission must be postmarked on or by December 31, 2009.
If you are current on the DXCC Honor Roll (minimum of 329 'current' DXCC entities) you will automatically be listed and you DO NOT need to make a submission. However, if you are not current on the Honor Roll you must make a submission in order to be listed.
Also, in order for an award to appear in the Annual List, first the award must be 'active' (Meaning you must have a certificate). Just qualifying for an award does not mean it will appear. Also, for an active award to appear your total on that category MUST increase by at least one point. (eg: If you had 300 in 2008 for 10 Meters and in 2009 your number remaining at 300, the 10 meter listing will not appear in the Annual List. But, if your number increased to, at least 301, then your active award will appear.
Also, only ARRL members (during the 2009 calendar year) receive the free copy. (The cost of the yearbook is to be determined soon).
The 2009 DXCC Yearbook will now be handled as an official ARRL publication that will no longer be handled by the DXCC Branch directly. Orders for the yearbook will now be available only via the ARRL catalog. (This will not affect those who qualify for the free copy).
Send questions to <dxcc@...> "

ER, MOLDOVA. Vladimir, RA4LW, will be active as ER4KAA during the CQ 160M CW Contest (January 29-31st, 2010) as a Single-Op/High-Power entry. QSL via his home callsign direct.

GS, SCOTLAND (Year Long Special Event - Yaesu Heritage Year 2010). Just a reminder and update to look for the special event callsign GS2MP (club callsign of the North of Scotland Contest Group - GM7V) during 2010. Operators Chris GM3WOJ/ZL1CT and Jim/GM0NAI will be operating their vintage Yaesu transmitters/receivers and transceivers during the whole year. Each calendar month they will use a different Yaesu radio, and

amateurs worldwide are invited to work GS2MP and earn points towards the "Yaesu Heritage Year Award". Operation will mostly be on 40 and 20 meters, SSB and CW, using classic radios like the FT-dx-100 (original), FT-200, FT-dx-401, etc. Yaesu (UK) Ltd are kindly sponsoring the event by supplying special QSL cards, small trophies and a special prize to the overall 'winner' of this year-long fun event. In January 2010, Chris, GM3WOJ, will start by using an FT-200 transceiver. For more details, please visit the following Web site for some photos of the vintage radios at: http://www.gm7v.com/yaesu2010.htm

HS8, THAILAND. Voravut, HS8JYX, from Paknum Muang Krabi, is planning to be in the CQ 160-Meter CW Contest (January 29-31st) as a Single-Op/Low-Power entry. QSL via HS8JYX, LoTW or eQSL. He states he will use an inverted L antenna and transmit the power limit at about 50 watts.

IOTA NEWS.....
AF-019. (REAL EARLY ANNOUNCEMENT) Operator Luigi, IK8HCG, will be active as IG9R from Lampedusa Island, African Italy, during the next CQWW DX SSB Contest (October 30-31st, 2010). QSL via IK8HCG.

EU-099. Operators Lieven/ON4PQ, Jo/ON5MF, Pat/ON7PQ, Geert/ON7USB and Tim/ON5HC will be active as MJ/OP9X/P from Les Minquiers Island between March 31st and April 7th, 2010. Activity will be on 80-10 meters, including 30/17/12 meters, using CW, SSB and the Digital modes. QSL via ON4PQ by the Bureau or direct only! No eQSL or LoTW. QSL direct with 2 green stamps and a SAE. Les Minquiers is an uninhabited rock formation midway between St. Malo, France and Jersey Island. For more details about the island, see the DXpedition's Web page at: http://www.eu099.be

NA-235. (New IOTA, Also Possibly NA-239) Operators Yuri/UA9OBA, Merle/N6PYN, Yuri/N3QQ and possibly one operator will be active as KL7RRC from Chirikof Island, possibly late July and early August. This will be a typical Russian Robinson Club operation for about one week, depending on the weather. The team is talking about chartering an airplane from Kodiak and possibly landing in one of the two lakes on the island. They state that there are no bears on the island, but there is a herd of about 700-800 wild cows. The team may use an electric fence for antennas/camp to protect them. A possible trip to Seal Islands (NA-239; Callsign will be N6PYN/KL7) may take place after the Chirikof operation is completed. No other details were provided.

J3, GRENADA. Ulf, DL5AXX, will be active as J38XX between February 10□24th, 2010. Activity will be focused on the lower bands, but also in the ARRL International DX CW Contest (February 20-21st) as a Single-Op/All-Band entry. QSL via his home callsign.

J8, ST. VINCENT (On 6m). Member of the Midwest 6 Meter DX Group will activate 6 meters from Bequia Island (NA-025) as J8/homecall between June 28th and July 5th, 2010. Operators mentioned are: David/W9DR and Mike/W8IF. QSL both callsigns via KB3RHR. Visit the Midwest 6 Meter DX Group's Web page at: http://www.6meterdxgroup.com/DXpedition_2010.html

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH9, WAKE ISLAND. Colin, WA2YUN, will once again be active as KH9/WA2YUN from Wake Island (OC-053, USI OI-012S, WLOTA LH-2293) for about one year while on work assignment. Activity will be limited to his spare time. QSL via K2PF.

OFFICERS FOR 2010. Members of the Carolina DX Association elected the following officers for 2010 at their annual meeting held on December 9th. Serving as 2010 Officers are:
President: Ted Goldthorpe, W4VHF
Vice President: Paul Ponak, AD4IE
Sec./Treasurer: Cliff Wagoner, W3ZL
Newsletter Editor: John Scott, K8YC
Contest Manager: Dick Williams, W3OA
Cluster Manager: Joe Simpkins, K4MD
Cluster Manager, North: Paul Sturpe, W3GQ
Webmaster: Wayne Setzer, WB4BXW
Visit the CDXA Web page at: http://www.cdxa.org

OH0, ALAND ISLAND. Operators Timo/OH6GLE, Juha/OH6XX and Kari/OH5TS will be active as OH0Z during the CQ 160-Meter CW Contest (January 29-31st) as a Multi-Op entry. QSL via W0MM.

PJ2, NETHERLANDS ANTILLES. Members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX 160m CW Contest (January 29-31st, 2010) as a Multi-Op entry. Operators will be Jeff/K8ND and Jim/W8WTS. QSL via LoTW or direct to N9AG.

PJ5, ST. MAARTEN/ST. EUSTATIUS (Update). Last week we mentioned that Jim, K1NA, will once again be active as PJ5NA. Activity will include the ARRL DX CW Contest (February 20-21st) as Single-Op/All-Band entry. This week Jim informed OPDX that he will be at PJ5NA between January 10th and March 27th, operating mostly WARC bands outside of the contests and 160/80/40m

during his night time hours. He also mentioned that he should have all of the antennas up by the 13th of January. "Nothing very big, CC-R7 for 40-10m, CCMAV-160 for 160m, dipole for 80m on 30 ft. mast and using an IC-706 with a AL-811," states Jim. QSL via K1NA (100% QSL direct only with SASE) No bureau cards will be answered. DX stations MUST have SASE or SAE with 1 USD. No IRC! USA stations SASE only.

QSL INFO AND NEWS.....
A71QND via A71CO. Special event station in Doha, Qatar, is to celebrate "Qatar National Day" (December 18th). Activity was between December 15□19th.

LOGS ONLINE. The Algarve STAR DX Team announced this past week that the following logs are available online at:
http://algarvedx.com/logonline
CT1CQK/p - Roxo Large Dam (November 20th)
CR5CQK - Igreja da Fuzeta; LH POR-074 and Fa-44
CR5CQK - Dunas de S.Jacinto Natural Park; DPRN FF-16, WFF CTFF-16
CQ1I - Berlenga Island (EU-040) 1997; PIP NT-029
CU3F - Terceira Island - AZORES
CQ0ODX - Mouchao da Lebre Island (TJ-013); Mouchao dos Caracois Island (TJ-014) and 50 MHz expedition to Serra de Montejunto.
Information about the Algarve STAR DX Team awards program is available at: http://algarvedx.com

NOT THE QSL MANAGER. Ken, WA8JOC, reports that he is not and never has been the QSL Manager for BV7FF.

PIRATE ALERT. Nenad, VE3EXY, reports that a station signing C31LJ/M between December 8-9th was a PIRATE. Peter was not in Andorra. He also mentioned that this was the second PIRATED C31LJ operation this year.

RARE 1AW QSL FOR SALE! There is a rare 1AW QSL for sale on eBay at:
http://cgi.ebay.com/Rare-Hiram-Percy-Maxim-1AW-November-11-1923-QSL-Card_W0QQitemZ400092442363QQcmdZViewItemQQptZLH_DefaultDomain_0?hash=item5d275e2efb
Best offer by December 27th or "Buy It Now" for 275.00 USDs.

QSLS VIA LoTW: AU8JCB, JT1CO, VU2NKS and XR0Y

QSLS RECEIVED VIA MAIL: 3D2GM, 5N0OCH, 9M6DXX/p, 9M6XRO/p, BD4QH, EE9K, FO/G3BJ, FO/F6CTL, FP/KV1J, FT5GA, IM0A, KH7XS, LA2NK, OJ0B, P29NI, T2G, T30GM, TY1MS, UU4JDD/p, UA9UZZ, V47NT, VP2MXO, VP2V/DL7VOG, VP2V/KG9N, XE2YBG, XV2Z, XV4D, ZB2EO, ZC4VJ and ZK2BJ

QSLS RECEIVED VIA THE BUREAU: 3B8MM, 3D2RX, 3XDQZ/P, 5H3AP/3, 5I3A, 5V7BR, 6V7E, 6V7M, 7P8AO, 8P9JG, 9J2FM, 9M2MRS, 9M4SMO, 9X/ON4WW, A62ER, A61NT, A43DLH, AH2J, AM8IL, AP2TN, B7HQ, C6ATA, C6AKU, D2NX, D44TT, D44TXO, DL5JS, DP1POL, EA1GA, EL2WW, ER7HQ, FK/G3TXF, FK8HC, FM5LD, HF15SZL, HS0ZDY, IK2WZM, J38AA, J5C, J88XF, KB1H, LY1CX, M8C, OH3GZ/P, P29NI, RK2FWA/P, S79NS, S79NS/P, T88IW, T88KJ, TL0R, TO4X, TO5RZ, TS7C, TX7LX, UA4PWR, VK9AA, VK9LA, VK9N/G3TXF, VU4MY, VU4RG, VU7SJ, WZ3AR,

XU7ACY, YJ0TXF, YK1BA, YS1G and YU8/OH2R

SILENT KEYS.....
* Arnold Polsbroek, PZ1AP, became a Silent Key (SK) on December 11th.

* Karlis Sleckaitis, YL2MD, became a Silent Key (SK) on December 12th. He was 57.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

SOUTHEAST ASIAN TOUR (HS and XU). Eddy, ON4AFU, plans to be in Thailand (HS) between January 12th and March 8th, 2010. His callsign will be HS0ZJF. During his stay, Eddy plans to activate the Malay Peninsula East Group (AS-101) during this time-frame as HS0ZJF/8. He will also make a trip to Cambodia between February 2-15th, 2010, and be active as XU7AFU. All his activities will be on all bands but CW only. QSL via his home callsign.

TK, CORSICA. Laurent, F8BBL, will once again be active from here next year between July 10□24th, 2010. However, he will be using a different callsign this time. His callsign will be TK10B. His main QTH will be Golfe de Valinco, but he plans to make side trips to Sanguinaires Island (EU-104), Lavezzi Island (EU-164) and possibly a third IOTA. QSL via F8BBL.

V88, BRUNEI DARUSSALAM. Jan, DL7JAN, will be active as V88/DL7JAN from Bandar Seri Begawan between February 22nd and March 3rd. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via DL7JAN, by the Bureau or direct.

VK6, AUSTRALIA. Jim, G6PAA, is now active as VK6/G6PAA from Western Australia (IOTA OC-001, WLOTA LH-1520) until January 13th, 2010. Activity will be 80-10 meters using CW, SSB, RTTY and PSK. Jim will use 100 watts into a dipole. QSL via his home callsign, direct or by the Bureau.

VP2M, MONTSERRAT (Update). Mike, W1USN, will once again be active as VP2MPR between February 28th and March 13th (2010). Mike will work mainly SSB and PSK31. Bob, AA1M, will also return to Montserrat and will operate mostly CW as VP2MPL between March 3-11th. QSL both operators via their home callsigns.

VP8, FALKLAND ISLANDS. Operators Michael/G7VJR and Martin/G3ZAY will be active from Falkland Islands (SA-002) as VP8DMN between January 21-29th, 2010. Activity will be focused on lower bands. QSL via G7VJR, by the RSGB Bureau or direct.

YJ, VANUATU (OC-035). Nao, JK1FNL, will be active as YJ0NA from Port Vila between December 28th and January 4th. Activity will be on 40□6 meters using 100 watts into wire antennas. QSL via his home callsign.

YN, NICARAGUA. Eric, K9GY, will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the 2010 CQ WPX CW Contest

(May 29-30th) as a Single-Op/All-Band/Low-Power entry. He will be there between May 27-31st. Outside of the contest, look for CW activity on 30/17/12 meters. Also look for him on 6 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

ZL, NEW ZEALAND. After his Australia trip, Jim, G6PAA, will head to New Zealand and be active as ZL/G6PAA between January 16th and March 1st, 2010. He will probably visit both the North Island (OC-036, WLOTA LH-0069) and South Island (OC-134, WLOTA LH-0342). Activity will be 80-10 meters using CW, SSB, RTTY and PSK. Jim will use 100 watts into a dipole. QSL via his home callsign, direct or by the Bureau.

The other day on another group 3B8CF came up. I worked Jacky in November of 1979. Glad to see someone is still on after so many years. I wonder how many more DXers are on from at least the 70's? I think 9J2BO may still be on. I have his first QSL card with a real ugly woman on it which he told me was his wife .... ..
I used to work ZE1FL but don't know if he's still active or what his call would be now. Oh, how about XE1OW?

I heard Jacky about a week ago. And I heard Brian 9J9BO maybe a couple months ago. So they're still around.

I don't hear much of ZL1AMO any more. I think he might be about done with DXpeditioning, though. Also, I haven't heard anything of DK7PE in a long time. Those two gents gave me about 25 new countries between them!

ZACK,

I heard ZL1AMO last week, on 17 meters SSB the reason I remember it is that I spotted him on the cluster and I had 2 radios running at the same time so it showed up as a 6 meter spot and he thought that was kinda funny I, didn't !

Hi Joey,

I just looked for recent spots for him and I see your spot that showed up
for 50.125. I guess that is kinda funny, except all the 6m DX'ers would be
running to their radios to find him.
:-)

I see he's been on 40 CW too. So I guess Ron is doing OK.

Yes, that was his Spratley DXpedition that was attacked. Amazes me he's still at it. He usually doesn't annnounce a lot ahead of time where he's going to be, sometimes he just suddenly shows up. I guess that keeps us on our toes!

Luc I1YRL sometimes operates from 3A and from 4U1ITU. I haven't heard him in a while either. But I don't hear a lot from EU at the bottom of the sunspot cycle.

Bottom ?

there are 3 groups of sunspots up there and the sfi is 84.
I think the bottom is behind us now !

Yes, that was his Spratley DXpedition that was attacked. Amazes me he's still at it. He usually doesn't annnounce a lot ahead of time where he's going to be, sometimes he just suddenly shows up. I guess that keeps us on our toes!

Luc I1YRL sometimes operates from 3A and from 4U1ITU. I haven't heard him in a while either. But I don't hear a lot from EU at the bottom of the sunspot cycle.

I heard Jacky about a week ago. And I heard Brian 9J9BO maybe a couple months ago. So they're still around.

I don't hear much of ZL1AMO any more. I think he might be about done with DXpeditioning, though. Also, I haven't heard anything of DK7PE in a long time. Those two gents gave me about 25 new countries between them!

Baldur is a first class op as well. If he is on and you can hear him, you can probably work him with 25 watts to a dipole.

12330. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-21 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12330

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 21 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 355 Issued at 2200Z on 21 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 20/2100Z
to 21/2100Z: Solar activity was low. Isolated low-level C-class
flares and occasional B-class flares were observed. Region 1035
(N31W85) showed no significant change as it approached the west
limb. Region 1036 (S27W45) showed rapid growth and was classified as
a Dso/Beta at the end of the period. No new regions were numbered.
IB. Solar Activity Forecast: Solar activity is expected to be low.
Isolated C-class flare activity is expected. There is also a slight
chance for an isolated M-class flare.
IIA. Geophysical Activity Summary 20/2100Z to 21/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels through the period (22 - 24
December).
III. Event Probabilities 22 Dec-24 Dec
Class M 10/05/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 21 Dec 083
Predicted 22 Dec-24 Dec 080/076/074
90 Day Mean 21 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 20 Dec 002/001
Estimated Afr/Ap 21 Dec 001/005
Predicted Afr/Ap 22 Dec-24 Dec 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 22 Dec-24 Dec
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

I worked Ron on 17 SSB about four months ago and he was spotted there as recently as two days ago. He's not on too much, but when he is it tends to be on 40 and 17.

If you got the credits in your LoTW account, ie they moved from the applied column to the Awarded Column, its done! In the Left side selections the application should also should as complete under History. It takes awhile for the Certificate to show up. 4-6 weeks I believe.

Scott:
You and I are paralleling the same path.

I just checked the DXCC Listings at <http://www.arrl.org/awards/dxcc/appstatus.html>http://www.arrl.org/awards/dxcc/appstatus.html
you filed on 11/30/09 and I filed on 12/03/09.

I know I was on the DXCC Phone list sometime before 12/14/09, so you must have been also been listed at about the same time at http://www.arrl.org/awards/dxcc/

As of 12/21/02 no paper award and pin. 3 more mail deliveries before Christmas, lets hope !!!

So the bottom line is an all LoTW submission was extremely fast, the paper not quite so fast.

In the meantime I am also am trying to get all my needed cards located for about another 15 Countries and 35 to 50 "Band Mode Countries".

Planning to work as many new ones as I can (DX and Contests) for next submission in Dec 2010.

Merry Christmas es gud DX.

First, when responding to someone about weather, the whole membership does NOT need to read it. Some of us get quite enough email already.

More importantly Mike, we could care less about your political views, especially those written so vulgarly and sexually explicit.

There were two separate Spratly dxpeditions that were attacked - Baldur was on at least one of those.

A friend of mine was on the one in 1979 when they were attacked while trying to navigate to Amboina Cay (sp?). A year or two later, the group was trying to get to that same island when they were fired upon and that was the trip where two of the guys died.

My friend decided he had a wife, children and a career - he operated from Brunei instead.

That is a political statement. Obviously Don's earlier post
about laying off politics fell on deaf ears.

Clearly we list owners can't stop these posts. They are
insulting and serve no purpose. It's a shame the Internet ever got
intertwined with Ham radio. Anyhow, I quit.

Amen Frosty. On numerous occasions in the past I have privately expressed objection to various items appearing on this reflector, and was firmly reminded that the goal was to keep this reflector open and without moderation.

We can't have it both ways, So, which is it gonna be?

There are lots of offensive "sayings" that have been around for years, often masquerading as jokes; they remain offensive, and have no place on a DXing reflector.

The delete key is fine for off-topic content; offensive content should never be posted.

12355. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-22 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12355

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 22 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 356 Issued at 2200Z on 22 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was low. Region 1036 (S27W58) produced a
C7/Sf flare at 22/0456Z associated with a Type II radio sweep
(estimated velocity 531 km/sec) and discrete frequency radio bursts,
the largest of which was 4900 sfu at 245 MHz. There was also a
faint, slow-moving partial-halo coronal mass ejection (CME)
associated with the flare (estimated velocity 300 km/sec). Region
1036 gradually decayed from a D-type to a B-type spot group during
the period. Additional isolated low-level C-class flares and
occasional B-class flares also occurred during the period. Region
1035 (N31W98) crossed the west limb early in the period. No new
regions were numbered.
IB. Solar Activity Forecast: Solar activity is expected to be low
during days 1 - 2 (23 - 24 December) with a slight chance for an
isolated M-class flare. Activity is expected to drop to very low
levels on day 3 (25 December) as Region 1036 departs the west limb.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels through the period (23 - 25
December). The CME mentioned above is not expected to significantly
disturb the field.
III. Event Probabilities 23 Dec-25 Dec
Class M 10/10/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux

For Heaven's sake, Mike, use common sense. A total lack of rules leads to anarchy. The moderators need to post whatever minimal rules they feel appropriate and the moderators need to enforce those rules. Yahoo! provides them with the tools to send offenders into a corner to "time out" if they don't respond to reasonable requests. If some people are to act like children they should expect to be treated like children.

I am not a moderator of this group and I don't envy Paul and Don's
position one bit, but every organization needs published rules of
acceptable behavior and whatever those rules are they need to be
enforced fairly and equally. With a group as diverse and world-wide
as this, determining what is and is not acceptable behavior has to be
a daunting task.

"enforced fairly and equally." Oh really?

Dick, you are preaching to the choir. Go back and read my last
question. Let me paraphrase; Do the rules apply to everyone, or do
those rules apply to everyone except the moderator(s)?

Mike

Yes, the rules should apply to everyone including the moderators,
while baring in mind that moderators are just as fallible as the rest of us.

12364. QRZ DX?

Yahoo group: DX-IS (2009)
Date: 2009-12-23 04:26:44 UTC
From: CSM(r) Gary Huber - AB9M
Topic: 12364 Message: 12364

Hopefully this will be non-controversial and acceptable.

I received an email from Carl, N4AA stating that he had been without power for three days due to winter weather in his area. As a result there would be no QRZ DX sent this week and he intended to send QRZ DX out next week instead.

Wishing everyone the best spirits of the Holiday Season.

Best regards,

12366. Re: DXCC QSL Return? Added info

Yahoo group: DX-IS (2009)
Date: 2009-12-23 15:38:03 UTC
From: Bob
Topic: 12259 Message: 12366

For those who may not realize it, the ARRL DXCC Que is mainly due to the issuing of Certificates (which are dated), so that the awards are dated in the order recieved.

Not quite the same if you are just doing undated Endorsement stickers!

I submitted my LoTW credits on Monday evening, drove down to the ARRL HQ on tuesday and had my cards checked (Mom is 20 minutes away), walked away with my cards and endorsement stickers, new totals were up on the ARRL web site on Wed morning. Start to finish---36 hours.

Happy Holidays to all..

Bob KB1JZU

PS this time 3/4 of my QSLs where via LoTW for those who are not using it

12367. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 23 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 357 Issued at 2200Z on 23 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 22/2100Z
to 23/2100Z: Solar activity was low. Isolated B- and C-class flares
occurred. The largest flare was a C6/Sf from Region 1036 (S28W70) at
23/1017Z. Region 1036 showed no significant changes during the
period. Region 1038 (N15W69) gradually decayed during the period. No
new regions were numbered.
IB. Solar Activity Forecast: Solar activity is forecast to be low
during days 1 - 2 (24 - 25 December) with isolated C-class flares
expected. There will also be a slight chance for an isolated M-class
flare. Activity is expected to decrease to very low levels on day 3
(26 December), once Regions 1036 and 1038 depart the visible disk.
IIA. Geophysical Activity Summary 22/2100Z to 23/2100Z:
Geomagnetic field activity was at quiet levels through the period.

SB PROP @ ARL $ARLP053
ARLP053 Propagation de K7RA

ZCZC AP53
QST de W1AW
Propagation Forecast Bulletin 53 ARLP053
>From Tad Cook, K7RA
Seattle, WA December 24, 2009
To all radio amateurs

SB PROP ARL ARLP053
ARLP053 Propagation de K7RA

This bulletin is coming out a day ahead of normal schedule because of the Christmas holiday on Friday. ARRL headquarters closes early today for Christmas Eve at 1900 UTC.

Many of us are nearly giddy with joy over the recent steady increase in sunspot activity, which seems long overdue. Average daily sunspot numbers rose over 10 points this week compared to last, from 21.1 to 31.4. The monthly average daily sunspot numbers for September, October and November were 6.6, 7 and 7.7, so this is quite a large jump.

Five new sunspot groups emerged since December 9, three of those over the past week, on December 19 and 20. These were groups 1035 and 1036 on December 19, and 1037 on December 20. Today a new sunspot appears to be forming, and you can see it via the Solar Terrestrial Relations Observatory at http://stereo.gsfc.nasa.gov/. Look for that bright spot in our Sun's southern hemisphere, around -65 to -70 degrees longitude.

If we consider there are twelve of these 30 degree segments on the spinning Sun seen on the STEREO web site, considering a complete solar rotation takes about 27.5 days, each thirty-degree segment passes over the horizon in about 2.3 days, or every 55 hours. We can't tell if every bright spot beyond the horizon is formed into a sunspot, but we can roughly calculate how long it takes for a particular area of interest to rotate into view.

Right now on early Thursday morning, December 24, I can see an active area (number 1035) around +115 degrees longitude or so, about 25 degrees over the horizon. We can roughly assume that it is about 155 degrees longitude away from its reappearance at the -90 degree longitude horizon on the other side. This should be about 11-12 days from now. Of course we do not know if activity in this area will increase or decrease in the next couple of weeks.

At http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html we see a prediction for December 24 (in the December 23 forecast) showing predicted solar flux values of 76, 74, and 72 for December 24-26, continuing at 72 until January 4, around the time this region reemerges, when it rises to 75, then 77 for January 5-6, then 80 on January 7-9, and 85 for January 10-18.

We also see steady quiet geomagnetic conditions, with planetary A index rising slightly to 7, just for December 27-28. Or course, this could be wrong. Note that in the December 16-19 forecasts the expected planetary A index for December 20 was 15. Data from the bottom of our bulletin shows that planetary A index for that day was only 1.

The Winter Solstice occurred on Monday, December 21 at 1747 UTC in the Northern Hemisphere, and days are gradually growing longer. Spring Equinox is 179 days from today.

We've had reports from Robert Elek, W3HKK of Johnstown, Ohio in two recent bulletins, and again he comes through with some interesting observations.

Bob reports that John, ON4BW (Jean-Michel Debroux in Braine l'Alleud, Belgium) is running 600 watts to a 4 element 40 meter Yagi at 70 feet, and blasting a strong signal into North America during his mid-day, around 1100 UTC. Braine l'Alleud is about 10 miles south of Brussels. You can see a nice photo of ON4BW and the big antenna at http://www.qrz.com/hampages/w/b/on4bw/on4bw.jpg.

Bob says, "Time and time again, strong signals are heard from Europe 2-3 hours past their sunrise here in Ohio, during the so called dog-days of winter. The combination of a broadcast-station-free segment of 40 meters and growing global wealth have 40 meter Yagis popping up all over the 7.125-7.200 SSB band segment, with corresponding big sigs from around the globe. If you haven't been on 40 SSB for a few years, you WILL be surprised at how much 40 sounds like 20 meters used to sound. And, it only takes ONE Yagi to make the circuit, so give them a call. W3HKK is using 100 watts to a quarter wave ground plane just off the ground, with 6 radials."

"A reminder: This is the time to hear polar stations, north and southern latitudes. Antarctica, KC4AAC was heard just above the noise near 7.170 SSB, around 0100 UTC on December 20. Oleg, UU9JX/MM was worked from the Magellan Straits on 10.110 MHz at about the same time. Strong LU stations are regulars on 40 SSB in the evening. Plus OX, TF have been worked in recent weeks with big signals."

On December 18 Bob reported, "Another interesting Friday night on 40 SSB. At times during the evening, the band sounds pretty quiet. More stateside signals are being heard with the recent rise in sunspots. And a fair number of Central America and Caribbean stations come and go. But if you poke around, the juicy DX is there loud and clear. I2VRN is a beacon, and several EAs also 59+ are heard. Pair of A71

stations (Juma, A71EM and Jamil, A71FJ) were taking turns working DX on 7.130 MHz with signals around 5x9 from 0400-0445 UTC. 4L4TL joined in for a while. Juma noted they were over 2 hours past their sunrise and still the DX kept coming. Juma and Jamil are a couple of very nice guys looking to spread A71 contacts around to any takers. A71 activity on 40m has been almost daily all this week, through December 19."

"Then, tuning up into the 7.135-7.155 MHz range, at least eight ZS stations were heard working stateside, or rag-chewing in a morning ZS roundtable, at 0400-0430 UTC. Again it was at least one hour past their sunrise. ZS3D has been heard in Ohio on a nightly basis with signals between 57 and 59+10 running 500 watts to a 2 element hex beam."

Dick Grubb, W0QM of Boulder, Colorado used to work at the NOAA Space Weather Prediction Center. He sent along an article he scanned from the current issue of Space Weather, the International Journal of Research and Applications from the American Geophysical Union. Titled "Slow Start to Solar Cycle Tied to Sluggish Interior Stream," it explains there is a slow moving river of gas deep inside the sun which may be the reason for the scarcity of sunspots and late start to the current solar cycle. Sonograms show it is currently moving much slower than normal.

The currents typically take 6-8 years to move from the poles to equator as they spiral east to west, and for this cycle it is taking 1-2 years longer.

When the stream reaches 22 degrees latitude, a new crop of sunspots and new solar cycle appears. The jet stream has finally reached critical latitudes for sunspot development, and we should look forward to a quick up-tick in activity. Solar activity is now expected to peak in May 2013.

The same publication announces a Space Weather Forecasting Contest. Unfortunately, they do not allow individual entrants without affiliation to some educational or research institution, but the criteria (high school students, researchers, grad students, alumni, etc) look pretty broad, so perhaps individuals may enter after all. Probably most of us are at least alumni of some high school, correct? You can see details at http://swxcontest.gmu.edu/.

The new issue of WorldRadio Online is out, at http://www.cq-amateur-radio.com/WorldRadio.html. Check pages 22-24 for Carl Luetzelschwab, K9LA's excellent monthly propagation feature, this month titled, "Is There a Most Advantageous Band and Time?"

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for December 17 through 23 were 24, 20, 43, 42, 42, 26, and 23 with a mean of 31.4. 10.7 cm flux was 86.9, 84.2, 81.7, 83.7, 82.7, 82.2, and 78.4 with a mean of 82.8. Estimated planetary A indices were 1, 2, 1, 1, 1, 2 and 2 with a mean of 1.4. Estimated mid-latitude A indices were 2, 2, 0, 2, 1, 2 and 3 with a mean of 1.7.

SB DX ARL ARLD051
ARLD051 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MADAGASCAR, 5R. Sat, G4OHX will be QRV as 5R8HX from December 28 to January 3. Activity will be on the HF bands using mainly CW. QSL direct to home call.

ZAMBIA, 9J. Take is QRV as 9J2FM and has been active on 17 meters around 1900z. QSL via JA4ATV.

MOZAMBIQUE, C9. John, ZS5J is currently QRV as C91J from Bilene. Lately he has been active on 40 meters using CW. QSL this operation to home call.

CHILE, CE. Al, K7CA is QRV as CE1/homecall until February 23. Activity is on the HF bands using mostly CW. This includes an entry in the Stew Perry contest and the upcoming CQ 160-Meter CW contest. QSL direct via NW7O.

MOROCCO, CN. To celebrate the New Year 2010 special event station CN10NY is QRV until March 18, 2010. QSL via EA7FTR.

ANTARCTICA. Felix, DL5XL is QRV as DP1POL from Neumayer Station III. He has been active on 80 meters around 2300z. QSL via DL1ZBO.

IRAN, EP. Mohammed, EP4MRG has been active on 20 meters using SSB around 1100z to 1300z. QSL direct.

THAILAND, HS. Joerg, DL1MJF will be QRV as HS0ZGQ from December 30 to January 25. This includes a one-week side trip to Koh Samui Island, IOTA AS-101. Activity will be on 40 to 10 meters using CW and SSB. QSL to home call.

ITALY, I. Roger, K1DQV will be QRV as I1/homecall from Rapollo in the Stew Perry contest. QSL to home call.

OGASAWARA ISLAND, JD1. Harry, JG7PSJ and Makoto will be QRV as JD1BMH and JD1BLY, respectively, from Chichijima Island, IOTA AS-031, from December 27 to January 1. Activity will be on 160 to 10 meters using CW, SSB and RTTY. QSL direct to home calls.

AUSTRALIA, VK. Jim, G6PAA is QRV as VK6/homecall from Western Australia, IOTA OC-001, until January 13. Activity is on 80 to 10 meters using CW, SSB, RTTY and PSK. QSL to home call.

MEXICO, XE. In celebration of the 5th anniversary of the "Grupo DXXE," some members of Grupo DXXE are QRV as 4A1DXXE from various locations until December 31. Activity is on 160 to 6 meters using CW, SSB, RTTY and PSK31. QSL direct via N7RO.

VENEZUELA, YV. Pasquale, YV6KAJ will be QRV as YW5EID from La Tortuga Island, IOTA SA-044, from December 26 to 29. Activity will be on 40 to 12 meters using SSB, RTTY, PSK and Olivia. QSL via EA5KB.

VANUATU, YJ. Nao, JK1FNL will be QRV as YJ0NA from Port Vila, IOTA OC-035, from December 28 to January 4. Activity will be on 40 to 6 meters. QSL to home call.

THIS WEEKEND ON THE RADIO. The Stew Perry Topband Challenge, DARC Christmas Contest, South Dakota QSO Party, PODXS 070 Club QRP DX PSK31 Scramble and the RAEM CW Contest are all on tap for this weekend. The Lighthouse Christmas Lights QSO Party runs until January 3. Please see December QST, page 66, and the ARRL and WA7BNM contest web sites for details.

12370. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-24 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12370

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 358 Issued at 2200Z on 24 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar activity was very low. Region 1038 (N13W81) was
a single spot Axx group today and continues to decay as it
approaches the west limb. No flares were observed during the past
24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low with a slight chance for an isolated C-flare.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet. Solar wind observations from the
ACE spacecraft show a possible weak, short lived, coronal hole
signature during the past 24 hours. Velocities steadily increased
after 24/0300Z from 350 km/s to 450 km/s as the density decreased.
Solar wind speed has since slowly decreased and returned to around
350 km/s.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (25-27
December).
III. Event Probabilities 25 Dec-27 Dec
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 24 Dec 077
Predicted 25 Dec-27 Dec 074/072/072
90 Day Mean 24 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 23 Dec 003/002
Estimated Afr/Ap 24 Dec 001/005
Predicted Afr/Ap 25 Dec-27 Dec 005/005-005/005-007/007
VI. Geomagnetic Activity Probabilities 25 Dec-27 Dec
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

****
* TO ALL OUR READERS *
* WARMEST THOUGHTS AND BEST WISHES *
* FOR A WONDERFUL HOLIDAY *
* AND A VERY HAPPY NEW YEAR *
****

9A - Tom, 9A2AA enjoys operating from Croatian islands and has
activated more than 500 of them ("exactly 523") so far. For this
reason he has been granted permission to use special prefix
callsign 9A500AA from 1 January through 31 December. QSL 9A2AA.
[TNX 9A2AA]
GJ - ON4PQ, ON5HC, ON5MF, ON7PQ and ON7USB will operate CW, SSB and
RTTY on 80-10 metres as MJ/OP9X/p from Les Minquiers (EU-099),
Jersey from 31 March to 7 April. QSL via ON4PQ, direct or bureau.
The web site for the operation is at http://www.eu099.be [TNX
ON4PQ]
HS - Joerg, DL1MJF will be active again as HS0ZGQ from Thailand from 30
December to 25 January, including a one week side trip to Koh
Samui (AS-101). He will operate CW and SSB on 40-10 metres using
100 watts and a dipole. QSL via home call. [TNX The Daily DX]
KL - Yuri/UA9OBA, Merle/N6PYN and Yuri/N3QQ plan to operate as KL7RRC
from Chirikof, Semidi Islands (NA-235, new one) in late July or
early August. This will be a "typical Russian Robinson Club
operation" for about one week, depending on weather conditions.
After the Chirikof operation is completed they might go and
operate as N6PYN/KL7 from the Seal Islands (NA-239). Further
information is expected in due course. [TNX www.islandchaser.com]
OH - Celebrating her 20th anniversary in amateur radio, Anne, OH2YL will
be active again as OG20YL from 30 December to 3 January. She will
operate CW on the HF bands. QSL via home call. [TNX OH2YL]
PA - Celebrating the 600th anniversary of the charter that granted city
rights to Purmerend, special event station PC600P will be active

on 1-27 January, 1-28 May and 1-28 September. QSL via PA3HGP. All
of the QSOs will be uploaded to LoTW and eQSL after each activity
period, and will be confirmed automatically via the bureau after
the last activity period. Local operators are expected to operate
under special prefix callsigns (i.e. PA600MIR, PA601FR, PA602SWL,
PA603HGP, PD602YL, PE603HG, etc) during the same time frames.
Information on the relevant short time award will be available at
http://hamradio.nikhef.nl/afdeling/waterland/ [TNX PA0MIR]
PJ4 - Hennie, PE1MAE will be active again as PJ4/PE1MAE from Bonaire
(SA-006) for a couple of months starting around 10 January. He
will operate SSB mainly on 40 metres around 00.00 UTC. QSL via
PA2NJC, direct or bureau. [TNX PA2NJC]
PY0F - Fred, PY2XB will be active as PY2XB/PY0F from Fernando de Noronha
(SA-003) from 23 January to 3 February. He will operate on all
bands CW, SSB, RTTY and PSK, and will participate in the CQ WW
160M DX Contest (CW) as PQ0F. QSL via PT7WA, direct or bureau.
[TNX PT7WA]
V8 - Jan, DL7JAN will be active as V88/DL7JAN from Bandar Seri Begawan,
the capital city of Brunei (OC-088), from 22 February to 3 March.
He plans to operate CW, SSB and RTTY on 160-10 metres. QSL via
home call, direct or bureau. [TNX http://dx-hamspirit.com/]
VK - The VK6IOA expedition to the Houtman Abrolhos (OC-211) [425DXN
964] has changed destination, and will be going to the Wallabi
group instead of Robertson Island. The operators (Wally/VK6YS,
Nigel/VK6NI and Bruce/KD6WW) expect to be QRV by 4 UTC on 31
December. They plan to have three stations active at the same
time. QSL via VK4AAR. The web page for the expedition can be found
at http://www.westozdx.net/index.html
VK - VI2AJ2010 is the very special callsign to be used by Scouts under
the guidance of Fishers Ghost Amateur Radio Club members (VK2FFG)
during the 22nd Australian Jamboree (4-14 January). QSL via
operator's instructions. [TNX VK2IA]
VP2M - Mike, W1USN will be operate mainly SSB and PSK31 as VP2MPR from
Montserrat (NA-103) from 28 February to 13 March. Bob, AA1M will
operate mostly CW as VP2MPL on 3-11 March. QSL via home calls.
[TNX AA1M]
XE - Celebrating the Centennial of the Mexican Revolution and the
Bicentennial of Mexico's Independence, the Radio Club Queretaro
(XE1RCQ) will operate as 4A1B from 1 January to 31 December. QSL
via LZ3HI. The logs will be uploaded to LoTW.
YI - YI9PSE will be active from Erbil, Iraq [425DXN 971] on 3-11 April.
Paul, N6PSE and others (for the time being AH6HY, JH4RHF, K3VN,
N2WB, N6NU, N6OX, NI6T, W8HW and YI1UNH) plan to operate CW, SSB
and RTTY on 160-10 metres with at least three stations at the same
time. QSL via N6NKT. Further information can be found at
http://www.yi9pse.com/ [TNX http://dx-hamspirit.com/]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****

==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5R8IC ---> A few pictures of Eric's (F6ICX) latest activity as 5R8IC (AF-090) can be found at http://f6kbk.free.fr/5r8ic/5r8ic.htm; a log search (including his activity in 2008) is available at http://logsearch.de [TNX F6GCP]

CAROLINA DX ASSOCIATION ---> At its annual meeting held on 9 December, the Carolina DX Association (http://www.cdxa.org/)elected the following officers to serve for 2010: Ted Goldthorpe/W4VHF (President), Paul Ponak/AD4IE (Vice President), Cliff Wagoner/W3ZL (Secretary-Treasurer), John Scott/K8YC (Newsletter Editor), Dick Williams/W3OA (Contest Manager), Joe Simpkins/K4MD and Paul Sturpe/W3GQ (Cluster Managers), Wayne Setzer/WB4BXW (Webmaster). [TNX K8YC]

OH CONTEST/DX CONFERENCE ---> The 15th annual CCF (Contest Club Finland) and OHDXF (OH DXFoundation, http://www.ohdxf.fi) Contest & DX Conference will be held at the Islande Hotel in Riga, Latvia on 22-24 January. Further information, prices and registration details are available at http://www.contestclubfinland.com/CCF/

QSL C4SV ---> The Cyprus Amateur Radio Society (CARS) QSL bureau is receiving significant numbers of QSLs for C4SV. The QSL manager for C4SV is SV2DGH, and QSLs should be sent to him at via the RAAG (SV) QSL bureau. C4SV QSLs should NOT be sent to the CARS bureau. At best, QSLs sent to the CARS bureau will suffer significant delays. [TNX 5B4AHJ]

WILLIS ISLAND ---> Dave, VK9WBM [425DXN 970] has been on Willis Island for a while and is experiencing unexpected problems. "I am slowly getting on HF", he says, "but I am not there yet. I cannot erect a mast, the soil is coral rubble and sand and will not hold a guy peg. The soil is a bone dry insulator and I have been unable to get any viable earth. The longwire has worked 2 stations and is to be removed and replaced with a balanced antenna. This will take a bit of work as I have no ATU except the Icom AH4, an unbalanced only auto ATU. On 6m I am unable to mount the beam anywhere useful. It can only point out to the ocean. I have built a 300ohm slim jim and worked about 40 stations, mainly VK2 but with some VK3,4,5 and one ZL2. Listen for me in the afternoons on 6m, between 0400z and 0900z". When he is "reliably on HF", he anticipates it "will be 40m and harmonics only". [TNX MM0NDX]

+ SILENT KEYS + Recently reported Silent Keys include Fritz Zwingli (HB9RE), Roberto Rossi (I5RRE), Giuseppe Montuschi (IK4EPI), Gary D. Poorman (K4VT), Henry W. Herman (W3UJ) and Fred "Angus" Small (ZL3FS).

QSLs received direct or through managers: 3A2MD, 3D20CR, 3D2GM, 3D2KJ, 3D2MJ, 3D2NB, 3X5A, 4J3M, 4S7NE, 4U1ITU, 4X/N2TA, 5F1ROM, 5H3EE, 5H3VMB/5 (AF-074), 5K0T, 5N0OCH, 5Q1A, 5W0KH, 5X1VB, 6Y1V, 6Y5WJ, 7P8MM, 7P8VB,

7Q7HB, 8P9SS, 8R1PY, 9H3DB, 9J2FM, 9M6DXX/p (OC-133), 9M6JC, 9M6XRO/p (OC-133), A52FJJ, A71BU, A92GR, AI5P/VK9N, AP2TN, BA4TB, BD4QH, BU2AQ, BW3/DJ3KR, C37URE, C6ATA, C91VM/5 (AF-088), CE1/K7CA, CE2/K0MD, CM6RCR, CP4BT, CX5BW, CX7CO, DU3NXE, E51NOU, EA9/OL8R, EA9EU, EE9K, ER8C, ES1LBK, EY8MM, FK8CP, FM5LD, FO/F6CTL, FO/G3BJ, FO5RH, FP/KV1J, FT5GA, GJ2A, H44MY (OC-127), HH7/N3BNA, HI8RV, HV0A, HZ1AN, IM0A (EU-165), IY1NGM, J20VB, J68JA, J79ZG, JD1BMM, K5D, KH7XS, KL7RRC/p (NA-233), KV4FZ, LA2NK (EU-044), LX/PA6Z, OJ0B, OX3R, P29NI (OC-205),P29VCX (OC-102), P29VLR (OC-231), P49Y, PJ4A, PY0FF, PZ5M, S04R, ST2R, SU8LH, SY2A, T27OU, T2G, T30GM, T77NM, T88CW, TK9X, TM0M, TN5SN, TO4X, TO8YY, TX5SPA, TX5SPM, TY1MS, TZ6JA, UA9UZZ, UU4JDD/p (EU-180), UU4JDD/P (EU-180), V47NT, V51AS, VK9DWX, VP2MDG, VP2MNK, VP2MXO, VP2V/DL7VOG, VP2V/KG9N, VP2V/KN5H, VP2VVV, VP8DIF, VP8YLC, VP9KF, VQ9LA, VQ9RD, VR2009EAG, W3FO/KH2, WN1Y/NH2, XE2WWW, XE2YBG, XV2RZ, XV4D, YJ0CCC, YN2N, YW5F, Z21BC, ZA0/IK7JWX, ZB2EO, ZB2FK, ZC4VJ, ZD7X, ZK2BJ, ZL7/N7OU.

12373. Iceland $ or IRC?

Yahoo group: DX-IS (2009)
Date: 2009-12-25 22:02:24 UTC
From: wc5m
Topic: 12373 Message: 12373

I need to send a direct QSL to a station in Iceland, but none of the IRC charts I can find mention whether I should send Green Stamps (and how many) or an IRC to get a QSL sent back to the USA. Any of you guys know?

Mark WC5M

12374. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-25 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12374

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 25 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 359 Issued at 2200Z on 25 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar activity was very low. No flares were observed.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
The geomagnetic field was quiet. Solar wind observations from the ACE
satellite decreased gradually after 24/2235Z, from 380 km/s to 282
km/s at 25/1457Z. Velocities then increased to 354 km/s at 25/1708Z
as the density increased to a peak of 13 p/cc. The interplanetary
magnetic field (IMF) increased, with the total field reaching +10 nT
at 25/1852Z. The southward component of the IMF ranged between -8 nT
and +7 nT, with the peak of -8 nT at 25/1609Z. This activity is
consistent with the arrival of the partial halo coronal mass
ejection (CME) observed on 22 December.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet, with isolated unsettled periods
possible at high latitudes, on day one (26 December). Quiet levels
are expected on days two and three (27-28 December).
III. Event Probabilities 26 Dec-28 Dec
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 25 Dec 076
Predicted 26 Dec-28 Dec 072/072/072
90 Day Mean 25 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 24 Dec 001/002
Estimated Afr/Ap 25 Dec 003/005
Predicted Afr/Ap 26 Dec-28 Dec 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 26 Dec-28 Dec
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 360 Issued at 2200Z on 26 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 25/2100Z
to 26/2100Z: Solar activity was very low. New Region 1039 (S26E45)
was numbered today as a three-spot, Bxo-beta spot group. During the
period, several low-level B-class flares occurred from Region 1039.
The largest of these was a B4.8 at 1657Z.
IB. Solar Activity Forecast: Solar activity is expected to be very
low, with a slight chance for an isolated C-class flare.
IIA. Geophysical Activity Summary 25/2100Z to 26/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (27-29 December).

SB DX @ WW < KB8NW $OPDX.940
Ohio/Penn DX Bulletin No. 940

The Ohio/Penn DX PacketCluster
DX Bulletin No. 940
BID: $OPDX.940
December 28, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, N7OU, K8YSE, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, FO8RZ, I1HYW, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, PA7FM, Pete's-DX-Newsdesk, PT7WA, RA3CO, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK2IA and VU2PTT for the following DX information.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin), and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". Thanks to the many individuals who have provided DX information over the past year. Without them there would not be an OPDX Bulletin. Also, thanks to the individuals who sent holiday wishes to my family and me.....
73 and Have a Great/Safe/Healthy New Year de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-December, through Sunday, 27th-December there were 213 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J7, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V5, V7, V8, VE, VK, VK9W, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

4Z, ISRAEL. Alex, 4Z5KJ, will be active as 4Z5J during the CQ 160m CW Contest (January 29-31st, 2010) as a Single-Op entry. QSL via W0MM.

6W, SENEGAL (Early Announcement). Al, F5VHJ, will once again be active as 6W1RY during the CQ WW DX SSB Contest (October 30-31st, 2010) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ.

C6, BAHAMAS. Operators Dimtiri/RA3CO and Yuri/RL3FT will be active as C6AWL during the ARRL DX CW Contest (February 20-21st) as a Multi-Single entry. QSL via RX3RC. Dimtiri informs OPDX that he will arrive a few days before the contest and will be active on all bands CW, but prefers 30 and 17 meters.

CM2, CUBA. Frank, CM2IR, informs OPDX that he will once again be active between January 1-3rd, on 40 meters [CW around 7015 kHz and SSB around 7125 kHz], and also 15/12/10 meters SSB between 2200-0300z to bring in the New Year. Reference numbers are: CQ 8, ITU 11, IOTA NA-015 and GRID LOCATOR EL83TC. QSL via EB7DX, his QSL Manager, with 2 USDs or IRCs. Interests are: QRP CW, Europe, Islands, and Africa.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands (especially topband). He has announced this past week that he will be very active on 160m during his sunrise (around 1500z; calling on 1831 kHz +/- QRM and listening on 1824 kHz +/- QRM) until December 30th. If he does not hear anything, he will then move onto 80m, then after to 30m. QSL via F8BPN, direct, by the bureau, LotW.

HH, HAITI. Pierre, HB9AMO, is now active as HH/HB9AMO from Haiti for about one month. Activity will be limited to his spare time. He will be using a TS-50 with 100 watts into wire antennas operating CW ONLY, mainly on 30-17 meters. His QSL Manager is PA7FM: Dennis Robbemond, Loggerhof 11, 3181 NS ROZENBURG, Netherlands. An online log will be available later, but a small Web site is up and running at: http://www.hhhb9amo.pa7fm.nl

HS, THAILAND. Joerg, DL1MJF, is expected to be active from here again as HS0ZGQ between December 30th and January 25th. Activity will be on 40-10 meters CW/SSB using a Kenwood TS-50 and a dipole antenna. Joerg will also once again stay for one week on the Island of Koh Samui (AS-101) and will operate as HS0ZGQ/2. QSL via DL1MJF.

IOTA NEWS.....
OC-211. (Update) Operators Wally/VK6YS, Nigel/VK6NI and Bruce/KD6WW plan to be active as VK6IOA from Houtman Abrolhos in the Wallabi Island Group between December 31st and January 4th, 2010. They will definitely have the three stations on simul-taneously. Operations should be on 40-15 meters. QSL via VK4AAR. Visit their Web site at: http://www.westozdx.net/IOTAS/OC211/OC211.html

SA-041. Members of the Araucaria DX Group and the ForDX group are
planning to activate the Island of Maiau (DFB MA-01) during
June of 2010. This is the same group of operators who activated
PW6C from Coroa Vermelha Island and Coroa Da Barra Island.
More details are forthcoming.

KH6BZF PROPAGATION FORECAST/REPORT (For December 28th-January 3rd)....
Dec 28 AN SOLAR REFERENCE
Dec 29 AN ---------------
Dec 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 31 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 01 AN LN - Low Normal
Jan 02 AN
Jan 03 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NEED TO KNOW A GRID SQUARE? The following Web pages may be of interest
for those who chase Grid Squares (Grid Locators) or for those who need
to know their Grid:
Enter your address (or callsign) at:
http://www.levinecentral.com/ham/grid_square.php

Zoom in to your QTH and click on it, and it will display
your grid at: http://f6fvy.free.fr/qthLocator/fullScreen.php

NH7, HAWAII. Al, NH7A, will be active during the CQWW WPX SSB Contest
(March 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ.

OG20, FINLAND (Special Event). Anne, OH2YL, will be active using the
special callsign OG20YL from Karjalohja between December 30th and Janaury
3rd (2010). Activity is to celebrate receiving her ham license 20 years
ago. Operations will be on the HF bands and CW. QSL via her home callsign.

PY0F, FERNANDO DE NORONHA. Fred, PY2XB, will once agin be active as
PY2XB/PY0F from Fernando de Noronha (SA-03) between January 23rd and
February 3rd, 2010. Activity will be on all HF bands using CW, SSB,
RTTY and PSK. His activities will include the CQ 160M CW Contest (January
29-31st), but he will sign as PQ0F. QSL via PT7WA. See photos from his
last operation at: http://www.py2yp.com/py2xb

QSL INFO AND NEWS.....
AT1HQ ON LOTW. Prasad, VU2PTT, QSL Manager for AT1HQ, informs OPDX that
"the logs for Amateur Radio Society of India (ARSI) HQ station in IARU
Contest 2009 have just been uploaded to ARRL Logbook of The World. If
anyone has made multiple QSOs with this station, the Grid Locator for
each QSO may vary based on band and mode of QSO as we had stations in
different parts of the country for this HQ operation. The AT1HQ station
locations were at VU2BGS, VU2PAI, VU2PTT, VU2SWS, VU2TS and VU2UR. The
QSL cards, both direct and via bureau will take some more time and will

be notified shortly."

QSLS VIA LoTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3D2MJ, 3D2NB, 4U1UN, 5X1NH, 7P8MM, 8R1PY, 9M6XRO, 9N7JO, A92GE, BA4TB, BY4USA, C37URE, EA9/OL8R, EU7SA, FG5FR, FO/G3BJ, FO5RH, FT5GA, G3SWH, G3TXF, HA0HW, JT1CO, K5D, KL7RRC/P, M0URX, NI5DX, P29NI, P49Y, PJ4A, SU8LH, SV1CQN, SY2A, T8CW, T88CW, TY1MS, TO4X, TO8YY, TX5SPA, TX5SPM, TZ6JA, V26B, VK9LA, VP2MNK, VP2V/DL7VOG, VP8YCE, XV4D, YJ0CCC, ZA0/IK7JWX, ZB2FK, ZD7X and ZK2BJ

QSLS RECEIVED VIA THE BUREAU: 6M0W, 9M2GCN, DL4JS/6W, EA7HW, ER1RR, ER3DX, FK8CP, FO/N6JA, GB25FC, GW4CC, JO7CVU, MJ/F5CWU, OH1OR, OH2DZ/p, PY2OMS, RW0LT, TM6BRE, VP2ERV, VU2SWS and WI8R

R1, ANTARCTIC. Alex, UA1PAW (ex-RZ1PWA and R1ANF), now operating as R1ANR from Novo Runway in Antarctica, is expected to be there until the end of February 2010. Gianni, I1HYW, who spoke with Alex states, "He (Alex) said propagation is only open around 2000z on 40m. While 10/15/20/30m are closed. He is running a Stepp-IR all band vertical antenna using a Yaesu MARK V RTX and PA ACOM 2000A. He also said that he is worried as DX bulletins are reporting incorrect info about his QSL Manager, so this is the QSL route: QSL Manager is Nick Shapkin, RK1PWA for the Russian and Ukrainian Hams. While for the other countries his QSL Manager is ZS1ANF: Oleg S. Sakharov, P.O. Box 15968, Vlaeberg RSA, Cape Town, Western Cape 8018, SOUTH AFRICA." For more info and photos, see his blog at: http://alex-v-shmarin.livejournal.com

VI2, AUSTRALIA (Special Event). Look for the special callsign, VI2AJ2010, to be used by Scouts under the guidance of Fishers Ghost Amateur Radio Club members (VK2FFG) at Cataract Scout Park, near Sydney, during the upcoming triennial Australian Scout Jamboree (AJ2010), to take place January 4-14th, 2010. With registrations of 10,000+ Scouts and 3000 Scout Leaders, VI2AJ2010 will be active on HF, VHF and node 6111 to promote their hobby. QSL via VK2FFG (bureau/direct).

VP9,BERMUDA. Kurt, W6PH, will be active as VP9/W6PH for the 2010 ARRL DX CW Contest (February 20-21st) and ARRL DX SSB Contest (March 6-7th) as a Single-Op/All-Band/Low-Power entry. QSL direct to his home callsign W6PH.

YI, IRAQ (Update). A group of operators called the "YI9PSE DXpedition team" are planning to operate from Kurdistan and be active between April 3-11th. The team will receive a ten day visa issued by the Government of Kurdistan. A band/mode survey is available on their Web site at: http://www.yi9pse.com/survey.html
Suggested frequencies are also published on their Web page and OPDX.937. The current updated YI9PSE Team consists of the following operators: Paul/N6PSE (Team Leader), Andreas/N6NU, Bob/N6OX, Bruce/W8HW, Garry/NI6T, David/AH6HY, Bill/N2WB, Al/K3VN, Jun/JH4RHF and Heathem/YI1UNH. Pilot stations are: Don/N1DG, Chuck/AA6G and Toshikazu/JA1ELY. The group is also looking for donations to help fund their DXpedition. Donations can

be made via PayPal or mail a check to: Kurdistan 2010 DXpedition,
3052 Wetmore Dr., San Jose, CA 95148, USA. Online logs will be available
during and after the DXpedition. QSL via N6NKT. For more details and
updates, visit: http://www.yi9pse.com

ZK3, TOKELAU (Also 5W). Look for operators Bill/N7OU and Bob/W7YAQ to
operate from the Tokelau Islands (OC-048) between February 17th and
March 10th, 2010. The exact dates of their operation may change because
the only access to the Tokelau Islands is by boat. Their activities
will include an entry in the ARRL International DX CW Contest (February
20-21st). Operations will be on 160-10 meters but mainly on CW, with
some SSB and RTTY, using 100 watts and vertical antennas. Also, look
for them to operate from Apia, Samoa (5W), before they sail to Tolelau
and after between February 10-16th and March 11-15th. All callsigns
are to be announced. QSL via their home callsigns.

12382. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-27 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12382

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 27 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 361 Issued at 2200Z on 27 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 26/2100Z
to 27/2100Z: Solar activity was very low. Two B-class flares
occurred during the period from Region 1039 (S27E31); the largest
was a B7.6 at 1139Z. Region 1039 has grown during the past 24 hours
and is currently a 7-spot Dso-beta group, with an area of
approximately 100 millionths.
IB. Solar Activity Forecast: Solar activity is expected to be very
low to low. There is a chance for an isolated C-class event from
Region 1039.
IIA. Geophysical Activity Summary 26/2100Z to 27/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days, with a slight chance
for an isolated unsettled period on day three (28-30 December).
III. Event Probabilities 28 Dec-30 Dec
Class M 05/05/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 27 Dec 077
Predicted 28 Dec-30 Dec 078/079/080
90 Day Mean 27 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 26 Dec 002/003
Estimated Afr/Ap 27 Dec 002/005
Predicted Afr/Ap 28 Dec-30 Dec 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 28 Dec-30 Dec
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/01
Major-severe storm 01/01/01

12384. 2009 PSK-31 QSN Report DXCC entity count

Yahoo group: DX-IS (2009)
Date: 2009-12-28 13:58:39 UTC
From: CSM(r) Gary Huber - AB9M
Topic: 12384 Message: 12384

In reviewing 2009 QRZ DX's QSN Reports, I counted 160 DXCC entities on 20M PSK-31. Included in the count XV, 4W, 9M6, FR, A3, V8, and XT just to name a few of the less common "garden variety" stuff.

Best regards,

Modern technology is wonderful. All you need to operate PSK31 is the
software on your laptop computer and an extra cable.

Can you imagine operating RTTY on a DXpedition with a Model 28? Although I
wouldn't be surprised if someone has done it.

Don't forget that some rigs now have it built it. You can run it without any external support. Not as easy to use but in a pinch it can but a rare location on the air. Can even do RTTY on my IC7000 (if I want to go prematurely blind)

Oh one more note..

In hunting DX over the last 6 years I have gotten 282 on RTTY/PSK and 281 on Phone. The combination is over 300 but the point being the Digital modes are very active. Obviously the comparison would not be as good against CW.

This is true, Bob, and most major DXpeditions take RTTY gear these days. It has become a very popular mode. This wasn't so years ago. VE1YX told me that in the early 1980s he was involved in a DXpedition to CY0 (St Paul's Island) and he recalls helping haul a teletype machine along. This was not the normal thing to do at the time. I don't know the model, but it had to be one of those clunkers like an ASR-33 from the way he described it. I don't know what they used as an interface to the radios back then as my first involvement in RTTY was with a TNC -- an AEA PK-232. Today it is a laptop and a simple 3-4 component interface.

PSK31 is indeed a great mode for weak signal and low power work. AB9M (Gary) is a huge proponent of it. I can't imagine all of the hours he spent digging that rare and semi-rare stuff out. It is quite a feat to have knocked off all that stuff, and he is continuing to promote the mode. Look at the nice stuff he has spotted on PSK31 over the past few years. He is very diligent, to say the least.

I don't think PSK31 will catch on for large DXpeditions because it doesn't lend itself to the fast split-pileup exchanges like SSB/CW/RTTY. It might be possible as I've only dabbled in it, but it seems to me one show stopper would be those calling inching up their power -- I believe QRO chews up bandwidth on PSK31. Perhaps Gary can comment on that as I have only dabbled in the mode a few times. Also, it counts as RTTY for DXCC, so unless the ARRL adds a separate DXCC award for PSK31, it and RTTY are redundant on DXpeditions.

I know HAL Communications at least was making smaller RTTY TU's with monitor screens around 1975, possibly earlier, because we had one at W9YH back then (University of Illinois club station). I think HAL donated it to us. I have to wonder if anyone lugged a teletype machine around to a DXpedition earlier, when there were no small TU's with video screens. We had one of those at W9YH too. I can remember it running for hours as someone printed out a picture that was several feet long.

Still you need to be able to receive and transmit understanding the DX basics. While you may be able to work a bunch with a little luck and the broad-band decode function, working the pile-up split is a whole different game. But if you can relate visual indication to your audio DXing experience, you can have real success.

The PSK-31 sound card technology is really good for anyone with diminished hearing and decode ability especially those with auditory nerve damage.

QRP not QRO for PSK-31 since the stronger signals in the USB passband tend to either cause AGC compression or IMD products in the soundcard. When I've asked several recent DX-peditions to offer PSK-31, they have declined saying (rightly so) that they did NOT want cause QRM from QRO operators to the mode. Still for the basic, small pistol DXer with a low power (5W-30W is typical), small antenna in rare or semi-rare location, PSK-31 can be great way to to efficiently make lots of QSOs with similar stations.

I find there are many older (60-90 years old) DXers in the rarer locations who can frequently found on PSK-31. And while I hang out mostly on 20M, there is a bunch of DX on the 40M PSK-31 frequencies.

I spend six to ten hours a week average chasing PSK-31 DX, but there are many who spend more time and who are much more successful working PSK-31 DX than I.

Happy New Year.

This is true, Bob, and most major DXpeditions take RTTY gear these days. It has become a very popular mode. This wasn't so years ago. VE1YX told me that in the early 1980s he was involved in a DXpedition to CY0 (St Paul's Island) and he recalls helping haul a teletype machine along. This was not the normal thing to do at the time. I don't know the model, but it had to be one of those clunkers like an ASR-33 from the way he described it. I don't know what they used as an interface to the radios back then as my first involvement in RTTY was with a TNC -- an AEA PK-232. Today it is a laptop and a simple 3-4 component interface.

PSK31 is indeed a great mode for weak signal and low power work. AB9M (Gary) is a huge proponent of it. I can't imagine all of the hours he spent digging that rare and semi-rare stuff out. It is quite a feat to have knocked off all that stuff, and he is continuing to promote the mode. Look at the nice stuff he has spotted on PSK31 over the past few years. He is very diligent, to say the least.

I don't think PSK31 will catch on for large DXpeditions because it doesn't lend itself to the fast split-pileup exchanges like SSB/CW/RTTY. It might be possible as I've only dabbled in it, but it seems to me one show stopper would be those calling inching up their power -- I believe QRO chews up bandwidth on PSK31. Perhaps Gary can comment on that as I have only dabbled in the mode a few times. Also, it counts as RTTY for DXCC, so unless the ARRL adds a separate DXCC award for PSK31, it and RTTY are redundant on DXpeditions.

73, Paul VE1DX

12393. Report of Solar-Geophysical Activity

:Issued: 2009 Dec 28 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 362 Issued at 2200Z on 28 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 27/2100Z
to 28/2100Z: Solar activity was very low. Region 1039 (S28E18) has
shown little change from yesterday and remains a beta group. No
flares were observed during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low to low. There is a chance for an isolated C-flare from Region
1039.
IIA. Geophysical Activity Summary 27/2100Z to 28/2100Z:
The geomagnetic field was quiet. Observations from the ACE
spacecraft show solar wind velocities average around 335 km/s with
minor fluctuations in the IMF southward component, Bz, from +2/-2
nT.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (29-31
December).

DX Summit is of no help in identifying 4K2JF/P. DXbase says he's in Franz Josef Land. My guess is that he's a pretty persistent pirate.

I found his CW to be somewhat difficult to copy and listened to him for quite a while yesterday and for 20 minutes or so this morning. He offered no clues as to his whereabouts, leading me to believe he's a member of the Slim family. Does anyone have any definitive information on this station?

12400. 160 Meter Receiving Loop Info Wanted

Yahoo group: DX-IS (2009)
Date: 2009-12-30 22:36:46 UTC
From: RICHARD SOLOMON
Topic: 12400 Message: 12400

I decided last year to get on 160. I had not been on since 1985 and that was only for a few weeks. Now that I have some land I thought 160 DXCC would be a nice goal.

I built a KN4LF Receiving Loop, it's just a 25' length of RG-6 on a PVC cross. It hears, but I think I should be able to hear better. Of course, not being on 160 before I don't have much to compare with.

I thought maybe a "bigger" loop antenna would work better, but all the designs I see are based on the same size as the KN4LF Loop. Does anyone know where I can find info on a bigger loop ?

I have info on the antenna used at Mellish and Chesterfield and that may be the way to go, but first I want to explore the Loop more.

Thanks for any help,

73, Dick, W1KSZ

Dick, I like & work 160 Meters, but have not tried an indoor loop. However, there is a reflector dedicated to 160 meters at http://lists.contesting.com/mailman/listinfo/Topband. There are a lot of guys on that reflector that have been working 160 for years, and really know their stuff. It will be well worth your while to join that group.

I might also suggest that you consider a K9AY loop array. I have used one for several years and it works well. You will need a pre-amp which can be placed in the shack. The information for building a homebrew version of th K9AY loop is available on the internet, but I don't have that URL immediately available. Also, look in the latest edition of the ON4UN Low band DXing publication by ARRL.

While the K9AY loop array isn't as simple as a single rotatable loop, I believe it will be more effective. Either way you are in an excellent location for working plenty of DX from Europe & Africa.

Good Luck.

One problem is that politics are intertwined with DXing, and how certain entities are defined. One good example is the former "countries" of H5, V9, S8. They were more independent than the Soviet Republics were at that time, or that GW, GM, etc were, but because someone sitting in Newington (as well as many other places) didn't agree with the South African politics at the time, they never received country status. Okino Tori Shima was another good example.

There are certain political topics that are not relevant to DXing, though.

12414. lotw help

Yahoo group: DX-IS (2009)
Date: 2009-12-31 11:18:41 UTC
From: DE1DXX@aol.com
Topic: 12414 Message: 12414

Hi and a Happy New Year to all!

I got yesterday an email from LotW with my password.
Everything works fine and I see even QSL-records :-)

When uploding my adif files (from UCX-Log), I got an
error message, that the mode PSK is invalid.

When clicking on YOUR QSOs -> SUBMIT (without
any further selection) I see all my uploaded QSOs without
PSK.

What have I done wrong?
CW SSB RTTY appears, but no PSK.
It is the same adif file. How can I see my PSK QSOs
(and get some QSL records)?
I changed the mentioned mode PSK into PSK31 at my
adif fille 'cause I thought that was the fault.
Okay, I've upoaded the TQ8 file again (Sorry, that was
BEFORE I read, that I should not send duplicates).

Nothing found in FAQ.

Any help / hint from a lotw expert?

LotW is really great. I got a verification from VE9DX
for my very first CW-QSO on 160m!

Thanks in advance for helping a newbie.

Hello,

LoTW accepts PSK31. Edit your .adi file , create a new .tq8

and you will see, it does work.

Subject: [DX-IS] lotw help

Hi and a Happy New Year to all!

I got yesterday an email from LotW with my password.
Everything works fine and I see even QSL-records :-)

When uploding my adif files (from UCX-Log), I got an
error message, that the mode PSK is invalid.

When clicking on YOUR QSOs -> SUBMIT (without
any further selection) I see all my uploaded QSOs without
PSK.

What have I done wrong?
CW SSB RTTY appears, but no PSK.
It is the same adif file. How can I see my PSK QSOs
(and get some QSL records)?
I changed the mentioned mode PSK into PSK31 at my
adif fille 'cause I thought that was the fault.
Okay, I've upoaded the TQ8 file again (Sorry, that was
BEFORE I read, that I should not send duplicates).

Nothing found in FAQ.

Any help / hint from a lotw expert?

LotW is really great. I got a verification from VE9DX
for my very first CW-QSO on 160m!

Thanks in advance for helping a newbie.

Hello Jan,

thanks for the fast reply.
I've done and did it just again. When creating a tq8 file, the following
error came up:

Error: Invalid MODE (PSK) on line 1371
call: DL7ACA
qso_date: 20091211
time_on: 2121
band: 80M
mode: PSK
freq: 3.580

Then I replaced the mode PSK in my adi file with PSK31. And the same error
came up.

That's what I do not understand.

Andy, I don't think LOTW will accept PSK, or PSK31, but it will accept
DATA. I know that may not be specific enough for your purposes, but it
may be as close as you can get. Go here for a list of modes it will accept.

Hello Andy, sorry, but I did not tell you everything you have to edit in your .adi file.

In line 1371 you will find <mode:3>psk

change that to <mode:5>psk31

then create the .tq8 file. If you have only one entry with PSK, then no longer

any error will be shown. If there are more PSK entries change them accordingly.

The best modification is - of course - to be done in a (DLL) file of your logging

program, which contains the modes. Change PSK to PSK31, if possible.

Good luck + vy73 de Jan DJ8NK

ZCZC AP54
QST de W1AW
Propagation Forecast Bulletin 54 ARLP054
>From Tad Cook, K7RA
Seattle, WA December 31, 2009
To all radio amateurs

SB PROP ARL ARLP054
ARLP054 Propagation de K7RA

Here we are on the last day of the year, with finally some very positive indicators for Cycle 24. Except for Christmas day, since December 9 sunspots have been visible every day. Average daily sunspot numbers for the week December 24-30 were 12.9, an 18.5 point drop from the previous week, which was a 10.3 point rise from the previous week, December 10-16.

Average daily solar flux dropped from 82.8 to 76.2 from the December 17-23 reporting week, but the December 30 forecast from the U.S. Air Force predicts a solar flux value of 79 from December 31 to January 3, 80 for January 4-9, and 85 for January 10-18. They also predict a steady and stable planetary A index of five through February 13. Geophysical Institute Prague predicts quiet for the first week of January. You can get an update on the Air Force/NOAA prediction after 2100 UTC at,
http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html.

Since December 26 we've been blessed with new sunspot group 1039, which is now just past the zero degree meridian, referenced to Earth. This is the spot in the center of the solar image. This is the sixth new sunspot group to emerge in December.

After today we will know the three-month moving daily sunspot average centered on November, and it looks close to the average centered on August, 2007, which was 10.17. The moving average has not been above ten since then. The daily average for the month of December should be close to 15.7, the highest monthly average since March, 2008.

A number of sharp-eyed readers caught the major gaffe in the last bulletin, when I dozed off and with my fingers on autopilot I typed Spring Equinox when I should have said Summer Solstice. Needless to say, Spring is not six months off. The Vernal (Spring) Equinox is only 79 days from today. Thanks to (in order of notification) N5UWY,

WE5I, KW6G, KF7FIU, W3DM, N0LNO, and WA3VKG for noticing and not having too much fun at my expense.

Joe Reisert, W1JR, an exceptional low band DXer sent some comments about the solar minimum. I commented that the exceptionally quiet conditions are remarkable, and may partially make up for a lack of solar activity. At least we aren't bothered by large flares.

Joe responded, "I really don't think the low bands are that improved over times when the sunspots were there. Yes, it was nice to work TX3A and K4M on 160 meters for new ones but I still can't get JT1CO to hear me! Sometimes JAs spot me on 160 meters but no JAs call me! Except for early last February when one morning I worked 7 JAs (!) in a row starting at my sunrise (!), I haven't seen any really great Asian openings. I guess I just have to hang in there. I did land VK9XX on 80 near our sunset for number 341 about a month ago. That was a real thrill as he was only working Europeans and somehow I broke the pile up."

Rod Vorndam, K9ROD of Rye, Colorado wrote last week: "The past couple of weeks have seen openings to Europe at sunrise on 20 meters. This Gray Line Effect has made for several strong contacts. I worked I2OHO (Italy), ON5CD (Belgium), HB9RDE (Switzerland), and received several others including OZ1IKY (Denmark) and S51ZZZ (Slovenia). These are my first European contacts into the Western part of the US."

Mark Lunday, WD4ELG of Greensboro, North Carolina has a nice blog with observations on DX from his new QTH. Read it at http://wd4elg.blogspot.com/.

Mark wrote, on Christmas Day: "One thing I have noticed recently with the slight up tick in solar activity, is that 40 meters now reminds me of 20 meters during the solar peak. Even during daylight, there is DX open to somewhere on 40 in winter months. The exception is high noon. But mornings and late afternoons have LOTS of activity on 40."

"This afternoon, I copied HS0CZY/4 on 40 meters about an hour before my sunset. The last time I remember something like this was 1 January 2005 when I worked YB1A on 40 CW late in the afternoon."

"On Monday at 0100 local, I heard a fluttery signal RST 529, I copy JA7DLE, call him twice, he gets my call, BAM he is in the log. I have ONE JA QSO ALL-TIME on 80, and this is my SECOND EVER on 40. This is with a single vertical and 100 watts. What is neat about this is that it happens at 0100 local while I can hear EU stations 599 AND South Cook Islands DXpedition 559. So I am copying Pacific, JA, AND Europe at the same time. When the Sun throws lemons, make your own DX/lemonade."

"I heard 4S7NE on 40 CW at 2030 local, just after his sunrise. I have tried to hear Nelson since I worked him on 17 meters back in 2005, but I have never heard him since. Amazing!"

Thanks Mark.

Bob Doherty, K1VV of Lakeville, Massachusetts reminds us that tonight is Straight Key Night! Take a look at, http://www.qrz.com/db/K1VV/1262178636 and scroll down.

Jose Nunes, CT1BOH of Lisbon, Portugal (see http://www.qsl.net/ct1boh/index.htm) sent some fascinating material that he posted to the cq-contest email list at contesting.com, titled "Listen to what happens when a X4.0 Solar Flare hits your contest operation." He referred to K9LA's article, "Solar Flares at ZF2RR," which you can read at, http://mysite.verizon.net/k9la/Solar_Flares_at_ZF2RR.pdf.

Jose writes, "It just happens that while operating P40E during the 2000 CQWW CW Contest, I was recording the event. And I still remember the black-out that followed the big X4.0 Solar Flare. I thought it would be interesting to share the story and the audio clip of the impact of the solar flare."

"First take a look at the Goes X-ray Flux (5 minute data) on the 25 and 26 November 2002: http://qsl.net/ct1boh/audio/20001127_xray.PNG. I marked with an arrow the big solar X4.0 flare that occurred at 16:38 on 26 November, Sunday of the contest. P40E was QRV on 21 MHz (21050 kHz). In the 40 minutes before the Solar Flare impacted P40E operation, 16:00 - 16:39, I had worked 107 QSOs at a rate of 160.5 QSOs per hour. In the 20 minutes after the Solar Flare impacted P40E operation 16:40 - 16:59 first there was a 7 minute black-out and then I managed to work 10 QSOs at a rate of 30 QSOs per hour."

"Very interesting is the surge of noise right after the Solar Flare until almost total black-out of the bands and during the 7 minute black-out. You will listen to a vanishing pile-up, to a dead band, and then the recovery of activity."

"You can check P40E log at http://www.qsl.net/ct1boh/audio/flare.txt to follow audio clip from 16:36z until 17:02z."

"Listen to the 26 minute audio clip at http://www.qsl.net/ct1boh/audio/flare.wav and note this was an SO2R operation so you should use headphones. You will listen on the left ear to radio 1 (RUN radio) on 21 MHz and right ear to radio 2 (S&P radio) on 28 MHz before the QSY to 10."

Fascinating! Thanks so much, Jose.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for December 24 through 30 were 11, 0, 13, 17, 17, 17, and 15 with a mean of 12.9. 10.7 cm flux was 77.1, 76, 75.9, 76.8, 75.8, 75.1, and 76.9 with a mean of 76.2. Estimated planetary A indices were 2, 2, 3, 2, 1, 0 and 0 with a mean of 1.4. Estimated mid-latitude A indices were 1, 3, 2, 1, 1, 0 and 0 with a mean of 1.1.

Sad thing is Postal Clerks dont understand how to cash them for an Airmail Stramp. I went today and had to fill out a form to get a 98 cent stamp. Then clerk did not know how to use the retail system to redeem it. I have cashed over 150 of them at same postal facility in the past.
Folks some where in this thread there was instructions one of the guys provided on how clerks were to redeem the IRC. I will try looking for it.. Trust me you will need it in the future to redeem the new style ones.
It dont get any sadder than the Post Office --- no wonder our govt is in such dire straights

Found the instructions posted in n6hh site regarding IRC
Since your Postal Clerk will prob be confused show or tell him/her the following:These are the instructions for Point of Sale (POS) machines they do transactions on:The will enter the following

1. Stamps & Mdse [merchandise]
2. Exchange
3. Redeem Foreign IRCs
4. Enter .98 (cost of the stamp)
5. Scan and sell one international .98 stamp
6. The balance owed will show zero

Good luck as it took me 90 mins to redeem one IRC this morning

SB DX ARL ARLD052
ARLD052 DX news

This week's bulletin was made possible with information provided by HL1IWD, NC1L, PA0MIR, XE1EE, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CROATIA, 9A. Tom, 9A2AA is QRV with special event call 9A500AA until December 31, 2010. QSL to home call.

CUBA, CO. Edor, CO7PH plans to be QRV as CO7PH/p from Cayo Anclitas Island, IOTA NA-201, from January 2 to 5. QSL direct via W3HNK.

PHILIPPINES, DU. Lee, HL1IWD is QRV as DU1/homecall from Manila, IOTA OC-042, until January 3. QSL to home call.

HAITI, HH. Pierre, HB9AMO is QRV as HH/HB9AMO for about one month. Activity is mainly on 30 to 17 meters using CW in his spare time. QSL via PA7FM.

PAPUA NEW GUINEA, P2. Peter, VY0PW is QRV as P29CS from Lihir Island, IOTA OC-069. QSL via operator's instructions.

NETHERLANDS, PA. In celebration of 600 years of the city of Purmerend, special event station PC600P is QRV until January 27. In addition, look for stations PA600MIR, PA601FR, PA602SWL, PA603HGP, PD602YL and PE603HG to be active. QSL via operators' instructions.

CANADA, VE. Steve, N6QEK is QRV as VY1/homecall from Whitehorse in the Yukon Territory until January 4. This includes a possible entry in the ARRL RTTY Roundup. Activity is on 80 to 10 meters using SSB and PSK31. QSL to home call.

AUSTRALIA, VK. Special event station VI2AJ2010 will be QRV from the Australian Scout Jamboree in Sydney from January 4 to 14. Activity is on the H/VHF bands and EchoLink. QSL via VK2FFG. In addition, Wally, VK6YS, Nigel, VK6NI and Bruce, KD6WW are QRV as VK6IOA from

Houtman Abrolhos Island, IOTA OC-211, until January 4. QSL via VK4AAR.

MEXICO, XE. In celebration of the two hundred years of Mexican independence and the 100th anniversary of the Mexican revolution, members of the Radio Club Queretaro are QRV as special event station 4A1B throughout all of 2010. QSL via LZ3HI.

THIS WEEKEND ON THE RADIO. The ARRL RTTY Roundup, Lighthouse Christmas Lights QSO Party, AGB New Year Snowball Contest, SARTG New Year RTTY Contest, AGCW Happy New Year CW Contest, AGCW VHF/UHF Contest, Original QRP CW Contest, EUCW 160-Meter CW Contest and the Kid's Day Contest will certainly keep contesters busy this weekend. The RSGB 80-Meter Club CW Championship is scheduled for January 4. The ARS Spartan CW Sprint is scheduled for January 5. Please see January 2010 QST, page 80, and the ARRL and WA7BNM contest web sites for details.

12428. Re: [DX-IS] IRCs - expire today!!!!

Yahoo group: DX-IS (2009)
Date: 2009-12-31 21:25:21 UTC
From: Dick Flanagan
Topic: 12415 Message: 12428

I suggest you download US Postal Bulletin PR 22267, September 10, 2009, from
http://www.usps.com/cpim/ftp/bulletin/2009/pb22267/pdf/pb22267.pdf

Take pages 11 and 12 with you to the PO and courteously ask the
Counter Supervisor or Postmaster to read them. They describe how the
local PO obtains IRCs through their normal supply channels and how
they dispose of any old ones they have left.

Dick

12429. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-12-31 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 12429

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Dec 31 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 365 Issued at 2200Z on 31 Dec 2009
IA. Analysis of Solar Active Regions and Activity from 30/2100Z
to 31/2100Z: Solar activity was very low. Region 1039 (S28W21) grew
in both sunspot count and white light area coverage and produced
several low-level B-flares. This region remains a D-type sunspot
group with a beta magnetic classification.
IB. Solar Activity Forecast: Solar activity is expected to be very
low to low. There is a slight chance of an isolated C-flare and
M-flare from Region 1039.
IIA. Geophysical Activity Summary 30/2100Z to 31/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (01 - 03 January).
III. Event Probabilities 01 Jan-03 Jan
Class M 05/05/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 31 Dec 080
Predicted 01 Jan-03 Jan 079/079/079
90 Day Mean 31 Dec 074
V. Geomagnetic A Indices
Observed Afr/Ap 30 Dec 000/000
Estimated Afr/Ap 31 Dec 001/002
Predicted Afr/Ap 01 Jan-03 Jan 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 01 Jan-03 Jan
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

12430. Telnet posts

Yahoo group: DX-IS (2009)
Date: 2009-12-31 23:47:06 UTC
From: WB6PSY/N6AXK
Topic: 12430 Message: 12430

I just went into Telnet and put in FT5GA and found 22 posts, most all say they received their QSLs. Why was all this posted and what purpose does it really serve? Most listed 14000.0 as the frequency. Would this not set off alarms for those looking for a FT?

BTW, less than 15 minutes to GMT HNY!

73, de Rene, WB6PSY
